Table of Distribution of Personal Estate of Intestate.

If the intestate die leaving—	*His personal representatives take thus:*
Wife and child, or children	One-third to wife, rest to child or children; if children dead, then to their represent, (that is, their lineal descendants), except such child or children (not heirs-at-law) who had estate by settlement of intestate, in his lifetime, equal to the other shares.
Wife only	Half to wife, rest to next of kin in equal degrees to intestate, or their legal represent.
No wife or child	All to next of kin and to their legal represent.
Child, children, or their representatives ...	All to him, her or them.
Children by two wives	Equally to all.
If no child, children, or representatives ...	All to next of kin in equal degree to intestate.
Child or grandchild	Half to child, half to grandchild.
Husband	Whole to him.
Father, and brother or sister	Whole to father.
Mother, and brother or sister	Whole to them equally.
Wife, mother, brother, sisters, and nieces	Half to wife, residue to mother, brother, sisters and nieces.
Wife, mother, nephews, and nieces	Two-fourths to wife, one-fourth to mother, and one-fourth to nephews and nieces.
Wife, brothers or sisters, and mother	Half to wife (under statute of Car. 2), half to brothers or sisters and mother.
Mother only	The whole (it being then out of the statute).
Wife and mother	Half to wife and half to mothen
Brother or sister of whole blood, and brother or sister of half blood	Equally to both.
Posthumous brother or sister and mother	Equally to both.
Posthumous brother or sister and brother, or sister born in lifetime of father	Equally to both.
Father's father and mother's mother	Equally to both.
Uncle's or aunt's children, and brother's or sister's grandchildren	Equally to all.
Grandmother, uncle, or aunt	All to grandmother.
Two aunts, nephew and niece	Equally to all.
Uncle and deceased uncle's child	All to uncle.
Uncle by mother's side, and deceased uncle or aunt's child	All to uncle.
Nephew by brother and nephew by half sister	Equally *per capita.*
Nephew by deceased brother, and nephews and nieces by deceased sister	Each in equal shares *per capita*, and not *per stirpes.*
Brother and grandfather	Whole to brother.
Brother's grandson and brother or sister's daughter	To daughter.
Brother and two aunts	To brother.
Brother and wife	Half to brother, half to wife.
Mother and brother	Equally.
Wife, mother, and children of a deceased brother (or sister).	Half to wife, ½ to mother, ½ *per stirpes* to deceased's brother or sister's children.
Wife, brother, or sister, and children of a deceased brother or sister.	Half to wife, ½ to brother or sister *per capita*, ½ to deceased's brother or sister's child *per stirpes.*
Brother or sister, and children of a deceased brother or sister.	Half to brother or sister *per capita*, ½ to children of deceased brother or sister *per stirpes.*
Grandfather and brother	All to brother

British Weights and Measures.

Linear Measure.

	Frings.	Chains.	Poles.	Yards	Feet.	Ins.
Foot	...	...	...	...	...	12
Yard	...	...	...	...	3	36
Pole or Rod ...	...	...	...	5½	16½	198
Chain of 100 links	...	...	4	22	66	792
Furlong ...	...	10	40	220	660	7920
Mile	8	80	320	1760	5280	63360

A League is 3 miles. A Hand (used in measuring horses), 4 inches. A Fathom, 2 yards, or 6 feet, or 72 inches, and a chain 7 inches.

A pendulum which vibrates seconds of mean time in the latitude of London, at the level of the sea and in a vacuum, measures 39·1393 inches.

Cloth Measure.

	Qrs.	Nails.	Ins.		Qrs.	Nails.	Ins.
Nail... ...	...	...	2¼	Ell... ...	5	20	45
Quarter ...	...	4	9	French Ell	6	24	54
Yard ...	4	16	36				

Liquid Measure.

	Gal.	Qts.	Pts.		Gal.	Qts.	Pts.
Gill	...	...	¼	Hogshead of Ale ...	54	216	432
Quart	...	...	2	Hogshead of Wine ...	63	252	504
Gallon ...	...	4	8	Puncheon ...	84	336	672
Firkin or ¼-Barrel ...	9	36	72	Butt of Ale...	108	432	864
Kilderkin or ½-Barrel ...	18	72	144	Pipe or 2 Hogsheads	126	504	1008
Barrel ...	36	144	288	Tun or 2 Pipes	252	1008	2016

Dry Measure.

	Qrs.	Bus.	Pks.	Gal.		Qrs.	Bus.	Pks.	Gal.
Peck ...	...	...	...	2	Quarter ...	8	32	64	
Bushel ...	...	...	4	8	Load or Wey ...	5	40	160	320

The Imperial Gallon is the legal standard measure both for dry goods and liquids. It contains 277·274 cubic inches of distilled water when the barometer stands at 30 inches and thermometer at 62°. Under the same conditions an Imperial Gallon of water weighs 10 avoirdupois pounds, or 70,000 grains. A cubic inch of water weighs 252,458 grains. A cubic inch of air weighs 0·310 grains. A sack is 3 bushels.

Avoirdupois Weight.

	Cwt	Qrs.	Pounds.	Ounces.	Drachms.
Ounce (437½ grains)	...	...	...	...	16
Pound (7000 grains)	...	...	...	16	256
Stone	...	...	14	224	3584
Quarter	...	...	28	448	7168
Hundredweight ...	...	4	112	1792	28672
Ton...	20	80	2240	35840	573440

This weight is used for all substances except gold, silver, and precious stones. Drugs are sold by this weight, but medicines are compounded by Apothecaries weight.

Troy Weight.

Marks.		Ounces.	Dwts.	Grains.
dwt.	Pennyweight	...	...	24
oz.	Ounce ...	...	20	480
lb.	Pound ...	12	240	5760

Troy weight is used for money, precious metals, and jewels. Also in philosophical experiments, though the more convenient decimal divisions of the French gramme are almost universally preferred by scientific chemists of the present time. The diamond carat weighs 3 and 1-5th grains.

Diamond Weight.

16 Parts = 1 Grain (8-10ths Grains Troy)
14 Grains = 1 Carat (3, 1-5th ,,

Apothecaries' Weight.

Mark.		Oz.	Grs.	Mark.		Oz.	Grains.
oz.	Ounce ...	...	437½	lb.	Pound ...	16	7000

This is the new Apothecaries Weight, as revised by the Council of Medical Education in 1864. The ounce and the pound are the same as in Avoirdupois Weight. A grain is the same in all weights.

British Weights and Measures—*continued.*

Miscellaneous Articles.

Aum of Hock	about 30	gals.	
Box of Raisins	... 56	lb.	
Cask of Rice	... 7 to 8	cwt.	
Chest of Congo Tea ...	about 80 to 100	lb.	
,, Hyson	... 60 to 80	,,	
Drum of Figs	... 6 to 14	,,	
Firkin of Butter	... 56	,,	
Gross	...144, or 12	doz.	
Hogshead of French Wine ...	... 43 to 46	gals.	
Pipe of Madeira	... 92	gals.	
Pocket of Hops	... 1¼ to 2	cwt.	
Puncheon of Brandy	...100 to 115	gals.	
,, Rum	... 90 to 100	,,	
,, Whisky	... about 120	,,	
Quire of Paper	... 24	sheets.	
Ream of Paper	... 480	sh. or 20 qr.	
Roll of Parchment	... 60	skins	
Sack of Flour	... 280	lb	
Tierce of Sugar	9 to 12	cwt.	
,, Coffee	4 to 9	,,	

A Butt or Sherry contains 108 gallons, or about 52 dozens.
A Pipe of Port ,, 115 ,, ,, 57½ ,,
Hogsheads one-half, and Quarter Casks one-fourth part of these quantities.

Note.

To ascertain any day of the week in any year of the present century, first look in the table of years for the year required, and under the months are figures which refer to the corresponding figures at the head of the columns of days below.

For Example.—To know what day of the week May 4 will be on in the year 1872, in the table of years look for 1872, and in a parallel line, under May, is fig. 3, which directs to col. 3, in which it will be seen that May 4 falls on Saturday.

EXAMPLE.—To find the number of days from the 10th May to the 10th October following. Find May in the first column, and then in a line with that under October, is 153 days. If from the 10th May to the 25th October it would be 15 days more, or 168 days; but if from the 10th May to the 1st October, it would be 10 days less, or 143 days. In leap-year, when the last day of February is included between the two dates, there will be one day more than by the table.

NOTE.—Austrian money circulates in Hungary and Transylvania.

1 N. German Thaler, 1½ Austrian Gulden, 1⅔ Gulden of S.W. Germany.

In China and Japan payments are made by weight. The Tael is the principal weight used for this purpose. In Japan there are gold and silver coins as well, but none in China.

The Ducat and Gulden of S.W. Germany are both used in Baden, Bavaria, Frankfort, Hesse Darmstadt, Nassau, and Wurtemberg.

The Ducat is also current in Austria, Bohemia, Hamburg, Hanover, Hungary, Saxony, and Transylvania.

The German Crown and Half Crown are current in Austria, Baden, Bavaria, Brunswick, Frankfort, Hanover, Prussia, and Saxony. The Thaler is current in all parts of Germany and Austria.

The South-American Republics include the Argentine Confederation, or La Plata, Central America, Chili, Ecuador, New Grenada, Paraguay, Peru, Uruguay, and Venezuela.

Government Emigration Offices.

56, FENCHURCH STREET.

Chief Officer—Captain John J. Forster.

Assistants—Captain Westbrook, R.N.; Captain Barnard, R.N.; Captain Stanbridge, R.N.

Rates of Postage and Conditions of Transmission.

LETTERS.

The rates of postage to be prepaid are as follows, viz.:—

For a letter not exceeding	1oz.	...	...	1d.
exceeding	1oz.	but not exceeding	2oz.	1½d.
"	" 2oz.	"	"	4oz. 2d.
"	" 4oz.	"	"	6oz. 2½d.
"	" 6oz.	"	"	8oz. 3d.
"	" 8oz.	"	"	10oz. 3½d.
"	" 10oz	"	"	12oz. 4d.

A letter exceeding the weight of 12oz. is liable to a postage of 1d. for every ounce, beginning with the first ounce. A letter, for example, weighing between 14 and 15 ounces must be prepaid fifteen-pence. A letter posted unpaid is chargeable on delivery with double postage; and a letter posted insufficiently prepaid is chargeable with double the deficiency. On re-directed letters the charge for re-direction is the same whether prepaid or collected on delivery. No letter may exceed the dimensions of one foot six inches in length, nine inches in width, and six inches in depth.

NEWSPAPERS.

Inland.—For each newspaper, whether posted singly or in a packet, the postage, when prepaid, is one halfpenny; but a packet containing two or more registered newspapers is not chargeable with a higher rate of postage than would be chargeable on a book packet of the same weight, viz., one halfpenny for every 2oz. or fraction of 2oz. A newspaper posted unpaid, and a packet of newspapers posted either unpaid or insufficiently paid, will be treated as an unpaid or insufficiently paid book packet of the same weight. The postage must be prepaid either by an adhesive stamp or by the use of a stamped wrapper. No newspaper can be sent through the post a second time for the original postage; for each transmission a fresh postage must be prepaid, except that in the case of re-direction the amount chargeable may be collected on delivery. Every newspaper or packet of newspapers must be posted either without a cover or in a cover open at both ends, and in such a manner as to admit of easy removal for examination. If this rule be infringed, the newspaper or packet will be treated as a letter. Every newspaper must be so folded as to admit of the title being readily inspected. A newspaper which has any letter, or any communication of the nature of a letter, written in it or upon its cover, will be charged as an unpaid or insufficiently paid letter. No packet of newspapers must exceed 14lb. in weight, nor may it exceed two feet in length, or one foot in width or depth.

Colonial and Foreign.—Newspapers going abroad are also subject to the following regulations:

Publications registered for transmission abroad must be posted within eight days from the date of publication, including the day of publication. The collected numbers issued during the month of a weekly, fortnightly, tri-monthly, &c., publication will not be allowed to pass as a monthly publication. The postage cannot be prepaid in money. Every newspaper or packet of newspapers must be posted either without a cover or in a cover open at both ends, and in such a manner as to admit of easy removal for examination. No packet of newspapers must exceed two feet in length or one foot in width or depth. It is forbidden to introduce into Russia, through the post, political newspapers, even in covers open at the ends or sides; and the only means by which persons residing in Russia can obtain newspapers from the United Kingdom is by subscribing for them at one of the Russian post-offices. This prohibition does not, however, extend to political newspapers or any other publication addressed to members of the Royal Family of Russia, the Imperial Ministers, or members of the Diplomatic Corps. The admission into Russia even of newspapers not of a political character, is permitted only when they are addressed to the house of some established bookseller, to the higher schools, to the Imperial Public Library, or to the Academy of Sciences in Russia. Printed Prices Current, however, as well as printed circulars, in covers open at the ends or sides, are allowed to be addressed to any persons residing in Russia.

BOOK POST.

Inland.—A book-packet may contain not only books, paper, or other substance in ordinary use for writing or printing, whether plain or written or printed upon (to the exclusion of any written letter or communication of the nature of a letter), photographs, when not on glass or in frames containing glass or any like substance, and anything usually appertaining to such articles in the way of binding and mounting, or necessary for their safe transmission by post, but also Circulars when these are wholly or in great part printed, engraved, or lithographed. 1st. The postage is one halfpenny for every 2oz. or fraction of that weight. 2nd. The postage must be prepaid either by adhesive stamps or by means of a stamped wrapper, or by a combination of the two; except at the Chief and District Post-offices and the Branch Offices at Lombard-street and Charing-cross in London, and at the Chief Offices in Edinburgh and Dublin, where, from 10 a.m. to 4 p.m. it may be prepaid in money, provided the postage amount to not less than 1d. in any one case, and provided the packets are posted in bundles each representing a postage of 5s. 3rd. A packet posted wholly unpaid will be charged with double the book-postage; and if posted partially prepaid, with double the deficiency. 4th. Every book-packet must be posted either without a cover or in a cover open at both ends, and in such a manner as to admit of the contents being easily withdrawn for examination; otherwise it will be treated as a letter. 5th. A book-packet may not contain any letter, or communication of the nature of a letter (whether separate or otherwise), not being a circular-letter or not wholly printed, nor any enclosure sealed or in any way closed against inspection, nor any other enclosure not allowed by section 8. (Entries, however, merely stating who sends the book, &c. or to whom it is given, are not regarded as a letter.) If this rule be infringed, the entire packet will be charged as a letter. 6th. No book-packet may exceed 5lb. in weight, or one foot six inches in length, nine inches in width, and six inches in depth.

COLONIAL AND FOREIGN PATTERN AND SAMPLE POST.

There is a Pattern and Sample Post to such colonies and foreign countries as are marked in the Table of Colonial and Foreign Postage with the letter "P"; but it is restricted to *bonâ fide* trade patterns or samples of merchandise. Goods sent for sale, or in execution of an order (however small the quantity may be), or any articles sent by one private individual to another which are not actually patterns or samples, are not admissible. The postage must be prepaid either by adhesive stamps or by means of a stamped wrapper, or by a combination of both.

GENERAL REGULATIONS.

Postmasters are instructed not to receive any letter which there is good reason to believe contains anything likely to injure the contents of the mail bag or the person of any officer of the post-office. If such a packet be posted without the postmaster's knowledge, or if at any time before its despatch he should discover any such packet, he is directed not to forward it, but to report the case, with the address of the packet, to the secretary. The following are examples of the articles referred to: A glass bottle, or glass in any form; razors, scissors, needles, knives, forks, or other sharp instruments; leeches, game, fish, meat, fruit, or vegetables; bladders or other vessels containing liquids; gunpowder, lucifer matches, or anything which is explosive or liable to sudden combustion.

POSTAGE STAMPS.

Every Rural Messenger is authorised to sell penny postage labels at the same price at which Postmasters are empowered to sell them; and when any person applies to him for postage labels the messenger must either supply them, or (if he have none in his possession) must, without extra charge, receive the postage in money and, on his arrival at the post-office, obtain labels for it and affix them carefully to the letters. Postage stamps which have been torn, cut, or otherwise rendered imperfect,—embossed, or impressed, stamps cut out from the envelopes, cards, or wrappers, on which such stamps were embossed or impressed,—even although the stamps have not been before used or sent by post,—and receipt or other Inland Revenue stamps, cannot be used for payment of postage. Applications for allowance on spoilt postage stamps, embossed envelopes, post cards, or newspaper wrappers, which have not passed through the post, should be made to the Office of Inland Revenue. In the case of envelopes, cards, or wrappers, the application must be accompanied by these articles intact, as no allowance can be granted on the embossed, or impressed, stamps if cut therefrom. All Postmasters in the United Kingdom at whose offices Money Order business is transacted are permitted, though not compelled, to purchase postage stamps from the public (provided the stamps be not soiled or otherwise damaged), at a charge of 2½ per cent.; the charge, however, never being less than one halfpenny. Under this arrangement the payments are as follows:

For stamps not exceeding 1s. 8d. in value, the full price minus ½d.
" above 1s. 8d. but not exceeding 3s. 4d. the full price minus 1d.
" " 3s. 4d " " 5s " " 1½d.
" " 5s. " " 6s. 8d. " " 2d.
" " 6s. 8d " " 8s. 4d. " " 2½d; and so on.

No separate stamps can be purchased. They must in all cases be presented in strips containing at least two stamps adhering to each other.

REGISTRATION.

By the prepayment of a fee of fourpence any letter, newspaper, or book-packet may be registered to any place in the United Kingdom or the British Colonies. Registered letters, except those mentioned below, must, as regards both postage and registration fee, be prepaid. In the case of inland letters such prepayment must be by stamps; but in that of foreign letters it may be either in stamps or in money. Official letters for Government offices in London, Dublin, or Edinburgh may be registered at Country Post-offices on prepayment in stamps of the registration fee only. All inland or colonial letters, therefore, which unquestionably contain coin, even though they be posted without registration, are treated as registered, and charged on delivery with a double registration fee of eightpence in addition to the ordinary postage; and any such letters which cannot be registered in time to be forwarded by the mail for which they are posted are detained for the next despatch. Even if the letter do not contain any article of intrinsic value, it should, if it be very important, be registered. Every letter to be registered should be presented at the window, and a receipt obtained for it, and should on no account be dropped into the letter-box. If, contrary to this rule, a letter marked "Registered" be dropped into the letter-box, it will, if directed to any place in the United Kingdom or the British Colonies, be liable to a registration fee of eightpence, instead of the ordinary fee of fourpence. No letter carrier, rural messenger, or other servant of the Post-office is allowed to carry a letter for any person to be registered.

DELIVERY.

Any person can have a private box who is willing to pay the appointed fee. Where this fee goes to the Revenue, it is generally fixed at one guinea per annum to be paid in advance, and for a period of not less than a year; and where it goes to the Postmaster, he may demand the same terms, though he may, at his option, take less. The same also, in most cases, are the terms for a private bag, except that, in addition, there is the cost of the bag itself, and a charge for conveyance, the maximum of the latter being half a guinea per annum, if the bag be conveyed by a rural messenger, and two guineas if by a contractor for a mail cart or other horse post. If more than one rural messenger or more than one contractor take part in the conveyance of a private letter-bag, each is allowed to charge the full amount of the fee for his service. The weight of a private bag, when empty, is limited to one pound. As the service of a private bag may possibly delay the despatch of the general bag, none are allowed without the permission of the Surveyor. If a private letter-bag made up at one post-office be left at another to be called for or to be delivered from thence, the postmaster at such other office may make a charge for his trouble: this charge is usually 5s. per annum. Any person residing within the limits of a town free delivery, and renting a private letter-bag, is considered to have the accommodation of a private box at the post-office as well as a bag, and is liable to the full charge for both bag and box.

MONEY ORDERS.

The public are recommended, when applying for Money Orders, to use printed "Application Forms," which save time, and afford greater security than verbal messages against mistakes. These Forms are supplied gratuitously at all Money Order offices.

The commission on Inland Money Orders is:—

For sums under	10s.	...	...	1d.	For sums of	5l. and under	6l. ... 7d.
"	of 10s. and under	1l.	...	2d.	"	"	6l. " " 7l. ... 8d.
"	" 1l. "	"	2l.	... 3d.	"	"	7l. " " 8l. ... 9d.
"	" 2l. "	"	3l.	... 4d.	"	"	8l. " " 9l. ... 10d.
"	" 3l. "	"	4l.	... 5d.	"	"	9l. " " 10l. ... 11d.
"	" 4l. "	"	5l.	... 6d.	"	"	10l. ... ... 1s.

No order is allowed to contain a fractional part of a penny.

With the subjoined exceptions, no Money Order can be issued, unless the applicant furnish, in full, the surname and at least the initial of one Christian name, both of the remitter and the payee, together with the remitter's address:—1st. If the remitter or payee be a peer or a bishop, his ordinary title is sufficient; and the usual designation of a firm is sufficient, except in the case of a company trading under a title which does not consist of the names of the persons composing it, as the "Carron Company." 2nd. When the remitter notifies that the order is to be paid through a bank, it is left to his option to give or withhold the name of the payee. When application is made for a Money Order payable in London, or at any other town where there is more than one Money Order office, the remitter should say at which of such offices he wishes it to be paid: otherwise the order can be cashed at the Head Office alone. It is not incumbent on a Postmaster to supply such information relative to local or provincial offices. An order once issued cannot be cancelled; and should repayment or transfer to a different office be required, the remitter or payee must apply to the paying Postmaster. In order to enable the remitter to obtain an acknowledgment of the receipt of a Money Order before the money is paid, it is arranged that he may make his order payable ten days after date, provided that, in the presence of the Postmaster, when he obtains the order, he affix thereto, in the space after the request C., a penny receipt stamp, and write his signature across the stamp. The holder of a Money Order is always at liberty to direct, by crossing it, that the order be paid through a bank, even though its payment was not originally so restricted; and when the order is thus presented the question put on the presentation of an ordinary Money Order is dispensed with. Money Orders do not require a receipt stamp. Payment of an order issued and payable in the United Kingdom, or issued in the United Kingdom and payable in Belgium, Denmark or North Germany, and orders issued by those countries on the United Kingdom, must be obtained before the end of the second calendar month after that in which it was issued (for instance, if issued in January it must be paid before the end of March): otherwise the order becomes lapsed, and a new order is necessary, for which a second commission is charged. The period for payment of orders issued in the United Kingdom and payable at other places abroad or in any colony authorised to transact Money Order business, including Gibraltar and Malta, is six months; and orders granted at those places on the United Kingdom are also payable during six months after that in which they were issued. A person presenting a lapsed order is furnished with a copy of a printed notice headed "Lapsed Money Orders," containing directions how to proceed. If the order be not paid before the end of the twelfth

Digitized by Google

calendar month after that in which it was issued (for instance, if issued in January, and not paid before the end of next January), all claim to the money is lost. To guard against any person, even if he obtain possession of a Money Order, fraudulently getting it cashed, the remitter is recommended,—1st. When he is well known to the payee, to sign the letter enclosing the order with his initials only. 2nd. When this is not the case, either to make the order payable ten days after date, or to register the letter enclosing it, or to make the order payable through a bank. 3rd. When it is not considered expedient to adopt either of these courses, to send the remitter's name (without a knowledge of which payment cannot be obtained) in a separate letter from that containing the Money Order; although this latter precaution is much less effective than either of the others. Payment of an order cannot be demanded on the same day as that on which the order was issued. In case of the miscarriage or loss of an Inland Money Order, a duplicate is granted on a written application (with the necessary particulars, and enclosing the amount of a second commission, in postage stamps) to the Controller of the Money Order office of England, Scotland, or Ireland, as the case may be, where the original order was issued; and if it be desired to stop payment of an inland order, application must be made at the office where the order is payable, and a second commission must be paid. If alteration in the name of the payee or remitter of an Inland Money Order should be required, application must be made by the remitter to the Postmaster of the office at which the order was issued, and a second commission must be paid. Should transfer of payment of an inland order from one office to another in the United Kingdom, or repayment of the amount of an order, be required, an application enclosing the order must be made to the Postmaster at whose office the order is payable, who will transmit in exchange a new order payable at the place desired, but for a less sum than the original order by the amount of the second commission charged for the re-issue. Proper printed forms for making applications in all these cases may be obtained at any Money order Office. Whenever, on complaint being made, it is found that the necessity for an application, entailing the payment of a fresh commission, is attributable to the post-office, the charge will be remitted to the applicant and imposed on the officer in fault. No Letter Carrier, Rural Messenger or other servant of the post-office is bound to procure a Money Order for any person, or to obtain payment for one; but such services are not forbidden.

The scale of commission for orders payable abroad is as follows:—

	£2.	£5.	£7.	£10.
	s. d.	s. d.	s. d.	s. d.
For sums not exceeding				
If payable in Switzerland, Belgium, Denmark, North Germany, Egypt, or at Malta, Gibraltar, or Constantinople...	0 9	1 6	2 3	3 0
" any other place abroad (including most of the Colonies) authorised to transact Money Order business with this country	1 0	2 0	3 0	4 0

Money Orders are issued in the United Kingdom on the foreign countries and places mentioned in the subjoined list:

BELGIUM and SWITZERLAND.
DENMARK—GERMANY (including North Germany, Baden, Bavaria, Wurtemburg, and Luxemburg.)
GIBRALTAR—MALTA—CONSTANTINOPLE.
EGYPT—Alexandra, Cairo, Suez.
AMERICA, UNITED STATES OF.
ARGENTINE REPUBLIC—Buenos Ayres.

BRITISH COLUMBIA—Cariboo, New Westminster, Victoria.
BRITISH GUIANA—Berbice (New Amsterdam), Demerara (Georgetown).
CANADA.
CAPE OF GOOD HOPE.
CHINA—Hong Kong, Shanghae.
FALKLAND ISLANDS—Stanley.
GOLD COAST—Accra, Cape Coast Castle.
HONDURAS—Belize.
JAPAN—Yokohama.
NATAL—Durban, Pietermaritzburg.
NEW BRUNSWICK.
NEWFOUNDLAND.
NEW SOUTH WALES.
NEW ZEALAND.
NOVA SCOTIA.
PRINCE EDWARD ISLAND—Charlotte Town.
QUEENSLAND.
ST. HELENA—James Town.
SOUTH AUSTRALIA.
STRAITS SETTLEMENTS—Malacca, Penang, Singapore.
TASMANIA.
URUGUAY—Monte Video.
VICTORIA.
WEST COAST OF AFRICA—Gambia (Bathurst), Lagos, Sierra Leone (Freetown).
WEST INDIES—Antigua (St. John's and English Harbour), Bahamas (Nassau), Barbadoes (Bridgetown), Bermuda (Hamilton and St. George's), Dominica (Roseau), Grenada (St. George), Jamaica (Kingstown), Montserrat, Nevis (Charlestown), St. Kitts (Basseterre), St. Lucia (Castries), St. Vincent (Kingstown), Tobago (Scarborough), Trinidad (Port of Spain and San Fernando), Turks' Island.

WESTERN AUSTRALIA.

The only Post-offices in Western Australia which are authorised to issue Money Orders on the United Kingdom, and to pay Money Orders issued in the United Kingdom on Western Australia, are those at Perth and Albany (King George's Sound), but local arrangements are now in operation in the Colony by which orders dwawn on Perth in favour of persons residing in the undermentioned towns and districts can be negotiated, and the signature of the payee always obtained on the orders.

Australind.	Erwin River.	Mandurah.	Port Gregory.	Vasse.
Beverley.	Fremantle.	Moore River.	Serpentine.	Victoria Plains.
Bunbury.	Gingin.	Northam.	Swan.	Wannerenooka.
Canning.	Greenhough.	Pinjarrah.	Toodyay.	York.
Champion Bay.	Guildford.			

The renewal of a lapsed order, the issue of a duplicate order, or the stoppage of payment of an order issued by a colony on the United Kingdom, will be made on application to the Controller of the Metropolitan Office, of that portion of the United Kingdom in which such Colonial order is payable, provided an additional British Inland Rate of Commission be enclosed with the application; except in the case of lapsed orders, when the additional commission will be deducted from the amount of the new order issued by the department; but the lapsed order must be transmitted with the application for its renewal. Postmasters in the United Kingdom have power to transfer to other offices in the United Kingdom payment of colonial orders originally drawn on their own offices. For repayment of the amount of a Money Order, or for the correction of any error respecting the name of the payee or remitter of an order issued by a colony on the United Kingdom, the application on the subject, enclosing an additional Colonial Inland rate of Commission, must be addressed to the Controller of the metropolitan office of the Colony in which such order was issued.

MISCELLANEOUS.

The Post-office is not responsible for any injury which books or other articles forwarded by post may sustain; and the public, therefore, should not employ the Post-office for the conveyance of anything likely to suffer injury, unless such things be sufficiently protected. Neither is the Post-office responsible for any loss or inconvenience which may arise from the mis-sending, mis-delivery, loss, &c. of a letter or any other postal packet. Postmasters are not required to correspond with the public on official matters. All applications, therefore, which require an answer by letter should be addressed to the Secretary, at the General Post-office. Postmasters are not allowed to return any letter or other packet to the writer or sender, or to any one else, or to delay forwarding it to its destination according to the address, even though a request to such effect be written thereon. Any person who, on receiving a surcharged letter, has reason to think that the letter has been wrongly taxed, should take it, before it has been opened, to a post-office to be weighed, and should have its exact weight certified in writing at the post-office. This will in most cases be sufficient evidence that the letter has been erroneously charged; though sometimes, owing to the paper being damp when it is posted, a packet weighs more then than when it is delivered, and it is the weight at the time of posting that determines the charge. If a letter be forwarded under cover to any postmaster with a request that he will re-post it at his office, the letter, on being re-posted will be endorsed with the words "posted at ——, under cover, to the Postmaster of ——." Except where the Surveyor may deem a longer interval necessary, late letters, &c., are received till within five minutes of the despatch of the mails; although no office is kept open merely for this purpose after ten o'clock at night: and no late letters, &c. (except Government letters) are forwarded by the mail preparing for despatch unless prepaid, and that by stamps, so as to include both the ordinary postage and the late letter fee; but in the case of letters directed to any department of Government, it is sufficient to prepay the fee. Prepaid letters may, however, be handed to the sorters in the travelling post-offices on any of the lines of railway upon which such offices are run, on payment of an extra fee in postage stamps of 2d. on each letter. Every re-directed letter, post-card, or other postal packet is liable to an aditional postage (at the prepaid rate) for each re-direction unless the re-direction be made by an officer of the post-office, to a place within the same free delivery as the last address. Thus, on a paid or unpaid letter weighing not more than half an ounce, re-directed either by an officer of the Post-office or by anyone else to a different postal district in the United Kingdom, or from one place to another in the same postal district, provided these places be not in the same free delivery, an additional postage is levied of one penny; or, if the weight be more than half an ounce but does not exceed an ounce, of twopence; and so on. Upon a book thus redirected to any other postal delivery in the United Kingdom, and weighing not more than four ounces, an additional postage of one penny is levied, or if the book weigh more than four ounces but not more than eight ounces, an additional postage of twopence and so on. A registered letter when re-directed is only liable to the same additional charge as an ordinary re-directed letter. If, however, instead of being taken back to the post-office to be dealt with as a registered letter, it is dropped into the letter-box as an ordinary letter (the word "registered" not having been erased, or having been erased in pencil only), it becomes liable to the same treatment as any other letter marked "registered" and found in the letter-box, and is surcharged with a registration fee of eightpence minus the value of any stamps already affixed for the registration. Letters which have once been posted addressed to commissioned officers in the army, navy, or ordnance, or to schoolmasters and schoolmistresses in the army, or to non-commissioned officers, private soldiers, or seamen employed on actual service in any of Her Majesty's colonies, or on any foreign station, and who, before receiving the letters, may have started on their return home, or to another station, may be re-directed to such officers, private soldiers, or seamen, &c., when these have removed upon service, and will be delivered to them without any charge for re-direction. The same privilege extends to the letters of non-commissioned officers, schoolmasters in the army (of all but the first class), schoolmistresses in the army, private soldiers, and seamen, re-directed from one part of the United Kingdom to another, or from the United Kingdom to a place abroad, provided the original postage is prepaid and the letters do not exceed half an ounce in weight; but no such privilege is allowed with regard to letters for a commissioned officer, or for a superintending or first-class schoolmaster in the army re-directed from one part of the United Kingdom to another, or (if posted in the United Kingdom) re-directed to a place abroad. A Postmaster is not bound to re-direct letters for a person temporarily leaving his home, and not having a private bag or box, unless the house be left uninhabited, or the letters would be delayed in their transmission by being sent to the house to whom the letters are addressed, must be sent to the Postmaster. At all offices which are open on Sunday the public are allowed, during the time they are so open (viz. from 9 to 10 in the morning, and one other hour), to prepay foreign and colonial letters, to purchase postage stamps, and to have letters registered; and all other duties are performed as usual, except money order, savings bank, insurance, and annuity business, which, on that day, is wholly suspended. At no provincial town in England or Ireland is there more than one delivery on the Sunday, Christmas Day, or Good Friday; nor, in Scotland on Sunday or the Sacramental Fast Days; and any person is at liberty to prevent even this delivery, so far as relates to himself, as shown by the following regulations:—1st. Any person can have his letters, &c. retained in the post-office on Sunday by addressing to the Postmaster a written request, duly signed, to that effect; and such request will be held to include newspapers, and all other postal packets, even such as may be marked "immediate;" as no distinction can be allowed. 2nd. No letters, &c., the non-delivery of which by the letter-carrier on Sunday has been directed, can be obtained from the post-office window on that day. 3rd. Private box holders be permitted to engage a private box for Sunday only. 4th. To prevent the inconvenience and confusion which would arise from frequent changes in these instructions, no request can be entertained unless it extend to a period of at least three months, nor be withdrawn, even after the lapse of that time, without a week's notice. No Postmaster is bound to give change, or is authorised to demand change; and when money is paid at a post-office, whether as change or otherwise, no question as to its right amount, goodness, or weight can be entertained after it has been removed from the counter. Except as regards foreign and colonial letters about to be prepaid in money, a postmaster is not bound to weigh any letters or other packets for the public; though he may do so, if his duty be not thereby impeded.

OFFICERS' LETTERS.

Letters addressed to or sent by a commissioned officer in the Navy or the Royal Marines, or a Warrant Officer, when employed on board any of Her Majesty's ships on a Colonial or Foreign Station, as well as letters addressed to or sent by a commissioned officer or a superintending or first-class schoolmaster in the Army serving abroad, are subject to the same rates of postage as the letters of the general public.

Letters addressed to Ships of War on the Pacific Station (North or South) are subject to a postage of 1s. 6d. per ½oz. each.

Marriages.

MARRIAGES can be effected with or without ecclesiastical rites by license, or publication of banns or notices. Fees—The licenses are 5l. for a special, 10s. for ordinary, and 2 for non-residence. One at least of the contracting parties must live or sleep in district where the marriage is to be celebrated for fourteen days immediately befo the ceremony: the Vicar-General's office for marriage licenses is at 5½, Bell Ya Doctor's Commons.

Deaths, Wills, and Unclaimed Property.

A DEATH in like manner with a birth must be notified to the registrar, but *immediately* the undertaker should be provided with a certificate to the minister reading the bu service. The cause of death must be certified by the doctor in attendance to the registrar. Every will must be entered at the Probate Registry of the District London (and principal) Registry is at Doctors' Commons, E.C., where an official of all wills may be read on payment of 1s., or copies obtained on payment of a scale of charges.

UNCLAIMED DIVIDENDS.—Much property is left, in the shape of bank dividen persons whose present addresses are unknown, but of which lists are prepared the names of the legatee and description of dividends attached.

Stamp and other Government Duties.

RECEIPTS.

For £2 and upwards ... ... One Penny.

N.B.—Persons receiving the money are to pay the duty.

Receipts may be stamped within fourteen days of date, on payment of £5, or within the month on payment of £10, penalty; after that time they cannot be stamped.

Penalty for giving a receipt without a stamp, £10.

Penalty for not effectually cancelling or obliterating adhesive stamps when used, £10.

Penalty for frauds in the use of adhesive stamps, £20.

BIRTHS, MARRIAGES, AND DEATHS.

Certified copy or extract of or from any register of births, baptisms, marriages, deaths, or burials ... ... 1*d.*

(To be paid by the person requiring such copy or extract.)

Exemptions.—Copies of entries transmitted to the registrar of the diocese in pursuance of the 52 Geo. 3, c. 146; certified copies sent by Superintending Registrars to the General Registrar in pursuance of the 6 & 7 Will. 4, c. 86; copies or extracts in pursuance of the 7 Vict. c. 15; and copies under the 16 & 17 Vict. c. 45, to enable persons to purchase Government Annuities through the medium of savings banks.

DUTIES PAYABLE ON INHABITED HOUSES OF THE ANNUAL VALUE OF £20 OR UPWARDS.

The duty is 6*d.* in the pound in respect of dwelling houses occupied by any person in trade who shall expose to sale and sell any goods in any shop or warehouse, being part of the same dwelling house, and in front and on the ground or basement story thereof; or by a person licensed to sell therein, by retail, beer, &c.; or as a farmhouse by a tenant or farm servant, and *bonâ fide* used for the purpose of husbandry only.—The duty is 9*d.* in the pound for dwelling houses not occupied and used for any of the purposes described in the preceding.

Exemptions.—Market gardens and nursery grounds are not to be included in valuation of inhabited houses, and not more than one acre of pleasure grounds.

DUTIES ON LEGACIES AND SUCCESSION TO REAL PROPERTY.

To children or their descendants, or lineal ancestors of the deceased	£1 0 0
Brother or sister, or their descendants	3 0 0
Uncle or aunt, or their descendants	5 0 0
Grand-uncle or aunt, or their descendants	6 0 0
All other relations or strangers	10 0 0

The husband or wife of the deceased are not chargeable with duty.

Probate and Letters of Administration are exempt, if the effects are under £100 in value.

DUTIES ON MALE SERVANTS, CARRIAGES, HORSES AND MULES, AND ARMORIAL BEARINGS.

For every male servant	£0 15 0
For every carriage—	
That has four or more wheels, and shall be of the weight of four hundredweight or upwards	2 2 0
If such carriage shall have less than four wheels, or, having four or more wheels, shall be of less weight than four hundredweight	0 15 0
For every horse or mule...	0 10 6
For armorial bearings—	
Painted, marked, or affixed on or to any carriage	2 2 0
If such armorial bearings shall not be so painted, marked, or affixed, but shall be otherwise worn or used	1 1 0
For every horsedealer	12 10 0

And such duties respectively shall be paid annually upon licenses to be taken out by the person who shall employ, the servant, or shall keep the carriage, or horse or mule, or shall wear or use the armorial bearings, or shall exercise or carry on the trade of a horsedealer.

Inland Revenue Duties.

INCOME TAX, LAND TAX, AND INHABITED HOUSE DUTY.

Income and Property Tax.

100*l.* per annum, for every 1*l.* arising from Property, Profession, Trade, or Office	0 0 6
Exceeding 100*l.* but less than 200*l.* rated at 60*l.* less.	
In respect of occupation of Lands, Tenements, &c. for every 1*l.* in England ..	0 0 0½
Scotland and Ireland	0 0 1½

Inhabited House Duty.

For every private Inhabited Dwelling House which with the Household and other Offices, Yards, and Gardens therewith occupied and charged, is or shall be worth the rent of Twenty Pounds or upwards by the Year, there shall be charged for every Twenty Shillings of such annual value the sum of	0 0 9

Alteration in Date of Payment.

The Land and House Taxes in England, shall be payable on or before January 1st, in each year, and Income Tax for both England and Ireland, shall be payable in like manner.

ASSESSED TAXES, AND EXCISE LICENSES.

Servants, Carriages, Horses, Armorial Bearings, &c.

For every male servant	0 15 0
For every carriage—	
If such carriage shall have four or more wheels, and shall be of the weight of four hundredweight or upwards	2 2 0
If such carriage shall have less than four wheels, or having four or more wheels, shall be of a less weight than four hundredweight	0 15 0
For every horse or mule	0 10 6
For armorial bearings—	
If such armorial bearings shall be painted, marked, or affixed, on or to any carriage	2 2 0
If such armorial bearings shall not be so painted, marked or affixed, but shall be otherwise worn or used	1 1 0

And such duties shall be paid annually upon licenses to be taken out and granted by such officer as the Commissioners of Inland Revenue shall direct, shall be dated on the day of granting the same, and shall expire on the thirty-first day of December then next following.

Mistresses and Servants.

No receipt is *necessary* for wages paid to a servant, which, in the absence of any agreement to the contrary, must be paid monthly.

Any arrangement entered into at the commencement of hiring is binding throughout the term, and if broken by either, the engagement can be terminated *instanter*.

A mistress is bound to provide proper food and lodging, and if she omits to do so, so as to cause ill health to the servant, the latter may not only leave without warning, but can bring an action for damages. In the case, too, of a servant falling ill, she must be properly tended by the mistress until she is convalescent, though she is not bound to provide medical aid or attendance, but must give notice to the overseers of the poor, if she objects to finding it herself. *No one is legally bound to give a servant a character*, but if given, it must be true, or action may be taken upon it.

Servants who give false characters, and mistresses, too, are liable to punishment by any magistrates.

To terminate an engagement, a month's notice must be given on either side, or, on the part of the hirer, a month's wages; no reason *need* be assigned.

Immorality *proved* (not suspected), dishonesty, direct disobedience to orders, and persistent wanton neglect, are justifiable causes of *immediate dismissal*, without warning or money due for the current month. If money is given on account of service rendered up to date of dismissal, the mistress is liable to a claim for the whole.

The mistress is liable to her tradesmen for goods ordered by her servants, if she is in the habit of allowing them to order for her, and recognises such authority by paying for the goods so ordered, either herself or by them. This rule, however, does not apply to goods ordered out of the usual run, for which a tradesman would have no claim, nor would she be liable to other than her *usual* tradespeople. Still as the temptation placed in the servants' hands is great and detrimental to the employer, by reason of commission being paid for custom, &c., it is as well to pay periodical visits one's self, and learn that all is right, and in the event of changing, notify that the servant has no longer authority to order.

Wages Table.

Per Year.	IS Per Month.	IS Per Week.	IS Per Day.	Per Week of 6 Days.	IS FOR 5 Days.	4 Days.	3 Days.	2 Days.	1 Day.

Our Portraits.

Her Most Gracious Majesty the Queen.

(See page 1.)

Victoria Alexandrina, Queen of Great Britain and Ireland, is the only child of the late Duke of Kent and of the Princess Louisa Victoria of Saxe-Coburg, relict of the Hereditary Prince of Leiningen, and sister of Leopold, Prince of Saxe-Coburg, afterwards King of the Belgians. The Princess Victoria was born at Kensington Palace May 24, 1819. Her parents, who had for some time resided abroad, hastened to England in order that their child might be born a Briton. The Duke of Kent died in 1820, and the general education of our future Queen was directed under her mother's superintendence by the Duchess of Northumberland, wife of the third duke. The Princess was well grounded in historical knowledge, in music and the natural sciences. At a subsequent period, by the express wish of King William IV., Lord Melbourne instructed her in political science and the working of constitutional government. Until within a few weeks of her elevation to the throne, the Princess's life was spent in comparative retirement, only varied by occasional tours through different parts of the United Kingdom. Queen Victoria succeeded her uncle, William IV., June 20, 1837. Her Majesty was crowned at Westminster Abbey on June 28, 1838, and she was married to his late Royal Highness Prince Albert of Saxe-Cobourg Gotha on February 10, 1840.

Her Majesty has nine children—H.R.H. Victoria, Princess Royal, born Nov. 21, 1840; married Jan. 25, 1858, to H.R.H. the Crown Prince of Prussia. H.R.H. Albert Edward Prince of Wales, born Nov. 9, 1841; married March 10, 1863, the Princess Alexandra of Denmark. Princess Alice, born April 15, 1843; married July 1, 1862, Prince Louis of Hesse Darmstadt. H.R.H. Prince Alfred, born Aug. 6, 1844, created Duke of Edinburgh. H.R.H. Princess Helena, born May 26, 1846; married July 5, 1866, to Prince Christian of Schleswig Holstein. H.R.H. Princess Louise, born March 18, 1848, and married to the Marquis of Lorn. H.R.H. Prince Arthur, born May 1, 1850. H.R.H. Prince Leopold, born April 7, 1853; and H.R.H. Princess Beatrice, born April 14, 1857. The first domestic grief which Her Majesty suffered was the loss of her mother, the Duchess of Kent, after a short illness, followed by the sudden death of the Prince Consort, to the great grief of the entire kingdom, on Dec. 14, 1861. Her Majesty's intense sorrow for her irreparable loss, although it has to a great degree disabled her from appearing in public or at Court ceremonials, and has imposed on her a life of comparative seclusion, has never been allowed by her to interfere with the performance of her important duties as sovereign of this realm. Neither has it checked the exercise of that anxious interest which she has ever since her accession to the crown steadfastly manifested for the social welfare of her people, nor caused her to relax her efforts to encourage and reward subjects distinguished for their talents and merits, especially those whom her lamented consort loved to honour for their zealous co-operation with him in his high endeavours to promote the advancement of undertakings which have for their object the moral, social, intellectual, and artistic progress of the nation. It is a source of great pride to the subjects of Queen Victoria that not only in her own vast dominions, but throughout the civilised world, her name is never mentioned save in terms of sympathy, admiration, and respect as a Christian woman and a queen. Her Majesty is truly a pattern in all the relations of life, as a daughter, as a wife, and as a mother; she is accordingly loved and reverenced by all classes of her subjects. Two interesting but sad memorials of Her Majesty's life have been published, entitled "The Early Days of the Prince Consort," and "Leaves from our Journal in the Highlands," which are understood to be from Her Majesty's pen. It would occupy much more space than our limits admit to give even a brief outline of the political events of Her Majesty's reign, and we will content ourselves with enumerating a few of the great events which have marked it. The Repeal of the Corn Laws, the Russian War, the Reform Bill, the Irish Church Bill, may be cited from the numerous measures intended to improve the social condition of the English people, and to crown the great heritage of civil and religious liberty handed down to us from our forefathers. We regret to state that during the latter part of the past year Her Majesty has suffered from severe illness, and her health is seriously impaired. It is feared that some time must elapse before the Queen will regain her usual vigour.

The Emperor of Russia.

(See page 1.)

Alexander II., who succeeded to the Empire of all the Russias on the death of his father Nicholas I., March 2, 1855, was born in 1818, in the reign of his uncle Alexander I. The young Duke Alexander was seven years old when the death of Alexander I. and the renunciation of his rights by the Grand Duke Constantine led to the elevation of the Grand Duke Nicholas to the throne, and the young Alexander became heir apparent. For a moment, however, his destiny and that of his house trembled in the balance, as a widely-spread defection, which was only quenched by torrents of blood, exhibited itself in the garrisons of the capital. The resolute spirit of Nicholas I. overawed the rebellious regiments, and from December 25, 1835, he ruled over a nation of slaves. The whole tenor of the young Prince's life was now altered; the gentle sway of

his mother, the daughter of Frederick III. of Prussia, changed for the discipline of military tutors and governors. The Emperor Nicholas, his father, strove to fashion him after his own method. The substitution of the stern *régime* of the barrack room for the more genial influence of domestic life proved very irksome to the future Czar, and he was attacked by a species of hypochondria. He was ordered to travel and amuse himself, and he went to the Court of Hesse Darmstadt, where he made a long stay, and concluded a marriage with the Princess Marie, daughter of the Grand Duke Louis II. of Darmstadt. At the first council held under his presidency after his accession to the throne, he stated his resolution not in any way to interrupt the course of the war with the Allied Powers in which Russia was then engaged. The Emperor's first act was to issue a manifesto to the nation notifying his accession, and declaring in general terms his intention to uphold the glory of the empire as it had been upheld by Peter, Catherine, Alexander I., and Nicholas I. On the return of peace one of the first steps taken by Alexander II. in the direction of reform was the reduction of the army to the lowest limits compatible with the dignity and safety of the empire. But the greatest reform of all was his emancipation of 23,000,000 human beings from the bondage of serfdom, and an imperial ukase proclaimed the liberation of the serfs, on certain conditions, March 3, 1861. In February, 1864, the same boon was conferred upon the Polish serfs, with a view to weaken the influence of the Polish nobility, who owned the greater portion of the land and were consequently all powerful. As regards education, great efforts are being made by the Czar to place the State colleges on a level with the best educational institutions. A still more notable reform is the inauguration of elective representative assemblies in the provinces. The Czar has used great efforts to increase the supremacy of the Greek Church in his dominions. The Emperor of Russia has six children, five sons and one daughter. The Czarewitch is married to Princess Dagmar, sister to H.R.H. the Princess of Wales.

The Emperor of Germany.

(See page 1.)

WILLIAM I., the Emperor of Germany and King of Prussia, is the second son of Frederick William III. and of Princess Louise of Mecklenburgh Strelitz. The Emperor's reign, although comparatively short, has been marked by the successful issue to most ambitious projects. The aggressive war in Denmark, the humbling of Austria, and the organisation of the North German Confederation, in which twenty-two States are comprehended, representing a population of twenty-nine millions of inhabitants, are all recent events. The recent war between Prussia and France, in which the Emperor of Germany took so active a part, is too well known a topic to need recapitulation. The successful prosecution of the war undoubtedly hastened the consummation of a project dear to the heart of Count Bismarck—the unification of Germany under the leadership of Prussia. This great plan was completed at the commencement of last year—completed by the election of the King of Prussia to be Emperor of Germany—with the civil and military leadership of all the German Kingdoms and Principalities, under certain defined conditions. It cannot be denied that the Emperor possesses some remarkable qualifications for this exalted position. Strong, bold, determined, and warlike, he is, notwithstanding his seventy-three years, well fitted to be a great monarch, and a leader of kings and armed hosts. The Emperor was born March 22, 1797. He received a careful education, joined the army at an early age, and was engaged in the campaign of 1813 and 1814 against France, coming under fire for the first time at Bar-sur-Aube, February 27, 1814.

On June 11 the Prince married Louisa, Princess of Saxe Weimar, by whom he has two children, Frederick William, Crown Prince of Prussia, and Louisa, the present Grand Duchess of Baden. On the accession of his eldest brother, Frederick William IV., to the throne in 1840, Prince William became Governor of Pomerania. On the outbreak of the revolution of 1841 he had to flee to England, whence he returned to Prussia some months after. In October, 1857, the King having become incapacitated for business, Prince William was commissioned to act as regent, a commission renewed from time to time till his permanent installation in October, 1858. On January 2, 1861, Prince William succeeded to the throne, and on the occasion of his coronation at Königsberg on October 18 of the same year he put the crown on his own head, declaring that "he ruled by the favour of God and no one else."

The Emperor has for the recent campaign revived the Order of the Iron Cross—a decoration conferred only for gallantry against the French in 1813-15. It insures to its wearer, in addition to a trifling pension, the grateful esteem and reverence of his compatriots. As formerly, it includes two classes, with a Grand Cross as a third, the latter to be conferred only upon a general in command for a battle, capturing a fortress, or some such decisive exploit. The wonderful success of the Prussian arms against France is too well known to need recapitulation.

Their Imperial Majesties the Emperor and Empress of Brazil.

(See pages 4 and 5.)

DOM PEDRO, the second Emperor of Brazil, our honoured guest during the months of June and July, 1871, is one of those men who, if they had not been born to the purple, would have assuredly made themselves distinguished in any walk of life they had selected. It is, indeed, very rare in the history of nations to find a monarch who combines the most enlightened and constitutional method of governing his subjects with the greatest claims to the admiration of the world in his native talent, and in his acquisitions in science and literature. These rare combinations meet in Dom Pedro II. Of illustrious descent, in his veins courses the united blood of the Braganzas, the Bourbons, and the Hapsburgs, and by marriage he is related to the royal and imperial families of England, France, and Russia.

The early studies of the Emperor were conducted by the Franklin of Brazil, José Bonifacio de Andrada. The acquirements of Dom Pedro are indeed remarkable; to the science of chemistry he has devoted much time, and his laboratory at San Cristoval is always the scene of new experiments; he is a good topographical engineer, and a fair artist. He is also an enthusiastic astronomer. He is especially devoted to comparative grammar and questions of philology, and speaks six languages. Dr. Stately, late Bishop of Honolulu, bears testimony to his Majesty's desire for knowledge, relating that in an interview which he had granted to the Bishop he expressed himself as anxious for information in the Polynesian languages, to which he had given some attention, and signified a wish to have a Hawaiian grammar and dictionary, and the Prayer-book translated by King Hamehameha.

The Emperor has always availed himself of his exalted position to advance the interests of geographical science, and he displayed a lively and personal interest in the explorations of the Amazon and other districts of the Brazilian empire undertaken by the naturalist Agassiz. During his visit to this country the Emperor devoted his time to the inspection of all worth seeing. Considerable attention was excited in London society by the Emperor's habit of early rising, and no small amount of witticisms were engendered by it. It is, however, his constant custom, and, although the Brazilians are eminently an early-to-bed, early-to-rise people, and after ten o'clock at night few persons are seen in the streets of Rio Janeiro, yet before the majority of his subjects have risen the Emperor is in the dockyards, or in other public institutions.

Dom Pedro is descended from the Portuguese royal house of Braganza, being grandson to Dom John the Sixth, the last sovereign who reigned over united Brazil and Portugal. The Emperor's father was Dom Pedro the First, and his mother was Leopoldina of Hapsburg, sister to Maria Louisa, Empress of the French, second wife of Napoleon the First. Dom Pedro the First declared the independence of Brazil, and erected it into an empire, with himself as Emperor, in 1832. Various causes concurred to induce him to abdicate the throne of Brazil in favour of his only son, the present Emperor, then only seven years old. The boy was confided in Brazil to the charge of the patriot brothers Andrada, men distinguished for their abilities, learning, eloquence, and sterling patriotism, but of too great liberality for the predominant class. Troubled Regencies followed, and the last was terminated by a popular outbreak in July, 1840; and at the age of fifteen Dom Pedro the Second was called to the task of governing a vast, discordant, and poor empire. He has devoted himself to the serious duties of his exalted office with firmness, honesty, and self-denial, and the result is a prodigious vitality and prosperity throughout the empire; and, moreover, the institution of negro bondage is being gradually but surely destroyed.

The Emperor's personal appearance is worthy of his mental endowments; he is 6ft. 4in. in height, and having a handsome face and fine figure. The Empress of Brazil is daughter of the late King of the Two Sicilies. She is affable and charming, and her habitual expression is one of engaging sweetness; she is greatly beloved in her own country, where her time is devoted to works of benevolence.

The Imperial pair have had three children—one son, who died in early infancy, and two daughters, Princess Isabella, Countess d'Eu and heiress presumptive, born in 1847, and the Princess Leopoldina of Saxe-Coburg, lately deceased. The Emperor is allied by marriage to the three royal families of Europe, his eldest sister being married to the late King of Portugal, his second sister to the Count d'Aquila, brother to the Empress and to the ex-King of the Two Sicilies, and his third sister to the Prince de Joinville.

The late Queen of Sweden.

(See page 8.)

A GREAT gloom was cast on the kingdom of Sweden and Norway in April last by the premature and almost sudden death of the Queen of Sweden. In December of the previous year her late Majesty's mother, the Princess William Frederick of Holland, was attacked with the malady which proved fatal, and at that inclement season the Queen of Sweden travelled to the Hague to be with her mother during her last illness. There can be little doubt but that the seeds of the Queen's fatal disease were then sown, her voyage and journey having been attended by many hardships and much fatigue. No sooner had she returned home from the painful scene of her beloved mother's deathbed, than the King of Sweden fell seriously ill. The Queen assidiously attended on him night and day, refusing all assistance—a devotion greatly to be regretted in its excess, as her husband and family have since mourned the loss of a beloved wife and mother. Her Majesty had won the affections of her people; she was adored by the entire country; she was extremely charitable, and performed kind actions in a most unassuming manner. Her talents and acquirements were of no mean order; she was an author of some repute, having under the *nom de guerre* of Jane Voncome, published a Swedish translation of an English work, entitled "The Labourers in the Vineyard," the profits of which were devoted to charitable purposes. Her late Majesty was the eldest daughter

Digitized by Google

of Prince William Frederick of the Netherlands (an uncle of the present King) and of the Princess Louise of Prussia, sister to the Emperor of Germany, whom she only survived three months. The late Queen of Sweden was born at the Hague on the 5th of August, 1828, and was married in 1850 to the then Crown Prince of Sweden. The Crown Princess of Denmark is her Majesty's only surviving child, her one son having died in early infancy.

The King of Spain.

(See page 9.)

So far back as October, 1868, it was announced that negotiations were going on between King Victor Emmanuel and Marshal Prim for the candidature of an Italian Prince to the Spanish throne. At that time Prince Humbert had been married only a few months, and in case of his demise the only successor to the throne would have been the Duke d'Aosta. It was precisely this Prince whom Victor Emmanuel wished to place on the throne of Spain. The Prince, who is devotedly attached to his wife and fond of domestic life, found himself very undecided as to the course he should take in the matter. He declined giving any positive answer, and submitted the affair entirely to the decision of his wife. The Duchess d'Aosta counselled him to refuse the candidature, and the Prince adopted the unusual course of asking advice and acting according to the counsel received. The King of Italy was very much displeased at this refusal, and it is said that a perfect family squabble took place at the Pitti Palace; but the Duke d'Aosta held fast to his resolution. Time passed on, and after the disastrous Hohenzollern candidature, the Duke d'Aosta was again selected as an eligible occupant of the vacant throne of Spain, and he was finally elected by a majority of 71 out of a Parliament of 329 members. A deputation of distinguished Spanish officials was sent from Madrid to Florence to offer the crown to the Duke of Aosta, and he accepted it in a modest, spirited, and sensible speech. The reply of the new King of Spain was greatly admired by his new subjects.

The King of Spain was born in 1845; he commenced his career as a captain in the infantry, and attained the rank of brigadier-general. He then left the army for the navy, in which he is a vice-admiral. He married in 1867 the Princess della Cisterna, the richest heiress in Italy. He has two children, one born since his accession to royal dignity. His heir, by a curious coincidence, bears the name of Emmanuel Phillibert, the name of that Prince of Savoy to whose genius Spain is indebted for the most signal victory her arms ever obtained over those of France.

The King of Spain has sense and courage, tact, discretion, and that happy mixture of dignity and affability, all of which high qualities he has displayed in his recent tour through his new kingdom.

The Bishop of London.

(See page 12.)

THE Right Rev. John Jackson, D.D., Bishop of London, is the son of a merchant of London, and was born February 22, 1811. He received his primary education under Dr. Valpy at Reading School, whence he proceeded to Pembroke College, Oxford; there he graduated in 1833, taking first-class honours, and gained the Denyer theological prize. From 1836 till 1846 he was head master of the Proprietary Grammar School at Islington, and during a portion of that time he filled the office of incumbent of St. James's, Muswell-hill, in the parish of Hornsey. In 1846 he was appointed rector of St. James's, Piccadilly, and in 1847 chaplain to the Queen. His next preferment was the Canonry of Bristol, and he was named select preacher before the University of Oxford in 1845, 1850, 1862, and 1866. He preached the Boyle Lectures in London in 1853, and on the death of Dr. Kaye in that year was made Bishop of Lincoln. On the removal of Dr. Tait in 1868 from the bishopric of London to the see of Canterbury, Dr. Jackson was translated from Lincoln to London.

The Bishop of London is a man of considerable power, and possesses the highest character for Christian work; his opinions with regard to the Rationalistic tendencies of the present day are well known. Since Dr. Jackson's appointment to the diocese of London he has taken an active part in the religious and charitable duties connected with it, particularly with regard to the association set on foot by his predecessor, the Archbishop of Canterbury, for providing increased church accommodation for the metropolis, known as the Bishop of London's Fund. During the Archbishop's illness, and consequent absence from England, the Bishop of London has officiated for him on several important occasions, such, for example, as at the marriage of Her Royal Highness the Princess Louise with the Marquis of Lorne, and at the opening of the Royal Albert Hall of Arts and Sciences.

The late Archbishop of Paris.

(See page 13.)

Now that the process of time has permitted men to disentangle the vague and confused impressions of horror and amazement produced by the late stupendous events in Paris, there can be no doubt that the execution of the Archbishop of Paris and his distinguished fellow-prisoners are, of all the terrible series committed by the Commune, the most execrated crime. The Archbishop of Paris and the Curé of the Madeleine especially excited the wrath of the Commune, because they were priests. For a century the priests have been most bitterly hated, not only by the "Reds," but also by the Rationalistic Liberals, and the dislike against them has been intensified in recent years, because they have arrayed themselves on the side of the Empire, and have sent the peasantry to vote against Republicanism. Archbishop Darboy was specially singled out for hostility because, although a liberal among the clergy, he was a sincere champion of the Napoleonic *régime*. The members of the Commune did not, indeed, seize him merely because he was a priest, but because all the other great officials had fled, and he remained at his post, as Monseigneur Affré had done during the revolution of 1848. The venerable prelate was removed from Mazas to La Roquette, and there shot on the 24th of May, 1871, and it is not a little remarkable that for the best part of a century scarcely more than one Archbishop of Paris has died peaceably and quietly in possession of his palace and dignities.

Georges Darboy was born in 1813, and had only attained the comparatively early age of fifty-eight at the time of his murder. He was educated at Langres, and in early youth gave evidence of the possession of those talents which eventually raised him to the exalted position he filled in the Gallican church. A few years later he became a Professor where he had formerly been pupil, and filled successively the chairs of Philosophy and of Dogmatic Theology. He was ordained a priest in 1836, and soon after was appointed curé of St. Dizier, near Vassey. In 1846 Monseigneur Affré, then Archbishop of Paris, appointed him Almoner of the College of Henry IV., and an honorary Canon of Notre Dame. After the death of Archbishop Affré, his successor, M. Sibour, bestowed increasing confidence on M. Darboy, and charged him with the important duty of religious inspection in the College of the metropoliton diocese, and he was also made editor of the *Moniteur Catholique*. In 1854 he went to Rome to take part in the definition of the dogma of the Immaculate Conception. In the following year he was made titular Vicar-General of Paris, and in 1859 was raised to the Bishopric of Nancy. His comparatively recent elevation in 1863 to the Archiepiscopal See of Paris will be fresh in the memory of our readers. In 1869 he went to the Vatican Council as the champion of Gallicanism, and from that position, together with his published opinions, he became, as a matter of course, the head of the opposition. He voted against the dogma of Papal Infallibility, and led a numerous body of prelates to His Holiness for one more protest and warning before he left Rome. While in Rome, it was sometimes said that Archbishops of Paris should be listened to, as they were a doomed race, and wore the crown of martyrdom as well as the mitre.

The late Archbishop was not unknown as an author; he had edited the works of Dionysius the Areopagite, and a new translation of the "Imitation of Christ," He had also published "Les Saintes Femmes" and "Les Femmes de la Bible." In 1864 he was made Almoner to the ex-Emperor, and subsequently a member of the Senate, of the Imperial Council on Education, and of Legion of Honour. He was buried at Notre Dame, on the 7th of June, with great pomp.

The Duke and Duchess of Argyll.

(See pages 16 and 17.)

THE Most Noble and Right Honourable George Douglas Campbell, eighth Duke of Argyll, was born on the 30th of April, 1823, and is the eldest son of John Douglas Henry Edward, seventh possessor of the dukedom since its creation, a hundred and sixty-eight years ago. The seventh Duke of Argyll was thrice married, the mother of the present duke being the second wife, Joan, daughter of John Glassel, Esq., of Long Niddry, in Haddingtonshire. The Duke of Argyll was but little more than twenty-three years of age when he succeeded to his long and magnificent array of titles, which include among them eight titles as baron, two as viscount, three as earl, two as marquis, and one as duke. The oldest barony, that of Campbell, dates back to 1445; the oldest earldom, that of Argyll, to 1457; the barony of Lorne dates back to 1475; but the most extraordinary accession of honours to the house of Campbell accrued in 1701, when the first of the house who wore the coronet of strawberry leaves was created at one and the same time Duke of Argyll, Marquis of Lorne and Kintyre, Earl of Campbell and Cowal, Viscount Lochow and Glenilla, and Baron Inverary, Mull, Morven, and Tirey—all of the titles then and previously conferred upon the race being exclusively, however, in the peerage of Scotland. It was not until 1776 that a Duke of Argyll was enabled to take his place in the House of Lords, the duke at that time being created Baron Sundridge and Hamilton, in the peerage of Great Britain. It is as Lord Sundridge that the Duke of Argyll takes his seat in the hereditary branch of the Legislature. Before the present chief of the clan Campbell had taken his place in the House of Lords, he had already, while known as Marquis of Lorne, attracted some share of public attention by his published writings. "A Letter to the Peers from a Peer's Son," was his first literary production, and appeared in 1842, when its author was little more than nineteen years of age. It had reference to a religious question then powerfully agitating the popular mind to the north of the Tweed—the matter of lay patronage in the Presbyterian Church of Scotland, the abolition of which lay patronage the then Marquis of Lorne distinctly recommended.

Another and a far more remarkable contribution to literature by the Duke of Argyll is his "Reign of Law," a thoughtful and in parts a really profound treatise—valuable as an illustration of its subject, and conciliatory in the best sense of the word. Another work, entitled "Primeval Man," was published by the Duke in 1869, in which the author discusses the speculations of Whately on the one hand, and of Darwin, Huxley, and Sir J. Lubbock on the other, on the antiquity and primitive con[illegible] of

man. The Duke of Argyll's latest literary effort is an interesting account of the antiquities of the island of Iona, under the title of "Iona."

The Duke of Argyll is or has been a Knight of the Thistle, Privy Councillor, LL.D., F.R.S., Trustee of the British Museum, Chancellor of the University of St. Andrew's, Lord Rector of the University of Glasgow, and President of the Royal Society of Edinburgh; and in 1855 presided with conspicous ability at Glasgow, over the annual meeting of the British Association for the Advancement of Science.

The Duchess of Argyll, to whom the Duke was married in 1844, was Lady Elizabeth Georgiana Leveson-Gower, eldest daughter of the second Duke of Sutherland. The Duke and Duchess of Argyll have six daughters and five sons, of whom the eldest is the Marquis of Lorne, married to H.R.H. the Princess Louise of England on the 21st of March, 1871.

Mrs. Scott-Siddons.

(See page 20.)

THE appearance on the English stage of an actress directly descended from that famous tradition, Mrs. Siddons, naturally excited great interest in April, 1867, when Mrs. Scott-Siddons first made her appearance. She had previously given readings as a species of preparation, and made her *début* as Rosalind in "As You Like It." Her exceptional personal advantages were greatly in her favour, as well as her youth and an unquestionable freshness and manner of voice. She displayed considerable intelligence in her rendering of the charming *rôle*, and a thorough appreciation of the *espièglerie* incidental to it. She subsequently sustained the parts of Juliet and Imogen with the propriety and refinement which characterise her style of acting.

Mrs. Scott-Siddons' personal attractions are of a very high order; her figure is slender and elegant, and her face strongly resembles both the celebrated portrait of Mrs. Siddons as the Tragic Muse by Sir Joshua Reynolds, and the lovely Gainsborough portrait in the South Kensington Museum.

Mlle. Marie Marimon.

(See page 21.)

FOR several seasons past Mlle. Marimon has been spoken of as one of the principal operatic singers of Paris and Brussels, but it was not until the early part of the season of 1871 that the English opera-goers were able to form an opinion on her merits. Those who had seen her in Paris at the Athenée chiefly knew her as an accomplished mistress of a style possessing little in common with Italian Opera; for though composed by the brothers Ricci, "Un Folie a Rome" and "Le Docteur Crispin," are little better than extravaganzas. In these and in the "Toréador" of the late Adolphe Adam, and other works of a cognate kind, the recent triumphs of Mlle. Marimon have been for the most part achieved. Nevertheless, it was generally understood that she had a wide repertory of operas at command, and was thoroughly at home in the works of the modern Italian masters. The performances of Amina in "La Sonnambula" and Maria in "La Figlia del Reggimento" certainly gave colour to this belief, for no singer has shown herself more intimately conversant with both the parts in all their phases, vocal and dramatic.

Mlle. Marimon's intonation is irreproachable, and her manner of phrasing rarely offends the critical judgment. Her voice is a pure soprano, flexible, of wide compass, and of a flute-like quality. The consummate ease and certainty with which she executes passages of "bravura" and embellishments of every kind is remarkable. She is also an excellent actress.

Mlle. Marimon was born at Liége at the close of the year 1845. Her exceptional talent for music early developed itself, and for upwards of four years she studied under Duprez, who highly appreciated her great facility for vocalisation. Subsequently she became a pupil of the celebrated M. Delsarte, the late great Parisian singing master.

Le Comte De Chambord.

(See page 24.)

THE Count de Chambord, after "biding his time" for forty-one years, is now spoken of as having some chances of yet ascending the throne of France, and restoring for a time the succession of the elder branch of the Bourbons.

The count is the son of that Duke de Berri who was sssassinated in 1820, and of Caroline Princess of Sicily, his wife, and was born seven months after the death of his father. The Duchess de Berri, being desirous that the birth of the young prince should be irrefutably attested by the evidence of contemporary witnesses, had the courage to personally present him to the view of the assembled multitude from the principal balcony of the Tuileries on the afternoon of his birth. He was baptised with great pomp, in water brought from the river Jordan by M. de Châteaubriand, and received the appellation of the "Child of Europe" and the "Child of Miracle;" whilst M. de Lamartine celebrated his glorious destiny in one of his finest "Meditations," the "Chant du Sacre." The education of the Duke de Bordeaux (his rightful appellation) was confided successively to the Dukes of Montmorency, de Rivière, and de Damas; they instilled into his mind the Legitimist creed, pure and simple, of the divine right of kings—a theory he holds to the present hour. When Charles X. abdicated the throne in 1830, he designated the Duke de Bordeaux, then ten years old, as his successor, and attempted to have him proclaimed king before the soldiers encamped at Rambouillet; but these dispositions were useless, and the Duke de Bordeaux found himself obliged to follow the fortunes of his family in exile. He sojourned for a period at Holyrood Palace, at Prague, and at Goritz, and, under the title of the Comte de Chambord, undertook a course of travel to complete his education. In 1843 he came to London, and stayed for some time in Belgrave-square, where he openly avowed himself an aspirant to the throne of France, and received with proper regal etiquette many of the chiefs of the Legitimist party—M. de Châteaubriand, the Duke de Fitzjames, &c.—who came over from France to present their homage to their rightful sovereign. Three years after this, the Count de Chambord married the eldest daughter of the Duke of Modena, who brought him a large dowry, and he then went to reside at the Castle of Frohsdorff, in Lower Austria, where he has since lived the life of a country gentleman. The Count de Chambord was at Paris with his mother when Louis Philippe was forced to fly from France in February, 1848. He saw but little prospect of advantage to himself in so sudden a revolution, and remained in a state of political inaction, protesting in letters "his love for France," and declared himself to be waiting for the day when France, weary of experiments, would turn her attention to him, and would utter his name as a pledge of peace and safety.

The Count de Chambord seconded the efforts of his staunch supporters by appearing from time to time at Ems, Cologne, and Wiesbaden, and receiving his adherents with kingly condescension and kindness. During one of his visits to Wiesbaden the first attempt was made to bring about the fusion of the two branches of the house of Bourbon, which is now stated to be an accomplished fact. The re-establishment of the imperial form of government in 1852 obliged the Count de Chambord to resume his expectant attitude, and his political manifestations were not confined to the publication of a few letters addressed on important occasions to the heads of his party, and brought to popular notice by the press. In this manner he declares himself in 1861 to be strongly in favour of maintaining the temporal power of the Pope, and avowed himself ready to "purchase with his blood the triumph of a cause which is that of France, of the Church, nay, of God himself."

Since the deposition of the Emperor Napoleon, the Count de Chambord has asserted his claims to the crown of France. Little is known of his character and talents beyond the limits of his own household or the narrow circle of the Legitimist chiefs, but the nature of his education and the tone of his published manifestoes seem to indicate that there can be no true accord between his aspirations and the popular institutions desired by many of the nation over which he desires to rule.

The Duke of Saxe-Coburg-Gotha.

(See page 25.)

THE presence of the Duke of Saxe-Coburg-Gotha at the opening of the Albert Hall in April last, was particularly welcome and appropriate. It seemed but fitting, though suggestive of sad memories, that the beloved brother of the late Prince Consort should witness the impressive spectacle of the opening of the vast edifice, sprung to a great extent from the intellectual seed sown by that enlightened Prince, and dedicated to the purpose of keeping his memory alive in English minds and hearts.

The reigning Duke of Saxe-Coburg is the son of Ernest III., the first of the line of Coburg. This prince had but two children, Ernest, and Albert the late Prince Consort. When Prince Ernest was barely five years old, and Prince Albert not yet four, they were removed from the care of the nurse (to whom they had hitherto been entrusted) to that of Herr Flörschutz, of Coburg, who from this time forward had the sole direction of their education until they left Bonn fifteen years later, at the close of their academical career. The boys seem to have been very happy at Rosenau and Coburg, where they associated with youths of their own age in the intervals of the time devoted to their careful and varied education. The two Princes received a solid and brilliant education, and Ernest showed remarkable talents for the acquisition of the natural sciences and for the study of music. He has had the advantage of extended travel, and, in company with his brother, visited France, Belgium, and England; whilst at a later period of his career, in 1836, he made a tour through Spain, Italy, Portugal, and Africa. He was entered at the University of Bonn,, where he specially devoted his attention to the study of political economy and philosophy. When his education was completed, he followed the usual custom of all German princes, entered the army, and rose to the rank of major-general of Saxon cavalry, to which he has since added the posts of general of cavalry in the Prussian service, and colonel of the Magdeburg Cuirassiers. His position in the Prussian army placed him in active service in the late war, through which he was on duty on the general staff of the Emperor of Germany.

During the last two years of his father's life Duke Ernest took an active part in the government of the Duchy of Gotha, and his great task on ascending the throne in 1844 was to endeavour to appease the jealousies aroused by the annexation of the Duchy of Gotha to the parent state.

Duke Ernest was always favourable to the principle of German unity, and he accepted a command in the war against Denmark, where he gained the battle of Eckerfurde in 1849, at the time when all hope of the unity of Germany seemed to have vanished. He united himself with the coalition known as that of the three Kings, and warmly pleaded the cause of the legitimate desires and requirements of the people. The private life of this Prince is marked by great simplicity, and he continues to devote much leisure to the cultivation of the arts and sciences. He is an accomplished musician.

The Duke of Saxe-Coburg-Gotha is married to a daughter of the Grand Duke of Baden. They have no children.

DESIGN FOR BORDER.

Digitized by Google

The Lady's Work Table.

Introduction.

THE latest novelty in fancy work is called by some "Roman," by others "Strasburg" work. A specimen is given in colours at the commencement of this Almanac. For cushions, footstools, borders, bannerets, it forms a most charmingly effective style of ornamentation. Some ladies have already worked trimmings of it for black silk dresses, but it is too heavy for the purpose, and, in our opinion, not all appropriate. But for any article of furniture it forms an admirable decoration. Directions for working it are given below. If satin is found too costly for lining alpaca might be substituted, and will prove very effective, although lacking the sheen which always renders satin showy.

Mignardise braid is now worked in with crochet, and most tasteful antimacassars are produced with the combination. An example of an antimacassar of this kind will be found in page 44, and some edgings in pages 40, 41. These three designs were procured from Paris.

Lacework still remains most popular, and there is more ambition among amateurs about their productions than formerly. Many ladies have essayed Greek lace, and even raised bone point, which is like carved ivory; and we have seen specimens of both varieties marvellously well executed, and as near perfection as possible. A design for Greek lace will be found among the illustrations.

Ticking work is in high favour, and much greater scope is given to this style of embroidery by the variety of ticking now manufactured. The choice is no longer confined to the black and white stripe, so familiar as covers for feather beds and pillows, but wide orange, scarlet, fawn, and blue stripes are now woven alternately with white stripes, and flowing graceful designs are embroidered in a variety of fancy stitches with braid intermingling. For country house these ticking covers to chairs, ottomans, and footstools are in excellent taste. Knitting, tatting, crochet, guipure d'art, and Berlin wool work all find workers, and great is the demand for good patterns in all these styles of fancy decoration. So far as space allows, the demand will be in some degree answered in the following pages.

Description of Coloured Plates.

1. BORDER AND INSERTION IN ROMAN WORK.

(See Frontispiece.)

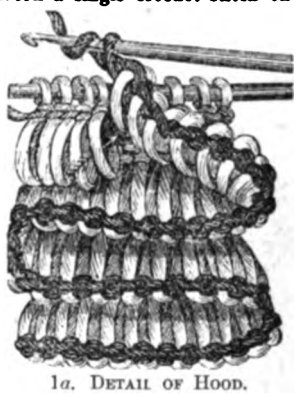
THIS coloured plate illustrates, in the best manner it is possible for printing to do, the new Roman or Strasburg work, which is the chief novelty of the season in the fancy-work world. The foundation is brown holland, the pattern is traced on it, and then run over with filoselle; lastly, the tracings are buttonholed, stitched over with filoselle, and the groundwork cut away when requisite. The colour of the holland and the fancy stitches are worked last. The holland is cut away when the embroidery is finished. It is easier to work if the holland is tacked on a piece of *toile ciré*. The work should be mounted on satin the colour of the furniture of the room to which the article may be destined, and the fringe should also be partially of the same colour. Our design will be found suitable for a border for either a Belgravian tea-table or an ordinary table-cover. By the addition of the insertion it can be made wider if desired. Both these patterns were supplied by Mesdames le Boutillier, 125, Oxford-street, from whom all particulars may be obtained.

2. BORDER IN CANVAS WORK.

THIS border is suitable for a variety of useful purposes. It would serve for curtains, portières. &c., or for alternate stripes with velvet for ottomans, chairs, cushions, footstools, &c. It is worked on Penelope canvas, with single Berlin wool. There is a slight difference in the stitch from the ordinary cross-stitch, as three threads of the canvas are taken lengthways instead of two, as is usually the case. This pattern was supplied by Mesdames le Boutillier, 125, Oxford-street, London.

1. Hood for Girl from Five to Seven Years Old (Tricot and Knitting).

MATERIALS.—2½oz. white and 1oz. of violet single Berlin wool, a tricot needle No. 9, and a finer short bone crochet hook, 2 steel knitting needles, No. 12, and a bone mesh ¼in. wide. The head piece and curtain of this hood are done in tricot, with white single Berlin wool. The head piece is commenced at the right side by 7 chain.—1st row. Raise the stitches, and work back plain.—2nd row. Increase 1 at the beginning and end, after the 1st stitch and before the last, and continue this increase in every row as far as the 21st, when there will be 47 stitches.—22nd to 36th rows. Plain, without increase, and in the following 21 rows decrease in the same proportion by working the 2nd and 3rd stitches as one, and the 2 before the last in the same manner, so that the number of stitches will be again reduced to 7. The rows without increase form the top of the head piece. When this is done, 2 plain rows must be worked along the front half of the head piece, to go round the face, and these should be done rather tightly, so as to keep in the edge. The 10 lower rows of the left hand side of the curtain (which is open at the back for nearly half its depth) are 60 stitches wide; in the 4th of these 10 rows a diminution is made in the centre, by taking up the 30th and 31st stitches together, in raising the row, and this decrease is continued in every alternate row (keeping the same line) throughout the whole depth of the curtain. Besides this, from the 7th of these 10 rows, the edge of the curtain next the front is to be sloped, by taking the 2 stitches before the last together, in every row. When the 10 rows are completed, another piece exactly similar must be worked to correspond, for the right-hand side of the curtain, the decreasing for the slope of the front edge from the 7th row now being at the beginning instead of the end of the rows, and in the 11th row this piece must be joined to the other, by working the row along both. The slope at the side, and the taking-in in the middle of both parts of the curtain, must be regularly continued; and beside these four diminutions, in the 12th and succeeding rows, the 3 centre stitches, immediately over the joining of the two parts of the curtain, are to be worked as one stitch. The entire depth of the curtain consists of 16 rows from the joining; when completed it is to be sewn to the head piece, and from the 13th row of the latter on each side (as far as which it goes plain) is to be somewhat fulled in. A cord 1¾ yards in length, composed of chain stitches, is, with the help of a bodkin, to be run through the top of the curtain, and serves to draw it in to the requisite size and fastens the hood under the chin. Tassels of white wool finish the ends of this cord. The ruche-like trimming, shown in detail in No. 1*a*, is done in looped knitting in the following way. Cast on 7 stitches with the white wool, knit 3 rows rather loosely backwards and forwards plain, and in every 4th row make 6 double looped stitches thus: Take off the 1st stitch, then, holding the mesh close behind the right-hand needle, insert the latter in the next stitch; pass the wool twice over both needle and mesh, and bring the double thread through the stitch; again insert the needle in the same stitch of the left-hand needle, to knit it from the back, and passing the thread, as before, twice over the needle and mesh, bring the double thread through the stitch once more, and then take it off the left-hand needle. Proceed in the same way with each of the other stitches of the row. The mesh must be kept in the loops till it is required to be used again. Knit the next row plain, taking the double stitches as one, so as to keep the original number of 7. Knit two more plain rows, then slip out the mesh and repeat the row of loops and the three plain rows alternately, till a sufficient length is done. Then, with the violet wool and the short crochet needle, do a continuous row of single crochet on the top of the white loops, from side to side, going from one row of loops to another, as shown in No. 1*a*. Work a single crochet stitch on the first white loop,



1*a*. DETAIL OF HOOD.

* take up the next on the needle, and bring the violet wool through it and the violet loop already on the needle; repeat from *. The hood and curtain are to be trimmed with this ruching in the manner seen in the illustration No. 1, and it is better to measure the lengths that will be required, and to make them each separately. Of course pink, blue, or ponceau wool might be used to edge the ruching if preferred, or the whole hood might be worked in scarlet wool and ruching of the same colour edged with black.

2. Knitted Hood for Girl from Five to Seven Years Old.

MATERIALS.—1oz of white Shetland wool, 2oz of ponceau, and 1½oz. of white single Berlin wool; two long wooden needles No. 10, an ivory mesh ½in. wide, and a short ivory crochet needle No. 14. This very simple hood is composed of a semi-circular piece, knitted in white Shetland wool, and a similar one in ponceau single Berlin wool as a lining. It is commenced by casting on 192 stitches on the wooden needles, which when knitted will measure about 32 inches, and is to go round the face and down the two straight sides of the curtain. (See preceding illustration.) It is knitted plain, in rows backwards and forwards, diminishing a stitch at the beginning of every row for the first 7 inches, for the next 3½ at the beginning of every third row, there being two plain rows between the diminutions; then again take-in at the commencement of every row for seven inches more, and afterwards 2 stitches are to be cast off at the beginning of every row till all the stitches are used up. It will be well to mark these various distances by tying in an end of wool of different colours, so as to be able to measure them correctly. The

lining must be knitted in the same way, to correspond exactly with this piece in size and shape; The ponceau wool, being somewhat coarser than the Shetland, will not require quite so many stitches either way, but must be worked to the measure. Both pieces must be pinned out, as often before described, well damped, and allowed to remain till dry; then the one knitted in the white Shetland wool is to have long and somewhat narrow spots worked over it at regular intervals with ponceau wool, in flat embroidery stitch. About three stitches of knitting in width are to be covered by 6 or 8 long flat stitches, 6 rows deep (taking care not to draw the work), and at intervals of 19 stitches, the spots of one row alternating with those of the last.

The trimming for the front of the hood (shown at No. 1*a*) is done in the following way, in looped knitting. Shorter needles of the same size as those used for knitting the hood will be found convenient. Cast on seven stitches with white single Berlin wool, knit 3 rows rather loosely backwards and forwards plain, and in every 4th row make six double looped stitches, thus: Take off the first stitch, then holding the mesh close behind the right hand needle, insert the latter in the next stitch, pass the wool twice over both needle and mesh, and bring the double thread through the stitch; again insert the needle in the same stitch of the left hand needle, to knit it from the back, and passing the thread, as before, twice over the needle and mesh, bring the double thread through the stitch once more, and then take it off the left hand needle. Proceed in the same way with each of the other stitches of the row. The mesh must be kept in the loops till it is required to be used again. Knit the next row plain, taking the double stitches as one, so as to keep the original number of seven. Knit 2 more plain rows, then slip out the mesh, and repeat the row of loops and the three plain rows alternately till a sufficient length is done to go round the face, to the commencement of the curtain on each side, which is to be 6¾in. deep in front and 8¾in. at the back. About 20in., or a little more than half a yard in length, will be found sufficient. Now, with the ponceau wool and the ivory crochet needle, do a continuous row of single crochet on the top of the white loops, from side to side, going from one row of loops to another as shown in No. 1*a*. Work a single crochet stitch on the first white loop, * take up the next on the needle, and bring the wool through it and the ponceau already loop on the needle; repeat from *. After the hood and lining are run together, the following crochet edging is to be worked round the curtain, commencing 6¾in. above the end of the straight side, and carrying it round to a corresponding depth on the other side.—1st row. With ponceau wool, * 3 treble (thread once over the needle) on the three first stitches, 2 Ch., passing over 1 of the foundation stitches; repeat from *.—2nd row. With white wool, * 3 DC. into space of 2 Ch. of former row, 2 Ch.; repeat from *.—3rd row. With ponceau, same as second.—4th row. With white, same as 3rd.—5th row. With ponceau, * 4 treble into space of 2 Ch., 2 Ch.; repeat from *.

For the strings, which draw in the head piece and curtain, make a chain of ponceau wool in two lengths of 24in. each, with white tassels at the end; these are to be drawn by means of a bodkin, in and out through the work, in a half circle, leaving the curtain of the proper depth, as before given.

The hood is fastened under the chin with a button and loop, the latter composed of ponceau chain stitches.

Pink or blue wool may be used instead of the ponceau, throughout the hood, if preferred.

3. Child's Dress (Crochet).

You require for this either white or grey four-thread fleecy wool for the ground of the dress, a colour forming a good contrast, say dark red or scarlet, for the pattern, one skein of black. Double Berlin wool will make it look much richer, but, of course, increase the expense. A little black single Berlin wool is required to work the pattern above the border. A crochet hook, 4 or 5.

The petticoat is crocheted in one large piece, and is joined up at the back with a needle. Commence with a chain of 240 in white wool, and work on this 18 rows of plain crochet tricotee. In the 19th row you commence the pattern. The coloured or pattern stitches are raised, and throughout the whole directions are worked in the same manner. To form a raised stitch, take up the loop, then the wool over the needle, and take it up again. You have, therefore, for every coloured stitch 3 loops of wool on the needle. In working them back work them off as one stitch, and in succeeding rows take up the loop that lies at the top of these raised stitches.—19th row. 3 coloured loops, 5 white, 11 times, 3 coloured; now work 42 white loops, then 3 colour, 5 white to the end of the row. The space of white is for the front of the dress.—20th row. 1 colour, 1 white, * 2 colour, 3 white, 2 colour, 1 white; repeat from*. When you come to the last three coloured stitches in the front work two colour on them as before, then 3 white. 4 colour, 32 white, 4 colour, 3 white, then 2 colour, 1 white, 2 colour, 3 white as before.—21st row. * 3 white, 2 colour, 1 white, 2 colour; repeat from * until you have worked over the last three coloured stitches in the 19th row; then work 1 white, 6 colour (the four middle of the six stitches should be over the four colour of last row); then work in white until one stitch before the next four colour in last row, and repeat this row backwards; the pattern is worked up the front of the dress, and half a row will only be given in the directions, as each side must correspond.—22nd row. 4 white, 3 colour, * then 5 white, 3 colour, until the six stitches of last row; the last coloured stitch worked will be upon the first of these 6 stitches, then 5 white, 1 colour; work the front and then this row backwards.—23rd row. 5 white, 1 colour, * 7 white, 1 colour; repeat from * to the last pattern before the front, then 6 white, 1 colour, over the single coloured stitch of last row, and on the following stitch also; work the front, and repeat as in other rows.—24th row. All white until the two last stitches of the border in the front of the dress, on these work 2 colour; after this row the pattern is only continued up the fronts.—25th and 26th rows like the 24th.—27th row. Work a coloured stitch on the last white one in the front and the following stitch, all the rest white.—28th row and the 29th like the 27th row.—30th row. Work with white until you have worked over the first coloured stitch of last row on the right-hand front side, then 2 colour: continue the row as before.—31st row. Like the 30th row.—32nd row. Like the 30th, but working one coloured stitch only.—33rd row. Work in white until you come to the last white stitch in the front of last row, over it and the following stitch work in colour; repeat this row 3 times, then repeat the 30th, 31st, 32nd, and 33rd rows. Work in this manner until you have in the whole work 67 rows; then reduce the work for the gathers to 112 stitches (these stitches are for the body), leave 5 loops in the front without decreasing on them; work three loops together, excepting just on each side the front, where work 2 together as often as necessary to make the right number work 1 row plain with white on the 112 stitches for the first row of

The Body.—2nd row. * 1 colour, 3 white; repeat from *.—3rd row. 2 colour, 1 white, * 3 colour, 1 white; repeat from *.—4th row. * 1 white, 3 colour; repeat from *.—5th row. 2 white, 1 colour, * 3 white, 1 colour; repeat from *. This is the last row of the border. You now work 6 rows plain with white, which brings you to the bottom of the armhole; for the first side of the back take up the first 30 stitches. and work 13 rows on them; fasten off. Now take up the last 30 stitches of the work, and crochet 13 rows. Take up the remaining stitches, leaving two stitches by each back unraised for the armholes; work 13 rows on them and fasten off. Take up 27 loops on the first back, then 2 together, 1 plain, the 2 first loops of the front together, plain to the two last loops on the front; these take up together, the first loop on the next back plain, the two next together, the rest plain; work all back; repeat this row 6 more times, always leaving the same stitch plain on the shoulders, and then work a row of DC. all round the top and down the right-hand back, and fasten off. On the other back work a row with white for the button holes, 3 DC., 2 Ch., 3 DC. Work next the border for the neck.—1st row. Black wool, in plain crochet tricotee, still reducing on the shoulders.—2nd row. Coloured as in the border, reducing as before.—3rd row. With black plain, and decreasing on the shoulders.—4th row. As the 2nd; then finish the neck by working 1 long on the first stitch, 1 Ch., 1 long, on the next and fasten off; the cord, which is made of the two wools, is run through the last row. A ribbon would be to many preferable.

The Sleeves.—Make a chain of 24 with white, take up 12 loops, work back, 3 Ch., take up the two first of these chains as loops, the 13 loops of last row, and 3 more; work in this manner until you have 36 loops on the needle, then work plain until you have 17 rows from the first row of 13 loops; decrease on each side the middle stitch in every row for the next 8 rows, then a row of DC., and fasten off. Join the sleeve up the arm, and then work the border round it in the same manner as round the neck. Sew the sleeves into the armholes. It is a nice finish to the skirt to work a row round the bottom of * 4 Ch., 1 DC. on the 2nd, 1 long on the first, 1 DC. on the bottom of the skirt; repeat from *.

4. Baby's Boot in Russian Crochet.

Materials—1oz. skein of pink, turquoise blue, or ponceau single Berlin wool; ½oz. skein of white ditto and 2 or 3 small skeins of black; an ivory crochet needle No. 14, a flat bone mesh three-eighths of an inch wide, and 8 very small jet buttons. In our model the tip of the boot is black, the rest pink, blue, or ponceau, and the whole is worked in rows of Russian or ribbed crochet, which is double crochet, but taking up the lower part of the stitch, or that nearest to the first finger of the left hand when holding the work. The boot is commenced at the toe by 7 chain with the black wool; work the 1st row in double crochet, putting 3 stitches into the 4th or centre stitch, and do 6 more rows in ribbed crochet, increasing in the same manner in each. 1 Ch. is to be made at the end of every row to turn with, and the 1st stitch of preceding row to be missed in going back; this is the case throughout, and will not be repeated again. When the 7 black rows or 3½ ribs are completed, there should be 9 stitches on each side of the centre one, or 19 in all in the row. Then change to the pink, or whatever colour is selected (finishing the last black stitch and making the Ch. to turn with it) and do 3 rows, putting 3 into the centre stitch as before, after which the two halves of the boot, which is open in front, are to be worked separately. In the following row work to the centre stitch and go back again. In the next, when you reach the centre, lengthen the row by making 14 Ch. for the height of the leg, and at the upper part of these a small gusset is to be made, to give width. For this purpose turn and work the first 6 stitches only, and back again; then 12 stitches and return; and afterwards work the whole of the stitches backwards and forwards for 13 rows, or 6½ ribs, which brings you to the centre of the back. Work the other half to correspond in every respect and crochet them together at the back. The neatest way of doing this is with single crochet on the right side of the work, taking up the front part of the stitch in the row next you, and the lower of that in the opposite one, on the needle at the same time, pass the thread through them and through the loop on the needle at once, and proceed in the same manner with each

Digitized by Google

stitch. When the boot is joined, work a row of long stitches (thread twice over the needle) along the top. On these is to be worked a band of looped crochet in white wool, to turn down over the boot. There are to be three rows of looped crochet, which is done in the following way. Raise a stitch (as in tricot) in the first long stitch of former row, hold the mesh close under the needle, and the wool being under the mesh, bring it over the mesh and needle twice, then carry the 2 loops formed by it through the stitch first raised, take up the wool again and bring it through the thick loop, which will fasten it; then raise a stitch in the next "long," and repeat. When the row is finished, slip out the mesh, without disturbing the stitches on the needle, and work the row back as in tricot, taking the thread through one loop, and then through two, the remainder of the row. For the 2nd row raise the stitches in the upright loops above the knot, work as in the former row, and at intervals of five white stitches do 1 with the black wool, leaving it at the back till again wanted. The 3rd row is all white, and this completes the band, which must be turned down, the loops pulled into their places, and the lower edge tacked through the boot. A narrow vandyked edge of the colour of the boot is next to be crocheted above the white band, thus: * 1 DC., 3 Ch., 1 DC. on the first of these Ch., miss 1 stitch of the foundation, and repeat from *. Two rows of plain crochet are to be worked down the left hand side of the opening in front, and on these the 4 buttons are to be sewn. On the opposite side, a scolloped strap to wrap over is to be crocheted, through which the buttons are passed. There are to be 4 scollops, each consisting of 1 DC., * 1 treble, 1 long, 1 extra long (thread three times over the needle), 1 long, 1 treble, 1 DC., and repeat from *, 2 of which stitches are to be put into each stitch of the foundation. These scollops are to be edged round, when completed, with black wool in single crochet, and a row of chain stitches, also in black, worked with a needle up the outer line of the strap.

The sole is done in ribbed crochet, of the same colour as the boot, as follows: Begin with 7 Ch., and one to turn.—1st row. 7 DC.—2nd row. 9 stitches in ribbed crochet, increasing by working twice in the 2nd, and in the last stitch but one.—3rd row. 9 stitches.—4th and 5th rows. 11, increasing as before.—6th, 7th, and 8th rows. 13 stitches.—9th and 10th rows. 11 stitches, missing a stitch of previous row, after the 1st and before the last, in the 9th row.—11th, 12th, and 13th rows. 9 stitches.—14th to 19th rows. 11 stitches.—20th and 21st rows. 9 stitches.—22nd row. 8 stitches, missing 1 in the centre. Sew the sole into the boot on the wrong side.

As these little boots are small in size, and intended for quite young babies, some people might prefer them to be white, in which case the tip would be pink, blue, or ponceau, instead of black; the vandyke edging round the top would be worked to correspond, and the scolloped strap edged round, and the row of chain stitches done with the same colour. Of course, the quantities for the wools would then require to be different.

5. Baby's Boot in Tricot and Crochet.

MATERIALS—½oz. skeins of ponceau and white single Berlin wool, 2 or 3 small skeins of black, 6 very small jet buttons, a fine tricot needle, No. 12, and a fine bone crochet hook. The leg of this little boot is worked in white wool, whilst the shoe part and sole are of ponceau, blue, or pink, done in tricot. The shoe is commenced at the toe with 7 chain, raise stitches in them, work back, and from the 2nd to the 15th row, which completes the height of the front, increase a stitch regularly on each side of the centre stitch. The side piece must now be proceeded with by working backwards and forwards to the stitch before the centre one, and in the first three rows a stitch is to be decreased each row at the edge next the sole, which will leave 14 stitches, with which continue to work backwards and forwards for 8 more rows, making 11 in all, to the middle of the back of the shoe. Then commence on the other side at the stitch next to the centre, and work a corresponding piece of 11 rows, decreasing a stitch at the edge next the sole, for the first 3 rows, then turn the work, and crochet the two pieces together from the heel upwards on the wrong side. Work a row of double crochet with ponceau wool round the upper edge of the shoe, and then follow, in imitation of a stocking, 5 rows of trebles (thread once over) in white wool. These trebles are worked backwards and forwards without breaking the wool, leaving a stitch on each side the centre one of the shoe, to form the opening, and at the beginning of each row 3 Ch. are made instead of the 1st treble. The last of these 5 rows, as will be seen in No. 3, is gradually raised towards the back, which is done by working 5 trebles, 4 long (thread twice over), 7 extra long (thread three times over), 4 long again, and 5 treble, after which do a row of trebles with ponceau. This boot is from a German model, and is higher in the leg than we generally make them here, so that, if preferred, the last raised row of white might be dispensed with and the row of ponceau trebles worked instead. Now with black work a row of double crochet along the top, continuing it down each side and round the opening in front. Down the left-hand side of the stocking work 4 rows of double crochet backwards and forwards to form a tongue, on which the three buttons are to be sewn; and on the other side, first a row of double crochet in ponceau, and then with white, a row of long stitches (thread over twice), through which it is easy to button the boot. The little scollops which will be observed on the shoe are done in black wool, commencing at the heel after the 6th row of horizontal stitches, counting from the top, and consist each of 5 Ch. fastened by a "single" into every alternate upright stitch, taking hold of both parts of it and following the line to the centre stitch, when 7 Ch. instead of 5 are taken again into the same stitch, then continue, as before, round the other half of the shoe. The sole is done in tricot as follows: Make 7 chain, raise the stitches and work back.—2nd row. 9 stitches, increasing after the 1st and before the last stitch.—3rd row. 9 stitches.—4th and 5th rows. 11 stitches, increasing after the 1st and before the last stitch in the 4th row.—6th, 7th, 8th, and 9th rows. 13 stitches, increasing after the 1st and before the last in the 6th row.—10th and 11th rows. 11 stitches.—12th, 13th, and 14th rows. 9 stitches.—15th and 16th rows. 11 stitches.—17th and 18th rows. 13 stitches.—19th and 20th rows. 13 stitches.—21st and 22nd rows. 11 stitches.—23rd and 24th rows. 9 stitches.—25th row. 9 stitches.—26th row. 7 stitches, and do a row of single crochet on these last stitches to complete the sole. The boot must be sewn to the sole on the wrong side, fixing the 7 stitches of the toe to those of the sole, and the centre of the heel to the seam at the back, holding the boot towards you so as to keep it in. The sole is purposely made somewhat smaller than the boot, so as to draw it into shape. The buttons must be so placed that when the white strap in front buttons over them, one row of the ponceau should show beyond it to correspond with the one on the outside, Make a chain of ponceau wool about 3-8ths in length, draw it in and out of the 1st row of white trebles, finish the ends with small tassels of the same wool, and tie it in a bow in front of the shoe.

6. Warm Glove for a Child (Knitting).

MATERIALS.—1½ oz. of light grey or partridge eider yarn or Andalusian wool, ½oz. of the same in bright violet, seven needles No. 17, ½ yard of violet sarsnet ribbon to match, 1¼in. wide, and a little round black elastic.

The cuff of these little gloves is double, for which 30 rows are first knitted in the grey or partridge wool, and when the glove is finished these are turned in and felled down in the inside. Cast on 72 stitches for the width of the glove, divided equally on 4 needles, 18 on each, and knit in rounds. The cuff as well as the whole glove is knitted in stripes of 1 plain, 1 purl, alternately, the plain stitches (after the first round) being *turned*, that is, knitted from the back, putting in the needle as if about to purl, which makes a more distinct and neater rib. When the 30 rounds for the cuff are finished, join on the violet wool and knit two rounds, then pass up the grey (giving it a single twist round the violet, taking care not to draw it too tightly, but just sufficient to bring the stripes opposite to each other, which must be done each time the colour is changed), and knit 2 rounds with it. Then two rounds with violet, 2 with grey, 10 with violet, 2 with grey, 2 with violet, 2 with grey, 1 with violet. 15 rounds of grey follow, 1 of violet, 15 again of grey, which bring you to the thumb, for which take off 16 stitches from the last needle knitted, (slipping the two that remain to the next) place them on 3 needles, and continue knitting round the thumb (endeavouring in the 1st round to avoid a gap as much as possible) for 16 rounds, then point it by decreasing a stitch at the beginning of each needle, till only 1 stitch remains on them, which take up with a needle threaded with the wool, turn the thumb inside out, draw them together, and fasten off securely on the wrong side. When you begin to knit round the thumb, fold the other needles together and pass the points through the work, that they may be less in the way.

The glove itself must now be continued with the remaining fifty-six stitches, beginning at the end of the needle on the right of the thumb. 4 stitches on each side of the thumb are to be formed into a little pointed gusset, for which purpose, when you come to the last 4 stitches of the needle, slip the 4th, knit the 3rd, pass the slipped stitch over, knit the next 2 as usual; then take up or make 2 stitches on the thread that remains where the thumb was commenced to fill up any gap there may be), and on the other side of the thumb work the 2 first stitches as usual, and knit the 3rd and 4th together, after which continue the round as before. Next round, the 3rd stitch before the thumb is to be slipped, the 2nd knitted, and the slipped stitch passed over it; the two stitches made last round are also to be taken together, and the other side of the gusset proceeded with in the same way. Next round, it is the 2 last stitches of the needle that are to be diminished, and the 2 first of the next, not counting the extra stitch between them; and in the next, the last of the right-hand needle must be slipped, the extra stitch, and the first of the next needle knitted together, and the slipped stitch passed over, so as to form but one stitch, which completes the gusset; then finish the round. After this 16 plain rounds are to be knitted, and then the stitches divided on the 3 needles as for the toe of a stocking, the first needle having a number equal to that of the other two. The diminutions are now to be made at the beginning and end of the long needle, and at the beginning of the 2nd and end of the 3rd. Knit the 1st stitch, knit the next 2 together, and at the end knit the 2 before the last together. At the beginning of the 2nd needle do the same, and at the end of the last; then 1 row without decreasing. Continue in this manner decreasing, in alternate rows, till you bring the stitches to 24 in all. Take these up on a piece of wool for the convenience of turning the glove inside out. When this is done take up the 24 stitches on two needles, and knit them off together; then cast off. Run in the elastic at the wrist, and place a bow of the ribbon on the top of the hand.

7. Knitted Knee Caps.

MATERIALS required—2 oz. of 3-thread scarlet fleece, and five steel needles, No. 12. For the lower edge cast on 100 stitches on 4 needles, and knit round in ribs of 2 plain, 2 purl, for a depth of 4½ inches. Then knit plain

to within 10 stitches of the end of the round, turn back, and, taking off the 1st stitch, knit plain to within 10 stitches of the other end; this will leave 20 stitches, which can be slipped on one needle and left till required. The other 80 stitches are to be knitted plain, in rows backwards and forwards, like the heel of a stocking, for the knee piece. The 1st stitch of every row is to be taken off without knitting; but these edge stitches must be kept rather tight, as they have to be picked up afterwards, and if left loose are apt to make holes. From the 10th (counting from where the ribbing is left off) to the 70th row, a stitch is to be decreased at the beginning of each by knitting the 2nd and 3rd stitches together, so that at the conclusion 20 stitches only will remain. Then unite the stitches again in a round, by picking up and working 30 stitches from the edge on both sides, which, with the 20 stitches left on the needle at the beginning of the knee-piece, and the 20 remaining at its conclusion, will again make the original number of 100, which must be knitted in ribs of 2 plain, 2 purl, as at the commencement, for a corresponding number of rows, and when these are completed cast off loosely. If wished a size smaller, use No. 13 needles.

8. Cross-over Shawl.

MATERIALS required for this fichu—Half a pound of four-thread maroon-coloured fleecy wool, four shades of green for the border worked on it, one skein of partridge, and a wooden tricotee hook, No. 3 or 4. This fichu is worked in one piece. You commence by working the whole of one shoulder and front, also half the back in one piece; from this the other front is worked without any join. When the ground is finished it looks unshapely; but if you remember that the right-hand corner of the part commencing the fichu is the point of the back, the shape will be understood. The whole is worked in crochet tricotee. Make a chain of 40 stitches.

1st row. Raise 9 stitches only, work them back, then 5 Ch.—2nd row. Take up each of the 5 Ch. as a loop, then 4 stitches on the 9 of the first row, then increase one stitch by working a stitch between this last loop and the next, taking up the horizontal stitch; take up the next loop of last row, increase a loop again, then take up the next four loops of last row, and four more loops of the foundation chain; work all these off. Make 4 chain for the increasings on the right-hand side,—3rd row. Take up the loops of the chain, then 10 stitches on the last row. Increase before and after the next loop, which is the middle stitch, and must be marked by a white thread, then take up the remaining stitches of last row, and 4 more on the foundation chain; work back, making 5 Ch. at the end.—4th row. Work as the last row, increasing before and after the centre stitch, and take up four more on the foundation chain; work back, making 4 chain only at the end of the row.—5th row. The same as the last, but working 5 chain instead of 4 at the end of the row.—The 6th row as the 4th row.—The 7th row as the 5th row.—The 8th row. Raise the stitches as before at both ends, and increase in the centre. Make 4 chain at the end of the row, at the outside.—The 9th row.—Raise all the stitches as before, but make no increasings in the middle of the work. Work 3 Ch. at the end, and put them on the needle; work them back and make 3 more chain.—The 10th row. Take up the 2 next loops of the 3 chain. Increase in the middle of the work, and raise three loops only at the end of the row by making 3 chain and putting them on the needle as before; work them off. Make 1 chain only at the end of the row.—11th row. Make 1 stitch at the other end of the row, and no increasing in the middle of the work.—12th row. Increase one at each end, and on each side the middle stitch as before. The end of this row is the corner of the back.—13th row. In this row you commence the border of leaves. This is crocheted in as you work, in four shades of green wool. Those who do not wish to have the trouble of crocheting the border with the ground can work it on afterwards. To crochet it work 2 loops with maroon, 1 of the darkest green, * 4 of maroon, 2 of the same green, 15 maroon, 1 green; repeat from *. At the end of the row work 2 maroon. Work the stitches back with the right colours. In the following rows the border will not be given in detail, as the space required for the pattern cannot be spared, and it can easily be worked by the design, taking care throughout to leave two stitches at the edges.—The 14th to the 16th rows. Continue to work the border, and increase in the middle of the pattern in alternate rows.—17th row. Increase one stitch on each side the 16th stitch on both sides the work.—18th row. Increase in the middle of the row only.—19th row. Plain.—20th row. Plain.—21st row. Increase on both sides the work on each side the 16th loop.—22nd row. Plain.—23rd row. Like the 19th.—24th. Like the 22nd row.—25th. Like the 23rd row.—26th row. Increase on each side the 16th loop on both sides the work.—27th row. Plain.—28th. Plain.—29th row. Increase in two places, as in 21st row.—30th row. Plain.—31st row. Plain.—32nd row. Raise 46 stitches only, and work back. Continue to work one leaf only for the border, as you now commence what will be the other side of the front of the fichu. The first 17 stitches will be required for this single row of leaves, and they must be continued to the end of the pattern.—33rd row. Raise 45 loops, work back.—34th row. Raise 44 loops, work back.—35th row. Raise 17 loops, work back.—36th row. Raise 22 loops, work back.—37th row. Raise 27 loops, work back.—38th row. Raise 32 loops, work back.—39th row. Raise 37 loops, work back.—40th row. Raise 43 loops, W.B.—41st and 42nd rows. Raise 43 loops, W.B.—43rd row. Raise 37 loops, W.B.—44th row. Raise 32 loops, W.B.—45th row. Raise 27 loops, W.B.—46th row. Raise 22 loops, W.B.—47th row. Raise 17 loops, W.B.—The 48th, 49th, 50th, and 51st rows have 42 stitches.—The 52nd row. Raise all the loops of last row, work the two first back together, so decreasing a loop; the rest work plain. In the next row these two loops are taken up as one stitch.—*53rd row, 54th, and 55th plain.—56th row like the 52nd row. Repeat these four rows until you come to the 110th row, when you should now have 27 stitches; work them off, and fasten off. This does not quite finish the fichu, as it requires a small straight piece of crochet sewing firmly with wool under the point at the back, which not only makes the back rather deeper, but forms a deep band round the back, to which the ends of the front are fastened. Make a chain of 18 for this piece, and on it work 40 rows of crochet, and work the leaves on it; then sew it in its place.

THE BORDER.—Work all round the fichu a row of double crochet with the maroon wool, and on the piece sewn to the back also, then at the two ends of the fichu, that is the part where you finished with the 110th row, and the corresponding end of the work. Work on the row of double crochet a row of DC., making in this row three loops of 3 chain each, and missing 3 DC. under the loops; these loops are for the button holes. Then outside the fichu work a border in the following manner.—1st row. With the 2nd shade of green, work one long on the first stitch, * miss 2 DC., 1 long on the following DC., 4 Ch., 1 DC. on the first of this 4 chain, 1 long on the same DC. as the last long; repeat from *.—2nd row. With partridge wool, * work 1 DC. on the 1st of the next 4 Ch. stitches in last row; 2 Ch., 1 DC. on the 3rd of the 4th Ch. stitches, therefore at the top of the loop of chain in last row; 2 Ch., 1 DC. on the 4th of the 4 Ch.; repeat from *. Then crochet these two rows in the inside of the fichu. Put three buttons on each end of the band sewn to the fichu, and on these buttons loop the ends of the fichu, crossing them well over the chest.

9. Gentleman's Shooting Waistcoat (Knitting).

OUR model was knitted in black single Berlin wool, with two needles, No. 12 (but very dark chocolate or myrtle green might be substituted at pleasure), with a border of violet wool, also knitted. The fronts are done in the pattern to be described, the back in brioche stitch. For the carrying out of the work, the best plan is to cut a pattern in stiff paper from a well-fitting waistcoat, and use it as a guide for the size and shape of the pieces of knitting. Our model was about 25in. in depth, and 33½in. (when not stretched) in the whole width; but, as no given measurement will fit everyone, it is better to do as we have said. In measuring the depth and width of the points, allowance must be made for the border to be added afterwards, consisting of 15 rows of ribbed knitting. The piece for each front is begun at the lower edge by casting on 73 stitches (each repetition of the pattern takes 7, and the 3 are added at the end to make both edges uniform).—1st row. * 1 turned (a plain stitch, but knitted from the back), 1 purl, 1 turned, 1 purl, 2 plain, 1 purl; repeat from *; at the end of the row add 1 turned, 1 purl, 1 turned.—2nd row. 1 purl, 1 plain, 1 purl, * 1 plain, 2 purl, 1 plain, 1 purl, 1 plain, 1 purl; repeat from *.—3rd row. Like the 1st.—4th row. Like the 2nd.—5th row. * 1 turned, 1 purl, 1 turned; of the 4 next stitches knit the 4th first, plain, and pass it over the 3 others (to facilitate this, put the point of the right-hand needle into the stitch as if about to purl it, and loosen it by drawing it forward before knitting it); then do the same to the 2nd of the four stitches, knit it plain, and pass it also over the first, then the 3rd in like manner, and lastly knit the 1st stitch also plain; repeat from *, at the end of row knit 1 turned, 1 purl, 1 turned.—6th row. 1 purl, 1 plain, 1 purl, * 1 plain, 2 purl, 1 plain, 1 purl, 1 plain, 1 purl; repeat from *. These 6 rows repeated compose the pattern, and it has this peculiarity, that it forms two totally different patterns on the two sides of the work, and by no means the least pretty is that on what would be called the wrong side of the knitting; so that after knitting a sufficient portion to be able to judge, the worker would have the option which of the two to make the outside of the waistcoat. To make the slits for the pockets, shown in the illustration, when you have come to the place (which must be marked in your pattern), as many stitches as are necessary for the opening must be cast off, and replaced in the next row by casting on an equal number. If the pattern on the wrong side of the work be selected for the outside, these stitches must then be cast off (plain, not purl) in the 2nd or 4th row of the pattern which are at the back, and replaced in the next front row; and this is almost the only difference that need be made. When you have reached the arm-hole, cast off on that side in different rows, as may be required by your pattern, the necessary number of stitches to shape it, and then continue the front till you slope it for the shoulder and neck to the pattern.

FOR THE BACK.—Cast on 110 stitches, and knit in brioche stitch as follows: after 1 purl row—1st row. Take off the 1st stitch, * bring the thread forward, slip 1 as if about to purl it, 1 plain, and repeat from *.—2nd row. Thread forward, slip 1 as if about to purl, knit the next stitch and "the thread forward" of last row together; repeat from *. If there is a stitch left at the end, knit it plain, and slip it in the next row, as in the 1st row. This second row is repeated till the back is high enough to slope for the shoulder. In taking in stitches at the beginning of the rows on each side for this purpose, knit the stitch, and thread forward, always as one stitch. The fronts and back must now be sewn together at the shoulders and side. For the border, 4 or 5 needles No. 12 will be required; pick up the stitches all along the lower edge of the waistcoat, knitting them one by one as you take them up (like the heel of a stocking), and placing as many on a needle as it will conveniently hold. With these rib 15 rows, 1 plain, 1 purl, increasing one at the beginning of every row (for the mitring at the corners), and cast off. Now take up the stitches

Digitized by Google

down both fronts and round the neck in the same manner, and rib the same number of rows, increasing 1 at the beginning of each, for the corners. In the border of the left front 7 buttonholes must be made at regular intervals, by casting off 3 or 4 stitches, replacing them in the next row by casting on an equal number; when the 15 rows of ribbing are done, cast off, and without breaking the wool, pick up the edge stitches of the sloped corners of one front and the waist, each on a needle, and knit them off together, taking a stitch from each needle at a time, and then cast them off, which will form the mitre neatly. The other corner must be finished in the same manner. Then pick up the stitches round the armhole on 3 needles, knitting them as you take them up, and rib them round to correspond with the rest of the border. The pockets of twilled grey lining are then to be put in, the outer edge of the waistcoat bound with black braid, and buttons sewn on the border of the right front.

10. Scarf (Crochet).

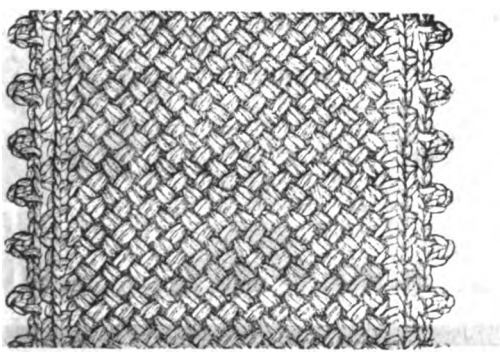
You require for this 1oz. of either white Andalusian or Shetland wool, and 1 of coloured. It would be very warm and soft if worked in some of the new wool introduced by Mrs Mee. A very fine bone crochet hook is also required, a netting needle, and a mesh half an inch wide. You commence the scarf by working first the foundation or under stripe in white wool; this is shown in the detail No. 10*a*. Make a chain 31½in. in length, and work back on it a row of 1 long on the 4th Ch.,* 1 Ch., miss 1 Ch., 1 long or the thread once round the needle on the next; repeat from *. Work three more rows in the same manner, commencing each row with 1 long on the first long of the last row. The upper stripe consists of a row of leaves; these are formed by folding the crochet when finished and trimmed with the netting every 2¼ inches, making the fold half an inch deep. The illustration No. 10*a* shows the manner of doing this; the stripe must be stitched together with the coloured wool at these distances, and at the same time sew it to the under stripe. This requires very neatly doing, as it should have the appearance of a separate fringe round the tip of the leaf. For the stripe forming the leaves make a chain 45 inches in length; on this work three rows of treble stitches, or the thread twice round the needle, before taking up the next stitch. The fringe is netted separately on a coloured thread, and is sewn neatly round the stripe. Finish the ends with tassels of the coloured wool.

11. Scarf (Crochet).

This scarf is very quickly made, and is very easy to work. You require ½oz. of grey, white, and black single Berlin wool, or any other kind. The three different colours are worked in long stripes of plain treble crochet, on a chain made three times the length the scarf is required. They are then loosely plaited together, taking care not to twist the work. Another stripe is worked in white the length the scarf is required, and sew the stripe on it. Finish the ends with a tassel of wool made of all the three colours mixed together.

12, 12a, and 12b. Knitted or Tricot Braces (in Silk) for Gentlemen.

There are so few things to be made in fancy work suitable for gentlemen, that many ladies may be glad to have directions for braces, either in knitting or tricot, which are both strong and very handsome, for particular occasions, such as cricket matches and other out-of-door sports. These are worked in the soft twisted crochet silk (to be had at Helbronner's, 265, Regent-street, in long skeins for knitting), which has a very rich appearance, and they look particularly well in a soft shade of grey, in ponceau, or the bright Eugénie blue. From 2½oz. to 3oz. of this silk will be required for a pair, and for the knitted braces, which are done in a pretty and effective kind of plaited or basket-work stitch, the detail of which is seen at No. 12*a*, three short steel needles, No. 14, are to be used.

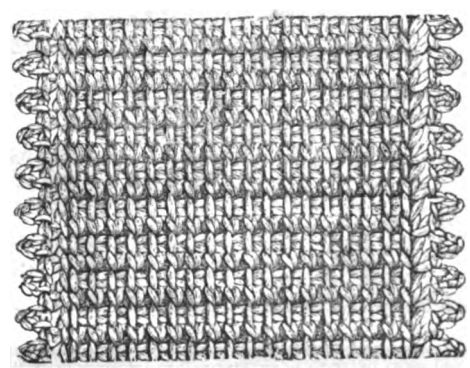


12*a*. Detail of Braces No. 12 (Knitting).

The braces have a crochet notched edge on both sides. It would be as well to practise the stitch a little with knitting cotton before commencing with the silk, for the beauty of the work depends on the latter looking bright and fresh, and on the same account it is desirable to keep a piece of tissue paper under the thumb of the left hand which holds the work. The knitting must be done loosely, as it not only makes the braces more elastic, but tends to facilitate the execution of the stitch, which is rather a troublesome one at first.

Cast on 21 stitches for the width of the strap (the crochet edges to be worked afterwards will add to it considerably) and for the first row. Take off the 1st stitch, bring the thread in front of the 2nd, and take it off also, as if about to purl, pass the thread back; now insert the point of the right-hand needle from the back between the 3rd and 4th stitches, and, putting it into the 4th stitch, draw it out to the side behind and beyond the 3rd, and knit it plain; then knit the 3rd plain in the usual manner, and slip both stitches off the left-hand needle. Knit every two stitches in this way, taking the last first, as just described; the last stitch of the row is knitted plain.—2nd row. Take off the 1st stitch, leave the thread behind the 2nd, and take it off also, as if about to purl, after which the thread is kept in front all the row; purl the 4th stitch in the usual manner, then purl the 3rd, and slip both off the needle. Knit every pair of stitches in the same manner; the last stitch of the row to be knitted plain.—3rd row. Like 1st.—4th row. Like 2nd; and repeat these two rows alternately for the length of the brace. It is better to measure, if possible, from an old pair of braces the exact length required, as the silk being expensive, it is not desirable to knit them longer than is actually necessary. After the first 12 rows, a button hole must be made, by dividing the stitches, beginning on the right side of the work, knit 11 in the usual way, like 1st row, turn and work them back, like 2nd row, and continue knitting backwards and forwards in the same pattern as before for 12 rows, which will be the depth of the button hole. Do not cut off the silk, but leave it for the present, and with another piece commence at the other half of the stitches, leaving a sufficient end to fasten off securely afterwards. To make an equal number of stitches with the other side (there being only 10 left) knit the first of these, first from the back, then, bringing the thread in front, take the same stitch off, thus making 2 of it, put the thread back, proceed with the next two stitches as usual in the pattern, and continue so, knitting the last one plain. The other rows are to be done as usual, till 12 have been knitted to correspond with the other half of the button-hole; then beginning from the outside edge of the strap, with the silk originally left there, proceed to unite the two sides by knitting the whole way across. When you come to the beginning of the left-hand side of the button-hole (an extra stitch having been made there which would throw the pattern out), insert the needle between the 2nd and 3rd stitches, instead of the 1st and 2nd, and bring out the 3rd stitch to the side beyond the 2 others, knit it plain, then knit the 2 first stitches together, treating them as one stitch; this will restore the whole number in the row to 21, and the pattern will be quite right. Cut off the silk with which the second half of the button-hole was knitted, leaving sufficient to fasten off very securely, and proceed to knit on as usual till you have the length required for one of the straps of the brace; cast off. A second must be knitted to correspond with this exactly.

The crochet notched edge, on both sides and round the two ends of these straps is done in the following manner with a fine ivory crochet to suit the silk: Beginning at the right-hand corner of the button-hole end of one of the straps, raise a loop in 3 successive edge stitches, keeping them on the needle, then take the thread through the 3 loops at once, make 4 Ch. and a DC. on the 1st of these to form a picot, and * passing over 1 of the edge stitches, raise loops in the 2 next (the loop already on the needle making the 3rd), pass the thread through the 3 loops at once, make a picot as before, and repeat from * all round. The narrow straps in front may be either knitted plain backwards and forwards, casting on 12 stitches, and making 2 buttonholes, as shown in No. 12, or, which is the better plan and saves work, have proper leather ends with elastic put to them at the shop where they are sent to be made up; gilt buckles should also be added, which are very ornamental, and the braces may be lined with white sarsenet ribbon, or coloured to match, if desired.



12*b*. Detail of Braces No. 12 (Tricot).

For the braces in tricot, which are worked with the same silk as the preceding, make 14 Ch. as a foundation.—1st row. Miss 1st Ch., raise a stitch in the 2nd, and make a Ch. through the loop, do the same in each of the remaining chain stitches, keeping all the loops on your needle; the Ch.

through each loop must not be omitted, as it forms the peculiarity of the pattern—2nd row. Work back as in ordinary tricot, and make a Ch. at the end to turn with; repeat these two rows for the length of the strap. After the first 12 rows make a button-hole as in the knitted braces by dividing the stitches and working 7 of them backwards and forwards till you have the depth of the button hole, then, leaving the silk at the outer edge, take another piece and commence working the other 7 stitches backwards and forwards in like manner for an equal number of rows. When these are done, begin again at the outer edge, where the silk was left, and proceed to raise stitches all the way across, and work them back, which will unite the two sides of the button hole, and continue working the pattern till you have the length required for the brace. These braces also have a notched edge on each side.—1st row. Alternately * DC. in one of the edge stitches, 1 Ch., miss 1; repeat from *.—2nd row. Make a loop in each of the 8 first stitches of former round, bring the thread through the 3 at once, 4 Ch., DC. in first of these to form a picot,* miss a stitch of former round, and raise loops in the 2 next (the loop already on the needle making the 3rd), pass the thread through the 3 loops at once, make a picot as before, and repeat all round.

13. Square of Tatting and Crochet.

THE inside of the square is tatted; round the tatting 5 rows of crochet are worked, and then the edge. These squares are very effective if joined to a narrow coloured ribbon, or if worked in fine cotton, joined together, and laid over coloured satin for a cushion. Commence with the stars in the centre, and work, quite close together, eight ovals, each oval of 8 double, 1 purl, 8 double. After the last join to the purl in the first oval, then join a second thread, * and work over it 5 double, 1 purl, 5 double, join to the purl on the next oval, and repeat from * all round, and fasten off. You next work the border of tatting round the star. Commence with the first oval on the side, and work for it 4 double, 1 purl, 4 double, join to a purl on the second thread of the star, 4 double 1 purl, 4 double, draw up, leaving the oval open about quarter of an inch, * leave quarter of an inch of cotton, and work the 2nd oval of 4 double, join to the purl on the last oval, 4 double, join to the next purl on the star, 4 double. 1 purl, 4 double, draw up as before; leave an inch of cotton, and work the first corner oval, 6 double, join to the purl on the last oval 4 double, 1 purl, 4 double, 1 purl, 6 double; draw up. Work close to this another oval like it, then leave an inch of cotton, and work an oval like the first side one, joining it to the last oval and also to the next purl on the star, and repeat from * all round, and fasten off at the end of the round. The next 5 rounds are worked in ribbed crochet. Commence on the corner oval and work * over the inch of cotton, 20 DC. in the opening of the next oval, 3 DC. between the two ovals, 3 DC., then 3 DC. again, and 20 to the next corner; repeat from * all round.—2nd round. Take up the front of the stitch only, and work 1 DC. on each stitch of last row, excepting in the corners where work 3 DC. The 3rd row is worked like the second, but is worked from the back of the stitch. In the following row work from the front, and so on. The outside round of tatting is worked with two threads. Commence on the corner DC. with the shuttle cotton for the corner oval, and work for it 6 double, 1 purl, then 1 double, 1 purl three times, 6 double; draw up, and knot into the DC. again. Then over the 2nd thread work 6 double, join to the last purl on the oval, 1 double, 1 purl 6 times, 6 double; divide the side of your work into four, and join the thread to the DC. falling at the quarter. Then repeat from * to the next corner, where work as before, and fasten off at the end of the round.

14. Tatted Cover.

THIS lovely pattern is adapted for d'oyleys, pincushion covers, &c. You must use very fine crochet cotton, and the finest Penelope crochet hook. You commence the pattern by working the four corner medallions; these must all be worked before any other part. Commence by making with the crochet hook a chain of 28, draw the cotton through the last stitch, and put the loop over your hand; on this work an oval of 5 double, 1 purl, 5 double, draw up, loop the cotton into the 24th chain stitch, and work another oval in this stitch of 8 double, 1 purl, 8 double, draw up, loop the cotton into the 20th chain stitch, and work another oval of 10 double, 1 purl, 10 double, draw up, loop the cotton into the 4th Ch. from the last, and work an oval of 12 double, 1 purl, 12 double, draw up, loop the cotton into the 4th chain stitch from the last, and work another oval of 12 double, 1 purl, 12 double, draw up, loop the cotton into the fourth chain on the foundation, work an oval of 10 double, 1 purl, 10 double, loop the cotton into the next fourth chain stitch, and work an oval of 8 double, 1 purl, 8 double; draw up. Now loop the cotton into the first chain stitch, and work three ovals close together of 5 double, 1 purl, 5 double. When the last is worked, loop the cotton into the fourth chain stitch again, and work an oval of 8 double, 1 purl, 8 double; draw up. Loop the cotton into the 8th chain, work an oval of 10 double, 1 purl, 10 double; draw up. Knot the cotton into the 12th chain, and work an oval of 12 double, 1 purl, 12 double: draw up. Loop the cotton into the 16th Ch., work another oval of 12 double, 1 purl, 12 double; draw up. Knot the cotton into the 20th chain, work an oval of 10 double, 1 purl, 10 double; draw up. Knot the cotton into the 24th Ch., work an oval of 8 double, 1 purl 8 double, knot the cotton into the 28th Ch., and work an oval of 5 double, 1 purl, 5 double, draw up, take the crochet hook and work a chain of 7, 1 DC. on the purl at the top of the 1st small oval in the spray, * 4 Ch., 1 DC. on the next oval; repeat from * all round the spray; at the end work 4 Ch., 1 DC. on the 3rd of the 7 Ch., and at the top of the spray work 6 Ch. between the three ovals of 5 double instead of 4; on this last round work a round of double crochet, taking up each stitch of last round; on this round work a second round of double crochet. 3rd round of crochet. 5 Ch., the first two of these five chain are for the first long, * miss two DC. stitches, 1 long on the next DC., 2 Ch.; repeat from * 12 more times, then repeat three times, leaving 1 DC. only between each long stitch; this is at the top of the medallion. The 5th round work as last, putting each long stitch over the long stitch of last row, and working one extra chain stitch between the long stitches; then fasten off securely. Now take the shuttle, and join the thread to the 2nd chain stitch, and work an oval of 3 double, 1 purl, then 3 double, 1 purl thrice, 3 double, draw up, join to the last chain stitch in the same space, and leave a little cotton, and work an oval like the last, joining to it in the first purl stitch, join to the centre purl in the next space, repeat from * all round the medallion, at the end fasten off. Work another row of ovals like the last, leaving them rather open, and joining the cotton to the top purl stitches of the ovals in the last round. Commence the round by joining to the 3rd oval of the last round, and finish on the 2nd oval from the end. This forms a medallion. Work the other three. Then commence the centre star.

THE CENTRE STAR.

Commence with the middle, and work a ring, 1 double, 1 purl, then 2 double, 1 purl, 7 times, 1 double, draw up. Knot the cotton into the first purl and make an oval of 8 double, 1 purl, 8 double, draw up, knot the cotton into the next purl stitch, and repeat from * all round the ring, making 8 ovals, then knot the cotton into the purl stitch at the top of the first oval, and join a second thread to this one, and work over the second thread, 5 double, 1 purl, 5 double, join to the purl on the next oval; repeat all round, joining at the end neatly to the first purl. With the shuttle only, work just over the purl of the first oval an oval of 5 double, 1 purl, 5 double, draw up, leave a little cotton, and loop into the purl stitch on the 2nd thread. Work another oval like the last, then join to the purl at the top of the next oval, and work another oval; continue to work in this manner all round. This round should have 16 ovals in it altogether. When the last oval is worked join to the purl stitch at the top of the last oval, and work an oval of 5 double, 1 purl, 5 double, 1 purl, 5 double, 1 purl, 5 double, leave the oval rather open; then join to the next oval in last round, leave a little cotton and repeat the oval again, joining to the first oval in this round; the 3rd oval must be joined to the first oval in the last round of a medallion, the 7th oval into the 2nd medallion, the 11th into the 3rd medallion, and the 15th into the 4th medallion. Then work the 16th oval, joining it to the last one worked and the first one also, and fasten off securely. You next work the four stars between the medallions in the middle of the pattern. * Commence in the centre with a ring of 1 double, 1 purl, then 2 double, 1 purl, 5 times, 1 double, draw up, join to the first purl in the ring and work an oval, 12 double, 1 purl, 12 double, draw up. This oval is for the centre one at the top of the star, join to the next purl on the ring, work another oval like the last, and join it to the 3rd oval in the outside row on the medallion, the 3rd oval join to the 1st oval on the outside row of the medallion, the 4th into the first oval of the centre rosette, the 5th oval to the first oval in the last round on the next medallion, and the 6th oval into the 3rd oval on the same round. When this oval is finished draw the cotton into the same purl stitch again, and work an oval of three double; join to the purl in the same oval again, 3 double, 1 purl, 3 double, 1 purl, 3 double. Work another oval like the last, and join to it in the first purl stitch, then join to the purl at the top of the first oval in the star, and repeat the oval joining to the last oval worked. Work two more ovals, joining each one to the one preceding it, and the last oval join in the last purl stitch to the 3rd oval on the next medallion; fasten off the thread; repeat from * three more times, joining the stars to the other medallions.

Then work the two stars above this single star. Each star is worked like the single one, and must be joined in the 4th oval to the 2nd small oval on the line of ovals, in the 5th oval to the 5th oval on the medallion, and in the 6th oval to the 7th oval on the medallion; join the stars to each other in the 3rd ovals.

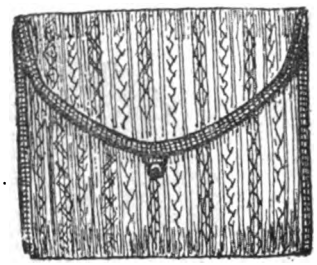
When all these eight stars are worked, join the cotton to the 8th oval on the medallion, and work the first row of ovals. Each oval is worked with 3 double, 1 purl, 3 times, 3 double; join the first oval in the first purl to the join between the 8th and 9th ovals on the medallion; then a second oval joining to the one preceding it, join the cotton before working the 3rd oval to the 6th oval of the star, repeat the ovals as before, but before the 5th oval join to the first oval in the star, before the 7th oval to the 6th oval of the 2nd star, after the 9th oval to the first oval of the same star, and join the last (the 11th) oval to the join between the 8th and 9th ovals on the next medallion, then draw the cotton through the purl at the top of the last row of ovals, and work an oval like those in the last row between each of them, leaving each one rather open; fasten off the last to the purl at the top of the first oval in the last row; work these 2 rows over the other stars, and the d'oyley is finished.

15. Work or Bed Pocket (Ticking Work).

THIS pocket will serve, according to the size it is made, either as a receptacle for work or to contain the night dress. The materials required are striped grey and white ticking; crimson, blue, black, and maize purse silks,

Digitized by Google

or Algerian silks; sarsenet for lining. The design must be sketched on the ticking. The grey stripe is ornamented with vandyked lines forming small lozenges; these are put on with crimson silk, crossed with black;



15. Work or Bed Pocket (Ticking Work.)

likewise the crosses. The herring-bone lines are alternate blue and maize silks. Ticking work is now very popular for a variety of purposes.

16. Knitting Basket (Ticking Work).

This basket is both convenient and elegant, and is especially adapted for containing knitting and crochet work. It is made of striped white and pale stone ticking, lined with scarlet cashmere. You require a piece of ticking 10 inches wide and 18 inches long. Two interlaced lines of scarlet braid are tacked upon the wide grey stripe, and this is sewn down with a *point lancé* in orange silk. At each side of these lines there is a straight

16. Knitting Basket (Ticking Work).

row of fancy braid, sewn down with black and white silks. The flowers in the medallions are worked in Russian embroidery with green and violet silks alternately. When the embroidery is completed, the ticking is lined with thin cardboard covered with cashmere, which is made somewhat longer than the ticking. The handles are ticking, worked in the same style.

17 and 18. Borders in Modern Point Lace.

Trace the designs on tracing calico or kid, tack the linen braid carefully and flatly on, whip the edges and draw them flat wherever they are at all full at the turns, and work in a variety of point lace stitches at all the parts of the design marked with white crossings. The greater the variety of these stitches, and the more pains there is taken in working them beautifully and contrasting them with each other, the more valuable and artistic the work will be; work the bars with thorns on, and the edge last. These borders are suitable either for dress or furniture decorations.

19. Milan Point Lace.

Milan point is rare and extremely beautiful. It is always in scroll pattern or nondescript device of rounds and lines, like the ends of the scrolls in Fig. 19. Many examples of it are very wide, and it is extremely effective as well as graceful in design. Nothing but the needle, point by point, could ever imitate this; but the same cannot be said of the magnificent Spanish point, with its scrolls and flowers, which the finest braid laces can successfully reproduce.

20. Gothic Point Lace.

The specimen here illustrated is probably coeval with Gothic architecture and Gothic printing, and is extremely fine. It is all point, the stitches are worked over coarse threads in a sort of buttonhole or wicker-work fashion, and upon some of the widest parts of the pattern is another raised stitch, worked over a cord in appliqué.

21. Greek Lace.

Draw your pattern on kid. Run Catt's linen cord, No. 2, on the straight lines; these are to be closely worked over in buttonhole stitch, with No. 8 Mecklenburg thread. On the wide line at the edge, run Catt's No. 3 linen cord, work with buttonhole stitch; these cords form the foundation of the lace.

Take No. 1 Mecklenburg thread, fasten it firmly to the wide cord, carry it over to the other cord, and back again to the wide one, where fasten it tightly. This bar is worked in Cluny stitch. These lines should all be worked first, then the various bars of buttonhole, and lastly the close buttonhole stitch on the cords. This design is supplied by Mr. Catt, Sloane-street, Knightsbridge, S.W., from whom any further particulars may be had.

22. Medallion for Antimacassar (Crochet).

Use Ardern's cotton No. 24, and a very fine hook. 7 medallions were used in the original, but it can of course be increased to any size. You commence the medallion in the centre with 6 Ch., join with 1 single on the first.—1st round. 12 DC. in the ring.—2nd round. 16 DC. upon the 12 of last round, therefore increasing one stitch in every three DC. of last round. —3rd round. 1 DC. upon the next DC., * 12 Ch., 1 DC. in the 5th of the 12 Ch., 4 Ch., 1 DC. in the same stitch as the last DC. on the ring, and on each of the two following; repeat from * 7 more times.—4th round. * 1 DC. in the 1st Ch. of the first 12 in last round, 1 treble or the thread once round the needle in each of the next 7 Ch. of the 12 Ch., 3 DC. in the next chain, then 1 treble in each of the next 7 stitches of the loop, 1 DC. in the following, and 1 DC. on the 2nd of the three DC. between the loops; repeat from * 7 more times, and fasten off at the end of the round.—5th round. 1 DC. on the second of three chain at the top of the leaf, * 11 Ch., 1 DC. on the second DC. at the top of the next leaf; repeat from *. At the end of the round work 1 single on the first DC.—6th round. 1 DC. in each stitch of last round.—7th round. 3 Ch.; this 3 Ch. is for the first treble stitch, 1 treble in the next DC., * 2 Ch., 2 treble in the same DC. as the last treble, 2 Ch., miss 5 DC., 2 treble in the following; repeat from *. All round at the end of the round work 3 Ch. and 1 single on the 3rd of the first 3 chain, then 3 Ch. for the first treble in the next round.—8th round. * 1 treble over the next 2 Ch., 2 Ch., 1 treble over the same 2 Cn., 2 Ch., 1 treble over the same 2 Ch., 1 Ch., 1 DC. over the next 2 Ch., 1 Ch.; repeat from *. At the conclusion of the round work 1 single on the 3rd Ch.—9th round. * 1 treble on the first of the two next chain, 2 Ch., 1 treble on the next treble, 2 Ch., 1 treble on the 2nd of the two next chains, 1 Ch., 1 DC. on the DC. of last round, 1 Ch.; repeat from *.—10th round. * 1 treble on the first of the two next Ch., 2 Ch., 1 treble on the second of the same two chain, 2 Ch., 1 treble on the second of the same two chain, 1 Ch., 1 DC. on the next DC., 1 Ch., and repeat from *.—11th round. * 1 treble on the first of the next two chain, 3 Ch., 1 treble on the first of the next two chain, 3 Ch., 1 treble on the second of the same two chain, 3 Ch., 1 treble on the second of the next two chain, 1 Ch., 1 DC. on the next DC., 1 Ch., and repeat from *. This finishes the medallion. You join the medallions together in the last round.

23. Tatted Medallion.

This little medallion is intended for the ends of cravats, sleeves, aprons, &c. Work the ring first in the centre of the medallion, using very fine cotton. With the shuttle work an oval of 1 double, 1 large purl, then 2 double, 1 purl, 9 times making all the purl stitches the same size, 1 double, draw up, join the thread to the first purl stitch of the last round, and work an oval of 8 double, 1 purl, 8 double, draw up, join to the next purl stitch on the ring, and repeat from * 9 more times, then fasten off.—3rd round. Join the thread to the purl stitch on the top of the first oval in the last round. Work an oval (which leave half open instead of drawing close) of 2 double, 1 purl, 4 double, 1 purl, then 1 double, 1 purl, 4 times 4 double, 1 purl, 2 double, draw up, join to the purl on the next oval, leaving a small piece of cotton between the oval and the join, and work another oval like the last, joining to the last in the first purl stitch. Work 10 of these large ovals, and fasten off at the end of the round.—4th round. Join to the last purl stitch on a large oval and work an oval of 6 double, 1 purl, 3 double, 1 purl, 3 double, draw up, join the cotton to the first purl stitch on the next oval of last round, * work the 2nd oval with 3 double, join to the purl on the last oval, 3 double, 1 purl, twice, 3 double, draw up, join to the next purl stitch, and repeat from * twice more. Then work an oval of 3 double, join to the last oval, 3 double, 1 purl, 6 double, draw up, and join the cotton to the first purl of the next large oval in the last round; then pass the cotton at the back of the same oval and knot it to the last purl stitch, and repeat the round again.

24. Rosette Tatting.

Commence in the centre with a ring of 3 double, 1 purl, then 4 double, 1 purl, 7 times, 1 double; draw up. Join two threads together, and then join them to the last purl in the ring, and work a round over the 2nd thread of * 4 double, 1 purl, then 2 double, 1 purl, 4 times, 4 double; join to the next purl on the last ring, and repeat from *, joining the first purl stitch on the scollop to the last purl stitch of the preceding scollop; at the end of the round fasten off.—2nd round. Join the two threads to the two purl stitches joining the first and second scollops of last round, and work over the

2nd thread, * a scollop of 3 double, 1 purl, then 2 double, 1 purl, 5 times, 3 double, join to the next two purl stitches at the bottom of the next two scollops, and repeat from * at the end of the round; fasten off.—3rd round. Join the two threads together, and to the last purl stitch of the first scollop and the first purl stitch of the second scollop in last round, taking the stitches up together; * over the 2nd thread work 3 double, 1 purl, then 2 double, 1 purl, 7 times, 3 double; join to the last purl stitch in this scollop and the first purl in the next scollop, and repeat from *; fasten off at the end of the round.

25. Edging of Braid and Crochet.

You require a piece of waved braid and Evans's cotton, No. 30. Evans's cotton matches the braids in colour, therefore we recommend it for use. Work the foundation row first, 1 DC. on the first point of braid, * 2 Ch., 1 DC. on the next point; repeat from *.—2nd row. This is worked on the other side the braid, * 1 long just between the two first points of braid, 3 Ch.; repeat from *.—3rd row. 1 DC. on the second of the first 3 Ch., * 3 Ch., 1 DC. on the 2nd of the next 3 Ch.; repeat from *.—4th row. * 1 long on the middle of the first 3 Ch., 3 picots close together, each of 4 Ch., 1 DC. on the first of the 4 Ch., 1 long on the same stitch as the last long, 3 Ch., 1 treble on the middle of the next 3 Ch., 3 Ch.; repeat from *. Fasten off at the end of the row.

26 and 35. Squares for Quilt, in Close Crochet, with Raised Work.

These squares, the models of which came very lately from Paris, are done in a novel style of crochet work, which has a rich and pretty effect. Strutt's No. 8, 3-thread knitting cotton may be used for them, with a steel crochet needle, about No. 16, or if wished rather finer, No. 10 cotton, and a finer needle. For No. 4 make 4 Ch., unite, and into space put 8 DC., joining by a single in the 1st DC. Turn the work, and for 1st round put 3 RC., or Russian crochet, into the back of last stitch of former round (the same stitch you turned upon), 1 RC. on next stitch, repeat 3 RC. in one stitch, and 1 RC. three times more, join by a single to 1st stitch of round, and work another single, taking up the front part of the next stitch, to bring you to the exact corner, which is always the centre of the 3 stitches worked into one, of the last round. It will be remembered that in Russian crochet the lower part of the stitch, next the forefinger of the left hand, holding the work, is to be taken up.—2nd round. Turn the work, 3 RC. into the corner stitch, 3 RC., * 3 RC. into 1 stitch, 3 RC.; repeat from * 3 times more, and join as before directed.—3rd round. Turn the work, * 3 RC. into the corner stitch you turned upon, 5 RC.; repeat from * 3 times more, and join as before.—4th round. Turn the work, put * 3 RC. into the same stitch, 7 RC., repeat from * 3 times more and join.—5th round. Without turning (on right side of the work) * 3 DC. in the corner stitch, 9 DC., taking up the stitch in the usual way, repeat from * 3 times more and join.—6th round. Turn to the wrong side again, * 3 RC. in corner stitch, 11 RC., repeat from * 3 times more and join.—7th round. Turn, * 3 RC. in corner stitch, 13 RC., repeat from * 3 times more and join.—8th round. * 3 RC. in corner stitch, 15 RC., repeat from * 3 times more, and join.—9th round. Without turning, on the right side of the work, † 3 DC. in the corner stitch, 1 long (thread twice over the needle) into the top of corner stitch of 6th round, * miss one stitch of 8th round, 2 DC. into next 2 stitches, 1 long into 6th round (2 stitches from the last long), repeat from * 4 times more, taking last "long" into centre stitch of the 3 corner ones of 6th round; then 1 DC., and repeat from † 3 times more, join and do another single to bring you to the exact corner stitch. There are 6 long on each side of the square in the 9th round.—10th round. Turn to the wrong side, * 3 RC. in the same stitch you have turned upon, 19 RC.; repeat from * 3 times more, and join. It is always desirable to count the stitches between the corners, on the last side of the square, otherwise an additional one before joining may be easily made without intending it, which would throw the square out, and make the subsequent rows wrong.—11th round. Turn, and on the right side * 3 DC., in centre corner stitch 21 DC.; repeat from * 3 times more, and join by a single.—12th round. On the same side * 3 DC. in centre corner stitch 23 DC.; repeat from * 3 times more, and join as last round.—13th round. Still on the same side * 3 DC., in centre corner stitch, 25 DC.; repeat from * 3 times more, join, and do another single on front of next stitch to bring you to the exact corner.—14th round. Turn to wrong side, * 3 RC. in the same stitch, 27 RC.; repeat from * 3 times more, and join as in last round.—15th round. Turn to right side, * 3 DC. in centre corner stitch, 29 DC.; repeat from * 3 times more, and join with 2 single.—16th round. On wrong side (whenever you turn to the wrong side of the work, the thread must be kept behind the needle to commence with) * 3 RC. in centre corner stitch, 31 RC.; repeat from * 3 times more, and join.—17th round. On right side, * 3 DC. in centre corner stitch, 33 DC.; repeat from * 3 times more, and join by 2 single.—18th round. Turn to the wrong side, * 3 RC. in stitch on which you turn, 35 RC.; repeat from * 3 times more, and join.—19th round. On right side, † 1 DC. in corner stitch, 1 long from the same stitch taken into corner stitch of 16th round (in front of 18th and 17th rounds), 1 more DC. into same corner stitch, 1 DC. in next, 1 long into next stitch to last in the 16th round, * miss one stitch of 18th round, DC. into 2 next stitches, 1 long into 16th round, 2 stitches from the last one; repeat from * 10 times more, taking the last long into the stitch next the corner one of 16th round, DC. into 2 next stitches, then repeat altogether from † 3 times more, join, and work a single on front of stitch, to bring you to the extreme corner.—20th round. Turn to the wrong side, * 3 RC. in stitch on which you turn, 39 RC.; repeat from * 3 times more, and join.—21st, 22nd, 23rd, and 24th rounds. On right side in DC., putting 3 stitches into each corner one, and 41, 43, 45, and 47 respectively between them.—25th round. Open edge. 8 chain from extreme corner stitch, 3 of them being instead of a treble, † 1 treble into same stitch, * 2 Ch., missing two stitches of last row, 1 treble; repeat from * 15 times more; 2 Ch., 1 treble into corner stitch, missing one of the corner row below, 5 Ch.; repeat from † altogether, 3 times more, joining the last 2 Ch. to the 3rd of the 3 first chain at the beginning instead of the last treble.—26th round. DC. into every stitch of last round, and 3 into each corner stitch as usual.

27. Border of Braid and Crochet.

For this border you require the vandyke braid and Evans's crochet cotton No. 24. You commence by working the inside of the scollop, each one of which has 7 points, 1 single, on the second point of braid 4 Ch., forming the first double long. 1st row. * 1 double long, or the thread three times round the needle on the same point of braid, 3 Ch., 2 long on the next point, 3 Ch., two treble on the following point, work 1 treble on the next two points, taking them up as one, 2 treble on the following point, turn, 1 single on each of the 3 Ch., turn, two long on the next point, turn, 1 single on each of the next 3 Ch., turn, 1 double long on the next point, 1 single on the next double long at the beginning of the scollop, 3 Ch., 1 DC. on the same point of braid as the last double long, 4 Ch., turn the braid over and work 1 DC. on the 5th and 6th points on the other side the braid; these points are to be counted from the top of the last scollop, turn, one treble on the 4th and 7th points, 4 Ch., turn the work and work 1 single on the other side of the second point of braid from the last double long, 4 Ch., and repeat from * at the beginning of the row.—2nd row. 1 DC. on the first point of the piece of braid, * 6 Ch., 2 long on the top of the 2 double long in the middle of the scollop, 6 Ch., 1 DC. on the next point; repeat from *.—3rd row. * 1 DC. on the first DC. of last row, 6 Ch., 1 DC. on each of the two long stitches, 6 Ch.; repeat from *.—4th row. 1 treble on the first stitch of last row, * 1 Ch., miss 1 stitch, 1 treble on the next; repeat from *, and fasten off at the end of the row.

28. Border in Point Lace and Tatting.

This border is intended as a substitute for the embroidery on linen or cambric; it looks much lighter and richer, and would wear well. You must work the tatting first with Taylor's thread, having two threads for it. * With the shuttle work 1 double, 1 purl, 8 double, 1 purl, 11 double, 1 purl, 11 double, 1 purl, 8 double, 1 purl, draw up into a circle and knot into the first stitch; then for the scollop work over the 2nd thread 12 double, 1 purl, 12 double, and repeat from * the length required. Next work the outside row of tatting. join to the purl stitch at the top of the first vandyke, * and work over the 2nd thread 1 double, 1 purl, then 2 double, 1 purl, 12 times, 1 double, draw into shape, and join to the purl stitch on the next vandyke, then two double, 1 purl, 5 times, 2 double, join to the ring, 2 double, 1 purl, 5 times, 2 double, join to the next vandyke, and repeat from *.

You next crotchet the foundation row; 1 double treble, or the thread three times round the needle on the purl stitch: after the 8 double between the two first rings, * 5 Ch., 1 DC., on the middle purl in the ring, 5 Ch., 1 double treble between the two next rings; repeat from *. You must now tack your tatting on paper (covered with linen) in the proper shape, and fill in the different parts by the engraving in finer thread. The circles are filled alternately with spotted lace and open English lace. The detail of the last stitch is given in No. 4*a*. The bars below the treble stitches are darned over a thread; it is known as *point de reprise*.

29 and 38. Edgings and Insertion (Crochet and Mignardise Braid).

For these trimmings, which are very pretty for children's white piqué jackets, &c., use Ardern's cotton, No. 26, or an equivalent number of Evans's "Boar's Head," and a fine crochet needle.

No. 6. Insertion.—Attach the cotton to a loop of the braid, * 9 Ch., miss a loop, join to the next by a single stitch (take the needle out, insert it in the loop of the braid, take up again the stitch just left, draw it through the loop, and then complete the single stitch); join by a single in like manner to each of the next 6 loops, 4 Ch., join as before (by drawing through) to the 5th of the 9 Ch., work 4 Ch., miss a loop, and join to the next. To make a second scollop, fold the braid back so as to bring 3 loops on each side together in pairs (the first two are quite over each other), and work 3 single stitches, taking up each time a loop from either side, and bringing the thread through both at once; then turn the work, and do 2 single at the back on the 2nd and 1st of the stitches just worked to bring you again to the inner edge, and leaving 1 loop at liberty (which must be in the centre of the turn); join to the next loop, and repeat from *. To form the insertion, work two lengths of braid in this manner, and sew them together at the foot of each scollop, keeping the single disengaged loop at the back, so as not to show on the right side when joined.

No. 5. Edging.—Attach the cotton to a loop of the braid, and * work twice (7 Ch., miss a loop, join to the next), then join as in the insertion to each of the next 6 loops, and work twice (3 Ch., join to 4th of 7 Ch.), 3 Ch., miss a loop, join to the next. For the second scollop, fold the braid

Digitized by Google

back so as to bring 4 loops of each side of the braid together in pairs, and work 4 single stitches, taking up each time a loop from either side, and bringing the thread through both at once; then turn and do 3 single at the back coming down, on 3 of the stitches just worked, leave a loop at liberty in the centre of the turn, join to the next one, and repeat from *. When a sufficient length is done, the edging may either be sewn to the material by the foot of each scollop, or a heading be made as follows: 1st row. DC. into disengaged loop, 8 Ch.; repeat from *.—2nd row. DC. in every stitch.

30. Border in Point Lace.

This border requires the fine plain point lace braid, also one a little wider with holes on it. Tack the braid in on the pattern first, then work round the edges of it, then the wheels, the groundwork, lastly the bars. The border ought to be worked the size given in the engraving, using Taylor thread No. 20.

31. Rosette of Tatting.

You commence this rosette with a ring of 2 double, 1 purl, then 3 double, 1 purl, 13 times, 1 double; draw up, and fasten off. Round this ring you work two rows over the 2nd thread; join the thread to the first purl in the ring, and work over it 3 double, 1 purl, then 2 double, 1 purl, 4 times, 3 double; draw through the 2nd purl on the ring, missing one purl; repeat in this manner. You will have 7 scollops at the end of the round; fasten off, then knot the cotton with the 2nd purl on the ring, work over the 2nd thread in the same manner, and knot the scollop in the 4th purl on the ring; fasten off at the end of the round. The outside round is worked in the same manner. Knot the two threads into the 3rd purl stitch of the first scollop of the first round, and work over it 2 double, 1 purl, 9 times, 2 double, knot into the middle purl stitch of the next scollop in the first round; repeat all round, then knot the cotton into the first and last purl of the two scollops in the under or second round worked, * over the 2nd thread work 2 double, 1 purl, 10 times, 2 double, twist it over the scollop of last round, and knot into the last and first purl stitches of the next scollop in the under round; repeat from * and fasten off.

32. Medallion.

Use Ardern's cotton No. 24 and the finest Penelope hook. Make a chain of 10 unite.—1st round. Work in the ring 24 DC.—2nd round. 3 Ch., 1 treble on the next DC., * 1 Ch., 1 treble on each of the two uext DC.; repeat from * all round. At the end of the round work 1 Ch., 1 single on the 3rd Ch.—3rd round. 4 Ch., the thread 3 times round the needle. Take up the next Ch. stitch of last round, work off all the loops on the needle two at a time, excepting the two last on the needle, the thread twice on the needle, take up the same stitch again, work off all but the three last loops, the thread once on the needle, take up the same loop again, and work off all the loops on the needle two at a time, * 7 Ch., the thread 4 times round the needle, take up the next chain stitch in last round, work off all the loops two at a time, excepting the two last, the thread 3 times round the needle, take up the chain again, work off all the loops excepting the three last, the thread twice round the needle take up the same stitch, work off all but the last 4 on the needle, the thread once round the needle, take up the same Ch., and work off all the loops on the needle two at a time, repeat from * over each Ch. of last round, making 12 leaves in the round. At the end work 7 Ch., 1 single on the first leaf.—4th round. 1 single on the first of the next 7 Ch., 1 DC. on each of the next five, * 5 Ch., 1 DC. on the 5 centre of the next 7 Ch., repeat from *, at the end of the round, work 1 single on the 1st DC. in this round.—5th round. * work 1 DC on the 2nd, 3rd, and 4th of the next 5 DC., 5 Ch., 1 DC. on the 3rd of the next 5 Ch., 5 Ch., repeat from *, at the end of the round work in single on the third of the first 5 DC. of last round.—6th round. * 5 Ch., 1 DC. in the middle of the next 5 Ch., 7 Ch., 1 DC. in the middle of the following 5 Ch,; repeat from *.—7th round. 1 DC. on each of the two first Ch. of last round, * 3 Ch., miss the next Ch., 1 DC. on each of the two next Ch., the DC., the 7 Ch. the following DC., and 2 next Ch., repeat from *, 1 single on the 1st DC at the end of the round.—8th round. * 1 Ch., 2 long in the three Ch., 3 Ch.. 2 double long or the thread three times round the needle in the same three Ch., 3 Ch., 2 double long in the same 3 Ch., 3 Ch., 2 long in the same stitch, 1 Ch., 1 DC. on each of the five centre DC. between this loop of three Ch., and the following three Ch.—9th round. 1 treble over the first Ch. of last round, * 3 Ch., 5 treble over the next 3 Ch., repeat from * twice more, 3 Ch., 1 treble over the one chain of last round, 1 DC. on the 2nd, 3rd, and 4th of the 5 DC.; repeat the round, and fasten off.

33. Rosette of Tatting.

Commence with a ring of 2 double, 1 purl, 11 times, 2 double; draw up. 1st round. Join a second thread, and * work over it 2 double, 1 purl, 5 times, 2 double, join to the 2nd purl on the ring; repeat from * three more times.—2nd round. * Work with the shuttle an oval of three double, 1 purl, 7 times, 2 double; draw up. Over the 2nd thread work 3 double, 1 purl, 2 double, 1 purl, 2 double. With the shuttle only work a Josephine knot of 10 double, draw up; then over the second thread again work 2 double, 1 purl, 2 double, 1 purl, 3 double. Draw the thread through the third purl of the scollop in last row, and repeat from * seven more times, joining the threads over the joins in last round as well as in the 3rd purl stitch in last scollop.—3rd round. Join the threads to the purl stitch at the top of the oval, and work * with the shuttle a Josephine knot, then over the 2nd thread 3 double, 1 purl, then 2 double, 1 purl, twice, 2 double, a Josephine knot with the shuttle, then over the 2nd thread 2 double, 1 purl, three times, 3 double, and knot into the purl at the top of the next large oval; repeat from * all round, and fasten off.

34. Crochet Edging.

This edging may be worked with Ardern's cotton, Nos. 22, 26, or 30, according to the purpose for which it is required, but looks best done with the finer number. It is commenced by making * 4 Ch. and DC. into the 1st; repeat from * for the length desired. Then for the 1st row. DC. on the first stitch of the first 4 Ch. of the foundation, * 5 Ch., passing over the two next little scollops, 1 long (thread twice over the needle) on the following DC., 4 Ch., 1 long, into the same stitch as before, 5 Ch., passing over two scollops, DC. on the next DC. of foundation; repeat from *.—2nd row. 1 treble on the 4th of the 5 Ch. of last row, 3 Ch., 2 DC. on the 2nd and 3rd of the following 4 Ch., 3 Ch., 1 treble on the 2nd of next 5 Ch., 5 Ch.; repeat from *.—3rd row. 1 treble on the 1st treble of last row * 4 Ch., 1 DC. between the next 2 DC., 4 Ch., 1 treble on the treble of last row, and a treble on the following one; repeat from *.—4th row. 1 treble on the 1st treble of last row, * 4 Ch., 5 DC. on the DC. of last row and the 2 Ch. on each side of it, 4 Ch., 1 treble taken into space between 2 trebles of last row; repeat from *.—5th row. * DC. on the 2nd of the 4 Ch. of last row, 4 Ch., 3 DC. on the 3 centre stitches of the 5 DC. of 4th row, 4 Ch., DC. on the 3rd of the next 4 Ch., 3 Ch.; repeat from *.—6th row. DC. on the 1st DC. of former row, * 5 Ch., draw the thread through the 2nd of the next 3 DC. and the loop on the needle, and proceed to work 5 long into the 1 DC. of the 3rd row; then draw the thread through the same 2nd stitch of the 3 DC. of last row and the loop on the needle, which will close up the group of "longs," 5 Ch., DC. into centre stitch of 3 Ch. of last row; repeat from *.—7th row. DC. on the 3rd of 1st 5 Ch. of last row, 5 Ch., DC., taken between the two loops drawn through the centre stitch of 3 DC. of 5th row, 5 Ch., DC. on the 3rd of next 5 Ch., 5 Ch.; repeat from *.

36. Knitted Edging.

Cast on 8 stitches.—1st row. Slip 1, 2 plain, over, purl 2 together. 1 plain, over twice, 2 plain.—2nd row. Slip 1, 2 plain, 1 purl (on the 2nd turn of the "over" of last row). 3 plain, over, purl 2 together, 1 plain.—3rd row. Slip 1, 2 plain, over, purl 2 together, 5 plain,—4th row. Slip 1, 6 plain, over, purl 2 together, 1 plain. —5th row. Slip 1, 2 plain, over, purl 2 together, 1 plain, over twice, purl 2 together, over twice, 2 plain.—6th row. Slip 1, 2 plain, 1 purl (on second turn of "over"), 2 plain, 1 purl, 3 plain, over, purl 2 together, 1 plain.—7th row. Slip 1, 2 plain, over, purl 2 together, 5 plain, purl 2 together, 1 plain.—8th row. Cast off 4, 4 plain, over, purl 2 together, 1 plain. Knitted edgings are rarely very novel in character, as Mrs. Gaugain exhausted all that was to be done in knitting, but this edging will be found useful for toilet cushions, night-dresses, cases, &c.

37. Crochet Border.

You require Ardern's No. 30 cotton and the finest Penelope hook for a strong border. The pattern consists of a row of medallions, each of which is worked separately. They are afterwards joined together by a row of crochet, and on this an edge is worked. The formation of the pattern is composed of four rows of crochet. You commence the medallion in the centre with a chain of 10 stitches, unite into a circle.—1st round. Work in the ring 24 treble, or the thread once round the needle.—2nd round. 1 DC. on each treble of last row, taking up both the horizontal loops at the top of each stitch.—3rd round. 1 DC. on each of the first 6 DC. of last round, 12 chain, miss the next 6 DC., and work 1 DC. on each of the following 6 stitches, 12 Ch., 1 DC. on the last DC. of last round.—4th round. 1 DC. on each of the next 6 DC. in the 3rd round, over the 12 Ch. work 18 DC., 1 DC., on each of the next 6 DC., 18 DC. over the next 12 Ch., 1 single on the last DC.—5th round. 4 Ch.; the first three of these are for the first treble; *miss 1 D.C., 1 treble on the following, 1 Ch., repeat from *; at the end of the round work 1 single on the 3rd chain at the beginning of the round; there should be 24 treble in this round.—6th round. Over the 1st and every following chain stitch work 1 DC., a picot of 3 Ch., 1 DC. over the same chain, miss the treble, and work in the same manner over the next space.—7th round. *5 Ch., 1 single on the 2nd of the 5 Ch., 3 Ch., a picot of 4 Ch. 1 single on the first of the 4 Ch., 1 Ch., 1 DC. on the 2nd picot in the last round; repeat from * twice more, then repeat joining to the next picot, repeat again all round, and join into the 2nd picot. You should have 14 loops at the end of the round, join the chain into the same stitch as the one on which you began the round.—8th round. * 2 Ch., a picot, 5 Ch., a picot, 2 Ch., 1 DC. on the second of the three chain between the next loops, repeat from * all round, and fasten off. You now repeat these directions for the second and all other rosettes until the end of the 8th round; instead of fastening off here work a loop of 2 Ch., a picot, 5 Ch., a picot, 5 Ch., a picot, joining to the 2nd picot; repeat again, joining to the following picot; then repeat 5 Ch., a picot, 2 Ch., join to the 3 Ch. in the middle of the corresponding loop on the next rosette and fasten off. When you have worked the requisite number of rosettes, work the first

row of the foundation.—1st foundation row. Commence at the top of the medallion in the middle of the 3rd loop (before the join to the next medallion) with a DC., * 7 Ch., 1 DC. in the middle of the next loop, 7 Ch., 1 treble in the following loop, this loop is just before the join, 7 Ch., 1 DC. in the middle of the next 5 Ch. of the long loop joining the medallions, 7 Ch., miss the next 5 Ch., 1 DC. in the middle of the following, 7 Ch., 1 treble in the loop after the join on the next medallion, 7 Ch., 1 DC. in the middle of the next loop; repeat from * throughout the row. On this row work three rows each of 1 treble, * 1 Ch., miss 1 stitch of last row, 1 treble on the next; repeat from *. You next work the edge round the medallions.—1st row. Commence with a DC. in the middle of the first loop of 5 Ch. on the first medallion * 7 Ch., 1 DC on the next loop; repeat from * all round the medallion. When you have taken up all the loops on the first medallion work 3 Ch., 1 DC. on the 3rd of the 5 Ch. between the medallions, 3 Ch., 1 DC. in the middle of the first loop on the next medallion, then work as before.—2nd row. 1 DC. on the 1st DC. of last row, 5 Ch., 1 DC. on the 4th of the next 7 Ch., * 5 Ch., 3 treble on the 3rd of the following 7 Ch., 5 Ch., 1 long on the 3rd of the next 7 Ch., 5 Ch., 1 long on the same stitch as the last long, 5 Ch., 3 treble on the 4th and 5th of the next 7 Ch., 5 Ch., 1 long in the middle of the next loop, 5 Ch., 1 long on the same stitch as the last long, 5 Ch., 3 treble over the 2nd of the next 7 Ch., 5 Ch., 1 long on the next DC., 5 Ch., 1 long on the DC., 5 Ch., 3 treble on the 4th and 5th of the next 7 Ch., 5 Ch., 1 DC. on the middle of the next loop, 5 Ch., 1 DC. on the next DC., 5 Ch., 1 DC. on the 5th of the next 7 Ch., 3 Ch., 1 DC. on the DC. in the corner between the two loops, 3 Ch., 1 DC. on the first DC. in the next medallion, 2 Ch., draw through the 3rd of the last 5 Ch., worked, 3 Ch., 1 DC. on the 5th of the next 7 Ch., 3 Ch., draw through the middle of the next 5 Ch. on the last medallion, 3 Ch., 1 DC. on the middle of the next 7 Ch.; repeat from *.—3rd row. 1 treble in the middle of the 5 Ch. after the first three treble of last row, * 3 Ch., a picot of 5 Ch., 1 single on the first of the 5 Ch., 2 Ch., 1 treble in the middle of the next loop, 4 Ch., 1 single on the last treble, 2 Ch., a picot, 2 Ch., 1 treble in the middle of the next loop of Ch, 3 Ch., 1 treble in the next loop; repeat from * twice more, then 3 Ch., 1 DC. on the 2nd Ch. after the next 3 treble, 1 DC. on the join between the medallions, 3 Ch., 1 DC. on the Ch. before the next 3 treble, draw through the DC. on the last medallion, 3 Ch., and commence from the beginning of the row.

39. Insertion in Tatting and Crochet.

You work first in this pattern the stars in the middle of the insertion; they consist of two large and two small ovals. Commence with the small oval, using No. 30 cotton, and work it with 3 double, 1 purl, then 2 double, 1 purl, 4 times, 3 double, draw up, work next a large oval of 4 double, join to the first purl in the last oval, then 2 double, 1 purl, 12 times, 4 double, draw up; repeat the small oval, joining the first purl stitch to the last purl in the large oval, then repeat the large oval, joining the first and last purl stitches in it to the small ovals on each side of it, and fasten off. Work as many of these stars as you require, joining them to the preceding ones in the centre purl stitch of the small ovals. When you have the requisite length, commence with a single crochet in the middle purl stitch of the large oval on the first star. With a fine crochet hook work *4 Ch., now work an oval of 1 double, 1 purl, 2 double, 1 purl, 2 double, join to the 4th purl on the large oval, 2 double, 1 purl, 5 times, 2 double, join to the 4th purl on the large oval of the next star, then 2 double, 1 purl, twice, 2 double, draw up, 4 chain, 1 single on the middle of the next oval in the star; repeat from *.—2nd row. 1 DC. on each chain, and single crochet of last row; also 1 DC. on each oval.—3rd row. Join the cotton to the first DC., and with the shuttle work the first small oval with 4 double, 1 purl, then 2 double, 1 purl, 4 times, 4 double, draw up, knot the cotton into the 4th DC. from the last used in the last row, and repeat the oval joining to the preceding oval in the first purl stitches. Work the last three rows on the other side the stars to complete the insertion.

40. Medallion Antimacassar in Braid and Crochet.

The original of this very novel and pretty antimacassar we received very lately from Paris. It is composed of circular medallions of braid and crochet work, having a raised rosette in the centre, and joined by small stars of the same, the medallions being placed in 5 rows of five each. The vandyked braid used for the work is a very fine French make, of the width shown in the illustration (to be had at Helbronner's, 265, Regent-street), of which two pieces will be required, and the cotton is Ardern's, No. 26, with a very fine crochet needle, No. 21.

Medallion.

Begin by the centre rosette, which is made of one piece of the braid, put round and round; there are in it 50 vandykes, but it is better to cut off a piece of 52, to allow for the fastening off at both ends. For the commencement cut the braid off rather beyond a vandyke, turn the one-half back against the other, and with a needle and very fine thread sew the upper edges together, and turning in the short part of the vandyke, stitch it neatly through and through; then sew the lower edges of the two together in like manner, and fasten the thread off by passing it through the braid. Begin the crochet on the first point, at the top of the braid—working from right to left—with a single stitch, 1 Ch., rather tightly done, * a single on the next point, 1 Ch., and repeat from *, bringing the points nearly together, till you have 8 points joined by a little circle of chain stitches, in such a manner that the whole shall be quite flat—these 8 points form the centre star of the rosette; 1 Ch., turn the next vandyke over the half one at the commencement (coming now from left to right) and join the two inner points which come over each other by taking a single stitch through both at once; draw the loop on the needle to the back through the next stitch, and turning the braid down towards you at the back, so as to be able to get at the inner points, work a DC. on the next point, and * 1 Ch., looser than before to give a little more room, DC. on next point, and repeat from *. This second row is to have 12 points of the braid counting the one that was passed over from the centre. It is well to mark the number of points for the different rows on the braid with coloured silk. Take the fine needle and thread, and fix this row on at the back rather below the other, so that the points should project a little beyond the first, and try to arrange them so that some should come in between those of the former row. Proceed in the same manner with the 3rd row, putting 2 Ch. between the points, of which there should be 14, and fixing them round, as before, at a little distance from the last row. The outside row must have exactly 16 points, and the chain stitches between them must be regulated by the worker, so as to make the points lie flat, and come into position nicely. Indeed this is the case throughout this rosette, as no very exact rule can be laid down; each row requires the vandykes to be a little further apart than the last, and when fixed on, the rows of chain stitch at the back look like the circular whorls of a shell. Join the braid of this last circle by putting one vandyke over another, sewing the edges of the outside point together, and turning in and stitching the narrow part as before. The rosette is now finished, and 25 of these will be required for the whole antimacassar.

Crochet Work.—It is to be observed that from this point all the crochet work is to be done tightly and firmly. 1st round—Without breaking off the cotton, make 6 or 7 Ch. at the back, to bring you up to the point of the vandyke, fasten to it by a single stitch, and do 10 chain (3 of them being instead of a treble), * 1 treble on the point of next vandyke, 7 Ch., and repeat from * all round the 16 points, joining the last 7 Ch., by a single, to the 3rd of the first 3 chain.

2nd round.—* 5 Ch., DC., missing 2 stitches of last row; repeat from *, but, as there must be only 36 of these little scollops in this round, the worker must occasionally at discretion miss 3 stitches, so as to have the proper number of scollops in the round. Fasten off securely.

Now make a circle of the braid, consisting of 36 points, joining in the neatest manner, as before, by putting one vandyke over another, sewing the edges of both sides together in this instance, and stitching down the part between. When this circle is complete, hold it next you, and the centre rosette from you, and proceed to connect them in the following manner.—3rd round. Make 3 Ch. from one of the points of the braid (instead of a treble), join to the centre stitch of one of the scollops of 5 Ch. of previous round (to join, take the crochet needle out of the stitch just worked, insert it from above in the one you wish to join it to, bring the former through the latter, and continue the work as may be directed), 2 Ch., join to the centre Ch. of next scollop, and * make a treble on the next point of the braid, 2 Ch., join as before, and repeat from * throughout the round, occasionally making 3 Ch. between the trebles, as may seem to be required, to keep the circle flat. Join at the end by a single in the 3rd Ch. at the beginning, and fasten off. —4th round. Begin on the other side of the circle of braid with a single stitch on a point, * 8 Ch., DC. on the 6th of these 8 Ch., counting from the end, to form a little ring or open picot, 2 Ch., a single on the next point, and repeat from * all round; there must be one of these open picots between each of the 36 points of the braid. At the end, join to the first single, and fasten off. This completes one medallion.

Small Star for Joining.

Join 8 points of the braid together by placing one vandyke over the other in the manner described before, and proceed to draw them together in the centre by a single on each point, with 1 Ch. between; join the circle, and work some chain stitches up the back of a vandyke to bring you to a point, make a single on it, then * 10 Ch., DC. on the 6th of these 10 Ch., counting from the end, 4 Ch., a single on next point of braid, and repeat from *. Every alternate open ring or picot of this small star must be joined while working to one of those on the medallions, in the position shown in the illustration No. 9. To do this, make 7 Ch., pass through the opposite ring, 3 Ch., DC. on the 5th Ch. from the beginning, 4 Ch., a single on the next point. It will be seen from the illustration that the medallions are also connected with each other by their picots, four consecutive ones being joined together, and five between left free; to the centre one of which latter, the picot of the joining star is united. No difficulty will be found in knowing where to connect them, as it is very plainly shown in No. 9. The centre medallions are united with each other in 4 different places of 4 picots each, besides the joining to the small star. The medallions coming next the edge of the antimacassar are only joined to each other and the centre ones, in 3 places of 4 picots each.

When all the medallions are joined together, proceed to work the outer edge of the antimacassar thus: 1st row. Begin on the medallion to the right of a corner (at the open picot next to the 4 that are joined to those of the corner medallion), do a tight DC. into it, 5 Ch., tight DC. into the 1st free picot of the corner medallion, * 7 Ch., DC. into next picot, and repeat from * 21 times more, which will bring you to the last picot of the corner medallion; then 5 Ch., DC. on 1st picot of the next medallion, * 7 Ch., DC. into next picot, repeat from * 12 times more, 5 Ch., and

Digitized by Google

proceed to the next medallion. Continue in this way all round the antimacassar; at the end of the row join the last 7 Ch. to the 1st DC., and fasten off securely, marking the place as a guide for the other rows.

2nd row. Commence with a tight DC. on the centre stitch of the last scollop of 7 Ch. of 1st row, 3 Ch., tight DC. on the centre stitch of first scollop of corner medallion, * 7 Ch., 3 treble in centre stitch of next scollop, repeat from * 19 times more, for corner medallion, then 7 Ch., DC. in centre of last scollop of corner, † 3 Ch., D.C. in centre stitch of 1st scollop of next medallion, 4 Ch., join to 4th stitch of 7 Ch. just worked, 3 Ch. to complete scollop, 3 treble in centre stitch of next scollop, * 7 Ch., 3 treble in centre stitch of next scollop, repeat from * 9 times more, 7 Ch., DC. on centre stitch of next scollop, and re-commence at † for all the side medallions; the corner ones to be like the first; at the end of the row join the 4th stitch of last scollop to the centre one of the first scollop of the row, complete the 7th Ch., by working 3 Ch., join to the 1st DC. and fasten off. —3rd row. Begin on centre stitch of 7 Ch., between the two first groups of 3 trebles of the corner medallion; 8 Ch. (3 being instead of a treble), a treble in the same stitch, * 5 Ch., a treble in centre stitch of next 7 Ch., 5 Ch., a treble in same stitch as the last, repeat from * 17 times more, which will bring it between the last 2 groups of trebles of the corner medallion. Then † 2 Ch., 1 treble on centre of 7 Ch., between the 1st two groups of trebles of next medallion, 4 Ch., join to centre stitch of 5 Ch. between the last 2 trebles worked; work back 3 single over 3 of these 4 Ch., and do 2 more Ch. to complete the loop, and 1 treble into the same stitch as the treble last done; * 5 Ch., 1 treble on centre stitch of next 7 Ch., 5 Ch., 1 treble in same stitch as the last; repeat from * 8 times more, and recommence from † for each of the side medallions, and the corner ones are also done in the same manner, only that the pattern is repeated oftener. At the end of the row (after working the last treble), 5 Ch., 1 treble, 2 Ch., join to the 3rd of the first 8 Ch., work 3 single upon the loop of 5 Ch., and 2 Ch. across, to join to centre of last loop of 5 Ch., and fasten off.—4th row. Begin with a DC. on centre stitch of 1st 5 Ch. of corner medallion, * 1 Ch., a treble on centre stitch of 5 Ch. between 2 trebles, 3 Ch., a treble into same stitch, 3 Ch., a treble still into the same stitch, 1 Ch., DC. in centre stitch of next 5 Ch., repeat from * 16 times more for corner medallion. Then 3 Ch. between the medallions (if this be found too tight, add another), DC. on centre stitch of 1st 5 Ch. of next medallion, † 1 Ch., 3 trebles with 3 Ch. between, into centre stitch of 5 Ch., between 2 trebles, 1 Ch., DC. on centre stitch of next 5 Ch., repeat from † 7 times more for side medallions; the corner ones like the first. End the row by 3 or 4 chain (as may have been found best before), join to 1st DC. of the row, and fasten off.

It will be found that this antimacassar will look extremely well if tacked to a lining of crimson cotton velvet, on which the outline of scollops following those of the antimacassar, but projecting beyond them 2½ inches, should be drawn, and then sent to be pinked out round the edges. This lining gives the antimacassar a very rich appearance, and also tends to keep it in condition.

41. Square (Guipure D'Art).

MATERIALS.—Flemish thread: steel mesh, No. 10, Bell gauge; darning needle; wire frame, 7in. square.

For the netted foundation commence with 1 stitch, take out the mesh, and turn back. 2nd row—Net 2 stitches, both in this 1 stitch, take out the mesh, and turn again. 3rd row—Net 1 stitch plain, then net 2 stitches, both in the 2nd stitch, turn back. 4th row—Net 2 plain, then increase as before in the last stitch, and so on backwards and forwards until it is increased to 27 stitches; then net a row plain, and commence decreasing by netting every row plain to the last 2 stitches, which net together as one stitch. Repeat this until there are only two loops left; these net together without the mesh, so that they may form one small stitch. Fasten off, wash and stiffen the square, sow it into the wire frame, and darn it according to the design. The stitches used are *points de toile* and *point de Bruxelles*, and also *point d'esprit*. The leaves are worked in *point de reprise*. Two or three threads are carried slantwise over the foundation, and then interlaced by darning stitches in and out.

Sleeping Socks in Tricotee.—Fold a piece of paper with a crease for back of sock; cut out a sock the required size; open the pattern. Commence at the toe, working the full length of pattern, according to shape of paper, backwards and forwards; then sew up for the sole, and up the front. The following pattern of knitted sock will be found a much better shape, though not so quickly done. Needles, No 8, six-thread fleecy. Cast on 91 stitches, knit8 plain rows, 8 rows ribbed (2 plain, 2 purl), 3 plain in middle of row. Next row. Plain until you come within 2 stitches of the middle, decrease by knitting these 2 together, middle stitch plain, decrease again by taking 2 together, the rest plain, 23 rows like the last, 8 rows plain, 8 rows ribbed. For gentleman's size cast on 93 or 95, and decrease for 26 rows.

Spray Work.—Use moist water colours in tubes, thus saving the trouble of rubbing, and I prefer lamp black to Indian ink. It is important to have a tooth brush, which is neither too hard nor too soft; thus I brush backwards and forwards over the large toothed end of one of the combs, ordinarily used for parting the hair. The paint should be as moist as possible. If it is very dry, the sprinkling will not look soft and smooth; but it requires some practice to use the paint without making blots. The chief point to be observed is never to have too much colour on the brush at once. To ensure this, it is well to press it against the side of another saucer, after dipping it in that containing the paint.

Dress and Fashion.

MOVEMENTS OF FASHION, 1871-72.

THE Franco-Prussian war has had a great influence on the movements of fashion. Through it Paris has been paralysed, and while she is recovering and gathering up her strength, there is a truce to invention in dress. Fashion accurately reflects, in its narrow sphere, the agitations and experiments which appear in political and social questions, and the result is that we are now in a state of transition. The present style of dress is, for the most part, what it was at this time last year; but if there is a tendency one way or the other, it is rather towards simplicity than to increased luxury. The general outline of a lady's figure is much the same as on New Year's day, 1871—very flat in front, very *bouffant* at the back, and very slim from the knees downwards. Crinoline is still worn, but only as a *tournure*, or bustle, as it is termed in English; costumes are still worn, but they now comprise only a skirt and polonaise, instead of a skirt, tunic, and bodice; chignons are worn, but not nearly on such a gigantic scale; bonnets are larger, and hats are not now worn so completely over the nose. The most popular garment of the past year has certainly been the polonaise, which is a modification of the large casaque popular some two or three years ago, and is now adapted to every style of dress, as it serves as well for visiting toilettes as for outdoor wear or travelling. It is the most comfortable, handy garment possible, and, what is more, it simplifies dressing. Before its introduction a lady's walking costume consisted of a skirt, a tunic, a bodice, a sash and a paletot; but now, with a skirt and a polonaise a costume is considered complete. It has likewise other advantages—it is neither very long nor very short, so that it requires no holding up when walking, and can be easily raised or put aside when sitting. It has been made in all materials, from velvet to tarlatane—sometimes to match the skirt over which it is worn, and sometimes of black silk or cashmere, to "go with anything." White muslin polonaises were worn during the summer trimmed with embroidered insertion and either lace, or plaited muslin, and exceedingly stylish they were. Black cashmere polonaises were worn during the autumn trimmed with Alsace or buff guipure, and with frills of the same; and now velvet and velveteen polonaises have "come in" for winter wear. Velvet ones are trimmed in various ways with black lace and rich, fine gimp; with guipure and coarser gimp intermixed with jet; with white lace, such as old Bruges or binche with black lace over it; with white silk crinkled fringe, with black lace above; and lastly, with fur. The last-named trimming is arranged in a new style this year, the edge of the polonaise is cut out sometimes like a leaf, sometimes like the top of a battlement; in other instances in scollops or vandykes; in fact in every form of what the French term *dents*, and these are bound with braid if the material be cloth, and with silk if it be velvet or cashmere. A narrow band of fur is laid under the *dents*, and the fur used should be light and have as feathery an effect as possible. Silver fox is found to be the best for this purpose. The muff is always trimmed in the same style as the polonaise, provided it be of velvet. Velveteens are trimmed with bias bands of silk and with fringe.

In colours there has, likewise, been nothing new, if we except the startling red that has recently been introduced in the French capital, and called *Feu de Paris;* it is a reddish tint not at all likely to become popular. Black for various reasons has been more worn in Paris and Berlin than anything else, but in colours bottle green, marron, or chesnut brown plum and grey are the most fashionable. One shade of colour no longer composes a fashionable toilette, but three and even five shades are frequently used in the same costume. If the shades are well graduated, and no startling gaps in tone catch the eye, the effect of these shaded dresses is very harmonious. The quiet colours we have named are more pleasing than *Paris en feu*, with its lugubrious name, bringing with it the saddest recollections. The French of 1871 who can introduce such a colour with such a title, no way differ from their ancestors of 1794, when ladies wore their hair *à la Victime*—that is cut short at the nape of the neck, as the executioner was wont to clip the locks of those condemned to death; and when miniature guillotines of gold and precious stones were worn as ornaments. The same buoyant spirit, the joke and fun in the direst hour of danger, characterise the French of the present day as it did a hundred years ago.

In materials, also, we have but little that is now to record; those that drape well, that can be bunched up, and yet fall in graceful folds, are the most affected. French cashmeres and English merinoes are once again in high favour. Both are made thicker and finer, and some are so silky and elastic that they rival China crêpe in the graceful flow of the folds. Cashmere costumes are extremely fashionable; many are made with capes, which divide public favour with the polonaise. These capes are sometimes made to the number of five, and each has an opening at the back. The best cashmere costumes are richly braided with soutache of the same colour, or of a lighter shade, and trimmed with fringe.

Costumes called "Dolly Varden" have been one of the eccentricities of the past year. Cambrics, looking like the chintzes of our great grandmothers, studded with flowerets of variegated colours, have been made up into skirts and polonaises, and elaborately trimmed with plaitings of the same, or with white cambric frillings. We have had Dolly Varden hats and Dolly Varden caps, in fact, at Hurlingham, at Ascot, and at the principal flower shows of the season, our *elegantes* were to be seen promenading

about, looking very like Dresden china figures, or calling to mind the fantastic creations Watteau loved to paint.

The bonnets and hats show that fashion is in a transition state more than anything else. It is now difficult to discriminate when in the hand whether the bonnet is a hat or a bonnet, so close is the resemblance between the two. The newest form of bonnet is called the *beret*—it is hight in front, and the largest amount of trimming is at the back; the strings also full at the back. Other bonnets are made with fronts slightly curved at the sides, a ruche of white tulle *illusion* beneath, and velvet strings under the chin. These are more generally becoming than the *beret*, which is a compromise between a hat and bonnet.

In evening and dinner dresses there has been but little change. The former are made with trains, and the latter with either square or heart-shaped bodices and basques; the fronts are sometimes let in with satin, and are cut in the form of a waistcoat. Sashes for a time completely disappeared, but recently they have again reappeared, not with the formal two long ends hanging straight down the centre of the skirt, but tied and looped in an irregular yet artistic way, sometimes at one side of the back, and sometimes at the left side in front, according as it suits the individual figure. Let us hope that 1872 will see a revolution in ladies' dress in one respect—that if they must spend large sums on their toilettes they will buy rich silks and velvets, cashmere, fine lace, and rich furs—all that makes dress worthy of being worn; and not throw away a fabulous sum of money on perishable flimsy articles that look fresh but a few times, and when their freshness has departed they are valueless. Ladies dress under the Second Empire was varied and extremely luxurious, but it was neither substantial nor genuine.

Walking Costumes.

(See pages 48 and 49.)

No. 1.—Skirt of violet gros grain, trimmed with a flounce of black gros grain scolloped, and a violet flounce above; festooned trimming of black gros grain secured with bows, and a black and violet fringe from the lower edge. Black and violet tassels from the bows. Tunic in black gros grain, trimmed with a bias of black edged with violet, and black and violet fringe to correspond with the skirt. Bodice of black gros grain trimmed to match the tunic.

No. 2.—Polonaise of rich black velvet trimmed with wide black French lace, and *passementerie*; the skirt of the polonaise is arranged with a *jabot* each side, which is lined with mauve silk; the bows and facings are also lined with mauve. The under-skirt is a demi-train, and trimmed with deep kilt plaiting headed with bands and scollops of the same silk, which in this costume is a very pretty shade of mauve *poult de soie*; the pipings are of satin to match. Both these models are from Mr. Jay, Regent-street, W., from whom all particulars may be obtained.

Fashionable Hats and Bonnets.

(See page 52.)

Fig. 1. *Henri III. Toque in Black Velvet.*—This toque has a straight brim, and the crown is *bouffant*. A black lace ruche trims the edge. It is ornamented at the side with a tuft of black feathers, in the centre of which is a rose with an aigrette of green grass. A bow at the back, with three falling loops and a long end.

Fig. 2. *Brown Fuille Bonnet.*—The colour of the bonnet is *marron* or chesnut brown. A double crossband of silk goes all round the bonnet, and the top is edged with a black lace ruche; at the side there is a tuft of brown feathers. A lace scarf veils the chignon. The strings are brown velvet, and there is a bow of the same at the top of each of them.

Shawl Costume.

(See page 52.)

THE material is woollen and the fringe is woven in the material, likewise the border. It forms a warm comfortable costume for cold weather or travelling.

Toilettes for Children.

(See page 53).

Fig. 1. *Boy from Four to Five.*—Suit of either light cloth or brown holland. Short, loose trousers, kilt skirt, and jacket with square *basques*.

Fig. 2. *Baby from Twelve to Eighteen Months.*—White cashmere frock, trimmed with pink silk; scolloped bands; low square bodice, terminating with square *basques*.

Fig. 3. *Girl from Five to Six.*—Buff Tussore silk costume. Skirt bordered with plaiting, headed by a row of buff guipure and two rows of black velvet; high bodice, with *bretelles*; short tunic open at the back, and the space filled with a tab, trimmed to correspond; small pagoda sleeves.

Fig. 4. *Girl from Eight to Ten.*—Blue and white striped camlet costume. Plain skirt, trimmed to simulate a tunic, with a blue silk vandyked band; high bodice, with *berthe fichu*, round at the back, and slightly crossing in front; waistband fastening under a blue bow; sleeve trimmed with *revers*.

Fig. 5. *Girl of Eight.*—Mauve and white foulard under frock, with plain mauve foulard corslet and tunic. First skirt is trimmed with several rows of mauve silk braid; tunic looped up each side with bands of plain foulard. Two shades of either piqué or buff batiste, or an under dress of de laine, with silk corslet and tunic, or again, a silk underdress with muslin corslet and tunic, would all suit this style of costume.

The Housewife.

THE GASTRONOMIC REMEMBRANCER:

AN AID TO THE COMPOSITION OF DINNERS FOR EACH MONTH IN THE YEAR.

Soups.

JANUARY: Potage à la reine——Consommé de gibier——Bouillabaisse——Mutton broth——Crécy au riz——Hare soup.

FEBRUARY: Mulligatawny——Oyster soup——Gravy soup——Potage au pauvre homme——Potage à la Condé——Potage aux quenelles de gibier.

MARCH: Croûte au pot——Fish soup——Cock-a-leeky——Consommé au céleri——Purée de lentilles——Oxtail soup (thick).

APRIL: Potage Printanier——Consommé aux pointes d'asperges——Brunoise——Palestine soup——Vermicelli soup——Julienne.

MAY: Consommé de volaille aux pois——Purée d'asperges——Potage à la bonne femme——Crecy soup——Calves'-tail soup——Soupe au choux et au riz.

JUNE: Purée de pois verts——Consommé aux chouxfleurs——Consommé à l'Estragon——Oxtail soup (clear)——Maccaroni soup——Soupe à l'oseille.

JULY: Consommé aux haricots verts——Potage à la Sévigné——Potage aux quenelles de volaille——Hodge-podge——Turtle (clear)——Potage à la jardinière.

AUGUST: Potage aux nouilles——Potage à la Faubonne——Purée de légumes——Potage à l'Italienne——Vegetable marrow soup—Sago soup.

SEPTEMBER: Consommé aux œufs pochés——Crème de riz——Giblet soup (clear)——Grouse soup——Purée de pommes de terre——Potage à la semoule.

OCTOBER: Potage à la Nivernaise——Brunoise aux pâtes d'Italie——Purée de gibier——Bisque d'écrevisses——Giblet soup (thick)——Ox-cheek soup.

NOVEMBER: Consommé aux quenelles de poisson——Pea soup——Brunoise aux œufs pochés——Potage aux profiterolles——Mock turtle——Crème d'orge.

DECEMBER: Potage à la royale——Purée de marrons——Consommé aux ravioli——Turtle (thick)——Celery soup——Potage aux pâtes d'Italie.

Fish.

JANUARY: Cod fish and caper sauce——Fried smelts——Haddock and egg sauce——Sprats au gratin——Tanches en matelotte——Sole à la Colbert——Rouget en papillote——Turbot à la Hollandaise——Barbue à la Béchamel*——Raie, sauce piquante——Escaloppes d'esturgeon aux truffes——Torbay whiting à la maître d'hôtel.

FEBRUARY: Cabillaud à la Béchamel——Sole au gratin——Brandade de morue——Haddock, shrimp sauce——Barbue au Madère——Skate, caper sauce——Smelts au gratin——Darne d'esturgeon à la Tartare——Tanche aux fines herbes——Turbot sauté au beurre*——Torbay whiting, Hollandaise sauce.

MARCH: Sole à la cardinal——Fried cod——Morue à la crème*——Boiled gurnet, ravigotte sauce——Stewed skate——Barbue au Parmesan——Fried smelts——Boiled sturgeon, lobster sauce——Turbot au gratin——Broiled whiting——Lobster cutlets——Bouchées de homard.

APRIL: Soles en caisse——Baked carp——Boiled mackerel, fennel sauce——Red mullets, caper sauce——Salmon, lobster sauce——Filets de saumon à la ravigotte——Saumon sauté au beurre*——Shad à la maître d'hôtel——Skate, Italian sauce——Brill, sauce Hollandaise——Fried smelts——Whitebait.

MAY: Filets de soles à la Lyonnaise——Broiled fresh herrings——Filets de maquereau à l'Italienne——Rougets aux fines herbes——Saumon à la Génevoise——Saumon sauté à la maître d'hôtel*——Alose grillée, sauce piquante——Grilled trout——Whitebait——Kromeskys de homard——Soles en caisses aux truffes——Filets d'alose sautés à l'Italienne.

JUNE: Sole aux fines herbes——Stewed carp——Fried gudgeons——Matelotte d'anguilles——Broiled mackerel——Rougets grillés à la maître d'hôtel——Saumon, sauce Hollandaise——Baked sea bream——Fresh herrings, tomato sauce——Whitebait——Filets de saumon aux concombres——Truite à la Tartare.

JULY: Fried eels——Water souchet of flounders——Filets de maquereaux aux crevettes——Harengs frais à la Tartare——Grey mullet, Hollandaise sauce——Salmon, caper sauce——Filets de saumon, sauce piquante——Truite à la maître d'hôtel——Whitebait——Sole à la ravigotte——Croquettes de saumon*——Stewed red mullets.

AUGUST: Carpe à la Chambord——Anguilles à la Tartare——Haddock, Hollandaise sauce——Baked fresh herrings——Grey mullet, anchovy sauce——Saumon à la Tartare——Truite à la Génevoise——Darne de saumon au gratin——Whitebait——Soles à la Orly——Rougets grillés au beurre d'écrevisses——Flounders à la maître d'hôtel.

* The dishes marked thus * are réchauffés, or second dressings.

Digitized by Google

SEPTEMBER: Dorade au Madère——Sole frite à la Tartare——Haddock, caper sauce——Fresh herrings au gratin——Brill, lobster sauce——Skate, tomato sauce——Stewed sturgeon——Fried trout——Emincè de turbot au gratin*——Eels, stuffed and baked——Grey mullet, sauce piquante——Grilled perch.

OCTOBER: Fried whitings——Escaloppes de turbot à la Perigord*——Sturgeon, caper sauce——Raie au beurre noir——Curried brill*——Pike, stuffed and baked——Red mullets, oyster sauce——Harengs frais à la moutarde——Haddock au gratin*——Dorade à l'Italienne——Boiled gurnet, caper sauce——Sole aux champignons.

NOVEMBER: Sole à la Normande——Cabillaud au gratin*——Baked John Dory——Broiled haddock——Brochet à la maître d'hôtel——Barbue sautée au beurre*——Fried skate——Grilled sprats——Turbot à la crème——Stewed tench——Merlan aux fines herbes——Esturgeon au Madère.

DECEMBER: Cod and oyster sauce——John Dory, caper sauce——Sole à la Béchamel——Barbue au gratin——Turbot au Madère——Merlan au gratin——Raie à la maître d'hôtel——Haddock, stuffed and baked——Brochet aux fines herbes——Twice laid*——Fried sprats——Esturgeon à la Génevoise.

Relevés, Rôts, and Entrées of Meat, Poultry, and Game.

JANUARY: Entrecôte de bœuf à la Napolitaine——Rump steak and oyster sauce——Stuffed calf's heart——Roast leg of mutton——Boiled shoulder of mutton——Côtelettes de mouton panées aux pommes de terre——Pork chops——Carré de veau à la Bourgeoise——Ris de veau en fricandeau——Boudins à la Richelieu——Roast turkey——Pâté de lièvre——Abatis de dinde à la Dauphine*——Escaloppes de lapereau à la financière——Faisan truffé——Perdreaux à la Périgord——Wild duck——Bécasses en suprême——Salmis de bécassines——Mauviettes en caisses.

FEBRUARY: Steak and kidney pudding——Filets de bœuf aux oignons glacés——Filet de bœuf aux pommes de terre——Boiled leg of mutton——Mutton chops——Côtelettes de mouton braisées aux choux——Ragout de veau——Roast loin of pork——Côtelettes de veau en papillotes——Quasi de veau à la chicorée——Roast guinea fowl——Suprême de volaille——Filets de lapereau en papillote——Boudin de lièvre——Côtelettes de perdrix à la financière——Salmis de faisan——Roast widgeon - Becassines en caisses——Rognons au vin——Croquettes de volaille.*

MARCH: Stewed beef——Broiled rump steak——Minced beef*——Roast saddle of mutton——Braised neck of mutton——Côtelettes de mouton à la Nivernaise——Carbonade de mouton au céleri——Calf's head——Filets de veau à l'Italienne——Paupiettes de veau au jus——Croustades de ris de veau——Boiled capon——Kromeskys de volaille*——Filets de levraut sautés aux truffes——Boudin de faisan——Poulet en papillote——Caisses de foie gras——Palais de bœuf au gratin——Escaloppes de volaille aux champignons*——Plovers.

APRIL: Rump steak pie——Filet de bœuf à la jardinière——Filets de bœuf à l'Italienne——Stewed ox palates——Roast leg of lamb——Côtelettes de mouton à la Maintenon——Escaloppes de mouton aux pointes d'asperges*——Boiled knuckle of veal——Côtelettes de veau à la Nivernaise——Cassolettes de pommes de terre au ris de veau*——Stewed pigeons——Roast chickens——Pigeons à la ravigotte——Ptarmigan——Boudins de volaille au salpicon*——Epigrammes d'agneau à la purée de navets——Fricassée de poulet à l'Italienne——Croustade de mauviettes aux truffes——Blanquette de volaille*——Petites chartreuses, crème de volaille.

MAY: Roast ribs of beef——Beefsteak à la Parisienne——Filets de bœnf aux cornichons——Stewed breast of lamb——Lamb chops——Côtelettes d'agneau aux concombres——Côtelettes de mouton à la Soubise——Roast fillet of veal——Filets de veau, sauce tomate——Ris de veau en caisses——Roast fowls——Fricassée de poulet——Chartreuse de pigeons——Poulet sauté à l'estragon——Curried fowl*——Bouchées au salpicon*——Rognons à la brochette——Escaloppes de veau aux navets glacés*——Timbale de maccaroni à la Milanaise——Côtelettes de mouton à l'Allemande.

JUNE: Bœuf à la mode——Croquettes de bœuf*——Beefsteak Châteaubriand——Roast forequarter of lamb——Hashed mutton*——Côtelettes de mouton aux petits pois——Stewed breast of veal——Fricandeau à l'oseille——Ris de veau piqué au jus——Tendrons de veau aux petits pois——Pigeon pie——Roast ducklings——Canard aux navets——Filet de levraut, sauce poivrade——Roast haunch of venison——Petits pâtés à la Monglas——Poularde à la Régence——Poulet à la Dauphine——Filets de volaille à l'écarlate——Friture de poulet à l'Italienne.*

JULY: Filet de bœuf mariné——Beefsteak à la Béarnaise——Rissoles de bœuf*——Roast loin of lamb——Côtelettes de mouton à la royale——Epigrammes d'agneau——Escaloppes de mouton aux tomates*——Minced veal*——Fricandeau aux epinards——Ris de veau aux truffes——Roast turkey poult——Ducks and green peas——Canard aux olives——Pigeons en compote——Escaloppes de levraut à l'Italienne*——Côtelettes de chevreuil à la chasseur——Cailles rôties——Poulet à la Chivry——Filets de volaille aux haricots verts*——Cuisses de poulet à la diable.*

* The dishes marked thus * are réchauffés, or second dressings.

AUGUST: Grenadins de bœuf à la poivrade——Escaloppes de bœuf aux choux*——Filets de bœuf aux tomates——Mutton steak——Roast shoulder of lamb——Côtelettes de mouton aux haricots verts——Croquettes de veau*——Rolled breast of veal——Filets de veau à la ravigotte*——Ris de veau à l'oseille——Roast gosling——Poulet à la Tartare——Canard en salmis*——Filets de volaille aux artichauts*——Poularde à la St. Cloud——Roast Blackcock——Roast grouse——Roast loveret——Hashed venison*——Cailles en caisses.

SEPTEMBER: Beef olives——Filets de bœuf à la Française——Miroton de bœuf*——Roast loin of mutton——Mutton curry*——Côtelettes de mouton à la jardinière——Poitrine de mouton grillée——Braised fillet of veal——Grenadins de veau à la Macédoine——Quenelles de veau à la Périgord*——Liver and bacon——Roast goose——Poule au riz——Pigeons à la crapaudine——Civet de lièvre——Roast partridges——Filet de chevreuil au Madère——Salmis of grouse*Croquettes de riz au salpicon*——Filets de volaille à la Provençale.*

OCTOBER: Stewed steak——Filets de bœuf aux champignons——Aloyau braisé à la Nivernaise——Roast shoulder of mutton——Haricot mutton——Côtelettes de mouton grillées, sauce piquante——Roast loin of veal——Fricandeau aux tomates farcies——Rissoles de ris de veau*——Foie de veau à l'Italienne——Roast rabbit——Poulet à la Marengo——Lapereau aux truffes——Chartreuse de perdrix——Roast pheasant——Roast teal——Rable de chevreuil en daube——Filets de perdreaux à la financière——Petits pâtés de bécassines——Cuisses de poulet à la Villeroy.*

NOVEMBER: Boiled beef——Steak and onions——Bubble and squeak*——Braised saddle of mutton——Côtelettes de mouton sautées aux champignons——Epaule de mouton à la Soubise——Roast leg of pork——Côtelettes de veau à la Milanaise——Escaloppes de veau aux champignons——Tête de veau en tortue——Boiled rabbits——Poulet sauté à l'Italienne——Lapereau aux olives——Roast hare——Perdrix aux choux——Faisan truffé——Roast snipes——Sarcelle à la bigarrade——Salmis de bécasses*——Filets de chevreuil à la maréchale.

DECEMBER: Roast sirloin of beef——Filets de bœuf aux olives——Ragout de queues de bœuf——Roast haunch of mutton——Irish stew——Côtelettes de mouton sautées, oignons glacés——Boiled leg of pork——Fricandeau au jus——Foie de veau à la Provençale——Côtelettes de porc, sauce Robert——Boiled turkey——Dinde truffée——Quenelles de lapereau au jus——Jugged hare——Salmis de perdreaux——Chartreuse de faisan——Roast woodcock——Bécassines en papillotes——Filets de chevreuil à la purée.*

Entremets of Vegetables.

JANUARY: Jerusalem artichokes à la crème——Broccoli sprout en salade——Celery fritters——Brussels sprouts au lard——Spinach au jus Choux rouges marinés——Saltsifis à la maître d'hôtel——Mashed potatoes——Spanish onions stuffed——Haricot beans (dried) aux tomates.

FEBRUARY: Purée of turnip tops——Sea kale au beurre noir——Broccoli sprouts à la sauce blanche——Stewed celery——Brussels sprouts à la crème——Fried potatoes——Parsnips au naturel——Navets glacés——Choucroûte——Spanish onions en salade.

MARCH: Sea kale à la crème——Broccoli sprouts au jus——Carrots à la maître d'hôtel——Stewed lettuce——Turnip tops en salade——Potatoes à la Lyonnaise——Stewed Spanish onions——Choux farcis——Haricot beans (dried) aux fines herbes——Greens on toast.

APRIL: Asparagus au naturel——Sea kale salad——Cauliflower au gratin——Carrots glacées——Purée d'oseille au croûtons——Laitues farcies——Potatoes à la maître d'hôtel——Choux au lard——Stewed beetroot——Navets au jus.

MAY: Asperges à la sauce blanche——Concombres au jus——Pois à l'Anglaise——Fried cauliflower——Stewed sea kale——Purée d'oseille aux œufs pochés——Lettuce on toast——Pommes de terre au beurre——Pois à la crème——Choux en salade.

JUNE: Asperges frites——Concombres aux fines herbes——Pois à la Française——Cauliflower salad——Lettuce salad——Potatoes sautées——Haricots verts à la crème——Fèves à la maître d'hôtel——Green artichokes à la Italienne——Potatoes à la Hollandaise.

JULY: Broad beans and bacon——Artichauts à la sauce blanche——Haricots verts sautés au beurre——Vegetable marrow au gratin——Stewed tomatoes——Potatoes à la crème——Cauliflower au fromage——Pois au lard——Tomates en salade——Haricots verts à l'Italienne.

AUGUST: Artichauts farcis——Purée de fèves aux croûtons——Vegetable marrow, tomato sauce——Haricots verts à la maître d'hôtel——Tomates au gratin——Stewed vegetable marrow——Broiled mushrooms——Haricots blancs aux fines herbes——Purée de pommes de terre——Champignons à la poulette.

SEPTEMBER: Vegetable marrow à la Lyonnaise——Haricots verts en salade——Green artichokes fried——Broccoli à la sauce blanche——Haricots blancs aux tomates——Stewed mushrooms——Aubergines au gratin——Tomates farcies——Boulettes de pommes de terre——Vegetable marrow au fromage.

* The dishes marked thus * are réchauffés, or second dressings.

OCTOBER: Haricots verts à la Lyonnaise——Vegetable marrow fritters——Broccoli salad——Vegetable marrow stuffed——Truffes au vin——Haricots blancs en salade——Tomates à l'Italienne——Greens à l'Anglaise——Potato snow——Oignons glacés.

NOVEMBER: Topinambours à la sauce blanche——Endive salad——Céleri au jus——Broccoli à la crème——Choux de Bruxelles sautés au beurre——Epinards aux œufs pochés——Choux rouges au lard——Potato salad——Lentilles au lard——Pommes de terre au gratin.

DECEMBER: Topinambours au gratin——Purée of endive——Broccoli, sauce tomate——Celery à la crème——Brussels sprouts au jus——Epinards au beurre——Salsifis à la poulette——Pommes de terre au lard——Choux frisé à l'Allemande——Scotch kale au naturel.

Savoury Entremets.

JANUARY: Stewed cheese——Huîtres au gratin——Omelette à l'oignon.

FEBRUARY: Ramequins——Bashawed crab——Curried eggs.

MARCH: Maccaroni au gratin——Salade de harengs——Œufs farçis.

APRIL: Fondue——Aspic de homard——Omelette au jambon.

MAY: Tartelettes piémontaises——Homard au gratin——Omelette aux fines herbes.

JUNE: Cheese straws——Salade russe——Œufs au gratin.

JULY: Petits soufflés au Parmesan——Canapés d'anchois——Omelette aux crevettes.

AUGUST: Gruyère sandwiches——Canapés de crevettes——Omelette aux champignons.

SEPTEMBER: Tartines au Parmesan——Salade d'anchois aux œufs——Omelette aux tomates.

OCTOBER: Omelette au Parmesan——Canapés de sardines——Maccaroni aux tomates.

NOVEMBER: Beignets au fromage——Crab à la remoulade——Omelette aux truffes.

DECEMBER: Welsh rabbit——Scolloped oysters——Omelette au lard.

Sweets.

JANUARY: Beignets soufflés——Tartelettes d'ananas——Gelée à la Russe——Roly-poly pudding——Trifle——Soufflé de pommes de terre——Orange cream——Ginger pudding——Roman pudding——Génoises——Apple pudding——Chartreuse d'oranges.

FEBRUARY: Compote de pommes——Marrow pudding——Soufflé à la vanille——Bouchées aux confitures Orange jelly——Pancakes——Fig pudding——Custard pudding——Eclairs au chocolat——Lemon cream——Tipsy cake——Tourte de Frangipanne.

MARCH: Apple tart——Beignets d'oranges——College pudding——Soufflé au citron——Marmalade pudding——Coffee cream——Jam tart——Darioles à la vanille——Croûte à l'ananas——Flan——Sir Watkin Wynn's pudding——Bakewell pudding.

APRIL: Chocolate cream——French pancakes——Omelette soufflée——Meringues——Lemon pudding——Fairy butter——Compote d'oranges——Rhubarb tart——Beignets à la dauphine——Gooseberry fool——Petits gateaux à la crème——Queen Mab pudding.

MAY: Charlotte de pommes——Croûte au cassis——Sago pudding——Pineapple fritters——Tartelettes d'oranges——Soufflé aux amandes——Compote de cerises——Rhubarb pudding——Salade de fraises——Gooseberry tart——Vanilla cream——Ribbon jelly.

JUNE: Soufflé de fraises——Macedoine de fruits à la gelée——Mousseline pudding——Cherry tart——Chartreuse de fraises——Apricot cream——Rice pudding——Tartelettes de fraises——Boudin glacé au café——Noyau jelly——Mirlitons au marasquin——Salade de groseilles.

JULY: Salade de fruits——Raspberry and currant tart——Tartelettes d'abricots——Cherry pudding——Soufflé aux abricots——Black currant pudding——Strawberry jelly——Nesselrode pudding——Gateau Savarin——Maraschino jelly——Strawberry cream——Compote d'abricots.

AUGUST: Soufflé au café——Croûte aux abricots——Raspberry cream——Apricot pudding——Chartreuse d'abricots——Compote de Reine claudes——Raspberry jelly——Pêches à la Condé——Beignets d'abricots——Salade de pêches——Greengage tart——Boudin glacé à la vanille.

SEPTEMBER: Crème Garibaldi——Compote de prunes——Chartreuse de pêches——Maccaroni pudding——Almond cream——Pommes au riz meringuées——Grape jelly——Soufflé de riz——Tartelettes de pêches——Plum tart——Beignets de pêches——Whipped cream.

OCTOBER: Soufflé de pommes——Barcelona nut cream——Semolina pudding——Pommes au beurre——Charlotte russe——Stewed pears——Damson tart——Œufs à la neige——Mormon pudding——Quince jelly——Riz à l'impératrice——Omelette au rhum.

NOVEMBER: Lemon jelly——Cabinet pudding——Beignets de pommes——Omelette aux confitures——Gateau Napolitain——Soufflé aux marrons——Compote de poires——Omnibus pudding——Gateau de pistaches——Pineapple cream——Pain d'honneur——Rissoles aux confitures.

DECEMBER: Plum pudding——Mince pies——Cheese cakes——Gelée au curaçao——Salade d'oranges——Blancmanger——Caramel cream Pineapple jelly——Nougats à la crème——Madeleines——Almond pudding——Soufflé au chocolat.

Garden.

THE CALENDAR.

JANUARY.

Protect from frost tulips, anemones, pots of cuttings, seedlings, and plants sheltered under glass. Give air to, but rarely water auriculas, carnations, picotees, pinks, and heartsease. Plant out in mild weather hardy deciduous shrubs, sweetbriars, jasmines, honeysuckles, roses, lilacs, laburnums, and all kinds of ornamental shrubs. Transplant each with a good ball of earth round its roots. In forcing plants the change of temperature should not be sudden. They may be first placed in a greenhouse, and from that into a stove or slight hotbed.

FEBRUARY.

Sow tender and half-hardy annuals in heat, and about the end of the month sow hardy annuals and seeds of polyanthuses in pans in a cold frame. Transplant all hardy fibrous-rooted flowering perennials and biennials, where they are to bloom, saxifrage, gentianella, hepaticas, violets, primroses, scarlet lychnis, carnations, pinks, monk's hood, campanulas, rose campions, rockets, sweet-williams, hollyhocks, sun-flowers, &c. Plant anemones and ranunculuses for show by the 15th. Laurels, cistuses, and many kinds of evergreen shrubs may be transplanted, if the weather be mild. Box edging, if planted now, will soon take root; also cuttings of roses, honeysuckles, and jasmines. Prepare soil for potting carnations and picotees, and pot and place in a hotbed choice dahlias. Give air and keep plants in pots moderately dry. Continue forcing a succession of flowering plants.

MARCH.

Laburnums, myrtles, roses, honeysuckles, jasmines, lilacs, and other evergreen and deciduous flowering plants may still be removed. Sow hardy annuals in borders and in heat for planting out. Part and plant chrysanthemums. Fill up early in the month vacancies with campanulas, rockets, Canterbury bells, lychnises, wallflowers, columbines, monk's hood, perennial asters, sunflowers, &c. Sow perennial and biennial flower seeds about the end of the month.

APRIL.

Pot and plant out carnations and picotees for blooming. Propagate dahlias by division of the root. Sow dahlia seeds in heat. Keep tulips from frost and high winds. Sow auricular seeds in pots and boxes: propagate by offsets. They bloom this month, and those intended for exhibition must be carefully looked to. Water and prick out polyanthus seedlings. Every sort of annual may now be sown.

MAY.

Balsams sown in heat should be planted as soon as they are up round the edge of a six-inch pot, about five in a pot, with the seed leaves not more than an inch above the soil. Strike cuttings of biennials and perennials under a hand glass. Plant out cockscombs. Sow carnation and picotee seeds; also biennials and perennials in open ground. Strengthen the upper shoots of rose stocks by trimming. Shade and protect from winds tulips and hyacinths. Propagate double wall-flowers by slips, and perennial fibrous-rooted plants by cuttings. Sow annuals for succession.

JUNE.

Bud rose stocks, and strike cuttings under a hand-glass; also cuttings of fuschias, heliotropes, pipings of pinks and geraniums. Ripen tulip bulbs in the open air. Take up bulbs of hyacinths, and dry in the shade. Sow plants, and strike cuttings of pansies. Plant in open ground or remove out of doors, greenhouse plants. Propagate by layers, pinks, double sweet-williams, &c., and by cuttings of the stalk, fibrous-rooted plants. Take up bulbs of ranunculus, and anemone plants, as the flowers decay. Sow hardy annuals, plant out China aster, holyhocks, carnation, and pink seedlings.

JULY.

Layer or pipe carnations and picotees. Trim and stake dahlias, plant out seedling pansies, strike cuttings of geraniums and chrysanthemums. Transplant into pots, seedling pinks, pansies, polyanthuses, &c., also perennial and biennial seedlings to remain till October. Budding rose stocks is an easy operation, and may be successfully performed this month. Carnation and picotee layers should not be cut off till they have plenty of fibrous roots.

AUGUST.

Sow auricular, polyanthus, anemone, ranunculus, and seeds of bulbs. Prune and repot pelargoniums. Carnations and picotees may still be propagated by layers or pipings. Strike cuttings of pansies, and plant seedlings in the shade. Lay and cut evergreens; this is a favourable time for transplanting them. Cuttings of geraniums will strike, freely planted with one joint beneath soil and one above it, under a hand-glass in borders. Roses budded last month may be released from their ties. Remove bulbs that have done flowering. Trim box, yew, holly, and privet. Plant autumnal bulbs.

SEPTEMBER.

Plant bulbs for early blooming. Transplant in pots singly, offsets and thick cuttings of calceolarias. Strike rose cuttings under a hand-glass.

Digitized by Google

Propagate perennials out of bloom, by parting them. Preserve the roots of dahlias from frost. Gather seed. Remove tender plants into greenhouse. Many hardy annuals will stand the winter if sown this month. Part and transplant peonies, irises, &c., in their destined situation. Transplant perennial and biennial seedlings, with a bulb of earth to their roots.

OCTOBER.

The garden should now be cleared and put in order for the season. Transplant perennial and biennial fibrous-rooted plants where they are to remain. Put auriculas into frames for the winter. Plant hardy deciduous shrubs and suckers, cuttings of honeysuckles, laurels, &c. Trim evergreens and prune flowering shrubs of all sorts. Plant bulbs in the borders and in pots for forcing. Dig up dahlia roots and dry them in the shade, to be stored away till May. Perennials not parted last month may be divided now. Put into frames pinks, pansies, and carnations. Plant box edgings and common bulbs.

NOVEMBER.

Auriculas, pansies, carnations, picotees, and other florist's flowers in pots, should have plenty of air, and be kept moderately dry. Plant the best bed of tulips the first week. Plant roses and rose stocks for budding or grafting. Continue to transplant all hardy kinds of flowering shrubs. Form beds of hyacinths. Shelter choice bulbs and flowering plants, and clear borders. Collect dead leaves, soil and sand for compost, and turn the heap at intervals. All kinds of bulbs may be planted this month.

DECEMBER.

Protect the stems and roots of half-hardy shrubs. Take up and secure in sheds tender roses, from frosts and damp. Cover in severe weather with litter, heartesase and pinks. Prune and dig between shrubs, and if the weather be open, hardy flowering shrubs may be planted. Dwarf plants may be protected with mats and hoops, or loose litter. Climbers may have coverings hung before them so as not to touch the plants. These should not be removed on bright days after frost.

Annuals for Sowing in the Autumn.

THERE are several pretty and showy hardy annuals, which, if sown in the early part of August, and planted out in the flower beds in autumn. after their summer occupants have been removed, make a very nice and most acceptable display in the early spring months. The most generally employed are Silene pendula, pink; S. pendula alba, white; and S. pendula ruberrima, with reddish-tinted flowers and dark foliage. S. pseudo-atocion is very pretty, and nicely compact in growth, but wants to be wintered in a cold frame in pots, and planted out the first week in March to flower. Limnanthes Douglasii, yellow edged with white, is a most useful annual, and very hardy; the bright green tufts of foliage are a pleasant sight during winter. Lasthenia californica, yellow, and Oxyura chrysanthemoides, yellow, are useful for filling large beds; for small gardens the Limnanthes is to be preferred. The red and white varieties of the common Virginian stock are very acceptable in their way. The forget-me-nots are charming things for spring work. There are Myosotis sylvatica, the early spring flowering blue forget-me-not, and the white variety of the same, both very hardy, and singularly floriferous. Then there is that splendid but less hardy variety, M. dissitiflora. In dry, warm, sheltered positions, this form will stand the rigour of an ordinary winter without taking much harm; in localities not so favourably situated it would be best to grow this Myosotis in pots during the winter, housed in a cold frame, and plant them out at the end of March. If Calandrinia speciosa were treated in the same way, it would be very charming in the spring also; but it is too delicate to stand the exposure of a winter. Nemophila insignis, blue; the pale-flowered N. maculata; Saponaria calabrica, rose, and its white variety, are all useful, and very effective. The beautiful blue of N. insignis is quite bewitching at the end of April, and it makes a fine edging to a bed of Silene pendula. Beds in which two or three annuals of similar growth can be mingled, so as to give intermingling hues of colour, are to be commended. The blue Nemophila, blended with the yellow of Oxyura chrysanthemoides and edged with the white Silene pendula, is a pleasant floral picture on a bright spring day. A combination like this suggests others; but much depends on a knowledge of the growth of the various annuals employed, and the times of blooming. Generally speaking, these hardy annuals grow much more vigorously in the spring, especially when transplanted into prepared beds, than they would under the ordinary course of a summer treatment. It is well, however, that they be planted out in the autumn somewhat thickly, so as to give the beds as soon as possible a filled and finished appearance; and when, as the days lengthen and the atmosphere becomes more genial, robust growth sets in, some of the plants can be pulled out, to prevent undue crowding. A goodly number should be left, as the plants are subject to many destructive influences—such as frost, slugs, wet, &c. The crimson, lilac and white candytufts are sometimes used for spring work, and, being of a very hardy character, they stand the winter well. They are, however, somewhat late in blooming, and are thus apt to trench upon the summer season, Collinsia bicolor is a capital showy annual, but tall in growth, and requires to be planted thickly in the midst of large beds, when the effect is very fine.

In addition to the annuals already enumerated, there are many others that are very hardy and quite pretty, a great number of which, if sown in the autumn, would be found capable of standing the rigour of an ordinary winter. Excessive wet, and the attacks of various insects are hostile influences; but many of these will be certain to stand, will bloom very much earlier because sown in the autumn, and be as varied in habit as they are in the colours of the flowers.

The blue-flowered Asperula azurea setosa is a fine spring bedding plant, of wiry habit and considerable hardihood; Bartonia aurea, orange, is very showy, though a little coarse in growth; the dwarf blue Campanula Lorei, and C. Lorei alba, C. pentagonia, and its white variety also, are pretty certain to stand, especially if they could be wintered in a cold frame, and planted out early in March. Some of the dwarfer Clarkias, such as C. integripetala, and the white and flesh-coloured Tom Thumb varieties of the same; the two last are very pretty in small groups. Of the Collinsias, C. bicolor, C. candidissima, C. grandiflora, and C. verna are all very charming and desirable; the last-named supplies a tint of lively blue. The purple, crimson, white, and lilac candytufts are hardy in character, and supply pleasant tints; and the large blue form of Convolvulus minor, by some termed Tricolor monstrosus, by others the dwarf clustered, should also be included, even though a little tender. The blue Cyanus minor, if sown in the autumn, will stand through the winter, and many grow it in that way because of the attractive blue flowers it yields in the spring. There are some dwarf varieties of the Indian pinks (Dianthus chinensis nanus), such as the dark purple and striped types, that might be treated as annuals, which they practically are, and if sown in August would bloom early. Erysimum arkansanum, yellow, and E. Peroffkianum orange, are both hardy, early, and singularly gay when sown in the autumn; the former has rather the dwarfest growth. Eschscholtzia californica, crocea, and alba are not less acceptable; they are robust in growth, and very free. Less showy, but scarcely less useful, are the Gilias, such as laciniata, tricolor, and alba; in fact, they may be sown at almost any time, and will bloom in almost any situation. Lasthenia californica is a strong, showy annual, and, being very hardy, will stand through the winter. The Leptosiphons represent a most useful class of hardy annuals, bright-looking and free-blooming, and well worth trying to stand through the winter. Mr. William Thompson thinks the new Californian L. roseus will be sufficiently hardy to stand through the winter; if so, it will be very charming indeed in bright sunny weather in the early spring.

The varieties of Nemophila insignis, as well as those of N. maculata, are not the least attractive of this list. The nemophilas will grow in any soil, and bloom with wonderful freedom; but it would be well, in the case of plants required to bloom in early spring, if they were housed during winter, and planted out at the end of February. Oxyura chrysanthemoides, yellow, makes grand masses of golden flowers in early spring if sown in the autumn.

There is no reason why the varieties of the sweet pea should not be sown in the open ground at the same time. Nearly, if not quite, as hardy in constitution as the common early peas of our gardens, there is no doubt as to their acceptability could they be had in bloom two months' earlier in consequence. If sown in the open ground, a few branches of spruce fir placed about the young growth would preserve them from many vicissitudes; and they can also be grown in pots, housed in a cold frame, and planted out in February or March. Some of these pots of peas should also be grown into bloom early in the greenhouse. What could look gayer than some groups of the dwarf French poppy when crowned with divers-coloured flowers of striking hues at the height of spring? and there is reason to believe the plants would stand through the winter. The pretty double yellow Sanvitalia procumbens, than which nothing scarcely is more effective in our garden in October and November, could also be used for early spring work; so could the pink and white varieties of Saponaria calabrica, which are among the most continuous blooming of the dwarf annuals. Silene pseudo-atocion is quite a gem for early blooming, but, being a little tender, should be wintered in pots. Its lively pink blossoms are very soft, and at the same time very showy, and a bed of this edged with the blue Nemophila insignis, would be indeed a surprise. This Silene is very compact in growth, and extremely free-bearing. The chaste white sweet alysum, the blue, white, and blush varieties of Venus's Looking-glass, and the red and white Virginian stocks, close the list, all dwarf in growth, and free-blooming.

Annuals will yield a return of floral service just in proportion to the attention bestowed on them. They well deserve, and should receive, some care. They are too often sown in hard, poor ground, barely fit to sustain life, much less bring out the beauty of the flowers. Some attention is absolutely necessary in the case of those to be sown in the autumn for blooming in the spring. Dry and sheltered positions that are open to the sun should be selected in so far as it can be done; and some light, free, and rich soil will help their development largely. A few sprays of evergreen, placed about the tenderest, act as a kindly screen in rough weather; and in many cases where there is sufficient pit room to afford shelter to those of less robust growth, it should be availed of. There are many gardens in which the introduction of a few autumn-sown annuals would be highly beneficial and acceptable. Most hardy annuals bloom much better and are much stronger when sown in autumn.

Substitute for Glass in Cucumber Frames, &c.—Procure some strong canvas and brush it over with boiled linseed oil while in a hot state, allowing it to dry thoroughly previous to the next application. Three coatings will be sufficient. It being presumed that the wooden frame is already made, stretch the canvas and nail it on carefully.

ACTING CHARADE.

GREENHOUSE.

SCENE I.

GREEN.

MRS. STEPHENS at work in her drawing-room. Enter MRS. ROBINS.

Mrs. Stephens.—Well, this is kind, my dear friend!—and to come on such a dull day, too! I was just wishing some one would drop in.

Mrs. Robins.—And how are you, dear? But I need not ask—you look charming! I believe jaundice itself would become you! As for me, I look a perfect wretch in this bonnet; it doesn't suit my complexion at all.

Mrs. Stephens.—You vain creature! you know you're looking sweetly. That bonnet's a perfect love—such an exquisite shade of green!—and your shawl is exactly to my taste. But do take them off, and stay an hour with me; I am so dreadfully worried, your company would soothe me.

Mrs. Robins.—Anything to oblige you, dear. (*She takes off her shawl and bonnet.*) I have a piece of crochet in my pocket: now for a good gossip. (*Begins to work, then says eagerly*)—But do tell me, dear, what has worried you? Not Fanny, I hope—she is so tractable, so grateful for your kindness; and well she may be, to such an aunt!

Mrs. Stephens.—Fanny is, as you suppose, blameless; and I strive to be kind to the poor girl, for her own sake as well as her mother's. My sister, I dare say you know, was so silly as to marry a poor man; he had *some* idea of decency, for he died within a year. She, having bought her experience, was wiser next time, but not happier, she pretends to say.

Mrs. Robins.—Dear me, I thought Fanny's mother was dead!

Mrs. Stephens.—Oh, no; she married an old Indian general, as mean as he is rich, which melancholy fact she did not find out till too late. Well, he was ordered to India; she went with him, for everyone said the climate would be too much for him, so I advised her not losing sight of her lord, who has a mine of wealth to bequeath. He wouldn't take to Fanny at all, so I offered to bring her up, for affection's sake, while he lives; at his death, my sister is to refund my expenses on her daughter's account. Of course, she wishes the girl to be married—so do I; and my vexation arises from my having failed in every attempt to make a match for her.

Mrs. Robins.—Is that all? Why, I thought Fanny had fallen in love with some wretched younger brother—which would have been distressing indeed. Keep her from that, and you may be quite happy.

Mrs. Stephens.—My dear creature, how you run on! Fanny will never have any attachment that is not founded on a rent-roll and a fine establishment. Pray don't think so ill of the poor girl; she has imbibed all my principles thoroughly!

Mrs. Robins.—I am glad to hear it. I can speak from heartfelt experience, having had three daughters to marry off! I assure you, dear, I suffered martyrdom every evening that we spent in society, from their *début* to their marriage, in witnessing the odious fascinations of those detestable younger sons. If I had my own way, emigration should be the fate of all of them; they're intended for public nuisances, I'm convinced.

Mrs. Stephens.—But your dangers were wholly imaginary—your girls are happily married, are they not?

Mrs. Robins.—Oh, yes! Maria is the poorest—£3000 a year. I am quite happy now, without a care, till my granddaughters grow up; but they'll do well, no doubt, their mothers' principles are so decidedly settled.

Mrs. Stephens.—Happy woman; I envy you! My trials might be printed as a warning to mothers and aunts! Pass me the Eau-de-Cologne, please dear.

Mrs. Robins.—Has anything happened lately?

Mrs. Stephens.—Every day brings a fresh disappointment, or such a keen remembrance of old ones, that I get disgusted. When I count up the divines whose doctrines I have adopted, the landowners with whom I have alternately upheld and abused Free Trade, the generals whom I've preferred to Wellington—always insinuating that Fanny had converted me to these opinions—I declare to you I feel like a pettish child, doubtful whether to laugh or cry. The labour that girl has cost me, none can tell.

Mrs. Robins.—How is it that you missed Colonel Grantley last winter? I put him down for Fanny at once.

Mrs. Stephens.—And so did I. He behaved shamefully! I slipped down in a field where he was shooting one day, so that he was obliged to help me home and call on me afterwards. I asked him to dinner, inviting some humdrums to meet him, just such people as would discuss the dishes and mind their own business. Every bit of plate I possess was polished up; I made myself ill by devoting a whole day in the kitchen to soups and curry; and during dinner I contrived to draw Fanny into a fit of enthusiasm which would have melted the heart of Pluto himself. My party went off well, costing a good sum. The Colonel stayed last to express a wish to be intimate with us, asked my assistance in furnishing a house he was about to take, and, as my claret was good, his precipitancy seemed natural. The wretch came continually, till he got leave to go into Devonshire, after which visit he hoped, he said, for perfect happiness. Any one would have been deceived by him, as I was, into the belief that he had gone for his father's consent; but, behold, he writes me a sentimental letter that a long engagement with a cousin having ended painfully, England was so distasteful to him he had exchanged into a foreign regiment!

Mrs. Robins.—Shameful, inexcusable conduct!

Enter FANNY, with a letter.

Fanny.—Oh, aunt, here it is! I've expected it for a fortnight, and—— Ah, Mrs. Robins, good morning! I wish to speak a word with you, aunt.

Mrs. Stephens.—I have no secrets from dear Mrs. Robins, what is it?

Fanny.—Do you remember Mr. Green, aunt?

Mrs. Stephens.—Yes; a silly-looking young man, with straw-coloured hair and pink cheeks, stands in doorways and hinders the servants. What of him? has he married his cook? (*Crossly.*)

Fanny (with a disappointed air).—No, he has not married his cook; he has proposed to me, but as you dislike him, I suppose I must refuse. Do you know Mr. Green, Mrs. Robins?

Mrs. Robins.—Yes, my dear, if it's Edward Green of Stoke Park he must be worth six thousand a year; he lives with a very learned aunt. She says he is so amiable, a child might handle him.

Mrs. Stephens.—Why, Fanny, you silly girl, couldn't you see I was joking? I saw his admiration for you long since.

Fanny.—I wish you hadn't put me out of conceit with him by your criticisms on his appearance.

Mrs. Stephens.—Fanny, my pet, I see I must give you my real opinion of him, if you won't be jealous. I consider him to be very good-looking; what I fancy Lord Byron to have been, or the Apollo of the Greeks. Now run, darling, and answer his letter; say I highly approve of your choice, that will at once show you are dutiful to me, and that I am aware of the engagement; it will be more security for you against his retracting. (*Fanny is going out.*) Give the bearer of the letter half-a-crown, dear, that will make him like to come again.

Mrs. Robins.—I congratulate you most sincerely, my dear friend. (*Aside.*) I don't know how I should feel if my own girls weren't married. Now what can I do for you?

Mrs. Stephens.—Do make some inquiries about the man's estate; see if it is entailed. I should like to know something about the residence, too, and the establishment, whether that's on a suitable scale.

Mrs. Robins.—I shall come to-morrow armed with a complete history of Mr. Green and his belongings. Depend on me, good-bye.

Mrs. Stephens.—Good-bye, my excellent friend, I shall go and help Fanny with her letter. [*Exeunt.*

SCENE II.

HOUSE.—(The same room.)

Mrs. STEPHENS seated, enter Mrs. ROBINS.

Mrs. Stephens.—Dear creature, I thought you would never be here, I have so much to say, I hardly know where to begin.

Mrs. Robins.—Let *me* tell *my* story first, it will be sooner over. Mr. Green's estate is entailed on his eldest son, with a jointure of 2000*l.* a-year to his widow; and as for the house, it is not a house, but a palace. You lucky woman! Now for your news.

Mrs. Stephens.—Yesterday, after you left, we had a visit from the lover; he is so ardent, so generous, and, *entre nous*, so silly!

Mrs. Robins.—I thought "straw-coloured hair" had taught you prudence.

Mrs. Stephens.—Ah, that might have been attended with fatal consequences if Fanny had been less amiable, dear girl. This morning Mr. Green's aunt has come over; she was talking me to death, so I left her to Fanny in the garden, and have come in for a little chat with you.

Mrs. Robins.—Oh, I hope Miss Green will come in, I delight in her. She fancies me twice as learned as I am.

Enter FANNY and Miss GREEN, both embrace Mrs. ROBINS.

Mrs. Stephens.—My dear Miss Green, I find you know my friend.

Miss Green.—Yes, we have often met; corporeally and mentally we are pilgrims in the paths of literature, climbers up the heights of Parnassus, fellow quaffers of the fount of Helicon. I have been explaining to my dear Fanny my tastes and dispositions. I find in her more of the Sybarite than I like; I live nearly two thousand years too late. I try to atone for that by denying myself everything I like best; you will learn to imitate me in this, Fanny, will you not?

Fanny.—Impossible! for to carry out your principles I must forswear your society.

Miss Green.—I am steeled against your bewitching flatteries. If you have a taste for study, what a happy life we shall lead. I have so long sought a genial mind with which to hold communion.

Mrs. Robins.—Am I bold in expressing my wonder why you have never chosen a companion of the ruder sex, whose happiness might have been secured in yours?

Miss Green.—I consider such attachments, in general, too trifling for a studious mind, yet two men have existed whom I *could* have loved.

Mrs. Stephens.—Do I know them, Miss Green?

Miss Green.—Doubtless you do, I mean Herodotus and Josephus; to either of those men I could have proved a helpmate, but these are idle retrospections. Fanny, should you ever see me indulging in these weak regrets, speak to me of Zenobia, whom I would fain imitate.

Mrs. Robins.—But do you never seek recreation? Do you never crochet?

Miss Green.—When tired of graver subjects, I amuse myself with Greek, or Euclid; crochet I never heard of; but I delight in music. If you sing Fanny, I will accompany you.

Fanny.—Yes, I sing, my aunt says, *well;* what instrument do you play, Miss Green?

Digitized by Google

Miss Green.—I have taught myself to play on reeds, such as Polyphemus used to discourse sweet music to Galatea; but I am allowing Time to pursue his journey unheeded, I must be gone.

Fanny.—I fear you will find me painfully ignorant.

Miss Green.—Abstractedly you may be, circumstantially you do not appear so; you appreciate my gleaning from Wisdom's harvest, and following my footsteps, you may find the clue to Learning's labyrinth.

Mrs. Robins—Do you think well of Bloomerism, madam?

Miss Green.—I approve of it, and think the women of Sparta would have agreed with me. But I am forgetting my errand here, my nephew begged me to invite your party to return with me to luncheon; he wishes Fanny to see the house over which she will so soon preside. Oh, that the dear girl were but called Aspassia! But you will accompany me?

Mrs. Stephens.—With pleasure, we shall enjoy the walk.

Miss Green.—I rejoice to find you a peripatetic, Mrs. Stephens; I will await you in the garden, and, in the meantime, will solve a problem in my mind. [*Exit Miss Green.*

Mrs. Stephens.—What did she call me? It sounded like periwinkle!

Mrs. Robins.—My dear creature, peripatetics were walking philosophers!

Mrs. Stephens.—Well I'm sure, I'm as like a shellfish as a philosopher!

Fanny.—Oh, to what a perpetual intellectual treadmill I am doomed! I shall die of it in a month, I know I shall!

Mrs. Stephens.—Never mind, let us go and see the *house*, that will make up for fifty blue-stockings! [*Exeunt.*

SCENE III.

GREENHOUSE.—(Same Apartment.)

Enter Mrs. ROBINS to Mrs. STEPHENS, who is seated.

Mrs. Stephens.—Welcome back, my dear friend; I thought you would never be home again; I miss you so, when you're away, now that Fanny's gone!

Mrs. Robins.—I am equally pleased to see you again, dear, but I could not get back sooner. So the wedding went off well; how did Miss Green behave?

Mrs. Stephens.—She represented every possible encyclopædia, bound in blue and swansdown; she favoured us with the customs of the Spartans, till everyone wished them drowned in their own black broth; no one was more bored than Mr. Green.

Mrs. Robins.—But how does poor Fanny get on?

Mrs. Stephens.—Desperately, though Fanny suffers in silence. She is really much attached to her husband, who is all kindness; so she means to endure all quietly, till he sees for himself. *I* can scarcely keep from interfering.

Mrs. Robins.—Depend on it there will soon be a division in the household, and—— [*Enter Fanny singing.*

Fanny.—"The spell is broken, we must part!" Congratulate me, aunt, on obtaining my freedom! Miss Green started for Bath at six this morning, there to adopt the Bloomer costume, and lecture in its favour.

Mrs. Stephens.—My dear Fanny, I do congratulate you fifty thousand times, I was just telling Mrs. Robins of your trials!

Fanny.—Oh, Mrs. Robins, I have been dying of Spartans from my wedding day! only one virtuous action has Miss Green reckoned to my account since then, that was dining on water gruel when I had a cold. The incessant interference on every point, from a cup of coffee to a bonnet, was too much for mortal patience! a walk with Edward, was indulging him in un-Spartan effeminacy! eating with a healthy appetite was giving way to gluttony, against which the Spartans declaimed!

Mrs. Stephens.—But the crisis? Did you complain at last?

Fanny.—No, Edward himself began to tire of it; and a fortunate event occurred, which brought about a happy settlement of affairs. You know my passion for flowers? not a Spartan passion of course! well I had unknown to Miss Green, begged Edward to indulge me with a *greenhouse*, he consented, and promised that none in the county should excel mine. About this time, the good lady caught a mania for astronomy, took to walking by starlight, and then brought forward a proposal to build an an observatory on the very spot chosen for my greenhouse. In vain my husband offered her any other place on the grounds; she would neither listen to persuasion nor reason; there was an hour's war—science *versus* frivolity; the latter conquered, and the incensed lady left us, for which I owe her much gratitude. Now, you must come home with me; I have many improvements to show you, but none I value so highly as this memorable *greenhouse* plan.

(*The curtain falls.*)

ETCHING FOR LADIES.

AMONG the various kinds of occupation now sought for women, it is surprising that one so suited to them as etching has hitherto been overlooked. It is an employment which especially requires fineness and delicacy of touch, is quiet, and needs little physical strength. After the tools and materials are once bought, the outlay is small, and if the etcher is a "bread winner," and her work worth paying for, it is highly remunerative. The disadvantages consist in the "mess" of cleaning plates, and the unpleasantness of the smell of the acid used for "biting" them; but these are hardly greater than attend any serious occupation. Hood in his poem of "Etching," which all would-be etchers should read, enumerates another, that it cannot be "lady-like work" "which begins with a scratching and ends with a biting."

The necessity of "scratching" and "biting," however, exists, for it is a mistake to apply the term "etching" to drawings executed with pen and ink. An "etching" is drawn on a copper plate, with an instrument called indifferently a burin, etching point, or etching needle; the lines being afterwards deepened, and the shadows brought out by pouring some liquid on the copper, which shall eat into them, while the surface of the metal is protected by a "ground" or coating of varnish previously laid on.

Supposing that a lady wishes to acquire the art of etching, her best course would nevertheless be to train her hand for a short time by working with pen and ink, as delicately as possible; and no better instructions for pen and ink drawing are to be found than those in Mr. Ruskin's "Elements of Drawing." She should also study any etchings which come in her way, and become familiar with the modes of shading, crossings of lines, &c.; for upon these will partly depend whether the etching looks easy and properly graduated, or the shadows stiff and angular as the patches in a quilt. A good copper-plate printer will direct where the plates and the materials can be bought, if a master's assistance is not desired; but it would be far better to incur the expense of a few lessons from an experienced engraver, who will give advice on this and every other subject connected with the art, and whose instructions will more than repay their cost, by the saving of material otherwise wasted in experiments.

The lady, however, wishes to experimentalise by herself. Then, after mastering the pen and ink drawing, she should make a collection of two things, one, *proof* paper (upon which music and engravings are printed) for heating the plates, and the other, woven cotton rags, *stocking* material, for cleaning them. Woollen, calico, or linen will not do. She is provided with a copper plate. It looks bright enough; the surface should be perfectly smooth and free from dents or scratches, as every one will *print*, and so spoil the etching. The plate, notwithstanding its brightness, has to be cleaned. A little camphine is now poured on it; after this is rubbed off with the stocking rag, whitening is scattered over the surface, and after another rubbing the copper is like a mirror. Now it is prepared for laying the ground. The greatest care must be taken not to touch the bright face with the hand, which will grease it, and prevent the ground from adhering.

The plate is next put into a vice, which holds it at the centre of one side. A bit of paper must be put between the vice and the copper. The screw is turned as tightly as possible. Now, if the plate is a small one, a sheet of the proof paper is folded like a gigantic match, lighted, and held in the right hand, the vice handle taken with the left, and the plate, bright side upwards, held over the flame; the paper is kept moving underneath until the whole plate is as hot as a smoothing-iron, but care must be taken again that the plate is not burnt, which will soon be seen by the copper tint changing to violet and bright blue.

For the next process, "etching ground," a black composition in balls tied up in white silk, a "dabber," which is a mushroom-shaped, white silk, stuffed article, and wax bougies twisted three together, are necessary. The plate, heated, is laid on the table, and the ground rubbed upon it, not backwards and forwards or up and down, but straight from top to bottom, and then crossway, on the bright side, until it is tolerably covered. Then, warming the dabber on the plate, the ground is dabbed even all over, great pains being taken not to leave a single spot uncovered. If any show bright through the ground, it will "foul bite," that is, the acid will take it, and an ugly blot will appear in the proof. A fresh paper is lighted, as the plate must be re-warmed before smoking. Held as before, the heat of the plate will be found right when the brown film covering it reflects objects. If the plate is too large to hold steadily while warming, the paper may be lighted in an empty grate, and the edge of the copper rested on the back, while the flames will mount and heat it. In a regularly fitted studio the heating is effected by a row of gas burners, over which the plate is held; but this is a costly apparatus for an amateur. Proof paper is chosen for burning, as it has neither smoke nor much smell, and consumes slowly. Next best to this is letter paper.

The plate is heated for the second time, and it has to be smoked. Keeping it still in the vice, it is turned face downwards; the vice held in the left hand, the twisted and lighted bougie in the right, and this latter is constantly moved below every part of the plate, in order that the smoke may amalgamate with the ground, and both together cover the copper with an uniform shining black. The wick must never touch the ground, nor must the candle remain long enough in one spot to burn it. All the process must be carried on as quickly as possible, lest dust settle on the ground; and the dabber and composition should be kept perfectly clean and out of dust. A tin collar-box holds them better than anything. It would be well to practise laying grounds for a little while before trying anything farther.

The outline of the etching must then be transferred to the plate. This will gradually cool, but if it is desirable not to lose time, the copper may have a streaming of cold water. A piece of a gelatinous transparent substance called "glass-paper" is cut to the required size, and laid, smoothest side upwards, over the design. The etching point being made very sharp on a hone moistened with a drop of oil, the principal lines are traced on it with the etching point, so as not to cut the paper through. Taking this off the design, a little black-lead powder is shaken over it and rubbed into the scratches with a feather, their sharp edges, which would cut the ground, being taken off at the same time. The superfluous black-lead is blown away, and the lines look dark. The paper so prepared is put face down-

Digitized by Google

wards on the ground, and rubbed on the back with another tool called the "burnisher." The black marks, strange to say, will come off *white* upon the ground. If after laying the ground, or transferring the design, a single bright spot appear, the ground must be cleaned off and a fresh one put on. If the ground looks smutty, the smoke and the composition have not amalgamated, and they must be cleaned off, or the smut will all be wiped out. Never touch the ground with the hand.

The design transferred to the ground, it should be observed that it is *reversed*. Of course when printed it will come right again, but to etch it backwards, as it were, will be puzzling at first. An engraver for a large and complicated work will reflect the copy in a mirror, and follow the reflection. This saves both thought and trouble. It will, however, be found, after a little practice, that the picture in working comes to the mind the reverse way; it is *seen* so, and then, in Irish phrase, when it is seen *wrong* it will without difficulty be etched *right*. Now the burin work begins. This is executed very much as the pen-and-ink preliminary study, holding the burin rather more uprightly than the pen. If it will scratch the nail it is sharp enough, but a hone should be kept to set it from time to time. Rolling it round and round between the hands, the point slantwise on the hone, will sharpen it. Every stroke should take the copper, or the acid will not affect it, and its right depth will be known by the plate grating under the point. If copper dust comes up, it is too strong. In shading, the lines must be crossed diagonally, not square; the work must not be quite bright, but the ground be seen between the lines, or the biting will be flat and blotty. Here, for a time, another puzzle will be encountered; the lights will look dark, the shadows bright. Unless the artist enjoys the advantage of minute sight, which in work of this nature makes up for the disadvantage of short sight, a magnifying glass should be used, holding the glass in the left hand, and looking through it while at work. In any case, when finished, or supposed to be so—two very different things in etching—the work should be gone over with a glass, the gaps filled up, the lines connected, the edges of the shadows softened. A "photograph glass," of rather higher power than ordinary, is the best form. When a mistake is made, the line is to be painted out with a camel's hair brush and turpentine. This mixes with the ground and covers the metal. Serious errors can only be effaced by cleaning the ground and scraping the copper with a sharp three-cornered "scraper," rubbing smooth with a piece of clean charcoal, and, finally, polishing with rag and a drop of oil.

The etching being completed, the whole work is examined once more with the glass, and any scratches or spots which are seen on the ground are painted out with "Brunswick black" or carriage varnish, diluted with turpentine. Too much care cannot be taken in preserving the ground, and for this purpose when working a chamois leather should be spread to rest the hands upon, and the whole plate covered with it when put away. The etching should never be left about in the dust.

We now approach the difficult and unpleasant part of the process—the biting. As a preliminary, a wall is built round the plate with wax prepared for the purpose, and sold as "walling wax." A lump of this is thrown into very hot but not boiling water, which softens it and makes it kneadable into strips about an inch wide. These are quickly pressed round the edge of the plate, so that a quarter of the width is flat, and the rest stands up in a cell. A *lip*, or spout, is fashioned at one corner, to pour off the acid by. Should the weather be very cold, the plate may be just warmed first, as the wax will adhere better for it. When the cell is made, it will be best to prove it by pouring water into it, as, should a hole be left, the running out of the acid would cause dire mischief, every drop leaving a stain, and burning and corroding whatever it falls on. The manipulation of the wax and the exact heat of the water will be difficulties at first; the former, until the amateur becomes accustomed to its ways, having a most unpleasant habit of sticking to the fingers, whence it can only be removed by greasing them well before the fire; the latter, if too great, liquifying the wax—if too little, not softening it enough to make it adhesive. Well do we remember our own despair, on throwing a lump of wax into boiling water, to find it become in an instant like pitch, and the after state of our hands when we attempted to take it out! No washing was effectual; to touch anything was impossible while it remained on them; and we sat with them meekly hung down, until a good-natured sailor suggested that washing with grease before the kitchen fire would perhaps cleanse them. It did, but we were half roasted in the process.

The "mordant" may now be poured in. It consists of one part nitrous acid, three parts distilled water. If it is strong enough, in about five minutes the whole drawing will be covered with minute bubbles, the effervescence caused by its action on the copper. The depth should be half an inch; a feather should be used from time to time to remove the bubbles as they gather, as the acid will not of course take effect under them; but the head should not be held over the plate more than necessary, as the fumes, like the acid itself, are poisonous. It is well to keep the window open during the biting, and to wear a charcoal respirator to cover the mouth and nose.

When the acid has been on the plate about twenty minutes it may be poured off. A sauce-boat is a convenient receptacle for it, as with the lip it allows of pouring back again. The work should be examined, to ascertain how deeply the biting has gone; the mordant once more poured on, and after it has remained in all for fifty minutes it will, probably, be time to "stop out the lights." Sometimes the acid will be stronger than at others, and some plates seem to take it more quickly; on these matters experience will be the best guide, but fifty minutes in ordinary cases will be a good time to allow for the first biting. Pouring off the acid, the plate is washed thoroughly with a sponge and cold water, not disturbing the ground. The surface is dried by dabbing gently with an old silk handkerchief; when thoroughly dry all the lights are painted out with Brunswick black and turpentine. This being dry, the mordant is again poured in. Twenty minutes now will make a great difference in the strength of the etching, and at the end of this time the process is repeated for the middle tones; repeating it as often as required, according to the degrees of shade in the etching. The biting over, the acid may be kept in a stoppered bottle, tied down with leather, for use again; from time to time a few drops of pure acid being added as required. The wax is pulled off, and should be thoroughly streamed with water to get rid of the acid, after which it will also serve again. The plate is warmed, then turpentine is poured on it, and the ground thoroughly cleaned off with rag; a final polish being added with a few drops of oil and rag. It is best to burn the rags, as there will always be poisonous matter on them, the burning making glorious flames of blue, purple, red, and green, from the acid and copper.

The cleaned plate is now folded carefully in tissue paper, with a strong paper over, to protect it from scratches, and is sent to the printer's for "proving." He will, if desired, give two impressions, a dark and light. The proof is compared with the plate, and the latter corrected by it; great surprise will be felt that the work looks so imperfect. The corrections are made with the burin, and the process is called "dry-pointing." The plate may be proved again and again, and always touched with the dry point; the *burr*, or roughness on the lines, being removed with the scraper. If the shadows are too strong, they can be softened by rubbing them with the burnisher, laid flat, and if much too deep, with the charcoal; while the final sharp touches are given with the graver, whose use only a master can teach. The etcher, however, can do without them.

A new mordant, hydrochloric acid, has lately been talked of, but we believe the nitrous, in spite of its unpleasantness, is still considered the best. The process of biting we have described is the modern one. Rembrandt, the prince of etchers, worked in a different way. Instead of stopping out and re-biting, he first laid the depths and dark objects in his shadows, bit these, and then worked the shadows themselves; biting again and next giving the middle tones, so leaving the lights until the last. By these means his shadows attained their wonderful depth, and transparency; but the process requires a mastery over the art, and a *foreseeingness* which few possess.

DOUBLE ACROSTICS.

We subjoin, by permission, a few acrostics from a book now in the press, entitled "Whetstones for Wits, or Double Acrostics," by various hands. Edited by "Crack." The solutions will be published in The Queen newspaper of Jan. 6, 1872. Correct solutions will be acknowledged.

No. I.

My *first's* the quality of hand
That bid those granite pillars stand,
And marks the genius of the ar-
chitect who planned the famous mar-
ket place that we have got in town.

Here you may purchase what you wish,
To make my *next*,—a Spanish dish.—
From gardens ransacked near and far,
To find a buyer at the mar-
ket place that we have got in Town.

Or, if you have no cash to spend
Still thither you your way may wend
And be my *third*,—to view the gar-
den produce in the famous mar-
ket place that we have got in Town.

And when my *fourth* you've wandered
through,
I doubt if you will ever view
A more convenient place for bar-
ter than the celebrated mar-
ket place that we have got in Town.

Alas! my *fifth* must now relate,
The sadly discontented state
Of those who say my *whole's* not lar-
g' enough to be the only mar-
ket place that we have got in Town.

My *sixth* has grown so large of late,
Some salesmen say they must migrate,
'I would be a pity! But *che sa-
ra sara* in the famous mar-
ket place that we have got in Town.

No. II.

One half my name
Is a gentle dame,
The other, my brother
A songster of fame.
I meet him oft
On a summer's day.
Then he soars aloft
And I fly away
To the meadow so gay,
Where skipping and dancing
And jumping and prancing,
My *first* is at play.
Then ere 'tis dark
I seek some park
Where my *third* are bounding
With leaps astounding;
But while they leap
I fly off to sleep
Near the nest of a mouse,
By an old farm house,
With my *fourth* surrounding.
Next morn I hie
To the smoky town,
And you there may spy
Me settling down
On garden palings
And area railings.
And my bright red coat,
So handsome reckoned,
You oft may note
Just by my *second*,
In that garden famed,
From old Thames reclaimed.

No. III.

The shepherd Pan will not my *first* deny,
If you give up my *next*, I answer "try;"
Put both together, and in hungry mood,
My *whole*, I warrant, you will search for food.

1. Profit no prophet seeks; should Naaman proffer it,
"Nay, man," the man would say, "no man should offer it."
The ends of profit tally well with prophet,
Whiche'er you choose I promise not to scoff it.

2. Ere e'er the heir of Ayr a justice here of eyre is,
His wits he ought to air ere he a witness harries,
Ere this you guess, throw up the windows wide,
"Air, give me air! the heir of Ayr may 'bide.

3. Would france by war redeem her reputation?
Nay, shun the notion, so shone never nation.
Will France the secret of this "light" betray?
Nay! I reply, all France will tell thee nay.

THE QUEEN.

The Queen and Royal Family.

THE QUEEN.—VICTORIA, of the United Kingdom of Great Britain and Ireland, &c., Queen, Defender of the Faith. Her Majesty was born at Kensington Palace, May 24, 1819; succeeded to the throne, June 20, 1837, on the death of her uncle King William IV.; was crowned June 28, 1838; and married Feb. 10, 1840, to His Royal Highness Prince Albert (born Aug. 26, 1819; died Dec. 14, 1861). Her Majesty is the only child of his late Royal Highness Edward, Duke of Kent, son of King George III. The children of Her Majesty are:—

Her Royal Highness Victoria Adelaide Mary Louisa, PRINCESS ROYAL OF ENGLAND AND PRUSSIA, born Nov. 21, 1840, and married to his Royal Highness William of Prussia, Jan. 25, 1858, and has had issue, Frederick William Victor Albert, born Jan. 27, 1859; Victoria Elizabeth Augusta Charlotte, born July 24, 1860; Albert Wilhelm Heinrich, born Aug. 14, 1862 (dead); Francis Frederick Sigismund, born Sept. 15, 1864, died June 18, 1866; Frederica Wilhelmina Amelia Victoria, born April 12, 1866; Joachim Frederick Ernest Waldemar, born Feb. 10, 1868; and Sophia Dorothea Ulrike Alice, born June 4, 1870.

His Royal Highness Albert Edward, PRINCE OF WALES, born Nov. 9, 1841; married, March 10, 1863, Alexandra of Denmark (Princess of Wales), born Dec. 1, 1844, and has issue, Prince Albert Victor, born Jan. 8, 1864; George Frederick Ernest Albert, born June 3, 1865; Louisa Victoria Alexandra Dagmar, born Feb. 20, 1867; Victoria Alexandra Olga Mary, born July 6, 1868; and Maude Charlotte Mary Victoria, born Nov. 26, 1869; Alexander John Charles Albert, born April 6, 1871, died April 7, 1871.

Her Royal Highness ALICE MAUD MARY, born April 25, 1843; married to H.R.H. Prince Frederick Louis of Hesse, July 1, 1862, and has issue three daughters (Princesses Victoria, Elizabeth, and Irene), and two sons (Princes Ernest and Frederick.)

His Royal Highness ALFRED ERNEST ALBERT, born Aug. 6, 1844.

Titles of the Eldest Sons of Peers.

The eldest Sons of Dukes, Marquises, and Earls usually assume (by courtesy) the second titles of their fathers. The younger Sons of Dukes and Marquises take the title of Lord as a prefix to their Christian and Surnames.

The younger Sons of Earls take the title of Honourable.

All Daughters of Dukes, Marquises, and Earls, take the title of Lady.

All Sons and Daughters of Viscounts and Barons take the title of Honourable.

The following are the titles which are or would be borne by the eldest Sons of Peers, with the titles of their fathers:—

Those marked thus * are the second titles of Irish Representative Peers,
Those marked thus † are the second titles of Scotch Representative Peers.

The year 1873 is the latter part of the 5633rd and the beginning of the 5634th year since the creation of the world, according to the Jews. The year 5634 commences on Sept. 22, 1873.

The year 1873 answers to the 6586th of the Julian Period, to the 2626th from the foundation of Rome, to the 2649th year of the Olympiads, and to the year 7380-1 of the Byzantine Era.

The year 1290 of the Mohammedan Era commences on March 1, 1873; and Ramadán (month of abstinence observed by the Turks) commences on Oct. 23, 1873.

Inland Revenue Duties.

INCOME TAX, LAND TAX, AND INHABITED HOUSE DUTY.

Income and Property Tax.

100*l.* per annum for every 1*l.* arising from Property, Profession, Trade, or office	0 0 4
Exceeding 100*l.* but less than 300*l.* rated at 80*l.* less.	
In respect of occupation of Lands, Tenements, &c. for every 1*l.* in England	0 0 0½
Scotland and Ireland	0 0 1½

Inhabited House Duty.

For every private Inhabited Dwelling House which with the Household and other Offices, Yards, and Gardens therewith occupied and charged, is or shall be worth the rent of Twenty Pounds or upwards by the Year, there shall be charged for every Twenty Shillings of such annual value the sum of ... 0 0 9

Alteration in Date of Payment.

The Land and House Taxes in England, shall be payable on or before Jan. 1st., in each year, and Income Tax for both England and Ireland, shall be payable in like manner.

ASSESSED TAXES, AND EXCISE LICENSES.

Servants, Carriages, Horses, Armorial Bearings, &c.

For every male servant	0 15 0
For every carriage—	
If such carriage shall have four or more wheels, and shall be of the weight of four hundredweight or upwards	2 2 0

BISHOPS.

Style, *Right Reverend.*

The Bishops of London, Durham, and Winchester to take precedence in right of their respective sees; the other Bishops in the order of their consecration. The Bishop of Sodor and Man has no seat in Parliament. The statute 10 & 11 Vict. c. 108, enacts that, upon a vacancy in an English or Welsh bishopric, the newly consecrated bishop (unless elected to one of the archiepiscopal sees, or to one of the sees of London, Durham, or Winchester), shall not be entitled to sit; but the summons is to be issued to such one of the other bishops as has not previously been summoned.*

		Consec.	Translated.
Dr. John Jackson	London, P.C.	1853	—1869
Dr. Charles Baring	Durham	1856	—1861
Dr. Samuel Wilberforce	Winchester	1845	—1869

Registration.

BIRTHS.

PERSONS should cause their children to be registered within forty-two days after birth, by giving personal notice to the registrar of the district.

MARRIAGES.

MARRIAGES can be effected with or without ecclesiastical rites by license or publication of banns or notices. Fees—The licenses are £5 for a special, 10*s.* for ordinary, and 20*s.* for non-residence. One at least of the contracting parties must live or sleep in the district where the marriage is to be celebrated for fourteen days immediately before the ceremony. The Vicar-General's office for marriage licenses is at 5½, Bell Yard, Doctor's Commons.

Deaths, Wills, and Unclaimed Property.

A DEATH, in like manner with a birth, must be notified to the registrar, but *immediately*, as the undertaker should be provided with a certificate to the minister reading the burial service. The cause of death must be certified by the doctor in attendance to the Registrar. Every will must be entered at the Probate Registry of the District. The London (and principal) Registry is at Doctors' Commons, E.C., where an official copy of all wills may be read on payment of 1s., or copies obtained on payment of a fixed scale of charges.

UNCLAIMED DIVIDENDS.—Much property is left, in the shape of bank dividends, to persons whose present addresses are unknown, but of which lists are prepared with the names of the legatee and description of dividends attached.

Eclipses in 1873.

In the year 1873 there will be two Eclipses of the Sun and two of the Moon.

1. Total Eclipse of the Moon, May 12th, invisible at Greenwich.
2. A partial Eclipse of the Sun, May 26th, visible at Greenwich, commencing at 7.36 a.m., and ending 9.23 a.m.
3. A total Eclipse of the Moon, Nov. 4th, visible at Greenwich, commencing at 1.8 p.m., and ending 6.34 p.m.
4. A partial Eclipse of the Sun, Nov. 20th, invisible at Greenwich.

Meteoric Showers, 1873.

The days in each month most favourable for seeing very large meteors are as follows:—Jan. 2, and 15 to 19, Feb. 10 to 19, March 18, April 20, and 25 to 30, May 20 to 24, June 4 and 12, July 18 and 20, Aug. 10, Sept. 9, Oct. 14 and 18, Nov. 13, 14, and 29, Dec. 11, 14, and 27.

Rates of Postage and Conditions of Transmission.

LETTERS.

The rates of postage to be prepaid are as follows, viz.:—

For a letter not exceeding 1oz.	...	...		1*d.*
exceeding 1oz but not exceeding 2oz				1½*d.*
" " 2oz.	"	"	4oz.	2*d.*
" " 4oz.	"	"	6oz	2½*d.*
" " 6oz.	"	"	8oz.	3*d.*
" " 8oz.	"	"	10oz.	3½*d.*
" " 10oz.	"	"	12oz.	4*d.*

A letter exceeding the weight of 12oz. is liable to a postage of 1*d.* for every ounce, beginning with the first ounce. A letter posted unpaid is chargeable on delivery with double postage; and a letter posted insufficiently prepaid is chargeable with double the deficiency. No letter may exceed the dimensions of one foot six inches in length, nine inches in width, and six inches in depth.

ADDRESSES TO THE QUEEN AND PETITIONS TO PARLIAMENT.

Petitions and addresses to Her Majesty, forwarded direct, are exempt from postage; and such petitions and addresses, as also petitions to either House of Parliament, if sent to a member of either House, are likewise exempt, provided they do not weigh more than two pounds, and are either without covers or are in covers open at the sides. No letter or other inclosure, however, must be inserted.

NEWSPAPERS.

Inland.—For each newspaper, whether posted singly or in a packet, the postage, when prepaid, is one halfpenny; but a packet containing two or more registered newspapers is not chargeable with a higher rate of postage than would be chargeable on a book packet of the same weight, viz., one halfpenny for every 2oz. or fraction of 2oz. A newspaper posted unpaid, and a packet of newspapers posted either unpaid or insufficiently paid, will be treated as an unpaid or insufficiently paid book packet of the same weight. The postage must be prepaid either by an adhesive stamp or by the use of a stamped wrapper. No newspaper can be sent through the post a second time for the original postage. Every newspaper or packet of newspapers must be posted either without a cover or in a cover entirely open at both ends, and in such a manner as to admit of easy removal for examination. If this rule be infringed, the newspaper or packet will be treated as a letter. Every newspaper must be so folded as to admit of the title being readily inspected. A newspaper which has any letter, or any communication of the nature of a letter, written in it or upon its cover, will be charged as an unpaid or insufficiently paid letter. No packet of newspapers must exceed 14lb. in weight, nor may it exceed two feet in length or one foot in width or depth.

Colonial and Foreign.—Newspapers going abroad are also subject to the following regulations:

"Prices Current" and "Market Reports," but not private price lists or trade catalogues, are admitted to the same privileges as newspapers for foreign transmission. Publications registered for transmission abroad must be posted within eight days from the date of publication, including the day of publication. The collected numbers issued during the month of a weekly, fortnightly, tri-monthly, &c., publication will not be allowed to pass as a monthly publication. The postage cannot be prepaid in money. The rates are shown in the table of colonial and foreign postage of the "British Postal Guide." Publications not on the register at the General Post Office cannot be sent abroad at any rates lower than those applicable to book packets. Every newspaper or packet of newspapers must be posted either without a cover or in a cover entirely open at both ends, and in such a manner as to admit of easy removal for examination. Every newspaper must be so folded as to admit of the title being readily inspected. No newspaper, whether posted singly or in a packet, may contain any inclosure except the supplement or supplements belonging to it. No packet of newspapers must exceed two feet in length or one foot in width or depth. It is forbidden to introduce into Russia, through the post, political newspapers, even in covers open at the ends or sides; and the only means by which persons residing in Russia can obtain newspapers from the United Kingdom is by subscribing for them at one of the Russian post-offices. This prohibition does not, however, extend to political newspapers or any other publication addressed to members of the Royal Family of Russia, the Imperial Ministers, or members of the Diplomatic Corps. The admission into Russia even of newspapers not of a political character, is permitted only when they are addressed to the house of some established bookseller, to the higher schools, to the Imperial Public Library, or to the Academy of Sciences in Russia. Printed Prices Current, however, as well as printed circulars, in covers open at the ends or sides, are allowed to be addressed to any persons residing in Russia.

PARLIAMENTARY PROCEEDINGS.

Printed votes or proceedings of the Imperial Parliament, sent without covers or in covers open at the ends, may circulate within the United Kingdom at the rate of one halfpenny for every 2oz. or fraction of that weight. The words "Parliamentary Proceedings" must be written or printed on the cover of the packet; otherwise it will be treated as an ordinary book packet. Prepayment, when the circulation is within the United Kingdom, is optional; and if it be made in part, the simple difference only will be charged. Parliamentary proceedings may be sent, under the book post privilege, to all the colonies, and to those foreign states between which and this country there is a book post.

BOOK POST.

Inland.—A book packet may contain not only books, paper, or other substance in ordinary use for writing or printing, whether plain or written or printed upon (to the exclusion of any written letter or communication of the nature of a letter), photographs, when not on glass or in frames containing glass or any like substance, and anything usually appertaining to such articles in the way of binding and mounting, or necessary for their safe transmission by post, but also Circulars, *i.e.*, letters which appear from internal evidence to be intended for transmission in identical terms to several persons, and the whole or the greater part of which is printed, engraved, or lithographed. The postage is one halfpenny for every 2oz. or fraction of that weight. The postage must be prepaid either by adhesive stamps or by means of a stamped wrapper, or by a combination of the two. A packet posted wholly unpaid will be charged with double the book-postage; and if posted partially prepaid, with double the deficiency. Every book-packet must be posted either without a cover or in a cover entirely open at both ends, and in such a manner as to admit of the contents being easily withdrawn for examination; otherwise it will be treated as a letter. A book-packet may not contain any letter, or communication of the nature of a letter (whether separate or otherwise), not being a circular-letter, or not wholly printed. Entries, however, merely stating who sends the book, &c., or to whom it is given, are not regarded as a letter.) If this rule be infringed, the entire packet will be charged as a letter. No book-packet may exceed 5lb. in weight, or one foot six inches in length, nine inches in width, and six inches in depth.

COLONIAL AND FOREIGN PATTERN AND SAMPLE POST.

There is a Pattern and Sample Post to such colonies and foreign countries as are marked in the Table of Colonial and Foreign Postage with the letter "P," in the Postal Guide, but it is restricted to *bonâ fide* trade patterns or samples of merchandise. Goods sent for sale, or in execution of an order (however small the quantity may be),

Digitized by Google

or any articles sent by one private individual to another which are not actually patterns or samples, are not admissible. The postage must be prepaid either by adhesive stamps or by means of a stamped wrapper, or by a combination of both. Patterns or samples, when practicable, must be sent in covers open at the ends, and in such a manner as to be easy of examination. But samples of seeds, drugs, and such like articles, which cannot be sent in covers of this kind, may be posted inclosed in boxes or in bags of linen, or other material, fastened in such a manner that they may be readily opened; or, in the case of samples of seeds, &c., for the United States of America, Holland and its possessions, Belgium, Denmark, Greece, Portugal and its possessions, and Switzerland, in bags entirely closed, provided such closed bags are transparent. There must be no writing or printing upon or in any packet except the address of the person for whom it is intended, the address of the sender, a trade mark or number, and the price of the articles. A packet of patterns or samples sent to Portugal, Madeira, the Azores, Cape de Verds, France, or to Turkey, Syria, or Egypt, by French packet, must not exceed 18in. in length, width, or depth; a packet to any other place abroad must not exceed 24in. in length or 12in. in breadth or depth. Samples of intrinsic value must not be sent to foreign countries except the United States; and, in the case of France, samples of eider down, raw or thread silk, woollen or goats' hair thread, vanilla, saffron, carmine, or isinglass, are considered to fall under this rule, if they weigh more than 3oz. Raw and spun silk, as well as coloured and twisted silk, may be sent to Germany up to the weight of 3oz. Such articles as scissors, knives, razors, forks, steel pens, nails, keys, watch machinery, metal tubing, pieces of metal or ore, provided that they be packed and guarded in so secure a manner as to afford complete protection to the contents of the mail bags and the Officers of the Post Office, while at the same time they may be easily examined, may be sent as samples to the following countries, but to these alone, viz., the United States of America, Germany, Belgium, Holland, Denmark, Sweden, Norway, Turkey, Moldavia, Wallachia, Portugal, Madeira, the Azores, Cape de Verds, Switzerland, and the British Colonies; and not to these places when addressed "via France." Indigo cannot be sent to any place abroad.

POST CARDS.

Post cards, whether official or private, having a halfpenny stamp impressed upon them (adhesive stamps not being accepted in payment of the postage), may be transmitted between places in the United Kingdom with letters written upon the back. On the reverse side any communication may be written or printed; but such communication must not extend to the front side. Nothing whatever may be attached; nor may the card be folded, cut, or otherwise altered. If any one of these rules be infringed, the card will be charged 1*d.* on delivery. No card other than one of those issued by the Government, or a private card impressed with a halfpenny stamp at the Office of Inland Revenue, Somerset House, or at the Stamp Offices at Liverpool and Newcastle-on-Tyne, will pass under a halfpenny stamp, if it bear on it a written communication of the nature of a letter.

GENERAL REGULATIONS.

When, owing to a great and unusual influx of letters, books, &c., the transmission or delivery of the letters would be delayed if the whole mail were dealt with without distinction, book packets and post cards may be kept back until the next despatch or delivery. Postmasters are instructed not to receive any letter which there is good reason to believe contains anything likely to injure the contents of the mail bag or the person of any officer of the Post Office. If such a packet be posted without the Postmaster's knowledge, or if at any time before its despatch he should discover any such packet, he is directed not to forward it, but to report the care, with the address of the packet, to the Secretary. The following are examples of the articles referred to:—A glass bottle, or glass in any form; razors, scissors, needles, knives, forks, or other sharp instruments; leeches, game, fish, meat, fruit, or vegetables; bladders or other vessels containing liquids; gunpowder, lucifer matches, or anything which is explosive or liable to sudden combustion.

POSTAGE STAMPS.

Every Head Postmaster is required to keep, for sale to the public, a sufficient stock of Post Cards, of the various postage labels in use, and of envelopes with the penny stamp embossed. The labels are of the respective values of ½*d.*, 1*d.*, 1½*d.*, 2*d.*, 3*d.*, 4*d.*, 6*d.*, 9*d.*, 10*d.*, 1*s.*, 2*s.*, and 5*s.* Sub-postmasters are required to keep halfpenny and penny labels and post cards only (which latter are not sold singly, but in packets of twelve for 6½*d.*); but they can procure any stamps of other values, or embossed envelopes, which may be required. The envelopes are made of four sizes, viz., 5½in. by 3½in., 5½in. by 3in., 4¾in. by 2¾in., and 4in. by 2¼in. They are sold at the following prices:

1 for 0*s.* 1½*d.*	3 for 0*s.* 3½*d.*	6 for 0*s.* 6½*d.*	12 for 1*s.* 1*d.*
2 „ 0*s.* 2½*d.*	4 „ 0*s.* 4½*d.*	8 „ 0*s.* 8½*d.*	24 „ 2*s.* 2*d.*

Head Postmosters are also required to keep Newspaper Wrappers bearing an impressed ½*d.* stamp, of three different sizes, and to sell them at the following prices:

Size, 12*in.* by 5*in.*			*Size*, 9*in.* by 4*in.*			*Size*, 2*in.* by 4*in.*		
s.	*d.*		*s.*	*d.*		*s.*	*d.*	
400 ... 18	0	10 ... 0	5½	400 ... 17	8	10 ... 0	5½	400 ... 17	6	10 ... 0	5½
100 ... 4	6	5 ... 0	3	100 ... 4	5	5 ... 0	3	100 ... 4	4½	5 ... 0	3
50 ... 2	3	2 ... 0	1½	50 ... 2	2½	2 ... 0	1½	50 ... 2	2¼	2 ... 0	1½
25 ... 1	1½	1 ... 0	0¾	25 ... 1	1¼	1 ... 0	0¾	25 ... 1	1⅛	1 ... 0	0¾

Every Rural Messenger is authorized to sell penny postage labels at the same price at which Postmasters are empowered to sell them; and when any person applies to him for postage labels the messenger must either supply them or, if he have none in his possession, must, without extra charge, receive the postage in money and, on his arrival at the Post Office, obtain labels for it and affix them carefully to the letters. Prepayment of inland letters, newspapers, and book packets must be by labels or embossed stamps. Letters also to the colonies and foreign countries may be prepaid in money. British postage stamps, though available for all letters going out of this country, are not, as a general rule, available for letters coming into it. By using embossed envelopes all risk of the stamp being detached may be avoided; but when labels are used, they should be examined to see that they firmly adhere, and the envelopes to which they are affixed should not be too highly glazed since, if the stamps fall off, the letters are charged with postage, and that at the unpaid rate; while as respects letters addressed to many places abroad the transmission is altogether stopped. Labels should be placed on the front, that is the address side, of the letter, and upon the right-hand upper corner. On re-directed letters, however, care should be taken not to place fresh stamps over the stamps which have been previously used. Postage stamps which have been torn, cut, or otherwise rendered imperfect—embossed or impressed, stamps cut out from the envelopes, cards, or wrappers, on which such stamps were embossed or impressed—even although the stamps have not been before used or sent by post—and Receipt or other Inland Revenue Stamps cannot be used for payment of postage. Applications for allowance on spoilt postage stamps, embossed envelopes, post cards, or newspaper wrappers, which have not passed through the post, should be made to the Office of Inland Revenue. In the case of envelopes, cards, or wrappers, the applications must be accompanied by these articles intact, as no allowance can be granted on the embossed or impressed stamps if cut therefrom. All Postmasters in the United Kingdom at whose Offices Money Order business is transacted are permitted, though not compelled, to purchase postage stamps from the public, provided the stamps be not soiled or otherwise damaged, at a charge of 2½ per cent; the charge, however, never being less than one halfpenny. Under this arrangement the payments are as follows:

For stamps not exceeding 1*s.* 8*d.* in value, the full price minus ½*d.*
„ above 1*s.* 8*d.* but not exceeding 3*s.* 4*d.*, the full price minus 1*d.*
„ „ 3*s.* 4*d.* „ „ 5*s.* „ „ 1½*d.*
„ „ 5*s.* „ „ 6*s.* 8*d.* „ „ 2*d.*
„ „ 6*s.* 8*d.* „ „ 8*s.* 4*d.* „ „ 2½*d.*, and so on.

No separate stamps are purchased; they must in all cases be presented in strips containing at least two stamps adhering to each other. In all transmissions of stamps by post care should be taken to fold them in rather thick paper, so that the contents may neither be seen nor felt through the cover. Paper taken by the public to the Inland Revenue Office, Somerset House, can be impressed with Postage Stamps.

REGISTRATION.

By the prepayment of a fee of fourpence any letter, newspaper, or book packet, unless it be addressed to initials or to a fictitious name, may be registered to any place in the United Kingdom or the British Colonies. Registered letters, except those mentioned below must, as regards both postage and registration-fee, be prepaid. In the case of inland letters such prepayment must be by stamps; but in that of foreign letters it may be either in stamps or in money. Official letters for Government Offices in London, Dublin, or Edinburgh, may be registered at Country Post Offices on prepayment in stamps of the registration fee only. The registration of a packet makes its transmission much more secure. All inland or colonial letters which unquestionably contain coin, even though they be posted without registration, are treated as registered, and charged on delivery with a double registration fee of eightpence in addition to the ordinary postage; and any such letters which cannot be registered in time to be forwarded by the mail for which they are posted, are detained for the next despatch. Every letter to be registered should be presented at the window, and a receipt obtained for it, and should on no account be dropped into the letter-box. If, contrary to this rule, a letter marked "Registered" be dropped into the letter-box, it will, if directed to any place in the United Kingdom or the British Colonies, be liable to a registration fee of 8*d.*, instead of the ordinary fee of 4*d.* At all Post Offices the latest time for posting registered letters on the payment of the ordinary fee is entered in the notice exhibited in the office window; but, upon payment of a late fee of fourpence, in addition to the ordinary registration fee, at the Metropolitan Chief Offices, at the London District Offices (including the Lombard Street and Charing Cross Branches), and at all provincial Head Offices, letters, whether inland, foreign, or colonial, may be registered after the hours specified, until the closing of the letter-box for each despatch (exclusive of the time during which late letters are received), or until the office is closed for the night. No Letter Carrier, Rural Messenger, or other servant of the Post Office is allowed to carry a letter for any person to be registered. Parliamentary notices may be forwarded through the post under the following regulations:—The words "Parliamentary Notice" must be legibly printed on the face of the letter; and, in order to secure the speedy return of any notices which may be undelivered, the name and address of the solicitor issuing such parliamentary notice should also be legibly printed or written on the face of the letter; though this is not imperative. These notices must be posted either at the General Post Office, St. Martin's-le-Grand, in London; the General Post Office in Dublin; the General Post Office in Edinburgh; or at the chief office at one or other of the following towns:—

Aberdeen	Bristol	Inverness	Manchester
Athlone	Cork	Leeds	Newcastle-upon-Tyne
Belfast	Exeter	Lincoln	Norwich
Birmingham	Glasgow	Liverpool	Shrewsbury.

All notices which by the standing orders of either House of Parliament are required to be served on or before the 15th December, must be posted not later than the 12th December, unless the 12th fall on a Sunday, when they must be posted not later than the 11th; but those notices which, by the same orders, may be served after the 15th, may be posted after the 12th of that month. The postage chargeable on these notices and the registration fee of sixpence on each must be prepaid by stamps. The notices must be posted at the post office window, accompanied with duplicate lists of the addresses; the notices being arranged, for the convenience of comparison, in the order of the list. These lists will be examined by the officer in attendance at the window; and if they correspond with the addresses, he will sign and stamp every sheet of each list. One of the duplicate lists will then be returned to the person who brought the letters, and the other forwarded to the Secretary, General Post Office, London. The hours for receiving such notices are the same as those for the registry of ordinary letters, unless they be presented at such a time as to interfere with the other duties of the office; in which case the Postmaster may appoint any other time within the next twenty-four hours for receiving the same, provided that, when the notices are to be served on or before the 15th December, such arrangement do not delay the posting beyond the 12th. Re-directed parliamentary notices are, like letters, liable to an additional rate of postage. The senders of parliamentary notices should, if possible, arrange on the previous day with the Postmaster, as to the most convenient time for posting them, and state the probable number. Notices relating to votes for Members of Parliament, belonging to any of the classes enumerated in the Acts 6 Vict. c. 18, and 13 & 14 Vict. c. 69, can also be sent through the post (with the securities for their safe delivery enjoined by the Acts) on prepayment, in stamps, of the postage at the letter rate—whether inland or foreign, as the case may be—and of a registration fee of twopence, provided they be presented, duly directed, open, and in duplicate, to the Postmaster of an office which is also a Money Order Office and Post Office Savings Bank On receiving the notices, the Postmaster will compare each with its duplicate, and if the two agree, the latter will be stamped and returned to the bearer. The production by the person who posted such notice of such stamped duplicate is evidence of the notice having been given to the person at the place mentioned, on the day on which such notice would in the ordinary course of post have been delivered there. The notices must be presented at least half an hour before the fixed times for posting ordinary letters. They are liable to the usual charge for re-direction. When a poll-book is presented by any returning officer to be forwarded by post, the Postmaster is required to give to such officer an acknowledgment thereof in writing, stating the time when he received it. No registration fee is demanded for poll-books, and prepayment of the postage is optional, without regard to weight or size.

DELIVERY.

No person living within the town free delivery, or within the limits of a rural post free delivery, unless he rent a private box, can claim to have his letters delivered at the office window it a delivery by Letter Carrier or a despatch by messenger is about to take place; but letters which arrive by a mail, after which there is no immediate delivery by Letter Carrier or messenger, may be obtained by any person on application at the office window, so long as the office is open for delivery. Any person can have a private box who is willing to pay the appointed fee. Where this fee goes to the Revenue, it is generally fixed at one guinea per annum to be paid in advance, and for a period of not less than a year, and where it goes to the Postmaster, he may demand the same terms, though he may, at his option, take less. The same also, in most cases, are the terms for a private bag, except that, in addition, there is the cost of the bag itself, and a charge for conveyance, the maximum of the latter being half a guinea per annum if the bag be conveyed by a Rural Messenger, and two guineas if by a contractor for a mail cart or other horse post. If more than one Rural Messenger or more than one contractor take part in the conveyance of a private letter bag, each is allowed to charge the full amount of the fee for his service. The weight of a private bag, when empty, is limited to one pound. As the service of a private bag may possibly delay the despatch of the general bag, none are allowed without the permission of the Surveyor. If a private letter bag made up at one post office be left at another to be called for or to be delivered from thence, the postmaster at such other office may make a charge for his trouble; this charge is usually 5*s.* per annum. Any person residing

within the limits of a town free delivery, and renting a private letter bag, is considered to have the accommodation of a private box at the post office as well as a bag, and is liable to the full charge for both bag and box.

MONEY ORDERS.

The public are recommended, when applying for Money Orders, to use printed "Application Forms," which save time, and afford greater security than verbal messages against mistakes. These Forms are supplied gratuitously at all Money Order Offices. The commission on Inland Money Orders is:—

For sums under 10*s.*	1*d.*	For sums of 5*l.* and under 6*l.*	7*d.*
" of 10*s.* and under 1*l.*	2*d.*	" " 6*l.* " " 7*l.*	8*d.*
" " 1*l.* " " 2*l.*	3*d.*	" " 7*l.* " " 8*l.*	9*d.*
" " 2*l.* " " 3*l.*	4*d.*	" " 8*l.* " " 9*l.*	10*d.*
" " 3*l.* " " 4*l.*	5*d.*	" " 9*l.* " " 10*l.*	11*d.*
" " 4*l.* " " 5*l.*	6*d.*	" " 10*l.*	1*s.*

No order is allowed to contain a fractional part of a penny. With the subjoined exceptions, no Money Order can be issued, unless the applicant furnish, in full, the surname and at least the initial of one Christian name, both of the remitter and the payee, together with the remitter's address, or unless the remitter directs at the time of issue (which he is at liberty to do), that the order, by being crossed like a cheque, be made payable only through a bank, in which case it is optional with the remitter to give or withhold the name of the payee. If the remitter or payee be a peer or a bishop, his ordinary title is sufficient. The usual designation of a firm is sufficient, except in the case of a company trading under a title which does not consist of the names of the persons composing it. The holder of a Money Order is always at liberty to direct, by crossing it, that the order be paid through a bank, even though its payment was not originally so restricted; and when the order is thus presented the question put on the presentation of an ordinary Money Order is dispensed with. When application is made for a Money Order payable in London, or at any other town where there is more than one Money Order Office, the remitter should say at which of such offices he wishes it to be paid. In order to enable the remitter to obtain an acknowledgment of the receipt of a Money Order before the money is paid, it is arranged that he may make his order payable ten days after date, provided that, in the presence of the Postmaster, when he obtains the order, he affix thereto, in the space after the request C., a penny receipt stamp, and write his signature across the stamp. When an order is presented for payment (otherwise than through a bank) the Postmaster has first to see that the signature of the payee be as full as the name given in the advice, and be not in any way inconsistent therewith He has then to call on the applicant to give the name of the remitter, and if the reply be correct, the order will be paid, unless the Postmaster have good reason for believing that the applicant is neither the rightful claimant, nor deputed by him. When an order is paid through a bank it is sufficient that it be receipted (without regard to any discrepancy between the signature and the name in the advice, or to whether the receipt is given by the payee himself or by another person), and that it be presented (crossed with the name of the receiving bank) by some person known to be in the employment of the bank. Money Orders do not require a receipt stamp. Payment of an order, issued and payable in the United Kingdom, or issued in the United Kingdom and payable in Belgium, Denmark, or North Germany, and Orders issued by those countries on the United Kingdom, must be obtained before the end of the second calendar month after that in which it was issued (for instance, if issued in January it must be paid before the end of March), otherwise the order becomes lapsed, and a new order is necessary, for which a second commission is charged. A person presenting a lapsed order is furnished with a copy of a printed notice headed "Lapsed Money Orders," containing directions how to proceed. If the order be not paid before the end of the twelfth calendar month after that in which it was issued (for instance, if issued in January and not paid before the end of next January) all claim to the money is lost. No application can be entertained for compensation for alleged injury from the nonpayment of a Money Order at the expected time. After once paying a Money Order, by whomsoever presented, the Office is not liable to any further claim.

The scale of commission for orders payable abroad is as follows:—

For sums not exceeding	£2.	£5.	£7.	£10.
	s. d.	*s. d.*	*s. d.*	*s. d.*
If payable in Switzerland, Belgium, Denmark, Germany, Italy, The Netherlands, Egypt, or at Malta, Gibraltar, or Constantinople	0 9	1 6	2 3	3 0
" any other place abroad (including most of the Colonies) authorised to transact Money Order business with this country	1 0	2 0	3 0	4 0

Money Orders are issued in the United Kingdom on the following colonies and foreign countries:—

BELGIUM—ITALY—THE NETHERLANDS, and SWITZERLAND.
DENMARK—GERMANY (including North Germany, Alsace, German Lorraine, Baden, Bavaria, Wurtemburg, and Luxemburg).
INDIA—GIBRALTAR—MALTA—CONSTANTINOPLE.
EGYPT—Alexandria, Cairo, Suez.
AMERICA, UNITED STATES OF.
ARGENTINE REPUBLIC—Buenos Ayres.
BRAZIL—Bahia, Pernambuco, Rio Janeiro.
BRITISH COLUMBIA—Cariboo, New Westminster, Victoria.
BRITISH GUIANA—Berbice (New Amsterdam), Demerara (Georgetown).
CANADA.
CAPE OF GOOD HOPE.
CHINA—Hong Kong, Shanghae.
FALKLAND ISLANDS—Stanley.
GOLD COAST—Accra, Cape Coast Castle.
HONDURAS—Belize.
INDIA, BRITISH—Any place in.
JAPAN—Yokohama.
NATAL—Durban, Pietermaritzburg.
NEW BRUNSWICK.
NEWFOUNDLAND.
NEW SOUTH WALES.
NEW ZEALAND.
NOVA SCOTIA.
PRINCE EDWARD ISLAND—Charlotte Town.
QUEENSLAND.
ST. HELENA—James Town.
SOUTH AUSTRALIA.
STRAITS SETTLEMENTS—Malacca, Penang, Singapore.
TASMANIA.
URUGUAY—Monte Video.
VICTORIA.
WEST COAST OF AFRICA—Gambia (Bathurst), Lagos, Sierra Leone (Freetown).
WEST INDIES—Antigua (St. John's and English Harbour), Bahamas (Nassau), Barbadoes (Bridgetown), Bermuda (Hamilton and St. George's), Dominica (Roseau), Grenada (St. George), Jamaica (Kingstown), Montserrat, Nevis (Charlestown), St. Kitt's (Basseterre), St. Lucia (Castries), St. Vincent (Kingstown), Tobago (Scarborough), Trinidad (Port of Spain and San Fernando, Turk's Island.

WESTERN AUSTRALIA.

The only Post Offices in Western Australia which are authorised to issue Money Orders on the United Kingdom, and to pay Money Orders issued in the United Kingdom on Western Australia, are those at Perth and Albany (King George's Sound). The renewal of a lapsed order, the issue of a duplicate order, or the stoppage of payment of an order issued by a Colony on the United Kingdom, will be made on application to the Comptroller of the Metropolitan Office of that portion of the United Kingdom in which such Colonial order is payable, provided an additional British Inland Rate of Commission be inclosed with the application; except in the case of lapsed orders, when the additional commission will be deducted from the amount of the new order issued by the Department; but the lapsed order must be transmitted with the application for its renewal.

MISCELLANEOUS.

The Post Office is not responsible for any injury which books or other articles forwarded by post may sustain. Neither is the Post Office responsible for any loss or inconvenience which may arise from the mis-sending, mis-delivery, loss, &c., of a letter or any other postal packet. The restrictions laid down as to the dimensions of letters and packets do not apply to the following, viz.:—1st. Packets to or from any of the Government Offices or Departments, or Public Officers. 2nd. Petitions or addresses to the Queen, whether directed to Her Majesty, or forwarded to any member of either House of Parliament. 3rd. Petitions to either House of Parliament, forwarded to any member of either House. 4th. Printed Parliamentary proceedings. No information can be given respecting letters which pass through a Post Office except to the persons to whom they are addressed, and in no other way is official information of a private character allowed to be made public. A Postmaster may, however, give the address of any person unless he have reason to believe that the person for whose address he is asked would disapprove of his doing so. Postmasters are not required to correspond with the public on official matters. All applications, therefore, which require an answer by letter should be addressed to the Secretary, at the General Post Office. Postmasters are not allowed to return any letter or other packet to the writer or sender, or any one else, or to delay forwarding it to its destination according to the address, even though a request to such effect be written thereon. Any person who, on receiving a surcharged letter, has reason to think that the letter has been wrongly taxed, should take it, before it has been opened, to a post office to be weighed, and should have its exact weight certified in writing at the Post Office. This will, in most cases, be sufficient evidence that the letter has been erroneously charged; though sometimes, owing to the paper being damp when it is posted, a packet weighs more then than when it is delivered, and it is the weight at the time of posting that determines the charge. Except where the Surveyor may deem a longer interval necessary, late letters, &c., are received till within five minutes of the despatch of the mails; although no office is kept open merely for this purpose after ten o'clock at night; and no late letters, &c. (except Government letters) are forwarded by the mail preparing for despatch unless prepaid, and that by stamps, so as to include both the ordinary postage and the late letter fee; but, in the case of letters directed to any department of Government, it is sufficient to prepay the fee. Prepaid letters may, however, be handed to the sorters in the Travelling Post Offices on any of the lines of railway upon which such offices are run, on payment of an extra fee in postage stamps of 2*d.* on each letter. Every re-directed letter, post card, or other postal packet is liable to an additional postage (at the prepaid rate) for each re-direction, unless the re-direction be made by an Officer of the Post Office, to a place within the same free delivery as the last address. An additional postage is levied of one penny, if the letter weigh less than one ounce; of three halfpence if the weight be more than one ounce, but less than two ounces; of twopence if the weight be more than two ounces, but less than four ounces; and of one halfpenny in addition for each succeeding weight of two ounces, or fraction thereof, up to twelve ounces. (A letter exceeding twelve ounces in weight is liable to charge for re-direction at the rate of one penny for every ounce or fraction of an ounce.) Upon a book packet re-directed to any other postal delivery in the United Kingdom, and weighing not more than two ounces, an additional postage of one halfpenny is levied; or, if the book-packet weigh more than two ounces, but not more than four ounces, an additional postage of one penny, and so on. A registered letter when re-directed is only liable to the same additional charge as an ordinary re-directed letter. If, however, instead of being taken back to the post office to be dealt with as a registered letter, it is dropped into the letter box as an ordinary letter (the word "registered" not having been erased, or having been erased in pencil only) it becomes liable to the same treatment as any other letter marked "registered" and found in the letter box, and is surcharged with a registration fee of eightpence minus the value of any stamps already affixed for the registration. Letters which have once been posted addressed to commissioned officers in the army, navy, or ordnance, or to schoolmasters or schoolmistresses in the army, or to non-commissioned officers, private soldiers, or seamen employed on actual service in any of Her Majesty's colonies, or on any foreign station, and who, before receiving the letters, may have started on their return home or to another station, may be re-directed to such officers, private soldiers, or seamen, &c., when these have removed upon service, and will be delivered to them without any charge for re-direction. The same privilege extends to the letters of non-commissioned officers, schoolmasters in the army (of all but the first-class), schoolmistresses in the army, private soldiers, and seamen, re-directed from one part of the United Kingdom to another, or from the United Kingdom to a place abroad, provided the original postage is prepaid and the letters do not exceed half an ounce in weight; but no such privilege is allowed with regard to letters for a commissioned officer, or for a superintending or first-class schoolmaster in the army re-directed from one part of the United Kingdom to another, or (if posted in the United Kingdom) re-directed to a place abroad. A Postmaster is not bound to re-direct letters for a person temporarily leaving his home, and not having a private bag or box, unless the house be left uninhabited, or the letters would be delayed in their transmission by being sent to the house to be re-directed there. In all cases of re-direction a written authority, duly signed by the person to whom the letters are addressed, must be sent to the Postmaster. At all offices which are open on Sunday the public are allowed, during the time they are so open (viz. from 9 to 10 in the morning and one other hour), to prepay foreign and colonial letters, to purchase postage stamps, and to have letters registered; and all other duties are performed as usual, except money order, savings bank, insurance, and annuity business, which, on that day, is wholly suspended. At no provincial town in England or Ireland is there more than one delivery on the Sunday, Christmas Day, or Good Friday; nor, in Scotland on Sunday or the Sacramental Fast Days; and any person is at liberty to prevent even this delivery, so far as relates to himself. No Postmaster is bound to give change, or is authorised to demand change; and when money is paid at a post office, whether as change or otherwise, no question as to its right amount, goodness, or weight can be entertained after it has been removed from the counter. Except as regards foreign and colonial letters about to be prepaid in money, a Postmaster is not bound to weigh any letters or other packets for the public, though he may do so if his duty be not thereby impeded. By the Act 1 Vict. c. 36, s. 2, any person conveying (otherwise than by the post) a letter not exempted from the exclusive privilege of the Postmaster-General, incurs a penalty of £5 for every letter, and £100 for every week the practice is continued. The sender also incurs a penalty of £5 for every letter, with full costs of suit. The exclusive privilege of the Postmaster-General is confined strictly to letters, and does not therefore extend to newspapers, books, patterns, or money; all of which may be legally conveyed by other means. The following kinds of letters also need not be sent through the post:—1st. Letters sent by a private friend, to be delivered by such friend to the person to whom they shall be directed. 2nd. Letters sent by a messenger on purpose, concerning the private affairs of the sender or receiver thereof; commissions or returns thereof, and affidavits and writs, process or proceedings or returns thereof, issuing out of a Court of Justice. 3rd. Letters sent out of the United Kingdom by a private vessel (not being a packet boat). 4th. Letters of merchants, owners of vessels of merchandise, or of the cargo or loading therein, sent by such vessels of merchandise, or by any person employed by such owners for the carriage of such letters, according to their respective directions, and delivered to the respective persons to whom they shall be directed, without paying or receiving reward or profit for the same in anywise. 5th. Letters concerning goods or merchandise sent by common carriers, to be delivered with the goods which such letters concern, without hire or other advantage for receiving or delivering such letters.

Our Portraits.

Her Majesty the Queen.

(See page 1.)

THE reign of our beloved Queen has during the past twelve months been one of uninterrupted peace and prosperity, and 1873 opens without a cloud overshadowing the brightness of its prospects. As years roll by Her Majesty, by the thoughtful consideration and sympathy she displays to her people on all occasions, when a kindly word or a gracious message is more valued than anything else in the world, manages to plant herself deeper and deeper into the hearts of the British nation. No more significant tribute of loyalty could have been paid to a sovereign than the spontaneous sympathy displayed throughout all classes of the English nation during the illness of the Prince of Wales for the intense anxiety suffered by his mother, twelve months ago. We say advisedly his mother, for the feeling expressed by the people was the warm, heartfelt sympathy with the woman more than with the sovereign—the woman who throughout her whole life has gained the affection and respect of her subjects by her spotless domestic life, her proved depth and constancy of affection, as much as by her constitutional rule, her unfailing attention to public business, and her unwearying interest in all that conduces to the welfare of her subjects.

England may with justice love and be proud of her Queen. Statesmen and clergymen, and all who have ever known her, in a private or public capacity, have always done the most ample justice to her high aims and strict sense of duty. The great sorrow which darkened Her Majesty's life eleven years since caused her withdrawal from the gaieties of aristocratic society, and the absence of that kindly presence has naturally caused much sorrow—nay, even dissatisfaction—amongst those circles which were formerly gladdened by her presence. It is, however, very generally felt that the Queen's loss by the death of the late Prince Consort was far beyond the great bereavement experienced by most women when overtaken by a similar calamity. By the death of the Prince she lost not only a companion whose talents and rare cultivation made life delightful, but an adviser whose singular rectitude of mind and knowledge of men and history were of the greatest assistance and value to her in the conduct of affairs. Notwithstanding the withdrawal from the glitter and noise of gay assemblies, unimpeachable testimony establishes the fact that neither physical nor mental suffering has ever interfered with the strict discharge of her duties to the nation and to the Royal Family; and she has her reward in the love and respect felt for her by her subjects and her children.

It is perhaps not too much to hope that out of sorrow may come joy. On the 14th of December, 1871, the anniversary of the death of Prince Consort, the Prince of Wales made the first feeble step on the road to recovery. The nation remembered the sad event which occurred on that day, and, looking to the Prince of Wales's nearly desperate condition, almost superstitiously dreaded that that date was to be marked by another great sorrow for our widowed Queen. Happily, events proved otherwise, and this mournful anniversary will now be brightened for Her Majesty by the memory that on that day the shadow of the Valley of Death was lifted from her eldest son. The Queen's kindness of heart towards the humble and the lowly is well known to those persons privileged to witness her daily life; and was never more practically demonstrated than by her unassuming attention to the groom Charles Blegg, who succumbed to the malady which so severely tried the vital powers of the Prince of Wales. A mother's sympathy with a mother was evidenced by her visits to the bereaved parent of the lad, and the command that prayer should be offered up "for the Prince of Wales and Charles Blegg."

As a constitutional monarch all statements concur in representing Her Majesty as faultless; and it is stated under authority that, whatever might be her private feelings and opinions, she has never hesitated to ratify the will of the nation as expressed by the enactments of the Legislature. A model woman, wife, and Queen, long may she be spared to reign over a nation which appreciates her as she deserves, and prays that the rest of her days may be spent in calm happiness, and that the recollections of her trials may become daily less bitter to her, in the pleasure of seeing her children and her grandchildren flourishing around her.

The Three Empresses of Europe.

(See page 4.)

ELIZABETH AMELIA EUGENIA, Empress of Austria, daughter of Maximilian Joseph, King of Bavaria. Born Dec. 24, 1837; married April 24, 1854.

MARIA ALEXANDROWNA, Empress of Russia, *née* Maximiliana Wilhelmina Augusta Sophia Marie, daughter of the late Louis II., Grand Duke of Hesse. Born Aug. 8, 1824; married April 28, 1841.

MARIE LOUISE AUGUSTA CATHERINE, Empress of Germany, daughter of the late Charles Frederick, Grand Duke of Saxe-Weimar. Born Sept. 30, 1811; married June 11, 1829.

Three Queens of Europe.

(See page 5.)

MARIA HENRIETTA ANNA, Queen of Belgium, daughter of the late Archduke Joseph, Prince Palatine of Hungary. Born Aug. 23, 1836; married in 1857.

MARIA, Queen of Spain, daughter of Prince Charles Emanuel del Pozzo della Cisterna. Born Aug. 9, 1847; married May 30, 1867.

OLGA CONSTANTINEVNA, Queen of Greece, daughter of the Grand Duke Constantine of Russia, and niece to the reigning Emperor. Born Dec. 24, 1845; married Oct. 27, 1867.

H.R.H. the Duke of Edinburgh.

(See page 8.)

HIS ROYAL HIGHNESS PRINCE ALFRED ERNEST ALBERT, Duke of Edinburgh, K.G.K.P., the second son of Her Most Gracious Majesty the Queen and of His Royal Highness the late Prince Consort, was born at Windsor Castle, on the 6th of August, 1844. His early education was entrusted to the Rev. H. M. Birch, after 1852 to F. W. Gibbs, Esq.; and in 1856 the Prince was placed under the especial care of Major, now Sir John Cowell, R.E., and spent the winter of 1856-7 at Geneva, studying modern languages. Having decided upon entering the naval profession, Prince Alfred was placed under the care of the Rev. W. Jolly, at Alverbank, near Gosport, where he pursued the preparatory studies necessary for his adopted profession during the summer of 1858. He entered the service, after a strict and searching examination, Aug. 31, 1858, was appointed a naval cadet, and joined Her Majesty's screw steam frigate Euryalus. The *United Service Gazette* of that date tells us that Prince Alfred was brought up in the naval service precisely the same as if he had been the son of a private gentleman; he messed with the midshipmen, kept his regular watch, dined occasionally in the wardroom, and took his turn to dine with the captain. He was treated by his messmates as in all respects one of themselves; was called to order by the caterer; and was made the subject of practical jokes in the same manner as any other of the young gentlemen; but was, however, generally not behindhand himself in the business of playful mischief. It is also stated that he was sternly denied the privilege of smoking. His Royal Highness subsequently went on active sea service in the St. George, and served on various foreign stations, visiting many of the countries on the shores of the Mediterranean, and extending his travels to America and the West Indies.

In December, 1862, the throne of Greece was offered to Prince Alfred, but he declined to accept it. He was created Duke of Edinburgh, Earl of Kent, and Earl of Ulster in the peerage of the United Kingdom, May 24, 1866, and took his seat in the House of Lords. His Royal Highness was sworn in Master of the Trinity House, March 2, 1866, and received the freedom of the City of London, June 8, of the same year. Early in 1867 the Duke was appointed to the command of the frigate Galatea, in which he proceeded to Australia, with the intention of visiting the whole of our Australian colonies and Polynesia. His progress was stopped at Sydney by an attempt to assassinate him, and although the wound inflicted on him by the pistol of the would-be assassin was not sufficiently serious to endanger his life, it induced an amount of weakness which prevented the Prince from completing his intended cruise, and he was ordered to return to England, where he arrived in June, 1868.

In 1869 the Duke of Edinburgh resolved on visiting Her Majesty's Indian possessions, and set sail in his ship, the Galatea. He made a progress through a considerable part of British India, where he was received by the native princes with the ceremony due to his birth. His Royal Highness, who is passionately fond of field sports, made great havoc among the "big game" of India, and returned to England a few months since laden with the spoils of his prowess. The extent and duration of his travels undoubtedly entitle the Duke of Edinburgh to the distinction attributed to him by Sir Henry Rawlinson at the last annual dinner of the Royal Geographical Society, that "he is the greatest traveller amongst royal princes of any nation and any time."

The Duke of Saxe Coburg Gotha has adopted his nephew the Duke of Edinburgh as his heir, so that he will in all probability one day find a larger and more onerous field of action for the application and development of those habits of rule he has learned as captain of The Galatea, and will doubtless earn for himself the same respect and affection from his subjects that are now felt for him by the officers and crews who have served under him.

H.R.H. the Princess Beatrice.

(See page 9.)

HER ROYAL HIGHNESS PRINCESS BEATRICE MARY VICTORIA FEODORE is the ninth and youngest child of Her Majesty the Queen and H.R.H. the late Prince Consort. The Princess was born on the 14th April, 1857, and is consequently in her sixteenth year. Being the only remaining unmarried daughter, she is now her royal mother's companion. The Princess is an excellent linguist, is remarkably fond of study, and learns all she undertakes with facility. She evinces the same aptitude for acquiring information and the same ease in perfecting herself in various accomplishments that so conspicuously distinguished her royal sisters.

Oscar II., King of Sweden and Norway.

(See page 12.)

THE new King of Sweden and Norway, Oscar Frederick, is the second surviving brother of the late king. He was born in January, 1829, and has served his country in both its military and naval services. He is distinguished for many virtues, and, above all, by that most useful quality, consummate prudence. Less enthusiastic politically, perhaps, than the brother he is called on to succeed, he is possibly better fitted to the needs of a prosaic age. King Oscar, as we must now call him, is one of the most accomplished men amongst the royal families of Europe, and well versed in science and philosophy. He has been lately chosen President of the International Congress of Prehistoric Archæology and Anthropology, which is to meet at Stockholm next year.

King Oscar married in June, 1857, the Princess Sophia of Nassau, who was born in July, 1836. From this union there are four sons. To provide for his family the King has a Civil List of about £78,700 as King of Sweden, and about £32,000 more as King of Norway, besides which the royal family enjoy an annuity of £16,666, voted to King Carl XIV. and his successors on the Throne of Sweden. His Swedish subjects amount to about 4,000,000 only. The number doubled itself in exactly a century, but in later years the emigration from Sweden has been great, principally to America and Denmark.

Sweden offers an example to other European nations in its educational arrangements, which seem to make it bid fair to become one of the best educated countries in the world.

By law, every Swede must be educated. If the parents cannot afford to give their children the requisite instruction at a private school, the State steps in, and insures its having a public one. The public schools are of every grade, affording instruction in the most elementary as well as the highest branches of knowledge. They are not absolutely free, but the highest charge made for them is about 30s. per annum; and even this it is in the power of the parish to remit in justifiable cases. But the Government finds no difficulty in enforcing the law, for public opinion in Sweden is strongly in favour of education, and the schools are everywhere filled with children belonging to every class of life. Besides these public schools, at which 629,000 children receive an elementary education, Sweden rejoices in normal schools, two universities, and many medical, military, technical, and navigation schools.

Charles XV., King of Sweden and Norway.

(See page 13.)

A PREMATURE death carried off in the prime of life a sovereign, who, though less heard of than many of his compeers, was in several respects a very remarkable man—one whose talents would infallibly have lifted him out of obscurity in what rank soever of life he had been born. The late King of Sweden was the third sovereign of the House of Ponte Corvo, and grandson of General Bernadotte, Prince de Ponte Corvo, who was elected heir-apparent of the crown of Sweden by the Parliament of that kingdom in 1810, and ascended the throne in 1818 under the name, style, and title of Carl XIV.

The union of Sweden and Norway under one sceptre and one sovereign was decided upon at the Congress of Vienna, and confirmed in 1814 by the Treaty of Kiel, when Denmark consented to dissolve its ancient connection with Norway. The provisions of this treaty were accepted, after some resistance on the part of the people, by the Norwegian Storthing, and on August 6, 1815, a charter, denominated the Riksakt, was promulgated, establishing the union. This Riksakt, amongst other provisions, lays down that while the Government of the two countries is kept entirely separate, the common sovereign shall exercise action over both, through a Council of State composed of Swedes and Norwegians. The law of succession shall be the same in both countries. The political union of the two kingdoms shall be indissoluble and irrevocable, without prejudice, however, to the separate government, constitution, and code of laws of either Sweden or Norway. Each, therefore, remains a distinct and separate kingdom, though under a single crown.

The late King Carl XV., King of Sweden and Norway, was the eldest son of King Oscar I. and Josephine, daughter of Prince Eugène, of Leuchtenburg. A romantic story is told concerning the union of this pair, the parents of the late sovereign. King Oscar scarcely ever quitted Sweden, so little of a traveller was he; but on one occasion, under the pretext of visiting the Rhineland, he boldly penetrated Bavaria, and visited Eugène Beauharnais, Duke of Leuchtenburg, at Reichstadt. The result of the visit was that he fell in love with Josephine, the duke's eldest daughter, whom he shortly afterwards married. By that marriage he had, besides the king now deceased, Oscar, Duke of Östergötland, heir-presumptive to the throne, and who now succeeds as king; Augustus, Duke of Dalecarlia, and Eugénie, Crown Princess of Sweden and Norway. The late king was born on the 3rd of May, 1826, and was consequently in his forty-seventh year at the time of his premature decease. He was appointed Prince Regent of Sweden and Norway by royal decree in September, 1857, in consequence of the protracted illness of his royal father. Within two years later, in July, 1859, King Oscar died, and the Prince Regent ascended the throne. He took the solemn oath to observe the Constitution of Norway, and was formally crowned King of Sweden at Stockholm, in May, 1860. His reign was signalised by a reform of the representative system of Sweden, which had been pending for at least a hundred years. In the old Swedish system of representation there were four houses, representing respectively the nobles, the clergy, the burghers, and the peasants, in which all classes of the community were represented, but which almost invariably voted two and two; that is to say, the nobles and the clergy always voted together in questions of great importance on one side, and the burghers and the peasants on the other. But by the same constitution, when the four houses were divided against themselves, two and two, the question proposed fell to the ground, and so it had occurred that many most important reforms, and amongst others that of the representation itself, could never be carried. At last, on the 5th of January, 1863, the Government of the late king accomplished what his father, grandfather, and several previous kings of Sweden had been unable to effect. A scheme of representation, simplifying the four Chambers to two, one elected by the local assemblies, and the other by the people, was proposed, and received with enthusiasm by the whole nation. It was not, however, till June, 1866, that the new constitution received the king's signature, and that the question which had so long perplexed Sweden was finally settled. In the same year the noble families, of whom there were no fewer than 2300, surrendered another typically feudal privilege—that which forbade any person to cite them for certain prescribed offences before an inferior court of law. Nor was the late reign undistinguished by other useful reforms and signs of progress. Canals have been cut, roads constructed, liberty in religious matters granted, commercial intercourse furthered with foreign countries, and free trade adopted. The problematical benefit of abolition of capital punishment was also conferred on his subjects by King Carl XV., a change he effected by his own will, without the aid of his Parliament. Each sovereign possesses, by virtue of his high position, an absolute power of pardoning criminals; and three years ago the late monarch peremptorily refused to sign any more death-warrants—a course to which no serious objections were raised by his subjects.

The union of the three Crowns of Scandinavia, Sweden, Norway, and Denmark, or what is termed the Scandinavian Unity, was a passion with the late king. So early as 1857, when as Crown Prince he was on a visit to Copenhagen, he expressed his adhesion to "Scandinavian ideas" in the most open manner.

This political combination has actually been carried into effect on one or two occasions in past times: once at what is known as the Union of Calmar, under Queen Margaret, and again when the ruthless Christian of Denmark held the three realms in subjection during his reign of terror. But these unions have left only a strong feeling of abhorrence in the Swedish mind. With the late King of Denmark the King of Sweden maintained the closest friendship, and when the succession to that kingdom was finally settled, by the selection of Prince Christian of Augustenburg, the extreme politicians of Denmark would willingly have rejected him for the then Crown Prince of Sweden.

During the war between Germany and Denmark on the Schleswig-Holstein question both Swedish King and people strongly sympathised with the Danes, but prudence forbade any active intervention on their behalf; and a proclamation was issued declaring Sweden to be neutral in the dispute.

Handsome, amiable, and generous, King Charles XV. enjoyed a considerable share of personal popularity. Apparently gifted with a strong constitution, he loved the most fatiguing of out-door sports, and every sort of active exercise, whether hunting, shooting, fishing, or dancing. He possessed considerable literary powers, both as a poet and a prose writer. His poems, of which two volumes have been published at Stockholm under the initials "C. F.," possess great merit. The longer poems are founded on themes drawn from early Swedish history, and display an intimate knowledge of the mythology of the Eddas. They strongly resemble the well-known "Frithiofssaga" of Tegnér, of which a translation by Capt. Spalding has lately been published.

Those who may be curious to know more of the poetical productions of the royal poet will find an interesting analysis of his poems, illustrated by some charming translations of many in different styles, in the *Cornhill Magazine* for January, 1870. The late king also wrote some essays on military subjects, which were well esteemed by the profession, and he was a frequent contributor to the Swedish newspapers. It will be remembered that some articles attributed to his pen, and signed C., not long since gave great umbrage to the German authorities by their inimical tone regarding the newly consolidated empire. Not contented with the pen, Charles XV. wielded the brush, and is said to have been above mediocrity as a delineator of the wild landscapes of his native country. He was married on the 19th of June, 1850, to the Princess Louise of Orange, who died about a year and a half since. By this alliance he had an only daughter, now Crown Princess of Denmark; but, as by the laws of Sweden women are excluded from the succession to the throne, the late King is succeeded by his second surviving brother, Prince Oscar, Duke of East Gothland.

The death of the King of Sweden, though somewhat sudden at last, was not altogether unexpected. His extreme ill-health had induced his doctors to send him to Aix-la-Chapelle, in hopes of procuring some amendment; but, as no improvement resulted from the thermal treatment, the King decided on returning home. His extreme weakness compelled him to stop at Malmoe, where he died on the 18th of September.

The Late Earl of Mayo.

(See page 16.)

On Monday, the 12th of February, 1872, intelligence was received in England that Lord Mayo, the Viceroy of India, had fallen under the knife of an assassin—the first Viceroy who has ever met with a similar fate. Lord Mayo was cut off in the discharge of his duty as undeniably as any soldier who has fallen in the battle field. He was paying a visit of inspection to the penal settlement of Port Blair, in the Andaman Islands, which had been reported to the Government as being in a most unsatisfactory condition. The Viceroy had, according to his wont, determined to make a personal inspection of the settlement, and to judge for himself of the reforms that might be requisite. He had finished his tour of the various establishments in the settlement, and was within a few yards of the boat intended to convey him to his frigate, when a convict rushed at and stabbed him twice in the back, the wounds proving fatal in a few hours.

The Earl of Mayo, thus cut off in the prime of life, was a man well known in politics and in Parliament. He was born in Dublin on the 21st of February, 1822, and had therefore at the time of his death attained his fiftieth birthday. He was the eldest of the seven sons of Robert Bourke, fifth Earl of Mayo (for some years one of the representative peers for Ireland), and of Ann Charlotte, only child of the late Hon. John Jocelyn, and granddaughter of Robert, first Earl of Roden. He was educated at Trinity College, Dublin, where he took his degrees of B.A. in 1844, M.A. in 1851, and LL.D. in 1852. He married, in 1848, the Hon. Blanche Julia Wyndham, fourth daughter of George first Lord Leconfield, by whom he has left a family of two daughters and four sons, all under age. He is succeeded in his titles and estates by his eldest son, Dermot Robert Wyndham, Lord Naas, a cornet in the 10th Hussars, who was born in July, 1851.

The Bourkes of county Kildare, whom Lord Mayo represented, have been connected by the ties of family and property with that county ever since the "troubles" of 1641, when their ancestor, John Bourke, settled in Kill, county Kildare. The late Earl succeeded his father in the earldom in 1867, and it was therefore not as Earl of Mayo, but as Lord Naas, that he was best known in our political history. Lord Naas began his public life by the publication of a volume of foreign travels, "Impressions of St. Petersburg and Moscow in 1845," and made his first appearance in the political arena in 1847 as one of the Conservative candidates for the county of Kildare, in which a large portion of the estates of the Bourkes is situated. He was returned by a considerable majority, and made his first appearance in Parliament as the Hon. Richard Southwell Bourke. In 1849 he became Lord Naas, on his father's succession to the earldom of Mayo, and began gradually to take an active part in the discussion of Irish affairs, so that Lord Derby made him Chief Secretary for Ireland in 1852, again in 1858, and for a third time in 1866. Lord Mayo was a popular and influential member of the Lower House, and he had shown considerable capacity for public business in his administration of Irish affairs. But his nomination by Mr. Disraeli to the important post of Viceroy of India came as a surprise upon the world, and the appointment was much discussed at the time. Mr. Disraeli, however, publicly declared that Lord Mayo had been appointed Viceroy for his sagacity, judgment, fine temper, and knowledge of men; and added, "I believe he will earn a reputation which his country will honour. He has before him a career which I believe will in the end equal that of any of the Governors-General who have preceded him."

All accounts agree in testifying to the ample justification Lord Mayo gave of the almost prophetic truth of this opinion; and the published testimony of Indian officials who have served under the late Viceroy dwells specially on his peculiar power of reading the character of those with whom he came into contact, and the utility of this knowledge of character in enabling him to deal with the native princes, from whom he won for his position as the Queen's representative in India a reverence and respect *hitherto* entirely unsurpassed.

The Duke of Argyll, Secretary of State for India, in the course of the remarks with which he communicated the distressing intelligence of Lord *Mayo's* death to the House of Lords, took occasion to say that in the opinion of Her Majesty's present Ministers the conduct of Lord Mayo in his high office amply justified the choice of their predecessors.

The epoch of Lord Mayo's rule in India was not so momentous nor so full of warlike events as that of some previous administrations. The time of conquest was over; the turn of material improvement and social progress had come. Lord Mayo saw his opportunity, and seized it. His first work on his arrival in India was the establishment of amicable relations with the ruler of Cabul, and it has been remarked that his power of winning over a rude chieftain was never more strikingly shown than on the occasion of his meeting the Ameer Shere Ali of Cabul at the great Umballa durbar of 1869. Since that meeting irritating recollections have been effaced, confidence and goodwill have succeeded to suspicion and distrust on the part of the ruler of Cabul. His dealings with the native princes have been, during the too brief space of his rule, entirely unexceptionable; he has received them in becoming state, at some of the most imposing durbars ever seen in India, with a display of the power and pageantry of the British Empire eminently calculated to fascinate and attract those semi-barbaric Oriental races; whilst his dignified presence and stately courtesy of manner made him appear the fitting impersonation of the distant and mysterious royalty he personified. Lord Mayo's administration was further distinguished by large schemes of internal communication by means of railways, by the institution of a new department of State for the development of agriculture and commerce, by searching and thorough inquiries into the radical defects of the system of public works, and by the diffusion of education on sound principles. It has been remarked by eye-witnesses that no one in a similar space of time has ever seen so much of India and of the actual work of his subordinates as Lord Mayo, save perhaps Lord Lawrence. His physical activity and personal energies were amazing, and he was as prompt in the despatch of current business at the desk as he was vigorous in the saddle, and ever ready for long journeys by rail or carriage over arid and interminable plains. His endurance as a horseman became proverbial, and on one of his journeys across the Punjab, when returning from a visit, he cantered sixty miles before breakfast—the Indian day, be it remembered, beginning before the dawn.

In social life Lord Mayo was most successful: his natural kindliness, his thorough untrained courtesy, his generous temper, and his geniality of manner, made him beloved by all who knew him; and, as the Duke of Argyll justly observed in the House of Lords, "no man ever had more friends than he, and no man ever deserved better to have them."

By Lord Mayo's untimely death the country lost a statesman who discharged the highest duties which the Queen can entrust to any of her subjects with entire self-devotion, and abilities equal to the task. Nor was it easy to find a statesman endowed with his practical sagacity, excellent sense, and untiring activity to carry on the works of reform and pacification he had so successfully inaugurated in India.

When the Viceroy left Calcutta on his trip to Burmah and the Andamans he was accompanied by Lady Mayo, the Marquis and Marchioness of Drogheda, Major and the Hon. Mrs. Burne, Miss Norman, Miss Milman, and Capt. de Robeck (aide-de-camp). The funeral procession took place at Calcutta on the 17th of February, and was most imposing. The mortal remains of the late Viceroy were landed from the steamer Daphne, and conveyed to Government House on a gun carriage, the Calcutta Volunteers, to the number of 500, forming the escort, and preceding the procession. After the body came the chief mourners, followed by the personal staff of the Viceroy, the Acting Viceroy, and members of the civil and military services, deputations from all public bodies, and an immense number of the general community, all on foot. Troops lined the road, and there was an immense concourse of spectators.

The following message was sent from the India Office for publication:

"The Secretary of State to the Acting Governor-General.

"The Queen has been deeply affected by the intelligence of the deplorable calamity which has so suddenly deprived all classes of her subjects in India of the able, vigilant, and impartial rule of one who so faithfully represented her as Viceroy of her Eastern Empire.

"Her Majesty feels that she has indeed lost a devoted servant and a loyal subject, in whom she reposed the fullest confidence.

"To Lady Mayo the loss must be irreparable, and the Queen heartily sympathises with her under this terrible blow."

Lord Northbrook, Viceroy of India.

(See page 17.)

The Right Hon. Thomas George Baring, second Lord Northbrook, who was appointed to the exalted and onerous post of Viceroy of India in place of the lamented Lord Mayo, is the elder son of Francis, first Lord Northbrook, better known by his original name of Sir Francis Baring, and of a daughter of the late Sir George Grey. The new Viceroy was born in 1826, and educated at Christ Church, Oxford, where he obtained a second class in the school of Literæ Humaniores in 1846. His official training may almost be said to have commenced with his earliest years, for before he left the nursery his father held office in the Ministry of the day, and thence advanced step by step until he became Chancellor of the Exchequer, and subsequently First Lord of the Admiralty. As soon as Mr. Baring arrived at manhood he openly entered official life as Private Secretary to Mr. Labouchere at the Board of Trade, and afterwards fulfilled the same duties for Sir George Grey at the Home Office, and for Sir Charles Wood at the India Board and the Admiralty. It is evident that the number and variety of working subordinate posts Lord Northbrook has undertaken must have endowed him with a sound practical acquaintance with the machinery of Government, likely to stand him in good stead in the great task he has before him. As an administrator he enjoys the highest reputation in official circles as one who acquits himself with distinction in all that he undertakes, and he will now have scope for the exercise of his solid abilities and large experience in the government of our immense Indian possessions. In 1857 Lord Northbrook entered the House of Commons as member for Falmouth, and from that time to the present period has filled different Parliamentary offices whenever the Liberal party was in power. He has been a Junior Lord of the Admiralty, Under-Secretary for the Home Department, Secretary to the Admiralty, and Under-Secretary to the War Department. In the last-mentioned capacity he greatly distinguished himself last year by the speech in which he introduced the Army Regulation Bill into the House of Lords. The clearness, force, and admirable mastery of details evidenced in that cogent statement excited great admiration and almost astonishment at the display of unsuspected abilities on the part of Lord Northbrook, who had hitherto been credited rather with administrative than oratorical talent. Socially, as well as politically, Lord Northbrook inherits the talents of a family whose members have exhibited a large variety of

Digitized by Google

tastes, and who have been distinguished in whatever walk of life they have chosen to pursue; whilst he is a worthy specimen of a class of Englishmen who, with all the advantages of wealth and station, tempting them to spend life in luxurious ease, have deliberately preferred to "scorn delights and live laborious days."

The Late Bishop Patteson.

(See page 20.)

THE murder of Bishop Patteson by the natives of one of the islands of the Melanesian Archipelago last year, evoked a deep feeling of sorrow amongst the numerous friends who were aware of his entire self-devotion to his appointed task of bringing the heathen into the way of salvation. As the details of his life and work became more fully known, the regret for his untimely death assumed larger proportions; it came to be considered a national loss. As such it was mentioned in the Queen's speech, and as such is to be commemorated by various memorials worthy of their object. The late John Coleridge Patteson, Bishop of Melanesia, was the son of the late Sir John Patteson, one of the judges of the Court of Queen's Bench, and nephew of Sir John Taylor Coleridge. He was educated first at the old foundation school of Ottery St. Mary, and afterwards at Eton. It may be worth mentioning that at the last Montem but one, in the throng of boys and carriages Coleridge Patteson was entangled for a moment against the wheel of the royal carriage, and would have been drawn under it had not the Queen held out her hand to the lad, who grasped it and was saved by the ready aid. Mr. Patteson was entered at Balliol College, Oxford, but afterwards became a Fellow of Merton, and so continued until the end of his life. Professor Max Müller, who knew him there, describes him as "a hale, honest-looking, hard-working young fellow, always among the first, yet never envied; full of enthusiasm, yet never obtrusive; a man of strong convictions, of strict and even narrow views, yet never impatient, never overbearing, never uncharitable." Mr. Patteson seems to have grown up with an unvarying purpose of taking holy orders, ever since he had as a little child longed to say the Absolution "because it would make people so happy," and immediately after his ordination he obtained the curacy of Alphington, near Ottery St. Mary (belonging to his uncle, Sir John Taylor Coleridge), and near Fenton Court, where his father had established himself on his retirement from the Bench. Notwithstanding the agreeable situation of his curacy, its close proximity to his family and friends, Mr. Patteson was induced to take up the missionary life in 1854, when the Bishop of New Zealand made a visit to England. He freely offered himself to work under Bishop Selwyn, and his father, though an aged man, well knowing that there was little chance of their ever meeting on earth again, cheerfully gave up his firstborn to his Master's service, even enjoining on him not to allow himself to think that he was called on to come back to visit his father. Mr Patteson possessed an unusual aptitude for acquiring languages. In the letter from which we have already quoted, Professor Max Müller speaks of meeting him "at Dresden in 1853, revelling in the treasures of ancient Italian art, working hard at Hebrew, Arabic, and German, and delighting in all the best minds modern Europe could supply in literature, science, and art. I then thought I saw in him the future accomplished dean or bishop; but when I heard of him next, his letters were dated longitude and latitude from some unknown island in the Pacific Ocean." Yet, devoted as the young missionary was to his work in that new world—the laying the foundations of a Christian future among the races of the Melanesian Islands—he continued his linguistic and philological studies; and Professor Müller tells us that his library was kept well supplied with the best books on comparative philology, even having Sanscrit grammars sent out to him, because he felt that a knowledge of that language was essential to every true scholar. His remarkable power for acquiring tongues, together with a constitution capable of bearing great heat, and a genius for seamanship, marked him out in Bishop Selwyn's eyes as a chosen instrument for the evangelisation of the islands which at that time formed part of the enormous diocese of New Zealand. The heat of the climate in these islands being too great to permit the residence of most Europeans in them, Bishop Selwyn decided upon inviting to New Zealand and there training native lads, who might become a leaven as it were amongst their people; the best forming a native clergy, whilst the others would show a Christian life to their associates. The mission yacht, The Southern Cross, was built for this purpose, and in 1856 Mr Patteson accompanied the Bishop on a voyage in quest of scholars. The Melanesian islanders were in almost every case willing to entrust their sons to the Bishop's care; but the New Zealand climate is too cold for these natives of the tropics, and it was therefore necessary to carry them back to winter in their own homes, where they were landed, while the mission ship sailed further on. A great college, or more properly speaking farm, was founded in New Zealand for the instruction of these islanders, where, whilst learning Christianity, they were also taught the arts of civilisation, agriculture, the care of cattle, cooking, printing, and similar occupations. For fifteen years Mr Patteson spent his life amongst them; occupied in the summer in labouring with them, in teaching and Christianising them, and in the winter in carrying them home in the yacht, renewing old acquaintances, touching at new isles, and then coming back to the old ones to gather up old scholars and new. In 1861, after seven years' trial he was consecrated Missionary Bishop of Melanesia by Bishop Selwyn, who in his consecration sermon referred to the manner in which the aged Sir John Patteson gave his son to the missionary service in the following simple and pathetic terms: "We were all trained in the same place of education, visited in the same circle of friends. In boyhood, in youth, in manhood, we have shared the same sorrows and joys, and hopes and fears. I received this my son in the ministry of Christ Jesus from the hands of a father, of whose old age he was the comfort. He sent him forth without a murmur—nay, rather with joy and thankfulness—to these distant parts of the earth. He never asked to see him again, but gave him up without reserve." As a matter of fact, Sir John Patteson just lived to hear of his son's consecration, and died a very few weeks after, having perhaps derived more satisfaction from the work and the letters of his son than he might have received from his continued companionship.

Meanwhile Bishop Patteson was endeavouring to systematise the thousand and one dialects of the Melanesian Archipelago into one language, and then translating into it the Church Services and portions of the Bible. His whole heart was in this portion of his work, and he writes to Professor Max Müller, "You can easily understand what it is to feel God has given to me, and to me only of all Christian men, the power of speaking to this or that nation; and moreover this is *the* work he has sent me to do."

During the last four years of his life Bishop Patteson lived almost a hermit life in Norfolk Island, passing his days in work in the fields, teaching in the schools, and translating; surrounded by his small English staff of fellow-workers, and his family of converts and scholars. The even tenor of his life was varied only by his annual voyage to the Isles to collect fresh scholars and to break new ground.

Notwithstanding the treacherous and savage nature of the inhabitants of some of these South Sea Islands, the Bishop had never been exposed to any actual danger of his life. The habit of carrying no weapons when on his trips, and the knowledge of him and of his vessel which had spread throughout the Archipelago, had fully sufficed to protect him. Latterly, the desire of the colonists of Queensland and Fiji to obtain cheap labour had led to the equipment of vessels to kidnap the islanders, and a veritable slave trade had sprung up in these seas. The Bishop was cognisant of it, and of the degree in which these doings militated against the success of his work, and even against the security of his life. He had in his last voyage decided against touching at Santa Cruz, but thought himself quite safe at the little island of Nukapu, where he was well known. Accordingly, on Sept. 20, 1871, he entered the canoe, containing two chiefs known by name, to be carried across the reef encircling the island. He was never again seen alive; but his body was cast adrift in a canoe, and recovered by the men of The Southern Cross. Thus died the Bishop of Melanesia, in the discharge of his self-imposed duties—a noble example of self-sacrifice and calm courage. Not in vain do such men live and die. However opinions as to the value and necessity of missionary enterprise may differ, the spectacle of a life spent in the exercise of the highest Christian virtues and the noblest intellectual efforts must be a grand incentive to hundreds of ardent minds anxious to leave the world at least a little better than they found it.

Bishop Patteson has left the whole of his fortune, upwards of £12,000, to the mission work to which his life was devoted. He had always employed his income to the same purpose, and although he nominally drew £200 a year from the Missionary Fund, it is well known he contributed to that fund much more than he ever received from it.

The Late Dr. Norman Macleod.

(See page 21.)

To Englishmen the name of Dr. Norman Macleod is chiefly familiar as the editor of that excellent periodical *Good Words*, and the author of "The Starling," "The Old Lieutenant and his Son," "Reminiscences of a Highland Parish," and numerous other works.

To Scotchmen he was a much more important personage, as the chief ecclesiastic of the Church of Scotland, and in some respects the most conspicuous public man in the northern kingdom. A large-hearted, liberal man, he was ever ready to place the widest interpretation on the dogmas of his Church, and to soften as far as possible the somewhat narrow interpretations and stern ordinations of the Calvinistic theology. It is asserted by authorities entitled to credit that he was greatly instrumental in liberalising the Church of Scotland by the force of his charity and of his intelligence. One such occasion was his display of antagonism to the traditional and excessive Sabbatarianism of his country. He contended that the Christian Sabbath ought not to be treated as was the Judaic Sabbath, and hedged in with a fence of sternly defined obligations and prohibitions. The Presbytery were horrified when Dr. Macleod, in the most pointed language, denounced the hypocrisy of the so-called professors of religion who insisted on the working man, after having been six days at work, "kennelling up" in his small house on the seventh day, instead of going for a healthful and harmless walk after church hours. The working man caught up this expression, and dubbed the brave champion of their social freedom "Kennel-up," a familiar nickname he bore for long afterwards. Dr. Macleod, however, lived to have the satisfaction of seeing a change come over the habits and opinions of Glasgow in this respect. It is no longer considered a sin in that city to take a walk on Sunday; thousands of the Glaswegians now resort to the Southside Park, the recreation ground of Glasgow, and amongst them the experienced eye may detect many an elder of the old school, who has allowed himself to be won over to the side of more modern ideas. That the Church of Scotland did not disapprove of Dr. Macleod's liberalism in

Digitized by Google

this and other matters of church discipline, may be inferred from the fact that he was elected Moderator of the General Assembly in 1869, on which occasion he delivered one of his most successful orations. For some years past he has taken a leading part in the movement for abolition of patronage in the Church of Scotland—a movement of which the ultimate effect will, it is believed, be probably to reunite the various Presbyterian bodies into one broad and comprehensive church.

As a pulpit orator Dr. Macleod was deservedly famous. Though many preachers possessed more learning, more eloquence, more perfection of style and matter, no one had an equal power of riveting the attention of a mixed congregation, from the force of his sympathy with his audience, and from his earnestness. Of late years his church in Glasgow—the Barony Church—came to be as well known as St. Mungo's Cathedral, and few visitors to the North spent a Sunday in Glasgow without hearing the eloquent words which were poured forth from its pulpit.

In her "Journal of our Life in the Highlands," Her Majesty thus refers to the occasion on which she first heard the minister of the Barony Church. The date is October, 1854. "We went to kirk, as usual, at twelve o'clock. The service was performed by the Rev. Norman Macleod, of Glasgow, son of Dr. Macleod, and anything finer I never heard. The sermon, entirely extempore, was quite admirable, so simple and so eloquent, and so beautifully argued and put. The text was from the account of the coming of Nicodemus to Christ by night (St. John, chap. 3). Mr. Macleod showed in the sermon how we all lived to please self and live for that, and in so doing found no rest; Christ had come not only to die for us, but to show how we were to live. The second prayer was very touching; his allusions to us were so simple, saying after his mention of us, 'Bless their children.' It gave me a lump in my throat, as also when he prayed for the 'dying, the wounded, the widows, and the orphans.' Every one came back delighted, and how satisfactory it is to come back from church with such feelings! The servants and the Highlanders were all quite delighted." This sermon was published by royal command; and, in connection with Dr. Macleod's pulpit ministrations, it may be interesting to note that the last sermon which he preached was in Crathie Church before the Queen on the 29th of last May.

Dr. Macleod did an immense amount of literary work in his lifetime of all kinds—stories, sketches, books of travel, sermons, poetry. We have already mentioned the best known of his works, but he has written much that has never been republished in a collected form, though probably that will soon be done. His sketches and stories are full of genial humour, combined with a force and shrewdness characteristic of his nationalty. "The Starling" and "Wee Davie" are perhaps the best of his stories, and in the first-named of these will be found a remarkably fine martial song, which the Sergeant, one of the characters, sings to his old companion in arms.

Dr. Macleod was born at Campbeltown, in Argyleshire, 1812. His early youth was spent in his father's manse of Morven, a wild Highland parish, which he has described with much felicity in his "Reminiscences of a Highland Parish." He afterwards went through the Art Curriculum at Glasgow University, and, having studied for awhile in Germany, prepared himself for the ministry at the University of Edinburgh, where he attracted the attention of Dr. Chalmers, then Professor of Divinity. He made his first mark in public on the occasion of the banquet given in honour of Sir Robert Peel on his election as Lord Rector of the University of Edinburgh in 1836. Mr. Macleod was selected to be the spokesman for his fellow students, and gave indications of that excellence in social oratory which distinguished him in after life. Having taken orders, he became minister of the parish of Loudoun, in Ayrshire, in 1838, whence, in 1846, he was translated to Dalkeith. There he remained for eight years, when his recognised energy and faculty of leadership pointed him out as fitted for a more important charge. He became minister of the Barony parish in Glasgow, of which the congregation originally worshipped in the crypt of the Cathedral, as described in "Rob Roy," and in later times in the large church in the neighbourhood. Here the remainder of his life was passed, labouring arduously in establishing schools and erecting churches for the accommodation of his immense parish. A writer in the *Daily News* tells a humorous story connected Dr. Macleod's removal to Glasgow. In visiting his Dalkeith parishioners to say farewell, he called on one of those sharp-tongued old ladies whose privileged gibes have added so much to the treasury of Scottish humour. To her he expressed his sorrow at leaving his Dalkeith friends, but stated that he considered his invitation to Glasgow "in the light of a call from the Lord." "Aye, aye," was the sharp response; but if the Lord hadna happened to call you to a better steepend, it might hae been lang gin ye had heard him."

In connection with the affairs of the Scottish Church, Dr. Macleod visited Canada in 1850, and India in 1869, and recorded his experiences of India and Indians in a series of papers, entitled "Peeps at the Far East," originally published in *Good Words*, and since republished in a collected form.

It was this journey to India which gave the first shock to his great natural strength, but he still maintained with undaunted spirit his incessant labours. In the last General Assembly he delivered what seemed, to those who heard it, the finest of all his speeches. It was upon the occasion, forced upon him by the imperative directions of his physician, of giving up the charge of those Indian missions in which he had taken so deep an interest. The effort was too much for him, and brought on the affection under which, retaining his faculties and composure to the last, he sank on June 16th, surrounded by his family. Notwithstanding Dr. Macleod's large amount of church and parish duties, he undertook much literary occupation. He edited, from 1850 to 1860, the *Edinburgh Christian Magazine*, a popular Scottish religious periodical, and then undertook the management of *Good Words*. How ably he fulfilled the latter task is a matter of public notoriety. The remains of the lamented minister were interred on the 20th of February at Campsie, near Glasgow. All classes of the community joined in paying a last mark of respect to his memory. The procession comprised clergymen belonging to all the Presbyterian churches, who thus recognised Dr. Macleod's catholicity of spirit, and his manifold services to his church and country.

Her Majesty and H.R.H. the Prince of Wales were represented by Dr. Robertson from Balmoral, and H.R.H. the Duke of Edinburgh by the Hon. Eliot Yorke. At the grave at Campsie Churchyard Dr. Robertson, by command of the Queen and royal family, placed on the coffin three wreaths of immortelles. The first from Her Majesty, bore the inscription, "A token of respect and friendship from Queen Victoria;" the second, "A token of respect from Prince Leopold;" and the third, "A token of respect from Princess Beatrice." Her Majesty also addressed to Mrs. Macleod an autograph letter of condolence, couched in characteristic terms of true womanly sympathy and kindness. She had during Dr. Macleod's life marked her sense of his worth, by appointing him one of her chaplains for Scotland, dean of the Chapel Royal of Holyrood, and dean of the Order of the Thistle.

The Late Mr. Charles Lever.

(See page 24.)

SINCE the universally regretted deaths of the two great English masters of fiction—Dickens and Thackeray—the reading world has sustained no loss of equal moment until startled by the tidings of Mr. Lever's sudden death, in August, 1872. Novel readers of some years ago well remember that the numbers containing the adventures of Charles O'Malley and Harry Lorrequer held their own well, and were anxiously looked for, even when the green and yellow garbed numbers of Dickens and Thackeray were the delight of thousands. Nor are the reasons far to seek; the earlier works of Charles Lever had the charms of absolute novelty, originality, and inexhaustible vivacity. The reader was in a constant state of expectation as to the next escapade, amatory or belligerent, which would befall the hero, and, however impossible or astonishing, he always believed it, and looked for more next month. To this quality of "unexpectedness" was superadded the most rollicking fun, wrought up in the drollest episodes. There is a description in his books of an improvised dance in an ironmonger's warehouse, the shelves and pegs holding the goods being hidden by green baize curtains. To this day we never can resist a hearty laugh when we remember the *dénouement* of this entertainment—how the curtains gave way under undue pressure, and the saucepans and fryingpans made their unwelcome appearance in *heavy* showers on the visitors. This is only one amongst scores of comic incidents in Lever's Irish stories, so characteristic of the lively, and, if we may so term it, makeshift character of the nation he describes in his pages. As Lever grew older, and gained knowledge of various phases of Continental and diplomatic life, his works reflected his kaleidoscopic stores of information. Foreign princes, ambassadors, wily priests, fine ladies, took the place of his dashing dragoons, country attorneys, charming Irish girls, and Spanish donnas—but they were presented with the same vividness and movement. Another striking characteristic of Lever's novels is their perfect wholesomeness of thought and expression. There is love-making in abundance—in fact, the heroes are impressible to the last degree; but it is good-natured, healthy love-making, such as we like to see. We get no morbid anatomy of the passions; none of the unhealthy, forbidden love which pervades too much of our modern literature, and makes it about the most insidious poison we can infuse into the mental constitution. Lever's heroines, too, are frequently distinguished by a singular air of refinement, high-bred and elegant; they impress us as incapable of an unworthy thought, and are admirable types of the best order of women. As instances of our meaning we would adduce the ladies in the "Knight of Gwynne" and the charming Kate in his last excellent novel, "Lord Kilgobbin." The publication of this last work serves to heighten our sorrow for the loss of the pleasant *racconteur*, so full is it of the fruits of large worldly experience, and so brightly and so interestingly are they placed before us. Still, notwithstanding the keen humour, the abounding fun of the book, the dedication seems to show that the author but too truly estimated his own chances of prolonged life. This touching dedication is consecrated to the memory of his wife, whose loss he had lately to mourn. Its profound pathos and melancholy fulfilment induce us to reproduce it. It runs thus:

"To the memory of one whose companionship made the happiness of a long life, and whose loss has left me helpless, I dedicate these volumes, written in breaking health and broken spirits. The task that was once my joy and pride I have lived to find associated with my sorrow. It is not then without a cause I say I hope this effort may be my last."

His melancholy wish was fulfilled; scarcely had the critics hailed his last work with unanimous approval, and commented with regret on the unhappy state of mind revealed by the lines above quoted, before news arrived of the author's sudden death at his consulate, Trieste.

In recent years Mr. Lever had almost made for himself a new reputation as a political essayist by his lively criticisms on men and things, published in *Blackwood's Magazine* under the pseudonym of Cornelius O'Dowd. His strictures, if not very profound, were always telling and sensible, and

Digitized by Google

showed the easy manner and clear insight we might have expected from his knowledge of many aspects of society and the political world. Their seriousness was always enlivened, *more suo*, by the drollest stories and the brightest flashes of wit. Of course the peculiar nature of Lever's talents and his inexhaustible store of anecdote made him distinguished as a brilliant talker and a relater of witty stories.

About 1845 he obtained a diplomatic post at Florence, where he was the delight of the Anglo-Florentine Society of those days, remaining there until the late Lord Derby gave him the vice-consulship of Spezzia, with the characteristic words, "Here is £800 a year for doing nothing, and you, Lever, are the very man to do it." Lever's "doing nothing" might have been true in the official sense, but he did much in his own way by continuing to write those tales and sketches which have amused and delighted thousands of readers, From Spezzia he was transferred to Trieste, where he died, leaving a hiatus in the literary world that does not at present seem very likely to be filled up. Mr. Lever's illness, though sudden in its termination, was of some duration, and, although strong hopes were entertained of his recovery, he himself was despondent. In a letter to a friend, published since his death, he wrote a few weeks prior to the event: "I cannot yet say that I am round the corner, and, to tell truth, I have so little desire of life, that my own lassitude and low spirits go a good way in bearing me down." Thus it appears that the sadness indicated in the preface to "Lord Kilgobbin" was no temporary depression of spirits, but a chronic condition, due to mixed physical and mental causes.

Mr. Lever's works may be roughly divided into groups—the military, such as "Harry Lorrequer," "Charles O'Malley," and "Tom Burke"; the Irish, such as "The Knight of Gwynne," "The O'Donoghue"; the comic, as "Con Cregan," "Arthur O'Leary," the "Daltons," &c.; and the semi-political, as "Sir Brook Fosbrooke" and "Lord Kilgobbin." They are by no means equal in merit, ranging from the excellence of "Charles O'Malley" and "Lord Kilgobbin" to the extravagance and carelessness of "A Day's Ride" and "That Boy of Norcott's"; but, as a whole, they constitute a body of bright and amusing reading, equally acceptable to man or woman, boy or girl, the busy man of the world or the unoccupied lounger. If Mr. Lever's lamented death should, as is often the case, lead to a re-perusal of his books, London dinner tables will be inundated with stories from his *Dowdiana*, for they contain a store of good things suitable to the professed diner-out, only second to that other mine—the Memoirs of Thomas Moore.

Mr. Horace Mayhew.

(See page 25.)

THE death of Mr. Horace Mayhew recalls to our memories the brilliant host who founded that witty and delightful contemporary which, since 1842, has weekly charmed thousands of homes by its pictorial teachings and its verbal comments of mingled fact and fancy. When we think of the talents which have been employed to fill that now historic sheet, what names and memories crowd upon us—Gilbert à Becket, with his keen sense of the ludicrous element underlying the pompous recitals of History and the formal proceedings of Law; Douglas Jerrold, with his razor-like wit and his wide sympathies for suffering humanity; the half-laughing, half-crying philosopher Thackeray; and the world-wise yet genial Mark Lemon. Following in the procession of shadows comes one, as great in his wonderful insight into the weaknesses of our human nature, in his exquisite perception of all sweetness and beauty, and in his unrivalled power of depicting all he saw, felt, or imagined—John Leech. Even the original publishers of *Punch* are gone to the Silent Land; and of all the projectors and contributors to that journal at its foundation only one—Mr. Percival Leigh—now remains to us. Truly may it be said, *Sic transit gloria mundi*, for are not such men as we have named amongst the very salt of the earth? The late Mr. Horace Mayhew became a member of the permanent staff of *Punch* in 1842, soon after its commencement, and contributed a host of graphic sketches and sparkling witticisms to its pages, under the editorial reigns of both Mr. Mark Lemon and Mr. Shirley Brooks. Of these perhaps the most important were "Model Men and Model Women," which became more generally associated with his name than many others of his productions, from having been published in a separate form. He continued to contribute to *Punch* up to the time of his death, although he had given up literature as a profession, in order to enjoy the pleasures placed within his reach by affluence and leisure. Besides his contributions to *Punch*, Mr. Mayhew had done a fair amount of journalistic and magazine work, and, in conjunction with his brothers Augustus and Henry Mayhew, he had written "When to Marry, and How to Get Married," and 'The Greatest Plague of Life." The last-mentioned work will perhaps be revived in the memories of many who have laughed over its comic miseries and its droll truth by the late servants' strike in "Marmalade Town." Indeed, both these books are replete with fun and keen observation, though the constantly rising tide of contemporary literature has swept them into oblivion.

Mr. Mayhew was the son of a well-known solicitor, to whom he was originally articled; but he speedily abandoned a profession which was distasteful to him, in order to devote himself to literature, after travelling for a while in France and Germany. Mr. Mayhew's handsome face, striking figure, and brilliant wit made him a welcome guest in many circles. His social endowments were considerable, and his friends credit him with unbounded sympathy with the suffering and charity to all who needed his help. Faults he unquestionably had; but, in the face of his good qualities, we can do no better than follow the example of those who knew him best. They adopted the poet's excellent advice (somewhat altered) "of being to his virtues very kind, and to his faults a little blind," in the case of Mr. Mayhew. His death was sudden; he expired at his house in Kensington on the 29th of April, 1872, after a seizure which lasted little more than twenty-four hours, deeply regretted by a wide circle of friends.

Mademoiselle Kellogg.

(See page 28.)

MLLE. CLARA LOUISE KELLOGG, a Transatlantic singer, has been fairly upholding the claims of the New World as a producer of fresh and young talent. She originally made her *début* at Her Majesty's Theatre in 1867, and gave promise of future excellence, though, from the fact of her having at that time received only an American training, her vocal method was far from perfect. Since then she has studied in Italy, and has sung in the principal capitals of the Continent with much approbation. She had not been heard in this country since 1868 until this season, when she reappeared at Her Majesty's Theatre, Drury Lane, on Saturday, May 11, as the heroine in "Linda di Chamounix." This opera affords many opportunities for brilliant vocal display and contrast of feeling, consequently the *rôle* of the heroine has always continued to find favour with soprani from the time of its production at Vienna in 1843 with Madame Persiani in the principal part. Mlle. Kellogg soon showed in the course of her performance that she had returned to this country with a voice as fresh and sympathetic as ever, but with increased vocal means and more finished dramatic power. She has since appeared in "Lucia di Lammermoor" with marked success. As Gilda, the third part she has thus far essayed in London, Mlle. Kellogg evinced both feeling and power, and presented to her audience an uniformly good performance, both from a vocal and dramatic point of view. Her advantages of personal appearance are very telling in the impersonations in which she has hitherto ventured, and, united with her innate dramatic instinct and flexible voice, will assure her a good position among operatic singers. Mlle. Kellogg was born in South Carolina, U.S., in 1842, but is of New England parentage. She received her education in Connecticut, and is at the present day the most popular singer in America. She has been engaged to sing with Mme. Pauline Lucca at the Academy of Music, New York, for the present year.

Mademoiselle Albani.

(See page 29.)

MADEMOISELLE ALBANI, the last risen star in the operatic firmament, is a Canadian by birth, and is known on the other side of the Atlantic as Mademoiselle La Jeunesse. She was educated at the Convent of the Sacre Cœur at Montreal, where the beauty of her voice and performances during mass attracted such crowds that at last she left the city and went to Albany, where she proved equally as attractive at the great Roman Catholic Cathedral of St. Joseph. Her parents then resolved to send her to Europe, where she studied in Paris under Duprez, who sent her on to the old maestro Lamberti, at Milan. He entertained a good opinion of her talents, and prophesied her future success to her friends. She made her *début* at Messina in 1870, greatly pleased her audience in the "Sonnambula," and at the conclusion of the first act she was engaged for Malta by the *impresario* of that island—a Government official who happened to be present. At Malta she created a very favourable impression on her audiences. During the last winter she had been singing at La Pergola, in Florence, and the Italian press had been loud in their praises, especially eulogising her rendering of the title *rôle* in Ambroise Thomas's "Mignon." She made her *début* at our Royal Italian Opera in the spring, choosing the character of Amina in "La Sonnambula" for her first appearance, and according to the usual custom of light sopranos since Mme. Patti made her first impression on an English audience in that *rôle*. The indications of talent and cultivation exhibited by Mlle. Albani on this occasion secured her a favourable reception, and her subsequent assumptions of other characters have confirmed the favourable impressions produced by her first appearance. She has since sung the parts of Lucia, Gilda, Marta, and Linda, all with the same fair measure of success. She has a fine voice, more particularly in the upper registers, which possess a peculiar and individual charm, notably in the softer passages. She is as yet not a perfect vocalist, but what she essays she generally accomplishes well. Her style is commendably unaffected and full of feeling, utterly free from trick or exaggeration. Her best quality—accent, as shown in her recitatives—bears evidence to the good training of her first master, M. Duprez. Her acting, like her singing, is fresh and sympathetic, and she has created equally favourable impressions in the light comedy of Marta as by her impersonations of the love-crazed Lucia and Linda, and the hapless Gilda. Altogether Mlle. Albani may be pronounced an aspirant of no common promise to the highest places of her profession, and it seems only to rest with herself to attain the first rank as light soprano. The industry and care which she has displayed in the study of the parts she has presented to us this year, give the fairest assurances that she possesses those qualities of perseverance and laudable ambition which will induce her to worthily continue the career she has so well commenced.

The Lady's Work Table.

Introduction.

Paper work of all descriptions has during the past year taken a prominent part in what is termed "fancy work." The plaiting of paper rosettes for church decorations, for Oxford frames to contain illuminations, cartes de visite, &c., &c., for flower pot covers, and for boxes of all sorts have been busily, and in many instances ingeniously, pursued. The foundation on which the rosettes are mounted is millboard, covered with either coloured kid, velvet, or paper, and the rosettes themselves may be made of either gold or silver paper, or cream colour in imitation of ivory, or brown of various shades to represent wood. Some of the rosettes—more especially the corner ones—look well fastened down to the frame with the small gilt studs, the kind generally used for attaching several slips or sheets of paper together. Paper rosette work is made on a large scale; for church decorative purposes, and so far as space allows, we have given a few suggestive designs for this popular work.

The year 1872 closed with quite a novelty in fancy work, the idea coming from far distant and mysterious Japan, and published in a practical form by an English lady, who writes under the *nom de guerre* of "Japonica." It is called Japanese work, and is made with twisted tissue paper which looks at a distance more like cotton than anything else. The tightly rolled strands are interlaced into patterns, which have the effect of the old German knotted work, so useful when made of twine for covering boy's satchels and sportsmen's bags. The Japanese work is produced in colours as well as white, and, marvellous to state, although paper is the only material used, it can be washed without thickening or losing any of its beauty. For screens or dress trimmings, for covering bags or cushions for making up into small baskets and various ornamental trifles, for either boudoir or drawing room it can be applied with advantage, and Japanese work at no distant period is likely to attain a great popularity.

In Lace Work there have been several novelties. To make lace on a pillow instead of on traced kid, to produce the real thing, is now the ambition of the best workers, and these include many ladies of the highest rank in this country. It requires extreme nicety of manipulation and much patient labour, but very exquisite results are often attained by amateurs. The Louis Quinze lace is the last novelty in what is known as modern point. It is not difficult to produce, as the raised rounds and picots are all sold ready made. We give a coloured specimen of the work, which is so beautifully printed that it is brought as clearly before our readers as though it were the lace itself.

Ticking work is much done, and when completed is extensively used for the decoration of country houses, more especially in France. Fancy workers are no longer limited to the old fashioned blue and white bed tick, and herring bone and feather stitches for this work, but novel ticking is manufactured for the purpose. The patterns are usually stripes; bright orange or red stripes on a white ground, blue and purple stripes on a stone coloured ground. And the design is not confined to the fancy stitches alluded to, but is braided, and the braid is barred across and further embellished with point russe, produced with various bright coloured purse silks.

Guipure d'Art is now rendered more effective, and less uniform by cutting away sections of the netted foundation, and overcasting the edges thus cut with button-hole stitches. A specimen of this novel mode will be found among our work-table illustrations. The hair-pin crochet (also included) is a revival of an old style of work; but as it is now produced with the fashionable *ecru* thread, and a small ivory instrument is made for the purpose, it reappears as a novelty. Mignardise braid and tape braid are now much intermixed with crochet and tatting, and made to form in intricate and cunning patterns, tasteful antimacassars, toilet mats, and dessert d'oyleys. In remunerative employments ladies are now turning their attention to painting, encaustic tiles, and fans.

Description of Coloured Plates.

The Louis Quinze Lace.

Designed by Mesdames le Boutillier, 125, Oxford-street, W.
(See Frontispiece.)

This is the latest introduction in modern point lace, and was first brought out in Paris, where it is extensively used for church and house decoration. It is easily and quickly produced as the small raised eyelets and the picots at the edge, all of which are shown by embossing on our coloured design, can be bought ready made. The pattern is traced on coloured kid, and the braid, which is linen, is tacked over the lines in the usual manner. Full particulars of the Louis Quinze lace can be procured from Mesdames le Boutillier, 125, Oxford-street, London, who supplied the design.

Afghan Quilts in Tricot.

Designed by Mr. Bedford, 186, Regent-street, W.

No. 1.—Two designs for Afghan quilts or couvrepieds are given to be worked in crochet tricoté, with single Berlin wool, and a rather fine tricot needle. The broad black stripe in No. 1 is 29 stitches wide, and is to be worked in the usual plain tricot stitch, which is so well known as not to require description. When sufficiently long, a row of DC. in scarlet is crocheted along both the sides and ends. For the scarlet border, make a Ch. of 40 stitches (which includes the stripe at the side), and work 12 rows for the depth of the border at the end; in the next row raise only 11 stitches, and continue working these backwards and forwards till the stripe corresponds in length with the black one; then the number of stitches must be again increased to 40, and 12 rows worked to form the border at the other end. A row of DC. in black, goes along the inner and outer sides of this border, which is to be afterwards joined to the black stripe, by lacing them as it were together on the wrong side with black wool by the DC. rows at the edge of each, taking up the back of a stitch, first on one side then on the other, missing a stitch between. All the black stripes are divided by scarlet ones, on which the fret given in the design is worked in cross stitch, according to the pattern, in bright yellow and black filoselle, each cross stitch covering one stitch of the tricot. The black stripe is embroidered in the same manner: the rosebud in three shades of pink, two shades of bright green, the stalk brown, and the scroll around it in three shades of gold colour. The fringe is composed of double wool more than a quarter of a yard in length, which is folded in half and looped into alternate stitches of the DC. row, there being 4 red and 4 black consecutively; the strands are then divided two and two, and knotted to each other in the manner shown in the illustration; and after 3 rows the whole of the 16 thread are knotted in one to form the head of the tassel.

No. 2.—The whole ground of No. 3 is black, but the wider and narrower stripes are defined in the original by a double row of raised loops, which give it great richness. Owing, however, to the opaque nature of the colour they do not appear at all in the illustration. For the corner of the couvrepied which is given, make 30 Ch., raise the same number of stitches, and work back a plain row.—2nd row. After taking up all the stitches, work off the 1st, make 4 Ch., work off 2 more loops, the first with the loop remaining on the needle after the Ch., 4 Ch. again, and repeat in this manner through the whole row.—3rd row. Raise stitches in all the upright loops, taking care not to miss those immediately after the loops of 4 Ch., so that you may have the same number on the needle as at first; in returning work off 2 stitches, make 4 Ch., work 2 more stitches, 4 Ch. as before and repeat. This will make the raised loops of Ch. fall between those of the 2nd row.—4th row. Work back plain till you come to within 1 of the end, then make the 4 Ch., and work off the last stitch.—5th row. Work plain till within 2 of the end, then make the loop of Ch., and work 2 stitches.—Repeat as 4th and 5th rows alternately to the 10th row.—11th row. In going back, after the 1st stitch, make 10 raised loops, with 2 stitches between, then 8 plain, and continue the loop at the edge in its proper place as before.—12th row. Put raised loops between each of those of last row, work plain and make loop at the edge as previously directed.—13th row. Work back 19 plain, 4 Ch., 8 plain, edge as before.—14th row. 18 plain, 4 Ch., 9 plain, edge as before. It will now be perceived that the inner edge of the narrower border next the broad stripe, is to be worked like the outer one, so as to give the appearance of 2 raised loops going up the edge of the stripe. Continue in this way till the stripe is the desired length, when the top must of course be made to correspond with the other end, and a row of DC. crochet all round the outer edge. The border and stripes between are worked in cross stitch, with the Grecian fret, in bright yellow filoselle, whilst the broad stripe is enlivened by stars of white, blue, green, and cerise, in *point lancé*, having a French knot of gold colour in the centre, and a small stitch at the point of each limb of the star, done with split filoselle, green on the white, white on the green, yellow on the blue, white on the cerise. These stars are worked on 5 rows of the tricot; a single white one in the centre, above it green on the right, and blue on the left, a single cerise star above, then the green and blue repeated, but on opposite sides. The fringe is so plainly shown in the illustration that it requires no description. The materials can be procured from Mr. Bedford, 186, Regent-street, London, who supplied the design.

1 to 4. Paper Rosette Work.

The plaiting of paper into rosettes and using them for decorative purposes is now extremely popular work. The following designs will be found useful for Church decorations and for picture frames. For the latter purpose gold paper is now much used, and has an extremely rich effect:—

No. 1 is an oval frame; the height of the model is 14in. and the width of the millboard 2in. This is covered with red velvet, and ornamented with brown paper stars. An inner frame must be cut the same size as the outer edge, but not quite so wide; glue to the back of the other, leaving a margin for the glass.

No. 2 is a floriated cross, 21in. in length, and the width of the stem and

Digitized by Google

arms 3½in. This is made of purple cotton velvet or velveteen, and ornamented round the edges with small rosettes of cream coloured paper, rather more than three-sixteenths of an inch wide. The foundation of the cross is cut in very strong mill-board; on this you glue the velvet carefully, glueing down the edges on the wrong side, of course leaving good turnings.

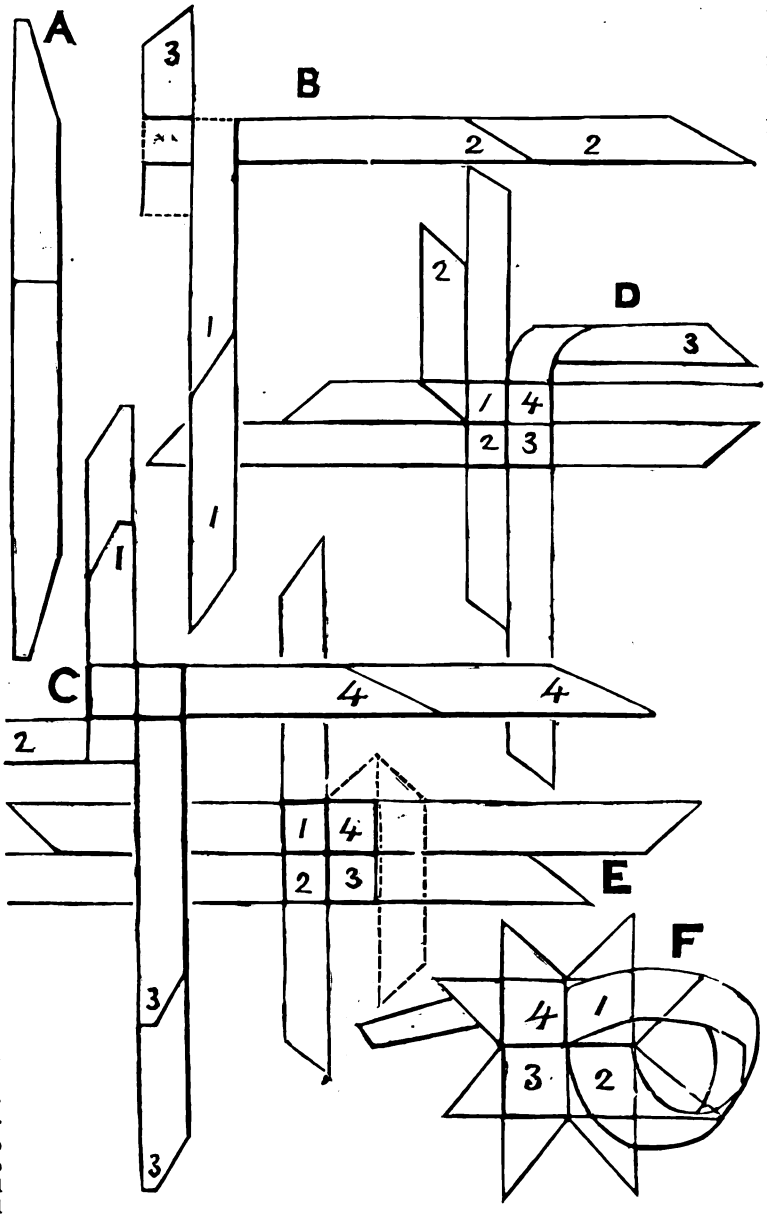
No. 3, an Oxford frame, covered with rose-coloured kid and white or cream-coloured stars. The frame is cut in millboard; the leather must be damped, and well stretched on the millboard, and carefully glued on to the latter on both sides; then you require another piece of millboard cut about ⅛in. narrower than the one covered, with no crosspieces; this is firmly glued down upon the back of the other to form a secure hold for the glass and back of the picture.

No. 4, a double triangle, in red velvet; the under triangle is ornamented with stars made of glazed brown paper, the upper one of cream-coloured paper, and the combination of colours is most effective.

We have not space to give more designs, but would suggest that the Latin cross is often made to stand upright, on a pedestal of three steps, each about an inch in depth. When this is preferred, the foundation should be of wood, not of millboard, as the latter is apt to warp in a damp situation, and is so much more expensive than wood, as it would require extra weight and thickness. In covering the millboard designs with velvet, the best method is to stretch out your velvet tightly on a board or table, then glue one side of your millboard, using very little, and lay this side down on your velvet. When set, cut the velvet out, leaving good turnings, which are glued over on the wrong side. In making a cross for a font, two pieces of millboard exactly the same size are required. Cover each piece with velvet, and glue the two pieces together, as both sides of the cross must be ornamented and made exactly alike.

Boxes, such as the round French plum boxes are very ornamental covered with bright-coloured velvet, and then neatly ornamented with these rosettes. Work drums, baskets, trays for cards, and numerous other knickknacks may all be ornamented with them; the only difficulty when once the rosette is accomplished being the cutting of the millboard and wood.

The Rosettes.—These are made of four pieces of cream-coloured or white note paper, cut exactly the same length and width, shaped at the ends as in detail A. For the rosettes for the designs Nos. 2 and 4, the paper should be cut three-eighths of an inch wide. No. 3 is varied, according to the size, some being much smaller; then of course smaller rosettes are required. The paper for the smallest rosettes must be 8 in. in length, and for the large ones 14in. or 15in. Cream-laid post size must therefore be used for these, and the pieces left from a rosette will divide and be the proper width for the small rosettes.



In making a rosette keep the details carefully before you. Double the four pieces of paper you have taken, so that one end is double the length of the other; a dotted line describes this in the detail. Now mark each end of the first paper with No. 1. Double the second and mark it with 2; then mark the two others 3 and 4 respectively. By the aid of these numbers and the details we hope to make the youngest of our readers and workers understand our directions. Take the paper No. 1 between the finger and thumb of the left hand, keeping the short end uppermost. Take No. 2 paper, folded as the first, pass the loop of this paper between the two folds or loop of No. 1, keeping it close to the top of No. 1; pass it the width of the paper beyond No. 1, the loop passes beyond No. 1, the position is seen exactly in detail B. Turn the paper round in your hand, so that No. 2 is in the position No. 1 was when you commenced the rosette, and No. 1 to the left hand; turn the detail round also, and you will more readily understand it. Take No. 3 paper, pass it through the loop of No. 2 paper, leaving the loop of the paper beyond. Turn the papers round without taking them out of the left hand, so that No. 3 is in the position of No. 1 in detail B. Take No. 4 paper, pass it through the loop of No. 3 paper and under both folds of No. 1 paper, not passing it through the loop. Push it some way beyond No. 1, draw the short end out beyond No. 2, lift this short end over both ends of No. 1, and pass it through the fold of No. 3; draw it out. This leaves the end in the same place over the long one as the others, and fastens all the four pieces tightly together. The four pieces must just be drawn close. The papers are now in the position of detail C. You now turn back the short end of No. 4 paper across the papers 3 and 1, and leave it parallel with No. 2; crease it carefully and firmly where turned back. Turn the papers round in your hand, so that No. 2 is uppermost, turn back the short end of No. 1 across the short end of No. 4 (just turned back), and leave it parallel with No. 3. Turn back the short end of No. 2 over the end No. 1, and leave it parallel with No. 4. Turn the paper, so that the long end of No. 1 is uppermost, turn back the short end of No. 3, lay it over the end No. 2, and slip it under the little loop formed by the short end of No. 4, draw it through this loop, and leave it parallel with No. 1 long end. This fastens all the short ends in their places. You must be careful when told to turn the papers round not to turn them over, as doing so would throw your work wrong.

You have a long and short end on each of the four sides of the square. The long ends have their numbers towards you, the short ones are underneath. Mark the four little squares of paper in the centre according to the numbers on the long ends—No. 1 square just under the end No. 1, and No. 2 square under No. 1 square, No. 4 to the right of No. 1, and No. 3 to the right of No. 2. Keep these little squares between the finger and thumb, still holding the paper so that the Nos. on the short ends are underneath, and therefore not seen. You now commence the more intricate part of the work, and the details must be carefully attended to. *Take the short end No. 8 between the finger and thumb of the right hand, draw it to the right hand (folding the paper *under*) until it is exactly parallel with the long end No. 4. This is described in detail D. When quite in a straight line, crease the paper sharply, so that it will be in the shape of the dotted line to the left of square 1 in the same detail. Take the same end again, fold it towards you, lay it over the long end No. 4 and short end No. 2, and parallel with two squares Nos. 4 and 3. A crossed dotted line shows this in detail E. Crease the fold at the top, which with the first fold should now describe the two sides of a triangle. You now fold these two little sides or dotted lines in the detail together, creasing the side up sharply, making a point the shape of those on the detail F. Hold this little point (without moving the papers from their former position) between the first and second finger of the left hand; lift up the little end No. 3, which is now very short, and slip it under the loop or square No. 4, drawing it out above No. 3 square. Cut what remains of the end off. This finishes one point. Turn the paper round, so that No. 2 long end is uppermost, fold the short end No. 4 in the same manner as the one you have finished after detail D, and until exactly parallel with the long end No. 1, which is now to the right hand of the square. Then fold it over again towards you until parallel with the squares 1 and 4. Lay the two triangular edges together; the short end therefore is doubled over the squares Nos. 1 and 4, and the figure on the end is now uppermost. Pass

Digitized by Google

the short end as before described under the square 1, bringing it out over square No. 4; draw it through and cut it off. Now take the short end No. 1, and manipulate in the same manner; repeating from *. Of course, the No.'s will be different, in the first instance it will lie parallel with No. 2, and then fold parallel with squares 2 and 1. Pass the end when finally doubled under the square No. 2. Then work No. 2 end; the last short end in the same manner; when all four short ends are finished, cut the little pieces off. Then turn the work *over*, so that the numbers are now underneath, or on the wrong side of the work. Number the little squares on this side to correspond with the long ends; the right hand square at the top mark 1, as No. 1 paper should be at the top, No. 4 to the left of No. 1, No. 3 under No. 4, No. 2 under No. 1. You now work the long ends in exactly the same manner as the short ones. Commence with No. 1, fold it under to the left by the detail D. Then fold it towards you over the triangular point and the long end No. 2, and parallel with the squares Nos. 1 and 2; crease the folds well, then fold the two edges together of the triangle, leaving the long end laid flat over squares Nos. 1 and 2. Raise the long end, and slip it through the square No. 1, drawing it through carefully, or you may pull the whole point through. When you have drawn it through, crease the end back over the square 1 again to keep it out of the way until it is wanted again. Turn the work round, and work end No. 4 next, in exactly the same manner. It will lie parallel in the first instance with the two points to the left of the square, then folded parallel with squares 4 and 1, and passed under square 4; turn back the end when finished. Work end No. 3, fold as before, pass it under square 3, and bring it out above square No. 1; then work No. 2 in the same manner. You now work the raised part in the centre of the rosette. Keep detail F before you. You have now the 4 long ends turned back over the sides of the square. Take end No. 1, draw it towards you. You must hold the paper so that the figures on the squares correspond with the figures on the engraving; fold the end underneath from left to right, take the point of the paper in your hand, making a loop as in detail F. If the 2nd finger is placed in the middle of the loop it will help you. Pass the end of the paper under the square 4 and under the long end 4, which is laid back. Push it carefully, and the end will come out in the middle of the triangular point 4; draw it through as far as it will come, and you will form the first centre point of the rosette. Now take the end No. 4, loop it in the same manner by the engraving, and pass under the end and square No. 3; draw it up till it forms a point. The end No. 3 is passed under the square No. 2, the end No. 2 under the square No. 1, and the end No. 1 under the square No. 4, which is now covered by a point of the rosette: this completes a rosette. The designer generally works the rosettes together, as it gives extra firmness. It would, however, be better to be well practised in the rosettes before attempting to join them. When they are not to be joined, cut off all the long ends close to the triangles; and it makes these rosettes firmer if the ends of the paper are just touched with a little very stiff gum, which fastens them, but, if firmly made, this is unnecessary. The rosettes are joined in the following manner: Take the end No. 4 of a rosette, and slip it through the point 4 of a second rosette, push it carefully under the paper, and the end will come out between the two points of the second rosette; pull it out till the two points in the two rosettes touch, then take the paper from the first rosette, and loop it in with the point of the 2nd rosette. This point will have to be loosened to manage this. The designer never finishes them when they are to be woven together, but passes the double loops through the points at once; but this is almost impossible to describe in words. The under end left on the 2nd rosette must be looped through the square No. 4, at the back of the first rosette.

5. Infant's Shawl and Hood (Crochet.)

This is intended for a child from 3 months to 2 years to wear in the house instead of the flannel shawls so much used, and it will be found very light and warm. 1½oz. of white Shetland wool, and 1oz. of coloured ditto, No. 10 bone needles. Begin with the white wool. Make a circle of 4 chain.—1st row. Work 10 treble or the thread once round the needle in the circle.—2nd row. 3 treble in last treble of first row, 1 chain, 3 treble in 3rd treble, 1 chain, 3 treble in 5th treble, 3 chain, 3 treble in the same space, 1 chain, 3 treble in the 7th treble, 1 chain, 3 treble in 10th treble. Turn.—3rd row. 3 chain, 2 treble in the last treble of 2nd row, 1 chain, 3 treble into 1st space, 1 chain, 3 treble into next space; repeat. In the centre work 3 treble, 3 chain, 3 treble into the 3rd chain of last row, 1 Ch., 3 treble into next space; repeat to the end of the row. Continue working backwards and forwards till you have done 39 rows, always making 3 treble, 3 chain, 3 treble in the centre. Take the coloured wood and count 8 rows from the commencement, and work 3 treble into 9th row, 1 chain, 3 treble in the next row; repeat till you come to the corner, then work 3 treble, 3 chain, 3 treble into the one space as before, 1 chain, 3 treble into the next space; repeat, working on the other side of the shawl in the same way, leaving 8 rows at the end to make it correspond with the commencement. Turn, and work another row in the same way, then work 2 rows with white wool, 2 rows again with the colour, 2 rows of white, 2 more rows with the colour. The Border is worked with colour and formed of scollops. Work 1 double crochet into the first space, * 8 treble into the next space, 1 double crochet into next space; repeat from *. At the corners work 6 treble, 3 chain, 6 treble into same space. This row finishes the shawl.

The Hood.—With the white wool, make a chain of 36 stitches, work 2 treble on to 4th chain from the neck, * 1 chain, miss 1, 3 treble into next chain, repeat from * to the end of the 36 chain; then in the last chain work 3 treble, 3 chain, 3 treble, and instead of turning back turn round and work down the other side of the 36 chain, 1 chain, 3 treble into the 1st space, * 1 chain, 3 treble into the next space, repeat from * to the end; turn back, and make 5 chain, 3 treble in the 1st space of last row, * 1 chain, 3 treble into next space; repeat from * till you come to the last space before the 3 treble, 3 chain, 3 treble of last row, then work 3 treble, 3 chain, 3 treble into that space and the 2 following ones, * then 1 chain, 3 treble into the next space, repeat from * to the end of the row; turn back, 5 chain, 3 treble into first space, * 1 chain, 3 treble into next space, repeat from * till you come to the 3rd space from the centre, then you must increase by working 3 treble, 3 chain, 3 treble into each space 7 times, then 1 chain, 3 treble to the end of the row, work 6 more rows without increasing at all, then 2 rows with the coloured wool, 2 rows with white, 2 rows with colour. The border is also worked with the colour. Work 1 double, 6 treble, 1 double into each space. The shawl and hood must then be sewn together, and a piece of rather narrow white ribbon run round the neck, leaving a sufficient quantity for strings. The ribbon must also be run above the border of the hood, which draws it up and finishes it by a bow in the centre.

6. Petticoat (Crochet).

Black and deep red 6-thread fleecy wool, or 6-thread Lady Betty. A crochet hook No. 4 for the Lady Betty wool, No. 2 for the fleecy. The whole of the top part, or ground of the petticoat, is in crochet tricotée. You commence at the back, and work from the top to the bottom; therefore, the chain you make to commence is the length of the petticoat. Make a chain with the red wool of 75 stitches, and work 12 plain rows; now work the first gore, take up 5 stitches, work them back. Then, for the 2nd row of the gore, take up 10 stitches, increase every row 5 more stitches, until you have taken up 40 stitches, work these 40 back, then 14 more plain rows. Now work another gore, as the last, then another 14 rows plain; work 4 gores in all for each half of the petticoat. When you have worked the 4th gore on this half work 10 plain rows for the middle of the petticoat. You next work the gores for the 2nd half. These are of course reversed, therefore, in the first row, take up 40 stitches, work back.—2nd row. Take up 35, work back, and reduce each time until you have worked a small row of 5 stitches, then take up all these small rows successively, and the remainder of the stitches. Work 14 rows plain, then another gore; after the fourth gore, work 12 plain rows, and fasten off Now work a row of double crochet with black wool all round the petticoat, then take up the stitches of this black row in crochet tricot with the red wool, and work 13 rows of red in plain crochet tricotée, then a row of black DC., a row of red DC., and another row of black. The border is worked next, but before this is commenced join the petticoat at the back.

The Border.—1st row. Work on the last row with the red wool, * 1 DC. on each of the 4 next stitches, 3 Ch., miss 1 DC., repeat from *. Do not fasten off at the end of the row.—2nd row. Black wool, 1 DC. on the first DC., * miss the 2 next DC. of last row, and work 1 DC. upon the next stitch and the 2 next chain stitches, 3 Ch., 1 DC. on the second of the three chain again, 1 DC. on the next chain, and DC.; repeat from *.—3rd row. Red wool, * 1 DC. on the 3rd of the first three DC. in last row, and on each of the two next Ch., 3 Ch., 1 DC. on the 2nd and 3rd of the last 3 Ch. and following DC.; repeat from *.—4th row is like the 3rd, but with black wool; fasten off. The 13 rows of red are worked over with black wool; this can be done from the engraving. The petticoat should be put into an elastic band.

7. Jacket for a Child (Tricot and Crochet).

Materials required: 6oz. or 8oz. of violet, ½oz. each of white and black single Berlin wool, and ½oz. of pearl grey Shetland wool; a long bone tricot needle, No. 8, and a shorter and rather finer bone crochet. This jacket, which is suitable for children from three to five years old, is worked in tricot with violet wool. Commence with a chain of 162 stitches for the width at the lower edge, of which 31 at each end are reckoned for the fronts, and it is as well to put in a piece of white thread to mark the division. The fronts are to be taken in at the side, as far as the armhole, by taking two stitches together in every 3rd row. The back is also to be taken in in the centre, by decreasing a stitch before and after the centre one in every 3rd row, till the neck is reached. The armhole begins in the 14th row, for which in the 15th 3 stitches of the front and back on each side are to be left unworked. For the depth of the armhole 15 rows are necessary for each portion of the jacket, and in working back the last row of the back and of the left front, make 1 Ch. at the end of each. The three portions of the jacket are now to be united, and in raising the stitches all the way across, one is to be raised (and, as it were, inserted between the parts, at the centre of the top of each armhole), in the chain stitch already spoken of, and the whole row worked back. In each of the 6 rows that follow between this one and the neck, a stitch is to be taken in immediately before and after this inserted stitch, while the stitch itself goes on in a straight line. In the 3 last of these 6 rows, the top of the fronts is to be sloped off on the straight side, by leaving 3 stitches unworked in each row. A row of double crochet is then to be worked round the neck. For the under part of the trimming round the edge, which latter is to be crocheted separately and sewn on afterwards, 4 rows of trebles, each separated by 1 Ch., are to be worked along the lower edge of the jacket, with the violet

wool, the trebles of the 2nd and following rows to be taken into the space of 1 Ch. in the preceding one. The fronts and neck are to be edged with 2 rows of tricot in the white wool, with a black row between them. After these rows are completed, the following scollop is to be worked entirely round the jacket in violet wool. * DC. on the 1st stitch, 5 Ch., a treble on the 1st of these 5 Ch., DC., in space of next Ch., between the trebles; and repeat from *. For the trimming itself of the lower edge of the jacket, make a chain of the required length in black wool, and work on it a row of tricot; this forms the centre row, on both sides of which a row of tricot in white is to be worked in the following manner: * raise 4 stitches, increase 1 before and after the next stitch, thus making 3 stitches instead of 1, raise 4 stitches again, and then take 3 together; repeat from *. For the 2nd row of white, which is to be on the other side of the black one, it will suffice to observe that the increasing and taking in must be exactly reversed, the increasing being opposite to the taking in, and *vice versâ*, which will cause the wave. The white rows on each side are to be edged with loops of the grey Shetland wool, thus: * 2 DC. in 2 following stitches, 9 Ch.; and repeat from *. The loops are to be fastened by a stitch in each to the violet ground, and those on the lower white row will come each on one of the violet scollops. A similar row of loops of the grey wool is to be added to the lower white row round the neck, and also tacked down, and the whole trimming including the under part, to correspond with that of the jacket, is to be worked for the edge of the sleeves. The sleeves are commenced at the hand with 38 chain. After 22 plain rows, raise the stitches in the next to within 3 of the end, and work back, leaving 3 on the needle at the opposite end; go back, and raise stitches to within 3 of the end again, and work back, leaving 3 more on the needle at the opposite end as before; do this twice more, and the last time work back through all the stitches left on the needle. Then raise stitches all the way along, and also in those left unworked at the other end, and work the whole 38 stitches back again, which completes the sleeve. When the trimming is finished and sewn round the hand, the sleeve is to be joined and fixed into the armhole. A cord three-quarters of a yard long, composed of chain stitches in violet wool, passed through the upper row of the neck, and finished at the ends with tassels 2½in. long, fastens the jacket.

8. Child's Frock (Crochet).

BLACK, scarlet, and white single Berlin wool are required; a long crochet hook No. 7 or 8. You work the whole width of this petticoat in one piece, working from the bottom to the top. Make a chain with scarlet wool of 284 stitches, and work 3 plain rows of crochet tricotée, then a black row; all the black rows are worked from the back of the loop.—5th row. White wool.—6th row. Black wool, then work 6 rows of red, a black row, a white row, and another black row. You now crochet 20 rows plain in red.—21st row. 10 plain, 2 together, repeat all through the row, then 7 more rows plain.—29th row. 9 plain, 2 together; repeat, 7 rows plain.—36th row. 8 plain, 2 together, repeat. 7 plain rows.—41st row. 7 plain, 2 together, repeat. 4 plain rows.—45th row. 6 plain, 2 together, repeat. 2 plain rows.—48th row. 5 plain, 2 together. 1 plain row.—49th row. 4 plain, 2 together.—51st row. Plain.—52nd row. 3 plain, 2 together; repeat.—With the 53rd row you work the band, work the 2 first rows of this with black wool, then 4 scarlet, and 2 more black, taking care to work these black rows from the back of the loops, as well as the first black rows in the pattern.—59th row. Scarlet wool, work plain, and then 7 more rows of plain crochet, which brings you to the bottom of the armholes; now work the first 20 stitches for the half of the back, on it work 7 rows, in the first and 3rd of these 7 rows work the two last stitches together, and in the 3rd and 7th rows increase one stitch at the end of the row only. Work the last 20 stitches of the body in the same way, but in the 1st and 3rd rows take 2 stitches together in the commencing, and in the 5th and 7th row increase a stitch in commencing. You next take the middle stitches, and work on them 10 rows of crochet, then work 2 small rows on the first and last 5 stitches in the last row, and join these 5 stitches to the first 5 stitches of the two back parts. Now work 3 rows of black double crochet down the left side of the back, working to the bottom of the band; then on the other side of the back work 4 black rows of double crochet. On these you put the buttons, and make the buttonholes by working a chain stitch between the DC. stitches. You next work round the neck the following border with black wool.—1st row. DC.—2nd row. 1 DC. on the first stitch,* 5 Ch., 1 treble on the first of this 5 Ch., miss 2 DC., 1 DC. on the next; repeat from *.

THE SLEEVE.—You make a chain of 32 stitches for the sleeve with scarlet wool, then 2 rows of scarlet. 3rd row.—Black, work in the same manner as the skirt, 3 rows red, another row of black. Now work 24 rows in red, and in the 9th, 14th, 19th of these 24 rows increase one stitch on each side of the work. In the 33rd row leave 2 stitches on each side unworked; also in the 34th, 35th, and 36th rows. Then work a row of DC., taking up all these stitches that were left unworked. The sleeve must be sewn together with a needle and thread, and a border worked round the bottom to match the top neck.

9 and 10. Lady's Under Vest (Knitting).

THE body of this is knitted in three parts—the back and two fronts. You require 8oz. of white eider yarn and a pair of bone needles No. 10, a little white sarsenet ribbon about a quarter of an inch in width, and pearl buttons for the front. The fronts are worked first, and are commenced at the bottom of the basque. Cast on 89 stitches, and knit 12 plain rows. In this pattern a row means one needle.—13th row. Knit plain 24, take 2 together, knit 11, take 2 together, plain to the end of the row, knit the two last together. In future rows T. will signify take 2 together, and plain, or KP., plain knitting.—14th row. Plain.—15th row. Plain, the 2 last together.—16th row. Plain.—17th row. Plain 22, T., 11 plain, T. plain to the end, T.—18th row. Plain.—19th row. T. at the end of the row.—20th row. Plain.—21st row. 21 plain, T., 10 plain, T., plain to the end, T.—22nd row. Plain.—23rd row. T. at the end of the row.—24th row. Plain.—25th row. 20 plain, T., 9 plain, T., rest plain, T. at the end.—Three plain rows.—29th row. 9 plain, T., 8 plain, T., plain to the end, T. Three plain rows.—33rd row. 18 plain, T., 7 plain, T., rest of the row plain.—34th row. Plain.—35th row. T. at the end of the row only.—36th row. Plain.—37th row. 17 plain, T., 6 plain, T., plain to the end, T.—Three rows plain.—41st row. 16 plain, T., 5 plain, T., plain, at the end T.—Two rows plain.—44th row. T. at the end only.—45th and 46th rows. Plain.—47th row. 17 plain, make 1 stitch in the next; all the increasings in this pattern are worked in the following manner. Take the stitch signified, knit a stitch in it as usual, then take up the back of the same stitch, and knit another in it. 6 plain, make 1, knit plain to the two last stitches, in the first of these two make 1, the next plain. In future rows the increasings at the end of the row are all to be made in the last stitch but one, and therefore, when "make one at the end of the row" is directed, this must be borne in mind.—48th, 49th, and 50th rows. Plain.—51st row. 18 plain, make 1, 7 plain, make 1, plain, make 1 at the end.—3 rows plain.—55th row. 19 plain, make 1, 8 plain, make 1, plain, make 1 at the end.—3 rows plain.—59th row. 20 plain, make 1, 9 plain, make 1, plain, make 1 at the end.—3 rows plain.—63rd row. 21 plain, make 1, 10 plain, make 1, plain, make 1 at the end.—3 rows plain.—67th row. 22 plain, make 1, 11 plain, make 1, plain, make 1 at the end.—3 rows plain (these three rows are knit between each row of increasings).—71st row. 23 plain, make 1, 12 plain, make 1, plain, make 1 at the end.—74th row. 24 plain, make 1, 13 plain, make 1, plain, make 1 at the end.—78th row. 25 plain, make 1, 14 plain, make 1, rest plain.—82nd row. 26 plain, make 1, 15 plain, make 1, plain, make 1 at the end.—86th row. 27 plain, make 1, 16 plain, make 1, rest plain.—90th row. 28 plain, make 1, 17 plain, make 1, plain to end, and make 1.—94th row. 29 plain, make 1, 18 plain, make 1, rest plain.—98th row. 30 plain, make 1, 19 plain, make 1, plain to the end, and make 1.—102nd row. 31 plain, make 1, 20 plain, make 1, rest plain. One row plain.—104th row. 32 plain, make 1, 21 plain, make 1, rest plain, make 1 at the end, 3 rows plain.—108th row. 33 plain, make 1, 22 plain, make 1, plain, make 1 at the end.—112th row. 34 plain, make 1, plain at the end, make 1.—113th row. Plain.—114th row. 35 plain, make 4, plain to the end, and make 1.—115th row. Plain.—116th row. 36 plain, make 1, plain to the end, then make 1.—118th row. 37 plain, make 1, rest plain.—120th row. 38 plain, make 1, rest plain, make 1 at the end.—122nd row. 39 plain, make 1, rest plain.—123rd row. Cast off 20 for the arm hole, the rest plain, *.—123rd row. Plain, at the end knit 2 together.—124th row. Plain. Knit these two last rows 4 more times.—133rd row to 153rd row. Plain.—154th row. Plain to the end, and make 1 there. Next 3 rows plain. Work 38 rows like the 154th and 3 following rows. You now begin to decrease for the neck and shoulder.—191st row. This row should commence on the even or front side of the work. Cast off 10 stitches loosely, plain to the end of the row, and knit 2 together.—192nd row. Plain.—193rd row. Cast off 5, rest plain T. at the end of row.—194th row. Plain.—195th row. Take 2 together twice at the commencement and at the end of row, repeat these two last rows 7 more times, then work the two rows with one decreasing only at the beginning and end, until you have about 10 or 12 stitches on the needle, and fasten off. Now take up the stitches on the shoulder, and knit 8 plain rows tightly; fasten off.

THE BACK.—Cast on 106 stitches, and knit 12 rows plain.—13th row. Decrease at the commencement of the row, knit 28 plain, take 2 together, knit plain until you come to the 32nd stitch from the other end, T., knit 28, take 2 together.—14th row. Plain.—15th row. Take 2 together at the commencement and end of the row.—16th row. Plain.—17th row. T., plain 27, plain to the other end, which work as this. In knitting this back part, both sides must correspond exactly; therefore, as our space is limited the end of each row will not be given, but it is always the same as the commencement.—18th row. Plain.—19th row. T., 26 plain, T., plain to the 30th stitch from the end, when work as you commence. Repeat the 18th and 19th rows four more times, then repeat the 19th row again, with 3 plain rows between instead of one, until you have worked altogether 40 rows, then 6 plain rows. You now begin to increase for the side pieces.—47th row. 1 plain, increase, 20 plain, make 1, plain; 3 rows plain.—51st row. 1 plain, make 1, 20 plain, make 1, plain, &c.; 3 rows plain.—54th row. Plain 1, make 1, 20 plain, make 1.—57th row. 1 plain, make 1, 20 plain, make 1.—60th row. * 23 plain, increase 1; 3 rows plain; repeat from the 60th row to the end of the 76th row.—77th row. 22 plain, make 1, plain, &c.—78th row. Plain. Every alternate row is now plain.—79th row. 21 plain, make 1.—81st row. 20 plain, make 1, plain, &c.—83rd row. 19 plain, make 1, plain, &c.—85th row. 18 plain, make 1, plain, &c.—87th row. Plain 16, make 1, plain.—89th row. 1 plain, make 1, 13 plain, make 1.—91st row. 15 plain, make 1.—93rd row. 14 plain, make 1.—95th row. 12 plain, make 1, plain.—97th row. 11 plain, make 1.—99th row. 10 plain, make 1.—101st row. 1 plain, make 1, 8 plain, make 1.—103rd row. 10 plain, make 1.—105th row. 9 plain, make 1.—107th row. 8 plain, make 1.—109th row. 7 plain, make 1.—111th row. 1 plain, make 1, 4 plain, make 1.—113th row. 7 plain, make 1.—115th row.

Digitized by Google

Take 2 together twice, plain to the end.—117th row. Like the 115th row.—119th row. T. plain.—121st row. T. plain.—123rd row. T. plain.—Now 7 plain rows, then the 131st row, 1 plain, make 1; 132nd row; Plain, repeat these two rows 21 more times.—Then you decrease for the shoulder in the same manner as the front, decreasing one stitch at the commencement and end of each alternate row for the next 76 rows. You now knit T., 10 plain, turn, knit plain back, turn, T. plain 6, turn, knit back, turn T. plain 3, turn knit back; now knit to the other side, turn T., knit 10, turn, and work these stitches as the last, and then take 2 together twice at each end of the alternate row until you have only about 3 inches of knitting left, and cast off. Sew the shoulders to the plain rows knitted to the front, and the sides together, then knit the sleeves.

THE SLEEVE.—Cast on 153 stitches, knit a plain row, now knit 18 rows of brioche stitch.—1st row. * The thread forward, slip one as for purling, knit 2 together; repeat from *.—2nd. Thread forward, slip the first, which is the stitch that was knit together in the last row, knit 2 together; repeat until you have the 18 rows.—20th row. Knit 1, make 1, 151 plain, make 1, knit.—21st row. Plain; repeat these two rows until you have 40 more rows, *. Then take 2 together twice at the beginning and end of the next row, the next row plain; repeat from * 3 more times, then four rows, decreasing one stitch in the 1st and 3rd rows, and cast off. Sew the sleeves up with a crochet hook, work two rows of double crochet round the armholes of the bodice, and sew in the sleeves; then work three rows in the neck, and down the front, and all round the bottom of the bodice. It is a great improvement to work upon the last row a row of colour in DC., run the ribbon through the last row in the neck to draw it up a little if too loose.

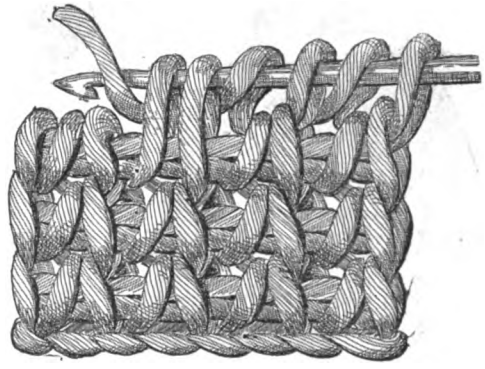
11. Lady's Cloak (Crochet and Point Russe).

YOU require a pound of dark maroon 4-thread fleecy wool, 8oz. white fleecy wool, 2oz. black mixed with silver wool, white corded ribbon for bow, edged with black 4½in. wide; a wooden crochet hook, No. 4. The ground of this cloak is of maroon; both the borders round the cloak are worked with white wool, and are embroidered with the mixed black wool in *point russe*. The white border round the hood is worked to correspond with the cloak. Make a chain with the maroon wool of 321 stitches, take them all up, and work them all back; mark the 161st stitch, which is the centre one in the row, as on each side this stitch in every row you work 2 loops together.—2nd row. Take 2 together, plain to the centre, work the 159th and 160th together, 1 plain, the 2 next together, plain to the end of the row, where take 2 together.—3rd row. Join the white wool, and work 6 rows like the 2nd, with white.—9th row. Join the red, and work 6 rows like the 2nd with it.—15th row. Join the white, and work 5 rows like the 2nd with it.—20th row. With the maroon work plain to the centre, with no decreasings at the edge of the work, but one decreasing on each side the centre; work 38 more rows like the 20th.—58th row. 20 plain, 2 together, 19 plain, 2 together, plain to the centre; take 2 together on each side the stitch, then 2 decreasings on the other half the cloak, taking the corresponding stitches to those in the beginning of the row. Repeat the 58 rows 8 more times, decreasing at the commencement and end of each row as well as in the other places. This row completes the depth of the cloak, but if it should be liked deeper, more rows can be worked following the last 4 rows. You now work the border up the sides of the cloak, which is also in crochet tricotée, and you take the white wool, and draw through the first loop in the first of the 5 white rows worked first on the cloak. (You are going to work the corner.) Draw the wool through the loop you have just made, take up the loop on the next row, draw through, work off these two loops separately. Take up these two loops, and the one in the next row of white, work all off. Take up these three loops again, and the first on the next row, work them off. Take up these 4, and the one on the 5th row of white; work all off. Now work these 5 stitches up the side of the cloak, and at the end of every row join to the next row on the cloak, fasten off at the end, and with the maroon work a stripe of 6 stitches commencing in exactly the same manner on the red stripe, and joining to the white stripe; then work a stripe of 6 white stitches, and after it two rows of double crochet on the outside; the left side of the cloak must be worked in the same manner, but you commence at the top of the cloak, and work to the corner, which is formed by gradually decreasing the number of stitches instead of increasing them. Work 2 rows of DC. in the neck.

THE HOOD.—Make a chain of 43, with maroon wool.—1st row. Take up 22 stitches, work 3 of them back, take up the two first of these three and then two more stitches on the chain, work back these five loops and 2 more, making 7, then take up 6 loops and 2 more on the chain; work back these 9 and 2 more of those on the needle. Work in this way until all the chain stitches are worked up; then work 7 more rows, increasing one stitch on each side the work, then 4 rows even, and in the next row work 2 together 5 times on each side, and fasten off. You next crochet the border to the hood, which is all worked in one length, and is sewn on to the coloured; make a chain of 18 loops and work back, then 2 rows, taking up the little loop just at the back of the long loops in the last row, instead of the long loops; * then 4 rows in plain crochet tricotée, the same as the ground of cloak, and 6 rows through the back of the long loop. Repeat from * the length required; you can join the rows to the hood as you proceed, if you like, but we recommend the border to be sewn to the hood after it is worked. You embroider the 4 plain rows with the same pattern as the white in the cloak; you crochet, after this is worked, an edge to the side of the border, through which you run the cord to draw it up. * 1 treble on the first loop, * 1 Ch., 1 treble on the next loop; repeat all round. Sew the hood to the neck of the cloak, and then work on this row a row of DC. with red, on it a row of treble with white wool; make a cord and tassels of red wool, and run them through the row of trebles. The pattern embroidered on the border is worked with the twisted black and gold wool, using it double, and two rows of rather long stitches is required for each pattern. The pattern itself is a diamond; each diamond is worked over 5 long loops in width on the widest white stripe, and 3 rows in the narrowest. The fringe is composed of black and red wool, knotted in regular distances in the outside edge of the cloak.

12. Cloud or Scarf for the Neck (Crochet.)

THIS should be crocheted in Berlin wool or eider yarn, in one colour, and a thick wooden tricotée hook used for it. The full length is about 62 inches. The detail for the crochet work is engraved nearly full size in No. 2*a*. Make a chain as many inches long as you wish your work to be wide. Take up all the stitches, and work them off one by one.—2nd row. * The thread round the needle, take up the next two loops together; repeat from * to the end of the row, then the thread round the needle, and take up the last stitch alone; work back each stitch of last row separately (the 2nd



row). The thread round the needle, pass the first loop of last row, which loop is the first one over the needle; * take up the next long loop, and with it the over loop after it; the thread round the needle, repeat from * until the end of the row, and always take up the last separately, making a loop before it. Repeat this row throughout the pattern. When the work is reversed, this stitch appears like rows of plain treble crochet. Add tassels at the ends of the wool. You may commence this pattern with two stitches, and gradually increase the number until you have the desired width, if you prefer it; but we think the full number of stitches is handsomer and easier.

13. Sleeveless Jacket (Knitting).

MATERIALS.—14oz. or 16oz. of violet, dark green, or black, 3-thread fleecy, Scotch fingering or single Berlin wool, as may be preferred; 4 steel needles No. 12, and 2 No. 14. The two fronts and the back of this jacket are knitted separately, and sewn together. It is worked in rows backwards and forwards, alternately plain and purl, so that on the wrong side it appears entirely purl, and plain on the right side. Cast on for the lower edge of each front 50 stitches. The border consists of four series of raised notches, each of which takes 5 rows. Knit a purl and a plain row.—3rd row. * Over, purl 2 together, over, purl 2 together; repeat from * throughout the row, being careful to keep the same number of stitches as before; then a plain and a purl row again, which complete the 5. Now with a smaller needle pick up, on the wrong side, the stitches of the cast-on row (taking care to make the same number you have on the needle), and placing the one with the stitches, just picked up, behind the other, proceed to knit them off together plain, stitch by stitch. You will then see that the open row, when folded together in this way, forms small notches. Knit 4 rows, alternately purl and plain, between this and the next set of notches; 3 are required for the interval, and the 4th for the double row. Then begin the 5 rows again, as before, the first and last being purled, and the 3rd or middle row, "over, purl 2 together," throughout. Pick up with the smaller needle, on the wrong side of the work, the 6th row, counting back from the one on the needle (which is the 4th of those knitted between), and knit the two needles off together as before, which will form the second series of notches. Knit 6 rows purl and plain, and then repeat the 5 rows for the 3rd set of notches, picking up the stitches of the 6th row at the back, and knitting the 2 rows together as before. Knit 4 rows, and repeat the notches for the last time. It will be seen that this makes a pretty and effective border. When this is completed, knit 3 plain rows, after which the side is to be taken in, at intervals of 3 rows, by knitting the 3rd and 4th stitches from the edge together, and this is to be done ten times; then follow 20 plain rows, and afterwards the side is to be increased 15 stitches, 1 in every alternate row, which will take 30 rows more. The armhole is now reached, for which 85 plain rows are to be counted. The shoulder is decreased every 2 rows by knitting the 3rd and 4th stitches from the armhole

together, and the same decreasing is to take place at the neck, as soon as the stitches on the needle are reduced to 46. In this way the front is brought to a point of 1 stitch at the top. Knit the other front in the same way, but reversed. For the back 100 stitches are to be cast on 2 needles, and when the 4th set of notches like those of the front is completed, it is to be taken in on both sides an equal number of times, then, after 20 even rows, to be increased the same as the fronts, and 70 plain rows knitted for the armholes. The shoulder pieces are to be knitted to the same height as those of the fronts, and sloped in the same way, and the stitches that remain at the throat are then to be cast off. The right front, which wraps over the other, is to have the same border as the edge of the jacket. For this pick up with the smaller needle, on the right side of the work, all the stitches of the edge of the front, knitting them as you take them up (each row of notches will make one stitch, and the intervals between them of 4, 6, and 4 rows must be duly kept), then begin the 5 rows for the first set of notches, with a purl row down from the top, turning back again after knitting the stitch belonging to the first set of notches you come to, leaving the rest on the small needle; complete the five rows, as before, to that point, pick up, with another small needle, the row of stitches just taken up along the front, making their number correspond with those on the needle, and knit them off together in the same manner as before. Now knit the 4 rows for the interval, returning with a purl row, and knitting a stitch at the end from those left, knit another one from the reserve for the beginning of the next row, and take an additional one at the end and beginning of the next 2 rows; the last of which, or 4th row, will commence on the stitch of the 2nd set of notches. Repeat the 5 rows for the notches, pick up the 6th row at the back, counting the one on the needle, and knit the two off together as before. Knit the rest of the border on the same plan, taking up an additional stitch from the reserve at the end and beginning of the rows for the intervals, and in the wide one of 6 rows making 6 buttonholes at equal distances by casting off 2 stitches in the 3rd row, which are replaced in the next by casting on the same number. The buttons are to be fixed to correspond on the other front. Should this way of knitting the border to the front be found too troublesome by some, it is much easier to knit the notched border at once straight down the front from end to end, but the effect will not be so good. At the corner of the wider space of the border, where the join takes place, the stitches may require drawing together afterwards with a needle and wool. Round the throat and armholes the following crochet edge is to be worked: 1st row. A row of trebles separated by 2 Ch.—2nd row. * DC. in the space formed by the 2 Ch., 5 Ch.; repeat from *.

14. Crochet Scarf.

MATERIALS required.—Pearl grey, Berlin, or eider yarn, a long wood crochet needle. 2 white Angora wool tassels, 2 white silk buttons, with cord for the fastening. This is crocheted about 42in. in length, and 40 stitches wide; it is crocheted in plain tricotée. The two sides are joined together with a row of single crochet, the ends drawn up, and the tassels sewn on, and the buttons and loops placed on the neck.

15. Infant's Boot (Knitting).

MATERIALS: ¼oz. blue or any coloured wool, ¼oz. white (Eider yarn or Andalusian is to be preferred to Berlin wool), and a pair of steel knitting needles, size 18 Bell gauge. With the blue cast on 74 stitches, and knit one row plain.—2nd row. Knit 1, * put the wool forward, slip 1 (as if you were going to purl it), knit 1; repeat from *, at the end knit 1.—3rd row. Slip 1, * put the wool forward, slip 1 (as if you were going to purl it), knit the stitch with the wool put over in the previous row as 1 stitch; repeat from *, at the end knit one plain. According to the directions for the third row, knit as far as the 9th row.—10th to 17th rows with white wool. 10th row. Slip 1, * wool forward, slip 1, knit 1 (as in 3rd row) 16 times, * decrease by knitting 2 stitches in 1, knit 4 plain, decrease again, brioche stitch again 16 times, knit 1 (brioche stitch is wool forward, slip 1, knit 1, as in directions for 3rd row).—11th row. Slip 1, brioche stitch to decreased stitch, which purl, and purl also the 4 centre stitches and 2nd decreased stitch, then brioche stitch to the end and knit the last plain; repeat the 10th and 11th rows alternately until there are only 40 stitches on your needle.—The 18th to 25th row knit with blue wool, always remembering to decrease 1 every alternate row on each side of the 4 centre stitches, which are to be knitted plain on the right side, and purled in the back row.—26th to 57th rows with the white wool. When you have decreased sufficiently, and have reduced the stitches to 40, which will be about the 49th row, knit all brioche stitch, for 8 rows, as in the 3rd row. Join on the blue wool in the 58th row, which purl throughout (being a back row).—59th row. Though a front row, purl throughout.—60th row. Knit throughout.—61st row. Knit 1, * wool twice round the needle, knit two together, knit 1 *; repeat from * to the end, knit 1 plain.—62nd row. Slip 1, * knit the row throughout; the thread put round the needle twice in previous row is to be knitted as 1 stitch.—63rd row. Purl throughout the row; break off the blue wool and fasten on the white; this begins the fancy work top, to represent the top of a sock.—1st row. Slip 1, knit 1, * wool forward, knit 2, slip 1, knit 2 together, draw slipped stitch over, knit 2, wool forward, knit 1; repeat from *; finish with wool forward, knit 2, slip 1, knit 1, draw slipped stitch over the knit 1, knit 2.—2nd row. Purl all 40 stitches; repeat these two rows 5 times.—11th and six following rows. Knit 2, purl 2, reversing the stitch in alternate rows, so as to keep the rib.—12th row. Cast off very loosely. The sole is to be knitted thus with the blue wool: Cast on 30 stitches.—1st row. Plain.—2nd row. Knit 1, increase by purling half the 2nd stitch and knitting half, knit to the end of the row; repeat this row until you have 36 stitches on your needle, knit 3 rows plain, and then begin to decrease by knitting together the 2nd and 3rd stitches of each row. When you have again only 30 stitches on your needle, cast off. Now sew the selvages of the boot up the back, and the sole in carefully on the wrong side. Run a cord composed of blue Ch. stitches long enough to tie in front with a double bow, and finished at the ends with tassels, through the holes at the top of the boot, and make a small rosette, also of blue Ch. stitches, to be placed in the centre of the front on the white stripe.

16. Baby's Boot in Honeycomb Knitting.

THIS little boot, which is a particularly good shape, and the model of which came from Paris, may be either knitted with single Berlin wool, pink, turquoise blue, or scarlet, and needles No. 14; or, if a smaller size is wished, No. 16 needles and Andalusian wool of either of the above colours; 1oz. of wool and 5 needles are required. Cast on 16 stitches on each of 3 needles, and work with the 4th.—1st and 2nd rounds. Purl.—3rd and 4th rounds. Plain.—5th round. * Knit 2 together, over; repeat from * all round.—6th round. Plain.—7th and 8th rounds. Purl.—9th round. You are now to commence knitting 34 of the stitches backwards and forwards in rows, for the back of the leg and heel piece, leaving the 14 remaining stitches for the instep, on a separate needle, which will be taken up again later. Take off the 1st stitch, 1 plain (slip 2 stitches from the left to the right needle, inserting it as if about to purl, and keeping the thread behind, 4 plain), do this 5 times, slip a stitch, as before, without working, 1 plain.—10th row. Turn back on the 34 stitches; take off a stitch, slip the same stitch as in last row in the same way, but keeping the thread in front (4 purl, slip the same 2 stitches as in last row, keeping the thread in front), do this 5 times, 2 purl.—11th and 12th rows. Like 9th and 10th.—13th row. Take off the 1st, knit all the rest plain, including those slipped in former rows.—14th row. Plain, taking off the 1st.—15th row. Purl.—16th row. Take off the 1st, 3 purl (slip 2 as before, thread in front, 4 purl), do this 5 times.—17th row. Take off the 1st, 3 plain (slip 2, 4 plain) 5 times.—18th row. Like 16th.—19th row. Like 17th.—20th row. Purl all stitches, except the 1st, which is taken off.—22nd row. All plain, taking off the 1st.—23rd to 36th rows. Repeat the 14 rows from 9th to 22nd, and for the 37th to 43rd rows repeat again from the 9th to the 15th row. Now begin to close the heel as in a stocking, knitting the 10 centre stitches backwards and forwards, and at the end of each short row knitting one of the 12 left on each side with the last stitch.—44th row. Take off 1, 21 purl (the first 12, and 10 centre stitches), and with the last purl, 1 of the 12 left on the left-hand needle; turn back, slipping the 1st, and knit the 10 heel stitches backwards and forwards in "moss stitch" (alternately 1 plain and 1 purl), and with the last, knit or purl one of the 12 stitches left on the other side; turn again, slip the 1st, knit a purl over a plain and a plain over a purl; with the last stitch, knit or purl (according to the pattern) one of the stitches left in the first instance, and proceed knitting in rows of 10 stitches in this manner, till the 12 stitches on each side have been taken up; all back rows end with knit 2 together, aud those on the right side of former work, with purl 2 together. Now with another needle, without breaking the thread, pick up 16 stitches along the edge of the heel piece (next to where you have just left off working), knitting them as you take them up; knit across the 14 stitches left for the instep with another needle, then take up and work 16 stitches down the other edge of heel piece to correspond, passing the last one to the needle already holding the 10 heel stitches; work across these 10 stitches and 1 additional from the next needle, making 12 for the sole. Now begin to work all round with a fifth needle; there should be 56 stitches in all. 1st and 2nd rounds. Purl.—3rd round. * Take off 2 stitches without knitting, 4 plain, repeat from * 6 times more, take off 2 stitches, and knit the 12 stitches for sole, plain. In these and all following rounds care must be taken to make as little gap as possible between the sole stitches and the front on both sides. 4th round. (Take off the same 2 stitches as before, 4 plain), do this 7 times, take off 2 stitches, 12 purl.—5th round. Like 3rd.—6th round. Like 4th.—7th round. Plain, knitting all the stitches.—8th and 9th rounds. Purl.—10th round, 3 plain (take off 2 stitches, 4 plain), do this 6 times, take off 2, 3 plain, 12 plain.—11th round. 3 plain (take off 2, 4 plain), 6 times, take off 2, 3 plain, 12 purl.—12th round. Like 10th.—13th round. Like 11th.—14th round. All plain.—15th and 16th rounds. Purl.—17th to 23rd rounds. Same as 3rd to 10th. The complete honeycomb pattern takes 14 rounds, so go on to the 16th, and continue repeating from the 3rd to the 16th, till the boot is completed. From the 23rd row, the front is to be taken in on each side of the sole, every three rounds, by knitting the first two stitches of the round together, and the two last before the twelve for the sole, which continue the same to the end. These stitches must be either knitted or purled together, according to the rounds in which they occur, the honeycomb pattern being kept up as much as possible. As the number of stitches diminishes, a needle may be withdrawn, so as to have them on only three, one being still kept for the sole. It is a good plan to keep a piece of paper by you, and mark the rows as they are completed, otherwise one is very apt to miss decreasing regularly at the proper time, which would spoil the shape of the boot. Go on numbering the rows as you

Digitized by Google

do them, and when come as far as the 57th row, decrease every alternate instead of every 3rd row, to the end. When the stitches are reduced to 24, put the 12 together on the 2nd needle, turn the boot with care, and cast off the 2 needles together on the wrong side. The top of the boot is finished with crochet.—1st round. * DC. on a stitch of cast-on row, 3 Ch. miss 2, repeat from *; at the end, join by passing through 1st DC., and work 2 singles to bring you to centre stitch of 3 Ch.—2nd round. * DC. on centre stitch of 3 Ch. of former round, 3 Ch., repeat from *; end as in 1st round. —3rd round. * DC. on centre stitch of 3 Ch. of last round, 4 Ch., repeat from *; at the end join to 1st DC.—4th round. DC. into space of 4 Ch. of last round, * 3 Ch., DC. into same space, DC. into next space, repeat from *; join at the end and fasten off. A small plait of the wool is passed through the knitted row of holes, tied in a bow, and finished at the ends with small tassels.

17. Square in Guipure d'Art.

This square, which would form a handsome centre for a cushion, covered with bright coloured satin, or would look well joined together for an anti-macassar, also to be lined with gas green or *ponceau* satin, is done in a new kind of guipure d'art, in which certain parts of the netted foundation are cut away after the embroidery is finished, which gives great lightness to the work. The filled squares occupy four meshes of the netting each way, and the illustration distinctly shows the stitches composing them, the ground having a tiny wheel in the centre of each mesh; and the long leaves above, which are raised and independent of the netting, to which they are only attached at each end, are worked as usual over a thread in *point de reprise*. The smaller squares, of only two meshes each way, are nearly filled up by a larger wheel, and beyond these a band in *point de toile* frames round the square, leaving only one row of meshes, worked in *point lace*, in which the thread is as it were laced in and out, forming a V in each mesh of the netting. When the embroidery is completed, button-hole the squares closely round, and at each place where a picot or thorn is seen in the pattern, take two or three buttonhole stitches on the thread of the netting at right angles with the line of the squares; and in order to continue the former row of overcast, pass the needle back through these two or three stitches to the place where the overcast was interrupted, and go on with it again: this makes these picots secure when the thread on which they are worked is cut away. After all this is done, carefully cut away the threads of the netting where the blank spaces appear in the design, and close to the overcast picots.

18. Square in Guipure d'Art.

This square is the old style of guipure d'art. The ground from the edge is in the well-known *point d'esprit*, surrounding peculiar-shaped figures or stars in *point de toile*, these last being edged round in *point lancé* or long stitch, with coarser thread, which gives a raised appearance. It will be seen that these figures have a small wheel in the centre and a star of 8 points (2 of which are worked in each mesh of the netting) in *point de rône*, which is also familiar to guipure d'art workers, while long stitches sewn over proceed from each point of the centre star to the outer edge of the larger figure. This pattern is capable of being continued to any size.

19. Butterfly (Point Lace).

This butterfly is worked in point lace, the ground being filled with Brussels point; the edge is finished with a fine wire, which helps to keep the shape of the butterfly, and to this a purl edge is added.

20. Designs for Handkerchief, D'Oyley, and Dress Trimmings (Richelieu Guipure).

This style of work is rapidly becoming fashionable in Paris, where it is used for a variety of purposes. It is worked on either fine linen or cambric, according to the use for which it is intended. Soft embroidery cotton is required for button-holing the outlines and bars. We here give two designs: No. 1. Handkerchief. No. 2. A trimming for either dress or furniture. On white piqué or holland costumes this guipure proves an effective style of ornamentation.

21. Butterfly (Point Lace).

This butterfly is worked with fine clear cambric muslin, embroidery cotton, and linen thread. Trace your design on paper, and on it lay the muslin; then trace round the thick work in the wings, and work over this tracing with buttonhole stitch. The edge of the butterfly is braid edged with cord, and an outer edge of picots worked all round it. The thick line in the open part of the wings is all buttonholed with the embroidery cotton. The fine lines are lace thread. The body is made of braid, edged with cord.

22. Louis Quinze Lace.

The braid for making this lace is called Louis Treize, and was originally introduced in Paris for working modern point lace. Two sizes are required for this design. The bars across are simply twisted, not buttonholed, as is usual in modern point. Mme. Boutillier, of 125, Oxford-street, supplied his novelty, and keeps the braid and thread for working it out.

23. Rosette (Crochet).

This rosette should be worked with a fine cotton and hook. Commence with 3 Ch.; unite into a ring.—1st round. Work 7 DC. in the ring.—2nd round. Work 11 D.C. on the last round.—3rd round. 4 Ch., * 1 treble on the next DC., 1 Ch.; repeat from *, working at the end of the round 1 single on the 3rd chain.—4th round, 33 DC.—5th round. 1 DC. on the next DC., * 10 Ch., 1 treble on the 7th of the 10 Ch., 1 Ch., 1 treble on the 5th of the 10 Ch., 2 Ch., 1 treble on the 2nd of the 10 Ch., 1 Ch., miss the next DC. on the last round, work 1 D.C. on each of the two next DC.; repeat from * 10 more times, making when finished 11 leaves in the round.—6th round. You work round the leaves of the last round, * on the first eight of the next 10 Ch., work 3 DC., 3 treble, 2 DC.; in the 9th Ch. work 2 DC.; in the 10th Ch. 1 DC., and on the next treble and chain stitches work 1 DC., 3 treble, 3 D.C., 1 DC. on the 1st of the 2 DC. on the last round, repeat from *, and at the end of the round fasten off.—7th round. Commence at the top of the 1st leaf, and work 1 DC. on each of the 2 DC. stitches worked in the 9th Ch. stitch, * 8 Ch., work 2 DC. on the top of the next leaf; repeat from *.—8th round. * On the next 2 DC. and 8 Ch., work 12 DC.; repeat from *.—9th round. * 4 Ch., 1 DC. on the 3rd of the 4 Ch., 1 treble on the 2nd, 1 long on the 1st, miss 2 DC. of last round, 1 DC. on the next; repeat from * at the end of the round; work in single crochet to the top of the first leaf.—10th round. 1 DC. on the top of the 1st leaf, * 3 Ch., 1 DC. on the top of the next leaf; repeat from *.—11th round. Over each 3 Ch., work 1 DC., 3 treble, 1 DC., and fasten off at the end of the round.

24. Rosette (Braid and Lace Work).

This rosette is intended for covers of all kinds, or for the ends of neckties. It also forms a good trimming for aprons if joined together as a border. Trace your design on stiff paper, and on it tack your braid, sewing all the corners in good shape and well together; fill in by the pattern, using coarse linen thread. On the inside of the outer round of braid in the centre of the pattern work round with button-hole stitch, which makes the braid work even.

25. Rosette (Tatting and Crochet).

You require Evans's cotton No. 28 or 30, a tatting shuttle, and the finest Penelope crochet hook. This rosette is intended for covers, cushions, &c., and when worked in very fine cotton looks very well. They are joined together by the tatted ovals in the two centre purl stitches. Make a chain of 8 stitches, join into a ring.—1st round. Work 12 DC. in the ring.—2nd round. Work 2 DC. in the first, fourth, seventh, and tenth stitches, 1 DC. in each of the others.—3rd round. 4 Ch., * 1 treble on the next DC., 1 Ch.; repeat from *, at the end of the round work 1 single in the 3rd of the 4 Ch.—4th round. Work 1 DC. in each stitch of last round.—5th round. 1 DC. on each stitch of last round.—6th round. 4 Ch., * 1 treble over the next treble in the 3rd round, 1 Ch.; repeat from *, but increasing the number of trebles to make the work lie flat, by working extra stitches on the DC. stitches between the trebles.—7th round. A DC. on each stitch of last round.—8th round. The same as the 7th round.—9th round. Work in the same manner as the 6th; about 50 treble stitches will be required to make this round flat.—10th round. DC. and fasten off. Draw the thread in the shuttle through a DC. on the last round and work a small oval of 3 double, 1 purl, then 1 double, 1 purl, three times, 3 double, draw up, close to this work the large oval of 5 double, 1 purl, then 1 double, 1 purl, three times, 5 double, draw up. Now repeat the first oval, draw up. Divide the stitches in the last round by nine, to find the proper distance these nine trefoils should be from each other, and when you have found the right stitches mark them, and work in each the trefoil joining the first oval to the last oval in the preceding trefoil.

26. Border (Tatting and Crochet).

You commence this border with the foundation or bottom row of ovals. Make an oval of 7 double, 1 long purl, 2 double, 1 long purl, 7 double; draw up, leave half an inch of cotton, and repeat the oval for the distance you require the length of your border. For the edge, which is composed of scollops, with ovals in each scollop, take up the last purl on the first oval 5 and the first purl on the 2nd oval, and knot the cotton through them for the first oval on the scollop; leave about the eighth of an inch of thread, and * work the small oval of 5 double, 1 purl, 2 double, 1 purl, 2 double, 1 purl, 5 double; draw up, leave the same amount of cotton, and repeat from * 3 more times, joining the ovals together, and after the last oval knot the cotton to that left between the 1st and 2nd of these four ovals. Then work a fifth oval in the same manner, joining it to the last worked; knot the cotton into the two large purl stitches again, pass the thread to the two next large purl stitches, and work the oval between the scollops. This is worked with 4 double, join to the 2nd purl of the last oval, 1 purl, 4 double, 1 purl, 2 double, 1 purl, 2 double, 1 purl, 4 double, 1 purl, 4 double; draw up, and pass the cotton to the two next long purl stitches, knot them together, and repeat the scollop, joining the first oval to the large oval worked between the scollops. The thread on the first row of ovals must now be covered with DC. crochet.

27. Insertion (Crochet and Vandyke Braid.)

For this insertion, the centre part of narrow vandyke braid is first to be put together with a fine needle and thread, to form the pattern shown in the illustration No. 29. It will be seen that three following points of the braid meet close together, alternately at the upper and lower edge of the insertion, while the point on each side between them also joins the opposite one. This is easily affected by a stitch or two to connect the points, passing the thread along the wrong side of the work from one to the other, so as not to be perceived. When a sufficient length of this part of the insertion is completed for the purpose it is intended for, make a chain with Ardern's cotton No. 30 and a fine crochet needle, and attach it, as you proceed, by a DC. to each projecting point of the braid. As the least variation in the width of the braid diminishes or increases the distance between these points, no fixed number of chain stitches to connect them can be given, but the worker will soon see how many are required to lie easily between, and will then keep to the same number throughout. The 2nd row for the edge consists of trebles, separated by 1 Ch., and missing a stitch of the foundation chain. The same two rows must be worked on the opposite side of the insertion.

28 and 39. Squares (Guipure d'Art).

These squares can be used either alternately with satin ones for antimacassars or singly for d'oyleys. Full directions for netting and darning appeared in The Queen Almanac for 1868.

29. Border (Crochet).

This edging is worked the short way of the pattern. Commence with 8 Ch., 1 DC. on the first of the 8 Ch. to form a loop, * 9 Ch., turn 1 single on the 2nd of the 9 Ch., forming another loop, turn, 4 Ch., 2 long. Each of these long stitches are worked by twisting the thread 12 times round the needle; take up the 3rd of the last loop of 9 Ch., draw the stitch through all the stitches on the needle, then through the last stitch on the needle, another long on the 4th stitch of the loop of 9 Ch., then 3 picots close together, each worked with 5 Ch., 1 DC. on the first of the five chain, 1 DC. on the 5th stitch of the loop of 9 Ch., 4 Ch., draw through the 4th stitch of the first loop of 8 Ch., turn, 4 Ch., 1 DC. on the first of these four chain, then 8 Ch., 1 single on the first of the 8 Ch. for the under loop; repeat from * the length required. Then you work a row on the under loops, 1 DC. on the 4th stitch of the first loop of 8 Ch., 1 Ch., * 1 DC. on the next loop, 4 Ch., 1 DC. on the top of the next loop, 1 Ch.; repeat from * and fasten off securely at the end.

30. Border (Guipure d'Art).

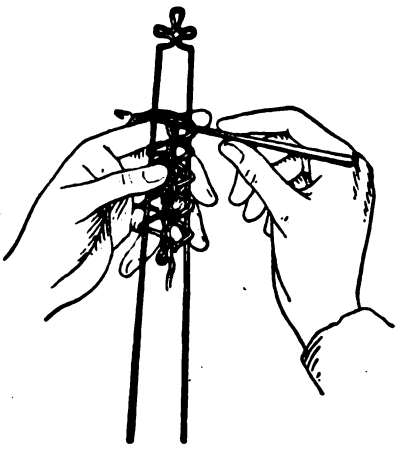
The ground for this border is required 7 stitches wide. When framed and stretched, proceed to work it over. You work first the point de toile in the thick squares, then the stars in point de reprise and the ground with the little wheels in the centre of the squares. The edge is worked over with buttonhole stitch, and is then cut out.

31. Insertion (Braid).

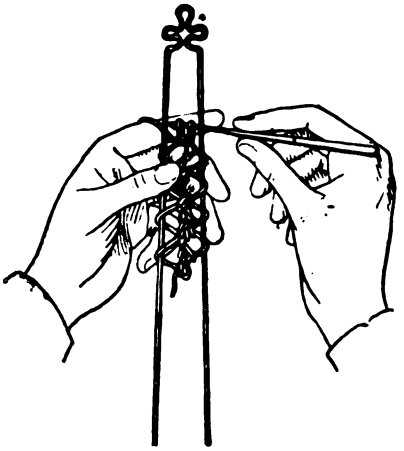
This insertion is made of the Vandyke braid. You commence it with the star. For each star 7 points of braid are required; join the braid neatly together, so that you have 6 clear points, then sew them with a needle and thread firmly together in the middle. Make as many of these as you require. The stars are sewn together on one side only with a needle and thread. When the length of stars is finished, you add the braid on the edge, work a DC. on the first point of another piece of braid for the edge, 1 DC. on the next point of the next star, 4 Ch., 1 DC. on the next point of braid, 4 Ch., 1 DC. on the next point of the star, 1 DC. on the next point of the braid, 4 Ch., a long in the corner of the first star, a long in the corner of the next star (these 2 long stitches must be worked very firmly), 4 Ch., 1 DC. on the point of the next star, 1 DC. on the next point of the braid; repeat from *, then work this edge on the other side the stars.

32. Edging (Hair-pin Crochet).

This kind of crochet was called "hair-pin" because it is worked on a long and thick hair-pin; but, now ivory pins are sold for the purpose. It is done in the open space in the centre of the pin. Hold the pin flat before you in the left hand, and to begin, put the cotton over the left hand prong, holding the end under the thumb in front, then bring it through the space and over the right hand prong, something like the figure 8, and the thread being now at the back, put the crochet needle through under the middle thread, and taking up that from the back, draw it forward in a loop, of which make a chain stitch by taking up the thread again and bringing it through it, as shown in detail No. 1; now take out the needle, and turn the pin over. The thread will now be round the right-hand prong of the pin,* put the needle into the loop just left, make a chain stitch by bringing the thread through it, then insert the needle into the front of the loop that is round the left-hand prong, bringing the thread through it, thus making two loops on the needle, as shown in detail No. 2; then take up the thread again, and pass through both, like a DC. stitch; and take the needle out, turn the pin over, and recommence from * till you have the length required.



No. 1. Detail of Edging.



No. 2. Detail of Edging.

When the pin is full, and you can work no more conveniently (having finished with the double stitch), draw it out, and, turning the work over, thread the prongs again through two or three of the last loops on each side, taking care that the thread is in front of the right-hand prong, ready to begin the next stitch, then proceed as usual. This stitch, done in black netting silk, makes a pretty kind of chain gimp to lay on the hem of black silk flounces, or in colours, for white grenadine, also for other purposes. For the edging shown at No. 32, which, it will be seen, is composed of circles, use Ardern's cotton No. 22 for these, and No. 26 for the heading. When 14 loops over the pin can be counted on each side, cut off the thread, leaving an end to work with, and, having pulled it through to fasten the stitch, draw out the pin and run the cotton through the open loops on one side, drawing them up together to form the centre of the circle, and fasten off the thread securely, at the same time joining the other part of the circle by passing it in and out through the thick crochet work; fasten off the other end in the same way, thus completing one of the circles. For each scollop of the edging three of these are required, and must be fastened together, in the form seen in the illustration No. 32, with a needle and very fine thread, sewing over the open loops, so as not to be perceived. The 6 open loops at the top of the lower circle are joined to 3 of each of those at the sides, while 2 loops of each of the latter meet above, the top pair of which must be held together with two buttonhole stitches for greater security, and the thread fastened off or passed on to the next scollop through the thick work. When a sufficient number of circles are thus joined for the length desired, the heading is to be made with the finer cotton.—1st row. * DC. in each of the open loops of the circles along the upper edge, and 1 Ch. between each, except between 2 circles, when 2 Ch. must be made a treble taken into the space where the 2 overcast stitches were made in the joining, 2 Ch., and repeat from *.—2nd row. * 1 treble, 2 Ch., missing 2 of former row; repeat from * throughout.

33. Insertion (Tatting and Braid).

This pattern is composed of three rows of stars, the outer ones of which are attached to a row of cordon braid, work with very fine cotton and No. 2 cordon braid. The length of the work is decided by the middle row of stars, as they are worked first in one long length.

The Stars.—You commence the stars in the middle by a ring of 1 double, 1 purl, then 2 double, 1 purl, 5 times, 1 double, draw up, join to a second thread, and work over it an oval of 3 double, 1 purl, 3 double, join to the next purl on the ring, and repeat 5 more times, making six ovals, then * pass the thread from the shuttle through the first purl of last round, place the loop on your hand and work over it an oval of 3 double, 1 purl, 1 double, 1 purl, 1 double, 1 purl, 3 double, draw up; repeat from *, taking up each purl stitch in succession, and fasten off neatly. Join the stars together by the centre purl stitch in the last round of ovals, and in the outside rows join the outside ovals to a loop on the braid, using the engraving as your guide.

34. Crochet Pattern.

This pattern is very useful and effective worked in fine cotton for nightcaps, antimacassars, &c. All the little stars are worked first; for each of these make a chain of 6, 1 DC. on the first Ch., 5 Ch., 1 single on the DC., 5 Ch., 1 single on the DC., 5 Ch., 1 single on the DC., then over every 5 Ch. work 7 DC., and at the end fasten off very securely. The stars are joined together in rows. Commence with the lowest horizontal row.—1st row.

Digitized by Google

3 Ch., 1 DC. on the 4th of the 7 DC. over the star, * 12 Ch., 1 DC. on the next star; repeat from *. At the end of the row work 7 Ch., 1 DC. on the next point of the star, 7 Ch., 1 DC. on the next point.—2nd row. * 6 Ch., take up another star, 1 DC. on the 3rd point of the star, 6 Ch., 1 DC. on the next point of the next star; repeat from *. At the end of the row work 7 Ch., 1 DC. on the side of the first star, 3 Ch., join to the first Ch. in the first row.

The following horizontal rows are worked in the same manner, the perpendicular rows are worked next; they are all worked alike. Commence with a single on the 4th Ch. after the first DC. in first row, 2 Ch., 1 DC. on the first star, * 7 Ch., 1 DC. on the star above, repeat from *. The slanting rows are worked last. You commence these on the same stitch as the perpendicular rows, joining to it with a single, 9 Ch., 1 single on the right-hand corner at the top of the first square, 9 Ch., 1 single on the right-hand square in the next row. Work all the rows in this direction first, then the rows slanting to the left. Commence on the lowest right-hand corner of the square, 4 Ch., draw through the 5th of the 9 Ch. in the last slanting row, 4 Ch., draw through the top corner stitch at the left hand of the square; repeat in this manner until all are finished.

35. Medallion (Braid and Needlework).

These medallions may be used for the ends of muslin neckties, or joined together for antimacassars, covers, &c. You require fine vandyke braid, and Ainsworth's linen thread No. 60. The inner circle of braid consists of 8 scollops. You require for each of these scollops 3 points of braid at each end of the scollop. With a needle and thread join 2 points together (leaving one or two for joining where you commence). This makes one scollop. Pass the thread to the outside of the braid; leave 1 point from the top of the scollop, and join the next two together. Work in this manner until you have the 8 scollops; join these 8 together inside. Then join 16 scollops, leaving two points of braid between the top and bottom of each scollop, and join the bottom point of every alternate scollop to the top of the last round of braid. You then tack the braid on stiff paper, and fill in the centre and spaces between the two rounds of braid with needlework.

36. Design (Crochet and Tatting).

This pattern may be used for pincushion covers or for antimacassars, in Shetland wool for caps, hoods, &c. You must work first a sufficient number of the tatted stars to form a small square, and then increase the dimensions of the square afterwards. Each star is worked with 4 ovals, each oval of 8 double, 1 purl, 8 double; now work the lowest horizontal row of crochet. Work 1 DC. in the left-hand oval of a star, * 7 Ch., 1 DC. in the purl of the next oval of the same star, 10 Ch., work back on the 9th Ch., 1 DC., 1 treble on each of the next 4 stitches, 1 DC. on the next, 4 Ch., 1 DC. on the picot of the next star; repeat from *. At the end, finish with a tatted star, and work 7 Ch. and a DC. in the 3rd oval of the corner star. 2nd row is worked back, 4 Ch., a little leaf as before on the extra 6 Ch., 4 Ch., a DC. on the 4th oval of the same tatted star; take up at the same time another star, and draw the purl stitch through when working this DC., 10 Ch., turn the work over, work back a leaf on the last 6 stitches, 4 Ch., take up the purl on the next star and the one just taken up, and repeat the row; at the end work 10 Ch., draw the last through the stitch at the top of the last little leaf, then a DC., 3 treble, a DC. as before, 4 Ch., take up another star, and work a DC. in the purl.—3rd row. * 10 Ch., draw the last through the point of the two little leaves just worked together, 1 DC., 3 treble, 1 DC., 4 Ch., work a DC. in the star of last row and the one taken up, 10 Ch., a DC. 3 treble, a DC. on the last 5 stitches of the same, 4 Ch., a DC. on the next oval of the star, and take up another; repeat from *, joining the next leaf to the one underneath. Work all the rows together in this manner, then work the lines on the sides of each star. These are worked in exactly the same manner, the little leaves being joined to those previously worked to form the crochet stars; a single should only be worked on the DC. stitches in the corners of the different stars, or it will make the pattern too thick.

37. Edging (Crochet).

This little border should be worked in coloured cotton to harmonise with the dress, or in thick black crochet or purse silk. Make a chain of 10, *, then work close together three picots, each picot being of five chain, 1 DC. on the first of the five chain. Twist the thread 12 times round the needle, take up the Ch. just before the first picot, draw the thread through all the stitches on the needle, finish the stitch in the usual manner, then a picot of 5 Ch. again; another long stitch like the last, but with the thread 16 times round the needle on the 10th Ch., a picot, a long like the first on the 10th Ch., 3 picots as before, 1 single on the 10th Ch., 1 DC. on the 9th and 9th Ch. stitches, 10 Ch., and repeat from *. In working the 2nd row, turn, after the 2nd DC. on the 10th Ch., work 9 Ch., 1 single on the 5th of the same 9 Ch., * 1 DC. on the middle Ch. between the two points, 4 Ch., 1 treble in the middle of the next DC., 5 Ch., 1 single on the last treble, 5 Ch., and repeat from *.

38. Insertion (Tatting).

This insertion is worked entirely with two shuttles or threads. Commence with the scollop to the left of the pattern, join the two threads together, with the first shuttle work over the other thread, 1 double, then * with the shuttle only, an oval of 16 double, draw up, over the 2nd thread 3 double; repeat from * twice, then repeat five more times, but gradually decrease the number of stitches in the oval, making the two next with 13 double, and the remainder with only 10 double in each; then reverse the work, work an oval of 3 double, join to the thread between the 5th and 6th ovals, 3 double, join to the thread after the first double, 3 double, 1 purl, 3 double, draw up. Now repeat the scollop, following the engraving as you work for the arrangement of the ovals and joining of the scollops.

40. Edging (Crochet and Mignardise Braid).

For this edging, use Mignardise braid of the size seen in the illustration, Arden's cotton No. 26, and a fine crochet needle. By selecting a coarser braid, cotton No. 16 or 20, and a rather larger needle, the edging may be made wider and stronger, according to the purpose for which it may be required. The whole is worked in only 2 rows, as follows. 1st row. Take up 2 loops of the braid at once, and join by a DC., 1 Ch., a picot (consisting of 5 Ch., take the needle out, and close by drawing the loop through the previous stitch), 1 Ch., join the 2 next loops of the braid together by a DC., 5 Ch., each of them separated by a picot, making 4 picots in all, then put the thread loosely 8 times round the needle, taking the last through the 1st of the 5 Ch., and taking up the thread again, bring it through all the loops on the needle, holding them with the thumb and forefinger of the left hand (this is rather troublesome to manage at first, but after a few trials the worker will get into the way of it); miss the next loop of the braid, and repeat from the commencement. The 2nd row forms the head of the edging. * Join 2 loops of the other edge of the braid together by a DC., 1 Ch., a picot, 1 Ch.; repeat from *.

41. Insertion (Tatting).

This pattern is very effective worked with fine thread and laid over ribbon for children's dresses, pinafores, &c. The pattern is formed of small ovals, all worked the same size, and joined together to form the scollop. The work is reversed between each oval; the inside ovals are worked with 8 double, 1 purl, 8 double; the outside with 1 double, 1 purl, 7 double, 1 purl, 1 double. Every alternate oval is joined together by the first purl stitch, which makes the pattern stronger. The 3 inside ovals at the bottom are joined together in working the last one of the five at the top of the pattern.

42. Fancy Knitting Stitch.

This is a peculiar and uncommon stitch, but rather difficult to execute, except for experienced knitters; it has raised kind of *bosses* over it at regular intervals, of which the illustration hardly conveys the idea. This stitch would be effective as an antimacassar for a dining room or library, knitted with coarse cotton. Cast on any number of stitches that will divide by 22, add one additional to make the two sides alike, and 2 or more edge stitches on each side, which will not be included in the pattern, but must be always knitted plain, taking off the 1st stitch of each row. The whole must be knitted tightly, and the double "overs" knitted off as one stitch in the next row, throughout the pattern. After a purl row, begin the 1st pattern row. * 1 plain, over twice, 2 plain, 2 purl, 2 plain, 3 purl, slip 1, knit 2 together, pass slipped stitch over, 3 purl 2 plain, 2 purl 2 plain, twice over; repeat from *, end with 1 plain, after the "over twice."—2nd row. 1 purl, * over twice, 1 plain, on "over twice" of last row, 2 purl, 2 plain, 2 purl, 2 plain, purl 2 together, put the stitch back on lefthand needle, keeping the thread in front, and pass the next stitch beyond over it, 2 plain, 2 purl, 2 plain, 2 purl, 1 plain on the "over twice" of last row, over twice, 1 purl; repeat from *.—3rd row. * 1 plain, over twice, 2 purl (the first of them on the "over twice" of former row let off as one stitch), 2 plain, 2 purl, 2 plain, 1 purl, slip 1, knit 2 together, pass slipped stitch over, 1 purl, 2 plain 2 purl, 2 plain, 2 purl (2nd one on the "over twice"), over twice, repeat from *; end with 1 plain, after the "over twice."—4th row. 1 purl, * over twice, 1 purl on the "over twice" of last row, 2 plain, 2 purl, 2 plain, 2 purl, purl 2 together, put back on left hand needle and pass next stitch over, 2 purl, 2 plain, 2 purl, 2 plain, 1 purl, on the "over twice" of last row, over twice, 1 purl, repeat from *. 5th row. * 1 plain, over twice, 2 plain (the first of these on the "over twice"), 2 purl, 2 plain, 2 purl, 1 plain, slip 1, knit 2 together, pass slipped stitch over, 1 plain, 2 purl, 2 plain, 2 purl, 2 plain, (the 2nd on "over twice"), over twice, repeat from *, end with 1 plain, before the edge stitches.—6th row. 1 purl, * over twice, 1 plain (on the "over twice"), 2 purl, 2 plain, 2 purl, 2 plain, purl 2 together, put back on left-hand needle, pass next stitch over, 2 plain, 2 purl, 2 plain, 2 purl, 1 plain (on the "over twice"), over twice, 1 purl, repeat from *.—7th row. * 1 plain, over twice, 2 purl (the 1st on the "over twice"), 2 plain, 2 purl, 2 plain, 1 purl, slip 1, knit 2 together, pass slipped stitch over, 1 purl, 2 plain, 2 purl, 2 plain, 2 purl (the 2nd on "over twice"), over twice; repeat from *; end with 1 plain, before the edge stitches.—8th row. 1 purl, * over twice, 1 purl (on the "over twice"), 2 plain, 2 purl, 2 plain, 2 purl, purl 2 together, put back on left-hand needle, and pass next stitch over, 2 purl, 2 plain, 2 purl, 2 plain, 1 purl (on "over twice"), over twice, 1 purl, repeat from *.—9th row. * 1 plain, over twice, 2 plain (1st on the "over twice"), 2 purl, 2 plain, 2 purl, 1 plain, slip 1, knit 2 together, pass slipped stitch over, 1 plain, 2 purl, 2 plain, 2 purl, 2 plain (2nd on the "over

twice"), over twice, repeat from *.—10th row. Plain throughout, knitting the "over twice" wherever it occurs as one stitch.—11th row. Purl. throughout.—12th row. Plain throughout. For the second repetition, the pattern must alternate, the "slip 1, knit 2 together, pass stitch over," coming over the plain stitch, with the "over twice" on each side of it, which necessitates a different arrangement of the stitches.—13th row. * Slip 1, knit 2 together, pass stitch over (at the beginning of row this must be worked slip 1, knit the next, pass stitch over), 3 purl, 2 plain, 2 purl, 2 plain, over twice, 1 plain, over twice, 2 plain, 2 purl, 2 plain, 3 purl, repeat from *; end with slip 1, knit 1, pass stitch over, next the edge stitches. 14th row. * Purl 2 together, put back on left-hand kneedle, pass next stitch over (at the beginning of row, this is to be worked 1 purl, put back, pass next stitch over), 2 plain, 2 purl, 2 plain, 2 purl, 1 plain, over twice, 1 purl, over twice, 1 plain, 2 purl, 2 plain, 2 purl, 2 plain; repeat from *; end with 1 purl, put back, pass stitch over, next the edge stitches.—15th row. * slip 1, knit 2 together, pass stitch over (1st time work this as directed in 13th row), 1 purl, 2 plain, 2 purl, 2 plain, 2 purl, over twice, 1 plain, over twice, 2 purl, 2 plain, 2 purl, 2 plain, 1 purl, repeat from *; end like 13th row.—16th row. * Purl 2 together, put back on left-hand needle, pass next stitch over (at the beginning of row this is to be worked 1 purl, put back, pass next stitch over), 2 purl, 2 plain, 2 purl, 2 plain, 1 purl, over twice, 1 purl, over twice, 1 purl, on "over twice" of last row, 2 plain, 2 purl, 2 plain, 2 purl, repeat from *; end with 1 purl, put back, pass stitch over, next the edge stitches.—17th row. * Slip 1, knit 2 together, pass stitch over, (work 1st time as directed in 13th row), 1 plain, 2 purl, 2 plain, 2 purl, 2 plain (last one "over twice"), over twice, 1 plain, over twice, 2 plain, 2 purl, 2 plain, 2 purl, 1 plain, repeat from *; end as in 13th row.—18th row. * Purl 2 together, put back on left-hand needle, pass next stitch over (work first time as directed in 14th row), 2 plain, 2 purl, 2 plain, 2 purl, 1 plain (on "over twice"), over twice, 1 purl, over twice, 1 plain (on "over-twice"), 2 purl, 2 plain, 2 purl, 2 plain, repeat from *; end as in 14th row.—19th row. * Slip 1, knit 2 together, pass stitch over (work 1st time as in 13th row), 1 purl, 2 plain, 2 purl, 2 plain, 2 purl, over twice, 1 plain, over twice, 2 purl, 2 plain, 2 purl, 2 plain, 1 purl, repeat from *; end as in 13th row.—20th row. Purl 2 together, put back on left-hand needle, pass next stitch over (1st time work as in 14th row), 2 purl, 2 plain, 2 purl, 2 plain, 1 purl (on "over-twice"), over twice, 1 purl, over twice, 1 purl, 2 plain, 2 purl, 2 plain, 2 purl, repeat from *; end like 14th row.—21st row. * Slip 1, knit 2 together, pass stitch over (1st time work as in 13th row), 1 plain, 2 purl, 2 plain, 2 purl, 2 plain, over twice, 1 plain, over twice, 2 plain, 2 purl, 2 plain, 2 purl, 1 plain, repeat from *; end like 13th row.—22nd row. Plain throughout.—23rd row. Purl.—24th. Plain. Now commence again at 1st row.

43. Tatted Insertion.

THIS useful and pretty pattern is worked with 2 shuttles. Commence with the shuttle only for the first inside oval, 8 double, 1 purl, 8 double, draw up, * work another oval close to this with the same shuttle, of 8 double, 1 purl, 8 double, draw up; now work with this shuttle, over the thread from the 2nd shuttle, 5 double, 1 purl, then 1 double, 1 purl, 4 times, 5 double. With the first shuttle work another oval of 8 double, join to the purl in the last oval, 8 double, draw up; repeat from * the length required, then turn the corner by joining the 3rd oval to the 2 last worked, * over the 2nd thread, 5 double, 1 purl, then 1 double, 1 purl, 4 times, 5 double, draw up; work another oval and join to the last three ovals, work another oval and join to the next two ovals; repeat from the last *. This is a very useful pattern for muslin bodices, jackets, &c.

44. Fancy Knitting Stitch.

FOR the fancy knitting stitch seen at No. 44, cast on a number of stitches that will divide by 24, and if for an antimacassar, add an additional stitch at one end, to make the two sides uniform, and 2 edge stitches on each side, which are not included in the pattern, and must always be knitted plain, taking off the 1st stitch.—1st row. * 1 plain, knit 2 together, 9 plain, over, 1 plain, over, 9 plain, knit 2 together, repeat from *; at the end of row 1 plain for the extra stitch.—2nd row. 1 purl, * 10 purl, 1 plain, 1 purl, 1 plain, 11 purl, repeat from *.—3rd row. 1 plain, knit 2 together, 8 plain, over, 1 purl, 1 plain, 1 purl, over, 8 plain, knit 2 together, repeat from *; at the end 1 plain.—4th row. 1 purl, * 10 purl, 1 plain, 1 purl, 1 plain, 11 purl, repeat from *.—5th row. * 1 plain, knit 2 together, 7 plain, over, 1 purl 3 times, with a plain stitch between each, over, 7 plain, knit 2 together, repeat from *, at the end 1 plain.—6th row. 1 purl, * 9 purl, 1 plain 3 times, with 1 purl between each, 10 purl, repeat from *.—7th row. * 1 plain, knit 2 together, 6 plain, over, 2 plain, 1 purl, 1 plain, 1 purl, 2 plain, over, 6 plain, knit 2 together, repeat from *; at the end 1 plain.—8th row. 1 purl, * 8 purl, 1 plain 4 times, with 1 purl between each, 9 purl, repeat from *.—9th row. * 1 plain, knit 2 together, 5 plain, over, 1 plain 5 times, with 1 purl between each, over, 5 plain, knit 2 together, repeat from *; at the end 1 plain.—10th row. 1 purl, * 8 purl, 1 plain 4 times, with 1 purl between each, 9 purl, repeat from *.—11th row. * 1 plain, knit 2 together, 4 plain, over, 1 plain 6 times, with 1 purl between each, over, 4 plain, knit 2 together, repeat from *; at the end 1 plain.—12th row. 1 purl, * 7 purl, 1 plain 5 times, with 1 purl between each, 8 purl; repeat from *.—13th row. * 1 plain, knit 2 together, 3 plain, over, 2 plain, 1 purl 5 times, with 1 plain between each, 2 plain, over, 3 plain, knit 2 together; repeat from *; at the end 1 plain.—14th row. 1 purl, * 6 purl, 1 plain 6 times, with 1 purl between each, 7 purl; repeat from *.—15th row. * 1 plain, knit 2 together, over, 2 plain, 1 purl 6 times, with 1 plain between each, 2 plain, over, 2 plain, knit 2 together, repeat from *; at the end 1 plain.—16th row. 1 purl, * 6 purl, 1 plain 6 times, with 1 purl between each, 7 purl; repeat from *.—17th row. * 1 plain, knit 2 together, 1 plain, over, 2 plain, 1 purl 7 times, with 1 plain between each, 2 plain, over, 1 plain, knit 2 together, repeat from *; at the end 1 plain.—18th row. 1 purl, * 5 purl, 1 plain 7 times, with 1 purl between each, 6 purl, repeat from *.—19th row. * 1 plain, knit 2 together, over, 19 plain, over, knit 2 together, repeat from *; at the end 1 plain.—20th row. 1 purl, * 24 purl, repeat from *.—21st row. Knit 2 together, * over, 21 plain, over, slip 1, knit 2 together, pass slipped stitch over, repeat from *; at the end knit 2 together instead of slip 1, &c.—22nd row. 1 purl, * 24 purl, repeat from *.—23rd row. To repeat the pattern, a different arrangement of the stitches is necessary, that it may alternate; * 1 plain, over, 9 plain, knit 2 together, 1 plain, knit 2 together, 9 plain, over, repeat from *; at the end, 1 plain.—24th row. 1 plain, * 1 purl, 1 plain, 21 purl, 1 plain; repeat from *; at end 1 purl additional.—25th row. * 1 plain, 1 purl, over, 8 plain, knit 2 together, 1 plain, knit 2 together, 8 plain, over, 1 purl, repeat from *; at end 1 plain additional.—26th row. 1 plain, * 1 purl, 1 plain, 21 purl, 1 plain, repeat from *.—27th row. * 1 purl, 1 plain, 1 purl, over, 7 plain, knit 2 together, 1 plain, knit 2 together, 7 plain, over, 1 purl, 1 plain, repeat from *; end with 1 purl additional.—28th row. 1 purl, * 1 plain, 1 purl, 1 plain, 19 purl, 1 plain, 1 purl, repeat from *.—29th row. * 1 plain, 1 purl, 2 plain, over, 6 plain, knit 2 together, 1 plain, knit 2 together, 6 plain, over, 2 plain 1 purl, repeat from *; end with 1 plain additional.—30th row. 1 plain, * 1 purl, 1 plain, 1 purl, 1 plain, 17 purl, 1 plain, 1 purl, 1 plain; repeat from *.—31st row. * 1 plain 3 times, with one purl between each, over, 5 plain, knit 2 together, 1 plain, knit 2 together, 5 plain, over, 1 plain, 1 purl, 1 plain, 1 purl, repeat from *; at the end 1 plain additional.—32nd row. 1 plain, * 1 purl, 1 plain, 1 purl, 1 plain, 17 purl, 1 plain, 1 purl, 1 plain; repeat from *.—33rd row. * 1 purl 3 times, each followed by 1 plain, over, 4 plain, knit 2 together, 1 plain, knit 2 together, 4 plain, over, 1 plain 3 times, with 1 purl between each, repeat from *; end with 1 plain additional.—34th row. 1 plain, * 1 purl, 1 plain, 1 purl, 1 plain, 15 purl, 1 plain 3 times, with 1 purl between each; repeat from *.—35th row. * 1 plain 4 times, with 1 purl between each, over, 3 plain, knit 2 together, 1 plain, knit 2 together, 3 plain, over, 1 plain 3 times, with 1 purl between each, repeat from *; end with 1 plain additional.—36th row. 1 purl, * 1 plain 3 times, with 1 purl between each, 13 purl, 1 plain, 3 times, each followed by 1 purl; repeat from *.—37th row. * 1 plain 3 times, each followed by 1 purl, 2 plain, over, 2 plain, knit 2 together, 1 plain, knit 2 together, 2 plain, over, 2 plain, 1 purl 3 times, with 1 plain between each, repeat from*; end with 1 plain additional.—38th row. 1 plain, * 1 purl 3 times, with 1 plain after each, 13 purl, 1 plain 3 times, with 1 purl between each; repeat from *.—39th row. 1 purl 4 times, with 1 plain between each, 2 plain, over, 1 plain, knit 2 together, 1 plain, knit 2 together, 1 plain, over, 2 plain, 1 purl, 3 times, with 1 plain after each, and repeat from *; end with 1 plain additional.—40th row. 1 plain, * 1 purl, 3 times, with 1 plain after each, 11 purl, 1 plain 4 times, with 1 purl between each, repeat from *.—41st row. * 10 plain, over, knit 2 together, 1 plain, knit 2 together, over, 9 plain, repeat from *; at the end 10 plain instead of 9.—42nd row. 1 purl, * 24 purl, repeat from *.—43rd row. * 11 plain, over, slip 1, knit 2 together, pass slipped stitch over, over, 10 plain, repeat from *; at the end 11 plain instead of 10. Commence again at 1st row. This is a good stitch done in stripes of two patterns wide, both for quilts and toilet covers; for the former use Strutt's No. 8, 3-thread, cotton, and needles, No. 14, and for the latter No. 10 cotton, and needles No. 15. In both cases, as the stripes are to be joined together, it is better to dispense with the edge stitches, except on the outer side of the two stripes forming the outside edges of the quilt or toilet cover. The additional stitch at the end of the row (making 49 for 2 patterns) would be best retained, as it will be taken up in sewing two stripes together. For toilet covers the stripes are better to go across than lengthwise.

To Clean Grebe.—Mix sufficient starch with cold water to make it of a good thickness, then put it on the grebe with a tooth brush, which will give it the appearance of being spoilt. Dry it slowly near a fire, gently shaking it all the time; when dry, brush out the starch. Another plan is to rub the grebe the way of the feathers, with a clean piece of flannel dipped in turpentine, and entirely cover the article with plaster of Paris, so as to exclude the air; let it lie for a week, and then shake it well to get all the dust out. The same plaster of Paris may be used several times by keeping it free from dust.

Uninflammable Dresses.—Tungstate of soda is used for rendering fabrics non-combustible. Where the material requires starching, to three parts of dry starch add one part of tungstate of soda, and use the starch in the ordinary way. If the material do not require starching, mix in the proportion of one pound of tungstate of soda to two gallons of water; well saturate the fabric with this solution, and dry it. It may afterwards be ironed, as the heat of the iron in no way affects the non-inflammability. The tungstate of soda, prepared expressly, can be obtained by order of any chemist. Silk tulle would certainly not bear treating in this manner.

Dress and Fashion.

MOVEMENTS OF FASHION, 1872-73.

One year ago, Paris was in no mood to turn her attention to creating New Fashions, and it was thought she would renounce the supremacy she has ever held in the world of dress. Speculations were rife as to whether Brussels, London, New York, or Berlin, would take up the fallen mantle, and from which capital edicts of what the civilized world was to wear were in future to be issued. But no such displacement took place, the wonderful vitality of the French nation asserted itself, and the activity of the people during the past year has been prodigious, more especially in the manufacture of luxuries. Never did France fabricate more beautiful dress materials, and never were ladies' toilettes at races and on all fête occasions more magnificent than during 1872. Those who look on the surface of events only, are wont to apostrophise our neighbours across the Channel as an "incorrigible nation" on this account. But such judgments are unfair and short-sighted. To manufacture articles of taste and luxury, to provide a continuous succession of novelties in all matters relating to a lady's toilette, is the speciality of *la belle France*. If she renounced luxury she would be ruined, and the ten milliards would be an impossibility.

The new year sees many changes, not only in form and material, but in colour. The costumes of the last three reigns before the Revolution—Louis XIV., Louis XV., and Louis XVI.—have for some time past set the law of Fashion. The stay of the French Assembly at Versailles has much to do with this, as it gives the fashionable world an opportunity to compare the grace, richness, and fancifulness of these costumes as displayed in the national pictures there, with the shabbiness and ugliness of the dresses of the Restoration, and even of the Monarchy of 1830. From the age of Louis XIV., and from the Grand Monarch himself, the large square vests are borrowed; from that of Louis XV. the Pompadour fabrics and high voluminous head-dresses, and from Louis XVI. the polonaises which in those days were called *deshabillés*.

A curious tendency of the prevailing Fashion is to throw all trimmings backwards. On meeting a lady, you think her simply dressed; she turns round, and immediately there is a change of scene. The profusion of loops and bows of ribbon, flounces, cascades of lace fringe, plaits, &c., &c., which cover the back breadths is amazing. There is now little similarity between the front and back of a skirt. The back is often flounced to the waist, while the front has but one or two plaitings at most.

The popular colours during 1871 have been indescribable—faded pinks, sickly blues, salmon not of the freshest, and the inevitable *ecru* prevailed during spring and summer, and for autumn these were succeeded by reseda, all shades of bronze and olive green. At the opening of the new year we have deeper shades of bronze, prune colour (which is a rich plum, with a dash of blue), a Holbein green, an olive green, a very deep reseda, and peacock shades, which are neither blue nor green, but a mixture of both. But if the colours have been eccentric, the combinations are still more so; prejudices have been thrown to the winds, and the most daring approximations made. Heading to flounces, plaitings, and falls of silk dresses are now all lined with silk, and the lining is so contrived that it shows beyond the edge as a sort of cording. Purple and plum-coloured dresses are lined and trimmed with blue, light olive and celedon green is trimmed with pink, lavender with blue, vert de gris with rose, and so on. When these are well done, and the exact shades hit upon, the result is artistic and original.

The make of dresses has undergone a great change. As mentioned before, all the trimming and fulness is at the back, and to affect this more certainly, the skirts and petticoats are all tied back with inner strings. Waistcoats have been much worn, long square ones are the newest, the back of a bodice is elaborately trimmed, basques are universal, and there is a large amount of scolloping, vandyking, and edges cut in the form of a battlement, all of which are bound with silk if the material is cashmere, and with velvet if silk. Tunics are long, and are draped up at the sides, that they fall in folds over the front breadth. The looping up of paniers and polonaises is now contrived with elastic loops and large buttons. Many out-door garments have been experimented on, but the polonaise still obtains, and for many reasons—it is easily adapted to all ranks in life, and can be modified according to the degree of wealth, while keeping the general characteristics which render them universal. It can be made of linen as well as of silk, satin, or velvet, and can be trimmed with braid or with the richest lace or fur. The majority after all decide whether any particular garment is to be fashionable or not. Dolmans and mantelets, and Hungarian jackets, and talmas, and redingotes are also worn, but not one so well liked as the polonaise.

In hats and headdresses generally the changes have been very important. The hats and bonnets are worn much more at the back of the head, and front hair is consequently seen. Watered ribbon is used more than in faille. The trimmings are much at the back, and a garland of flowers hang on loops and ends of ribbon generally falls considerably below the chignon. The hat with wide brim turned up at one side with a bow—called in Paris "Rubens," and in London and Brighton, "Rubagas," is the favourite. An illustration of it will be found among the engravings. Nets have expanded—the brims are wider and the crowns higher; the rings are now the point which decides whether any particular head-gear is a hat or a bonnet. If the distinguishing feature of strings is there it is at once pronounced to be a bonnet. Chignons are altered; they are not so large, nor so stiff, nor so long. An infinite quantity of false hair is still worn; but it is arranged over light *crêpés*, and much closer to the head; and fabulous sums are spent on furs this winter, and the price of certain skins that are in vogue has risen to four times the original value. Sealskin jackets are now bordered either with otter or beaver; velvet is edged with either silver fox or beaver points, and velveteen with jeannette; Cashmere is elaborately braided, and velvet equally elaborately embroidered. It will be gathered from these remarks that the prosperity of the country is manifest, even in our ladies' toilettes, for as the year 1873 opens magnificence and luxury are apparent as much in the accessories as in the principal items in a lady's costume.

Fashionable Toilette.

No 1. Toilette de Reception.—This toilette is made of two shades of blue faille—bleu de France for the darker, and pale blue for the lighter. The silk is embroidered with dark blue and trimmed with white lace. The under skirt of the light blue faille is bordered with a deep flounce, headed by a ruche, bound and ornamented with bands of the darker blue; the tablier is likewise crossed with dark blue. The train turns back with *revers*, lined with light blue; it is looped up *en pouf*, and trimmed with embroidered bands and white lace. The bodice of dark blue faille has white tulle sleeves and fichu.

No. 2. Toilette de Visite.—Black silk skirt, with a deep kilt plaiting at the back, the tablier being trimmed with flounces and ruches. Grey silk polonaise, bordered with a band embroidered *à la Pompadour*, edged with black velvet ribbon. At each corner of the polonaise there is an embroidered bouquet. It is looped up at the back with an embroidered band, which is tied at the side as a sash. Black lace forms a fichu on the bodice, and the sleeves are likewise trimmed with lace and velvet.

1. The new Watteau Style of Hairdressing.

The hair is parted across the head from ear to ear. At the top of the head a small plait is formed and fastened into a round, and this serves as the *point d'appui*. Two close curls are formed each side of the front parting over the forehead, and at the back four straight rouleaux, all of which are fastened at the top of the head. The ends of these are interlaced into loops. A thick ringlet covers the nape of the neck, and a garland of flowers and marguerites terminates it.

2. The new Louis XI. Style of Hairdressing.

This is commenced in the same way as the preceding headdress. At each side of the front parting there are four long rouleaux. At the back there are four rouleaux, with interlaced loops in the middle. A thick strand of hair is then taken and a large 8 is executed with it. A rose and leaves at the side.

Fashionable Hats and Bonnets.

No. 1. The Rubens Hat.—This picturesque hat is exceedingly popular with the Parisians. It is of black felt; the wide brim is turned up at the side with bows of rich faille ribbon. A long handsome ostrich feather curls round the crown, and falls over the left shoulder.

No. 2. The Montespan Hat.—Black felt hat, with brim lowered over the forehead in front, and turned up at the back with black faille ribbon, fastened down with steel buttons. It is ornamented with a large blue feather and a black aigrette.

No. 3. Marron Straw Bonnet.—Marron straw bonnet, bound with black velvet; soft crown of marron silk, confined round the base with a *crête* of black velvet, below which are folds of marron silk. Marron strings fringed at the ends, and a bow to match at the back, likewise fringed. Christmas roses at the top of the crown, and a garland of the same, with shaded leaves over the chignon.

No. 4. Scabious Velvet Bonnet.—This is one of the newest styles of winter bonnet. The brim turns back in front, so as to discover the forehead. The velvet is scabious colour; the strings are velvet and faille to match. Black lace lappets and a spray of sweet peas of scabious velvet fall over the chignon.

To Wash Point Lace.—Take a smooth deal board, ¾in. thick, and about 18in. by 14in.; cover it tightly with fine calico seamed at the edges to keep it firm; lay out the lace on this in its proper shape, without any undue stretching, and tack it closely all round the edge to the calico, putting a few stitches here and there in the middle to keep it firm. If a long length of lace, it may be either tacked on double, or wrapped round and round the board, only being careful to keep the edges in shape by tacking them down to the calico. Have ready a lather of curd soap and lukewarm water; lay the board in it to soak all night, and let it be entirely covered; the next day rub it gently with the hands in the lather, which will remove all soil or dirt. When quite clean rinse well in cold water by pouring it quickly over the lace again and again; let it drain a little, and finally pour over it some very thin arrowroot starch (if liked this may be slightly coloured with coffee); then dry it before a clear fire, and do not untack the lace from the board till it is quite crisp and dry. The lace will be perfectly in shape without any further pressing or ironing.

The Housewife.

DINNERS IN SEASON.

SPRING.

I.

Potage à la purée d'asperges.
Soles à la Lyonnaise.
Grenadins of beef à la Macedoine.
Braised capons; stuffed mushrooms.
New potatoes—Seakale.
Cheese—Watercress-butter.
Mousseline pudding—Chartreuse of oranges.

II.

Spring soup.
Fried whitings.
Fillets of plovers with truffles.
Rice cassolettes au salpicon.
Roast quarter of lamb.
New potatoes sautées—Spring salad.
Asparagus, poivrade sauce.
Parmesan fritters.
Charlotte russe—Croûte à l'ananas.

III.

Potage aux pointes d'asperges.
Slice of salmon au gratin.
Epigrams of lamb with spinach.
Veal cutlets, piquante sauce.
Roast fowl à la Française.
Cauliflower salad.
Tartelettes Piémontaises.
Caramel pudding—Orange fritters.

IV.

Consommé aux œufs pochés.
Fillets of mackerel à l'Italienne.
Croquettes of chicken.
Lamb cutlets à la Macédoine.
Wild duck, bigarade sauce.
Asparagus, sauce blanche.
Fondue au Parmesan.
Nougats à la crème—Salad of oranges.

V.

Potage à la Sévigné.
Salmon, fennel sauce.
Larks in cases—Lamb cutlets with asparagus points.
Fricandeau with spinach.
Roast guinea fowl.
Russian salad.
Rice soufflé à la vanille—Gooseberry tartlets.

VI.

Julienne.
Turbot à la crème—Kromeskys à la Russe.
Sweetbreads à l'Espagnole.
Fillet of beef braised à la jardinière.
Spinach au jus.
Maccaroni au gratin.
Charlotte of apples—Snow eggs.

SUMMER.

VII.

Consommé de volaille aux pois.
Fillets of salmon aux concombres.
Whitebait.
Lamb cutlets à la jardinière—Sweetbreads with mushrooms.
Roast quails.
French beans à la maître d'hôtel.
Ramakins.
Chartreuse of strawberries—Génoise au chocolat.

VIII.

Potage à la Faubonne.
Red mullets in papers.
Tendrons of veal with peas—Fillets of beef à la Béarnaise.
Stuffed green artichokes à l'Italienne.
Cheese fondue.
Apricots à la Condé—Iced pudding aux fruits.

IX.

Potage à la bonne femme.
Whitings au gratin.
Boudins of veal with truffles—Mutton cutlets à la Maintenon.
Roast ducks—Peas à l'Anglaise.
Maccaroni à la Napolitaine.
Salade de fruits—Vanilla soufflé.

X.

Green pea soup.
Grilled trout à la Tartare.
Croustades de volaille—Veal cutlets à la Milanaise.
Roast fillet of beef à la Française.
Lobster salad in aspic.
Cheese straws.
Cherry tartlets—Meringues with cream.

XI.

Barley cream soup.
Salmon cutlets, piquante sauce.
Lobster kromeskys.
Mutton cutlets with tomatoes.
Poulets à l'Estragon—Fried potatoes.
Parmesan omelet.
Raspberry and currant compôte—Génoises.

XII.

Brunoise.
Soles à la ravigote.
Grenadins of veal with French beans—Suprème de volaille.
Braised fillet of beef with maccaroni.
Vegetable marrow au gratin.
Greengage tartlets—Iced pudding à la vanille.

AUTUMN.

XIII.

Potage à la Reine.
Grey mullets, caper sauce.
Fillets of beef with mushrooms—Stuffed vegetable marrow.
Roast grouse.
Omelette à l'Espagnole.
Pommes au riz meringuées—Cheesecakes.

XIV.

Potage à la royale.
Stuffed red mullets.
Quenelles of rabbits aux truffes—Poulet sauté à l'Estragon.
Loin of mutton en papillote.
Tomatoes au gratin.
Cheese straws.
Apricot omelet—Potato soufflé.

XV.

Potage à la purée de gibier.
Sole au gratin.
Mutton cutlets with vegetable marrow.
Fricandeau with stuffed tomatoes.
Roast partridges, watercress salad.
Fresh haricot beans à la maître d'hôtel.
Garibaldi cream—Bouchées aux confitures.

XVI.

Potage à la jardinière.
Fresh herrings en matelotte.
Mutton cutlets à l'Italienne—Chartreuse of partridges.
Roast sirloin of beef.
Mashed potatoes—Fried vegetable marrow—Horseradish sauce.
Stuffed tomatoes à l'Italienne.
Peach fritters—Rice à l'Impératrice.

XVII.

Tomato soup.
Boiled turbot, Tartare sauce.
Croustades with purée of game—Braised mutton cutlets.
Roast goose, apple sauce.
Cabbage en choucroûte au lard.
Petits soufflés au Parmesan.
Omelette au rhum—Marmalade pudding.

XVIII.

Potage à la Nivernaise.
Stewed eels.
Fillets of beef à la maître d'hôtel—Potatoes sautées.
Salmis of partridges.
Roast saddle of mutton.
Fresh haricot beans au beurre.
Œufs farcis à la royale.
Apple fritters—Gateau Napolitain.

WINTER.

XIX.

Consommé of game.
Boiled turbot, Hollandaise sauce.
Beef olives à l'Espagnole—Chartreuse of pheasants.
Roast turkey—Endive salad.
Céleri au jus.
Cheese fondue.
Plum pudding—Mince pies.

Digitized by Google

XX.

Croûte au pot.
Stuffed haddock au Madère.
Small chartreuses of crème de veau.
Fillets of beef with olives.
Roast hare, sweet sauce.
Salad of dried haricot beans.
Stewed cheese.
Apple tartlets—Ginger pudding.

XXI.

Consommé au céleri.
Boiled cod and oyster sauce—Croustades of lobsters.
Civet de lièvre à la Française.
Braised turkey à la jardinière.
Roast snipes—Celery salad.
Cheese straws.
Biscuit au chocolat—Orange salad.

XXII.

Crécy soup.
John Dory au Madère—Fried smelts.
Boudin of game aux truffes.
Braised leg of mutton—Stewed endive.
Cheese fritters.
Bakewell pudding—Coffee cream.

XXIII.

Potage à la Condé.
Cod au gratin.
Stewed ox palates—Veal collops à la Milanaise.
Roast pheasants.
Brussels sprouts au jus.
Croustades of oysters.
Mirlitons au marasquin—Chocolate soufflé.

XXIV.

Potage à la Conti.
Skate au beurre noir.
Rissoles of salpicon—Salmis of pheasant.
Stewed brisket of beef aux racines.
Roast woodcock.
Brocoli au gratin.
Pommes à la Condé—Pistachio cake.

HINTS FOR HOUSEWIVES.

ON CLEANING.

Lamp Chimneys.—The brown marks inside lamp chimneys can be effectually removed by applying spirits of salt with a piece of cotton wool tied at the end of a small stick.

Decanters.—Spirits of salt will remove the marks of mildew, &c., inside decanters when all other means have failed. The decanters must be well washed afterwards.

Steel Fenders.—Putty powder is best to keep them in good order. To put them away, rub them all over with palm oil, powder them well with unslacked lime, and pack them up in cloths, not paper.

Ivory Knife-Handles.—To remove stains of wine and fruit from these, rub them with damp salt.

Oilcloth should be washed with soap and water alone, and rubbed with a cloth, not a scrubbing brush.

Ormolu Ornaments.—Rub them with a soft rag, dipped in sal volatile.

White Marble.—Make a liquid paste with ¼lb. soft soap, ¼lb. whitening, 1oz. soda, ½oz. stone blue, and a little water; boil it for ten minutes, and apply it hot to the marble with a flannel. The next day wash it off with clean water, and dry the marble with a rough flannel.

Moderator Lamps should be trimmed and filled with oil every morning, and particular care should be taken not to let any of the charred wick fall inside the works. The lamp should be wound up every day, whether it is to be used or not. When lighted, the wick should be at least half an inch above the sheath which incloses it, and the chimney should be so adjusted that the top of the wick be within an eighth of an inch of the shoulder of it. If the wick be close down upon the sheath, this gets hot, and the oil is consumed faster in consequence; besides, the wick gets charred, and the light given is not nearly so bright. In buying chimneys, they should be chosen with a well-defined shoulder. Every two or three years, moderator lamps should be sent to the maker to be thoroughly overhauled and cleaned.

Whitening Stone Stairs.—Wet some pipeclay with cold water, then add sufficient boiling water to get a mixture the consistency of cream; stir in a small quantity of stone blue, and apply the mixture hot with a painter's brush.

ON COOKING.

How to mix a Plain Salad.—Put the yolk of a hard boiled egg into the salad bowl, smash it up with a spoon, add mustard, pepper, and salt, all according to taste, then two tablespoonfuls of salad oil, mix thoroughly to a smooth paste, then add two tablespoonfuls of tarragon vinegar, and when this is well mixed in, add two more tablespoonfuls of oil; put in the white of the egg minced small, then the lettuce, washed and well dried in a napkin.

How to make Melted Butter.—Melt two ounces of butter in a saucepan, add a tablespoonful of flour to it, and when the two are well mixed put in salt to taste and half a pint of hot water, stirring on the fire until it thickens.

A Liaison.—Yolks of eggs strained and mixed with lemon juice, stirred into sauces and thick soups, give them a smooth appearance and improve their taste. The proportions are the juice of half a lemon to the yolks of two eggs. The saucepan should be taken off the fire before stirring in the liaison, else it will curdle.

How to Clarify Soup.—Beat up the white of an egg with a cupful of soup cold, then add it to a quart of soup; put it on the fire, and beat it up occasionally with an egg whisk; when it boils, strain through a fine tammy.

—— For the same quantity of soup take an ounce of raw beef, or of calf's liver, chop it up, and put it into the cold soup, set it to boil, and when it is boiling, strain it as above.

How to Fry Potatoes.—Use plenty of fat, and ascertain by trying it with a piece of potato that it is hot enough; let the potatoes be well dried before they are put into the fat.

How to Boil Maccaroni.—Salt the water to taste, and do not put in the maccaroni until it boils fast; use plenty of water; stir the maccaroni during the process of boiling; when done (about twenty minutes) pour a jugful of cold water into the saucepan, and drain the water off at once and effectually.

How to Peel Tomatoes.—Lay them for a minute in a basin of hot water, and the peel will then easily come off.

STORE SAUCES, &c.

Tomato Sauce.—Put tomatoes, when perfectly ripe, into an earthenware jar, and place it in the oven—after the bread has been drawn—till they become quite soft, then separate the skins from the pulp, and mix this with capsicum vinegar and a few cloves of garlic pounded; add powdered ginger and salt to your taste. Keep the sauce in small wide-mouthed bottles, well corked, and in a dry cool place.

—— Another Way.—Bake the tomatoes in a dish, in the oven or on the hob, for some hours; strain them when cold from the watery juice, and pass the pulp through a fine hair sieve. Throw away the watery juice, the pips, and the skins, and place the pulp into a stewpan, with white wine vinegar, five or six cloves, shallots, salt, and whole pepper according to taste. Boil gently on a slow fire for twenty minutes. Put the sauce into jars, and tie it tightly down as soon as quite cold. It will be fit for use in a month.

French Mustard.—Mix a quart of brown mustard seed with a handful each of parsley, chervil, tarragon, and burnet, a teaspoonful of celery seed; and cloves, mace, garlic, and salt according to taste. Put the whole in a basin, with enough wine vinegar to cover the mixture. Let it steep twenty-four hours, then pound it in a marble mortar. When thoroughly pounded pass it through a fine sieve; add enough vinegar to make the mustard of the desired consistency, and put it into jars for use.

Mushroom Catsup.—Take a quantity of fresh gathered mushrooms, pick them clean without washing, put them in a deep pan thus: First a layer of mushrooms, then a layer of salt, and so on till the pan is nearly full; let them stand twelve hours, covered over, in a warm place, they will then get soft, and must be well pressed down with a wooden spoon. Keep them in the pan two days or more, stirring and mashing them twice a day, then pour the pulp and liquor into a stone jar, and to each quart add ½oz. allspice, and 1½oz. whole pepper. Stop the mouth of the jar tightly, place it in a stewpan full of boiling water (enough to reach to the top of the jar), and keep the water boiling about two and a half hours. Take out the jar, pour off the liquor carefully from the sediment; strain it through a hair sieve into a clean stewpan, and let it simmer slowly for one hour, taking off all the scum that rises; then pour the catsup into a clean dry jug, and let it stand, closely covered, in a cool place for about twenty-four hours; pour it clear from the sediment through a thick flannel bag, add to each quart two teaspoonfuls of brafidy, and let it stand in a jug as before. Some sediment will again fall, and the pure catsup decanted from it must be kept for use in small bottles which have been well washed and made perfectly dry before the liquor is poured into them.

Walnut Catsup.—Bruise a quantity of young green walnuts in a mortar, pack them in layers, with salt strewn on each layer, in a strong earthenware pan; pour over them equal parts of vinegar and water, boiling hot, and in sufficient quantity to just cover them; mash the walnuts with a wooden pestle, two or three times a day for a week; at the end of that time squeeze out all the liquor, set it to boil for half an hour, and skim it well; then to every quart of liquor add 1½oz. of whole pepper and allspice, half a nutmeg, a heaped teaspoonful of cloves, and a couple of bay leaves. Boil the liquor again for one hour; when cold strain it into a basin, and let it settle; then pour it off from the sediment, bottle it, and cork it close.

Tarragon Vinegar.—Gather the tarragon the day before. Fill a large glass bottle with as much of it as it will hold, but do not press it down; put in a few cloves, and the thin rind of a lemon; fill up with wine vinegar; cork the bottle close, and leave it in a sunny place for a fortnight. At the end of that time, strain the vinegar, squeezing it well out of the tarragon, filter through paper, and bottle it for use.

ACTING CHARADE.

INFANTRY.

INN—FAN—TRY.

Characters.

ARTHUR FITZGERALD (very sentimental).
HARRY SINCLAIR (a fast young man).
EMILY.
JANET (her maid).

INN.

SCENE I.—*Parlour of a Country Inn.*—Enter two gentlemen, *Arthur Fitzgerald, Harry Sinclair.*

Sinclair.—Well, Arthur, how long is this sentimental fit to continue. For the last three days you have been as lively as a fly in a pot of treacle! Not one word have you vouchsafed to me, so that, compared with my pleasure derivable from your society, "Burton's Anatony of Melancholy," would be a joke! Here we are in this most dismal place, which hardly deserves the name of an *Inn*, detained by an inexhaustible torrent of rain, external and internal gloom exemplified in the atmosphere and your face. I'm nearly driven mad by these awful facts—or to something worse, the contemptation of matrimony!

Fitzgerald slaps his forehead in a theatrical style, and begins to pace the room, then enunciates—

"He jests at scars, that never felt a wound!

Your common-place jokes are pointless, Sinclair! What care I for the rain, the leaking roof, the smoky chimney? Is she not here? have I not seen her this very day? and don't I wish with all my heart that these showers may never cease, since to them I owe all my happiness!"

Sinclair.—And I, all my rheumatism!

Fitzgerald.—Say what you will, only forbear your ill-timed pleasantries on that most blessed state, matrimony.

Sinclair (soothingly).—Well, never mind my jests, old fellow; don't let us quarrel! If you won't talk, it's better than nothing that you're here to be looked at, I knowing all the time your tongue isn't paralysed, and that you could speak if you would, which gives me something to hope for, and now the hope is stronger than ever. But I can't conceive who your "she" is! I've only seen our dirty hostess and her dirtier maid, who varies the scene by squinting; should either of these be the subject of your rhapsody, I shall feel it my duty to place you under mild restraint. 'Pon my word I don't like the look of your eye. Do you feel excited, or as if gentle bleeding would be judicious?

Fitzgerald.—Can you for one moment be serious? if you can, listen to my tale.

Sinclair.—Why is the Royal Dane's ghost like a poodle with a — no that's not it, why are *you* like a monkey with a curling extremity? Because —because you can a tale unfold.

Fitzgerald (sternly).—Listen! Yesterday, passing along the corridor, I heard a most charming voice, in whose tones I discovered beauty, grace, everything that can adorn a lovely woman. The words were simple, "Where are my slippers?" but the accent made them like notes falling from a fairy's mouth, pearls of inestimable value.

Sinclair.—That's what I've heard called "an astonishing loud fact," but proceed, for it's capital! I say old fellow, you're turning out a trump. Could you find out her amount of tin in those wonderful tones, eh?

Fitzgerald.—Too soon for my happiness was my wish to see the speaker accomplished; a door opened, and there came forth the most bewitching creature man ever saw, I could only bow and look——

Sinclair.—Like a spoon!

Fitzgerald.—From that moment I have thought only of her, this day I have again feasted on her voice.

Sinclair.—Well, I thought it odd you didn't notice the extreme antiquity of the mutton at dinner, the sheep might have pastured in Babylon! Time was, you could appreciate a prime cut off a tender joint! But what did she want to-day? slippers again?

Fitzgerald.—No; she expressed a wish for lucifer matches. Sinclair, I beseech you devise some means by which I can have an interview with her! Let me succeed through you, and I am your friend for life!

Sinclair.—As far as the accepting of a bill, eh? I consider that the strongest test of friendship, and shall prove yours accordingly, so look out! But let's adjourn to my room, it's a shade less dull than this. [*Exeunt.*

FAN.

SCENE II.—*A Dressing Room.*—The two gentlemen are sitting at a table, on which is spread dessert.

Sinclair.—Three glasses of decent port despatched, yet I can't strike out an idea. Shall we send this fair unknown a box of pills by mistake, or a blister by accident, and then call to apologise in the morning? Shall we despatch to her a tax paper, some steel pens, or something genteel and sentimental? what do yo think?

Fitzgerald.—That you break promise with me; how can your low jokes help my plans?

Sinclair.—Patience! I'll search my portmanteau, and see if anything it contains can be pressed into the service (*he searches a portmanteau, and takes out a small parcel*). Ah, I have it! I asked a friend to choose a present for me, to give my sister; here's the parcel unopened. Let's send it as it is to your inamorata. Faint heart ne'er won fair lady, you know.

Fitzgerald.—No, I won't trust you, open it. (*Sinclair opens the parcel and takes out a fan.*)

Sinclair.—A fan! the very thing! Fortune is kind, and I can make you at least a dozen puns about fanning a flame, &c.

Fitzgerald.—Every medal has its reverse, every pleasure its pain. The possession of this fan is to be purchased at the cost of your puns! What a price I am to pay for it! However, I am so elated, you may say what you like. Now come with me to find the means of sending this open sesame anonymously.

TRY.

SCENE III.—*A Sitting Room.*—Enter *Emily* and her maid. Some one knocks at the door.

Emily.—See who is at the door Janet; a bill even would be acceptable in a wretchedly dull place as this. (*Janet goes to the door.*)

Janet.—Please, ma'am, nobody knocked; only this here little box.

Emily takes the box, opens it, takes out the fan, and reads aloud—

"Vainly thy slave, with this poor toy hath striven,
To cool the burning wound thine eye hath given;
At thy fair feet the feathery fan I lay,
Dream its soft airs, the sighs I thus convey."

Oh, what a darling fan. Who can have sent it? How exquisite that verse is. Janet, you must find the owner, for I'm afraid I must return it (*sighing*). [*Exit Janet. A pause.*

Enter *Janet.*

Janet.—Well, mum, I've told Boots all about it, but he don't know nothing of no fan, but the one in the chimney as toasts the meat, and that's black, and hasn't no pictures.

Emily.—Well, Janet, you must try to find it out. Pray, pray don't forget to try, you shall be well rewarded.

Janet.—I'll try, mum, indeed I will.

Emily.—While you inquire I'll make myself a little nice. I don't think this blue ribbon becomes me, I will have pink instead. The owner of the fan may call to explain this strange mistake.

Janet.—Nothing could be more properer, mum, than what he should. [*Exeunt.*

INFANTRY.

SCENE IV.—*The Same Room.*

Emily looks at the fan.—Oh, how I wish he'd call and ask for it. [*A knock at the door.*

Janet shows in *Fitzgerald* and *Sinclair.*

Sinclair.—My friend and I must crave your forgiveness, Madam, for having by mistake—no, no, not by mistake, but by—by— [*Aside to Fitzgerald.*—Can't you help me, Arthur?] But you understand me, we—we sent the fan, and now call to apologize for having done such—such a——

Fitzgerald (passionately).—Dear lady, let me trust not only for your forgiveness but for your good opinion. When I ventured to send you that fan I dared not hope to plead my cause in person, but the post, the blessed post [*Harry, aside.*—Draw it mild, young man.] has just brought me the good news that I have a commission in an infantry regiment. May I hope that time and my devotion will have some weight with you.

Emily (from behind the folds of her handkerchief).—Ask my papa, he lives at Ivy Cottage, Turnham Green.

(*The curtain falls.*)

DRIED FLOWERS.

IT is a mistake to suppose that great weight and pressure are necessary for the process of drying flowers so as to preserve their original brightness; on the contrary, this is one of the great causes of failure. *No more pressure must be used than is required to keep the flower flat.* The flowers

Digitized by Google

must be free from all damp and dew, and, if possible, should have had seven or eight hours sun upon them, and those only selected which are in full perfection, as if beginning at all to fade the drying process will fail to preserve their colour. Cut them with a sharp pair of scissors, and do not hold them in your hands, but throw them lightly as they are gathered into a large handkerchief, so as not to press one upon another. If the petals of a flower are at all bruised or broken it is better to discard it at once.

When the flowers are gathered take them from the leaves, leaving the stalk to each flower from one to two inches long; light a candle, and hold the stalks one by one in the flame, until about a quarter of an inch is quite burnt; this prevents the juice from escaping. Some flowers of very bright red, purple, or magenta hue, such as some of the cinerarias, pyrethrums, and those of a fleshy nature, such as the dielytra, require to have their stalks, previous to burning, dipped from ten to twenty minutes in a weak solution of muriate of lime, in crystals, and water, while very fleshy green leaves should have their stalks first put in a solution of saltpetre and water.

Some blotting pads must be provided (the size sold for 4*d.* or 6*d.* per quire will be found most convenient), and several quires of thin white blotting paper, to be procured in London at 10*s.* the ream. We will suppose we are going to dry scarlet geraniums, periwinkles, single magenta stocks, and laburnums, as they are some of the flowers most liable to change colour. Take the blotting pad and raise the whole of the blotting paper from the cover on each side. For the geraniums, periwinkles, and stocks, take each bloom out singly, and having burnt the stalks as before directed, bore a number of holes in one of the thicknesses of blotting paper sufficiently large to admit the calyces of the flowers, and so far apart that, when the flowers are arranged, no one bloom shall touch another; pass the stalk and calyx of each flower through the pad, so that the petals of the flower shall rest flat on the surface of the blotting paper, and no part of them be pressed against the calyx. Arrange each truss of laburnum (having passed its stalk through the pad) so that the blooms shall be distinct upon the paper; now lay the other thickness of blotting paper over the petals, and, holding the two pads together, turn them over on one of the covers. Gently press down the stalks and calyces, which will now be uppermost, and shut down the other cover upon them; tie the opposite edges of the pad round and round with cotton, taking care to make all the edges meet perfectly. Prepare as many pads as you require in this manner, then prop them up about a yard distance from a bright fire, or put them in a very gentle oven. When one side of the pad is so hot that yon can just bear your hand upon it, turn the other side to the heat, and repeat the process for an hour. Then open the pads and examine the flowers; if they feel like smooth paper, they are sufficiently dried, but if they have still any *fleshy* feeling about them, the pads must be re-closed, and the exposure to heat continued. After the hour, however, they must be carefully watched, the pads being frequently unclosed for examination, as a very little *too much* heat will cause the flowers to scorch and turn brown. Some take longer drying than others, even of the same kind, so that it is impossible to lay down any exact rules as to the time required; but no flower will need more than three hours. Great care must be taken in removing the flowers from the pad, as the drying renders them extremely brittle. The best method is gently to enlarge the holes on the side on which the stalks are, and, having seen that they and the calyces are free, to take hold of the petals on the other side, between a small ivory folder and one finger, and draw the flowers out; put them away immediately between sheets of white writing paper, being careful not to lay one flower over another. Remove the top sheet of blotting paper from each side before making use of the pad again.

Double flowers, such as stocks, small roses, narcissus, &c., must have layers of cotton wool or small pieces of blotting paper placed between the petals after they are arranged in the blotting pads before subjecting them to any heat or pressure. Calceolarias must have cotton wool or very fine sand very carefully put inside each flower; the flower being just sufficiently filled to retain its shape without fear of its bursting. The fuchsia should have a part of its calyx passed through the paper, with a little cotton wool between the flower and the surface of the paper, and also between the corolla and sepals, so as to keep the form of the flower as much as possible. Blue flowers in general do not require heat; they may be put between sheets of plain white blotting paper, five or six sheets on each side, and subjected to just sufficient pressure to keep the flower from wrinkling. Ferns, white and some variegated leaved plants, such as centaurea, begonias, and caladiums, may be thus treated. For mounting the flowers, a sheet of white cardboard, a pair of scissors, or a penknife, gum and a small camel's hair pencil are required. The gum must be *very* strong, made by taking 3oz. of gum arabic, pouring on it just sufficient hot water to dissolve it, and adding a teaspoonful of spirits of wine. The greatest care and patience is required in the manipulation of the flowers; they must be taken up between the blade of the penknife and one finger. It is well to arrange them first on the cardboard without fastening them, and, having arrived at a satisfactory effect, fix the arrangement in your mind or make a slight sketch of it; then remove the flowers and proceed to gum them one by one in the position you have assigned them. The smallest quantity of gum in the middle of the back of the flower or leaf is sufficient to hold it in its place. A cardboard mount, round or oval, must be placed over the group, and the whole covered with a sheet of glass, and the edges bound round so as to exclude the air. These groups may be mounted as fire screens or table-tops, as well as pictures. If hung up as a picture, it must be on a wall looking north; and, however used, care must be taken that the sun shall not rest upon them. They must also be kept from damp.

THE ART OF GILDING.

GILDING is generally allowed to be one of the prettiest and most effective decorations for a lady's boudoir; it is so simple that a lady may do it herself. But by this I do not mean to say she can gild cornices, and ornament her window shutters and doors to her fancy, for she would never have patience for this, and I should not recommend her to try. It is, however, such a taking amusement, when carried on in a small way, such as the gilding of brackets and picture frames, which always so greatly add to the appearance of a boudoir, that I am about to give a full description of the method of attaining this most pleasing art.

I will first enumerate the different things required to enable you to gild. You must have a gilding cushion, a knife with which to handle the gold leaf, a camel's hair brush, and a tip, which is formed of camel's hair, arranged quite flat. You must also have a small pot of gold size, a wooden pallet, and a knife, the same as is used by oil painters; get also ¼lb. of vellum shavings, some very fine whitening, and a book of gold leaf. I would advise you to apply to a painter and gilder to get you the cushion, knives, gold size, &c., as he would know quite what you require, and ought not to charge more than 15*s.*, or so, for all the materials. Take some vellum shavings, and cut them up into small pieces about an inch long; put them into a perfectly clean jar, fill it about three-quarters full, and cover them with water. The jar must then be covered with a plate, and placed in the oven or warmer for half a day, till the shavings have become quite soft; when that is done place the jar in a cool place, and when cold you should find the water is formed into a thick jelly (if it is not firm you must add a few more shavings, and put it to heat again.) Warm this over again, and strain the shavings from the water; they may then be thrown away. Take some fine powdered whitening and mix it with the water till it becomes as thick as cream; this is called white size; with an unprepared camel's hair brush apply this to the bracket, or whatever you wish to gild. When you have given it one coat all over, it should be left to dry, and then have another, until the whole is perfectly white. When dry it should be carefully rubbed with very fine glass paper until the surface is quite smooth. Care must also be taken that the wood is very smooth before the white size is applied.

The next thing to be done is to apply a coat of clear size, which is simply the water, or melted jelly without the whitening. This must be done with a camel's hair brush kept on purpose for it. When this is dry, take your pot of gold size, and with the knife take a little out, and put it on the pallet; you must then, with a camel's hair brush, go carefully over the whole surface of the bracket, which has previously been white-sized and clear-sized. After this has been done, the work must be left till the next day, to allow the gold size to dry sufficiently, when you will find, if it has been done properly, that if you touch it with your finger it is just sticky, but not so much as to stick to your finger. If left more than a day it dries up, and will not take the gold leaf. You may leave your work as long as you like after the application of the white size and clear size; but you must not put any gold size upon it unless you intend to finish it the next day, or you will have the whole to do over again. Having, I hope, made you quite understand the great care that must be taken with the preparatory part of the work, I now come to the most important—the real gilding. Get out your cushion, your knife, the book of gold leaf, and the tip; with care open one leaf of the book at a time, and let the leaf of gold fall out on the cushion; handle it with your knife, never with your fingers; and take care not to breathe much upon it, for it is so light that the slightest wind makes it fly about, and it is then more difficult to get flat on the cushion. You should also be careful not to sit in a draught, or with a window open. When you have got the gold leaf as flat as you can on the cushion, you should gently blow on the centre of it—this is to take all the creases out of it; then cut it into pieces to suit the shape of what you are gilding. Supposing you are only doing the straight edge of a bracket, cut the gold into strips about as wide as the piece to be gilded, and then take the tip in your hand, pass it gently over your hair, and then softly touch the gold leaf with it. You will then find that it will stick to the tip; raise it up and lay it upon the edge you are wishing to gild, go on in the same way until the whole is covered, and then gently rub it with cotton wool. You must never forget to pass the tip down your hair every time you wish to take up a piece of gold leaf, for it requires to be a little greasy, or the gold will not adhere to it. A camel's hair brush is also very useful, as well as the cotton wool. You may dust the gold over with it before rubbing it with the cotton wool, and in doing anything with holes in it the brush is indispensable. The gilding being now over, the bracket must be left until the following day, when it must have a coat of clear size. If you gild anything that is likely to be much fingered, I strongly advise you to varnish it over at the last with colourless varnish, which will preserve it very much. Never be in a hurry when you are gilding, and if you follow these rules you will find it a pleasant and interesting amusement, and I am sure you will succeed with a little patience; for what can be done without?

The Garden.

Plants for Winter Decorations.

For the winter decoration of the conservatory chrysanthemums are invaluable. As a matter of course we do not pretend to attempt this much with chrysanthemums alone, but use also in addition well-grown plants of *Salvia splendens, Poinsettia pulcherrima, Thyrsacanthus rutilans*, intermixed with such forced plants as *Deutzia gracilis, Prunus sinensis fl. pl., Azalea amœna, Weigela rosea, Dielytra spectablis*, lily of the valley, forced bulbs, &c., not forgetting camellias, ericas, and epacrids, many of which bloom naturally at this dull period. For several weeks after their last shift we use rain water alone for watering the plants; but as they fill the pots with roots, and begin to exhaust the soil, we commence to mix a little liquid manure from the stable yard with their ordinary supply, gradually increasing it until after the plants have set their flower buds. These plants are very gross feeders, and require a very large supply of moisture—often two or three times a day in hot, dry weather. If they are once allowed to become dry, the loss of their bottom leaves will be the penalty. If extra fine flowers are desired, some or all of the lateral buds should be displaced as they appear; but this is seldom requisite when they are grown for conservatory decoration only. Earwigs are a source of trouble and annoyance after the buds are formed, and, as they are very destructive to the flowers, they must be strictly looked after. The same remarks apply to the common garden slug, which frequently spoils the foliage. Green fly is another enemy, that may be routed by a weak solution of "Fowler's Insecticide." As a matter of course, the plants must be removed indoors before severe frosts are likely to occur. Cuttings may be purchased at a cheap rate at most of the nurseries where these plants are extensively cultivated. The following is a select list of kinds we have grown ourselves, and therefore can recommend as being good.

Large-flowered varieties.—Alfred Salter, Annie Salter, Beverley, Donald Beaton, Fabius, Gloria Mundi, Hermione, Jardin des Plantes, Lady Carey, Golden Ball, Golden Beverley, Golden Queen, Jenny Lind, Queen, Vesta, Lady H. St. Clair, Golden Hermione, Little Harry, Lord Clyde, Rifleman, Vulcan, White Christine, St. Patrick, Pink Pearl, Prince of Wales, Mr. Brumlees.

Pompones.—Andromeda, Lara, White Cedo Nulli, Golden Cedo Nulli, Lilac Cedo Nulli, Lizzie Holmes, Modèle, Mrs. Dix, Golden Circle, Little Beauty, James Forsyth, Fairest of the Fair, Little Gem.

This assortment will be amply sufficient for all decorative purposes. Some of the finely-formed white-flowered kinds, as Lady H. St. Clair, Mrs. George Trundle, or Vesta, are admirably adapted for ladies' hair.

Designs for Select Beds of Hardy Plants.

First, then, for a noble circular bed in an isolated place, say on some little glade of grass where there is a recess in a shrubbery. Have a bed thoroughly well prepared in the first instance, say 8ft., 10ft., or 12ft. wide, according to the size of your place, or the nook in which you plant. What we mean by well prepared is, that the soil should be rich, free, well drained, and 3ft. deep, if possible. Care should be taken that the far-searching roots of trees do not get to the soil of the bed and rob the plants of their nutriment. In a word, though the bed will be the better for being associated with handsome shrubs and trees, it must never be so placed as to become a mere trough of rich food for trees with voracious appetites. To commence with bed No. 1, we will place a good plant of the very tall and late-flowering *Tritoma grandis*, and then around it a circle of the excellent and somewhat smaller *T. glaucescens*. Follow that with a ring of the beautiful white Anemone Honorine Jobert and the showy and splendid *Rudbeckia Newmanni*, mixed plant for plant; and outside of that again place a circle of the fine new herbaceous *Sedum spectabile* (sold and known as *S. fabaria*). This Sedum will form a grand edge to the bed, and flower, like its fellows, finely in autumn; while immediately outside of it, and between it and the grass, might be planted a line of Snowdrops, or *Scilla bifolia*, or both mixed. These would flower, ripen their leaves, and perish before the stronger margins started up. The above would form a grand autumn bed, and a noble object from any point of view—its aspect all through the spring and early summer being fresh, healthy, and in every way unobjectionable in such a position as we have indicated for it.

Should any reader be unable to procure the above plants in sufficient numbers to make such an arrangement at once, he may soon obtain them by planting what he has got of each in good ground. We would advise every amateur and every gardener to have a good rich border in which to plant his first stock of each good thing, in which it might increase with rapidity and become ready for any use that may be designed for it. Of course we may plant them in borders and the like, and take them up and divide them; but much the best way is to have a border of good earth, in which they may be planted in rows, and where all the new and rare hardy plants may be looked after conveniently. Many a new subject gets an undeservedly bad character from being placed among a mixed and already established lot, which shade or otherwise injure it. When we get a new plant we immediately look to see if there be a possibility of dividing it, and in nine cases out of ten there is. We then carefully pull the roots apart, save every shoot or division, however small, and place them in a line in a border of good soil, and thus get each bit to make a capital plant, in as quick time perhaps as the complete root would make one if planted undivided—indeed often more so, for young plants of this kind frequently grow quicker than old tufts.

No. 2. This shall be an evergreen bed, highly suited for a position near small clumps of choice shrubs, or indeed anywhere that a place may be found for it. In the centre a healthy, good young plant of *Yucca gloriosa*, and around it a ring mixed of *Yucca filamentosa* and *flaccida* mixed. These two kinds flower regularly and well. If among them you could thoughtfully insert a few roots of Gladiolus in early summer, they would add very much to the effect of the white flowers of the Yuccas. Around the Yuccas place a ring of *Iberis saxatillis*, and around that a ring of that capital little spring plant, *Erica carnea*. Finally, if there be room—and if you have your bed in an isolated spot, you can of course make it as wide as you like—put a little cushion of the beautiful *Aubrietia grandiflora* all round your *Erica carnea*; and if you have a few Crimean or common Snowdrops, or *Scilla bifolia*, to spare, to drop here and there between the Erica and the Aubrietia, we do not think you will regret it.

No. 3. This shall be a grand bed of Lilies. Unhappily, the fine hardy kinds of Lilies are anything but as plentiful as we could wish them, though in a free rich soil they increase readily enough. With such kinds as *Lilium testaceum* and *tigrinum Fortunei* in the centre, surrounded by the queenly *candidum*, burnished *croceum*, spotted *canadense, pomponium, colchicum*, vivid *chalcedonicum*, and gradually worked down to the edge with dwarf but beautiful kinds like *pulchellum, eximium, longiflorum*, and *tenuifolium*, a large circular or oval bed might be made on the grass, in some isolated spot. The only precaution we need mention is, that to grow lilies well they should have three feet, or nearly that, of free loamy earth, with a good dash of vegetable mould in it. Even now such kinds as *L. tigrinum, longiflorum, candidum, croceum, bulbiferum*, &c., are to be had pretty cheap—although the chief thing that gardeners have been doing with the hardy Lilies for some time past has been to throw them on the rubbish heap, to make way for such glorious stuff as the yellow Calceolaria and the red Geranium.

No. 4. A mixed bed, carefully arranged as to height, and tastefully as to the quality and disposition of the contents. In this kind of bed we should of course have no band or circle whatever, but simply a careful following of the old mixed principle. We doubt if we could find a better centre for this type of bed than a good kind of Perpetual Rose, grown upon its own roots, or worked very low or trained as a pyramidal bush, say 4ft. high, more or less, according to taste and the subjects to be grouped in the bed. No weedy subject should occur in a bed of this kind, but, on the contrary, everything of the most distinct beauty. You may employ in such a bed anything, from a tuft of *Campanula carpatica bicolor* on its outer edge to the choicest pink Phlox or Picotee, the newest Delphinium, or the oldest spring flower. To specify a few choice things for such a bed, we will name, for the middle parts and around the central subject, *Platycodon autumnale*, or *P. grandiflorum, Delphiniums* (some of the newer and better varieties), *Aconitum variegatum, Achillea filipendula*, Phloxes, *Campanula persicifolia alba* and *C. coronata, Iris jacquesiana, pallida*, and *De Bergii*, with a host of others equally good. For the middle region of the bed such plants as *Dielytra spectabilis, Trollius napellifolius, Armeria cephalotes, Hoteia japonica*, Penstemon in its best forms, double Wallflowers, *Achillea ptarmica fl. pl.*, would do charmingly; while near the margin such dwarf beauties as *Cheiranthus alpinus, Ranunculus amplexicaulis, Achillea aurea*, the Iberises, the dwarf Phloxes, a few of the better Sedums and Sempervivums, an odd neat variegated or silvery plant, and even little tiny shrubs like the charming *Gaultheria procumbens*, will prove quite attractive. This kind of bed admits of infinite variety and lasting interest.

Next we come to No. 5. A bed of beautiful hardy foliage plants, interspersed with good bulbs or other spring-growing flowering things, which will show above the foliage and amongst it. In this way we may have two distinct styles—one of dwarf, neat objects; and one of tall or strong-growing ones. In the centre of the first, which need not be more than 6ft. wide or so, we would not put anything higher than a plant of *Acanthus spinosissimus* or *Arundo donax versicolor* in the centre. This Arundo is fine when it is strong enough to make six or seven shoots, and has been protected through the winter by a little pile of cocoa fibre or something of the sort. It only pushes between 2ft. and 3ft. high, in consequence of its variegation, and therefore is very suitable for the style of bed we are now discussing. Around it we should place either a complete line of some pretty green-leaved plant like specimens of *Rhus glabra laciniata*, a little shrub with elegant leaves, or the *Achillea* with silvery leaves, or both mixed, with the flowers pinched off the *Achillea*; or say a mixed line of the two *Santolinas, viridis* and *chamæcyparissus*, mixed plant for plant, variegated Jacob's Ladder—the flowers and stems of this last to be pinched off as soon as they show themselves, or rather to be nipped out altogether—and with it mixed the fern-like *Thalictrum minus*. There are dozens of both silvery-leaved and other plants which would edge such an arrangement charmingly—from young plants of the fine *Salvia argentea* to *Alyssum spinosum*, or *Antennaria tomentosa*; if, indeed, it would not be better to have a mixed planting of dwarf and elegant little plants all round. In most of the interspaces of such a bed the judicious cultivator might, if he chose, plant bulbs, &c.—say a sprinkling of Gladioli towards the centre, a few tulips about the middle distance, and any choice and delicate spring bulbs about the margin. These would in most cases come up and flower ere the foliage plants were vigorous. Where they do not do so, as in the case of the Gladioli, the result is nothing to be alarmed about, inasmuch as the effect of these magnificently coloured flowers among the rich and elegant foliage will prove simply superb.

Titles of the Eldest Sons of Peers.

The eldest Sons of Dukes, Marquises, and Earls usually assume (by courtesy) the second titles of their fathers. The younger Sons of Dukes and Marquises take the title of Lord as a prefix to their Christian and Surnames.

The younger Sons of Earls take the title of Honourable.

All Daughters of Dukes, Marquises, and Earls, take the title of Lady.

All Sons and Daughters of Viscounts and Barons take the title of Honourable.

The following are the titles which are or would be borne by the eldest Sons of Peers, with the titles of their fathers:—

Those marked thus * are the second titles of Irish Representative Peers,
Those marked thus † are the second titles of Scotch Representative Peers.

The following Peers have either succeeded to Peerages or been summoned to the House of Lords during the lifetime of their fathers:

Title by courtesy	*Summoned as*
Viscount Ockham	Lord Wentworth
Marquis of Kildare	Lord Kildare
Lord Eliot	Lord Eliot.

Digitized by Google

House of Peers.

Peers of the Blood Royal	4
Archbishops	2
Dukes	29
Marquises	21
Earls	127
Viscounts	32
Bishops	25
Barons	247
Total	478

Of whom 10 are Minors.

The undermentioned noblemen sit as Peers of Great Britain by titles nominally different from, as well as inferior to, those by which they are usually addressed.

Superior Title.	*Sits as*	*Superior Title*	*Sits as*

BISHOPS.

Style, *Right Reverend.*

The Bishops of London, Durham, and Winchester to take precedence in right of their respective sees; the other Bishops in the order of their consecration. The Bishop of Sodor and Man has no seat in Parliament. The statute 10 & 11 Vict. c. 108, enacts that, upon a vacancy in an English or Welsh bishopric, the newly consecrated bishop (unless elected to one of the archiepiscopal sees, or to one of the sees of London, Durham, or Winchester), shall not be entitled to sit; but the summons is to be issued to such one of the other bishops as has not previously been summoned.*

		Consec.	Translated.
Dr. John Jackson	London, P.C.	1853	1869
Dr. Charles Baring	Durham	1856	1861

Eclipses in 1874.

During the year 1874 there will be two Eclipses of the Sun and two of the Moon. The first is a Total Eclipse of the Sun on April 16, but not visible from England.

The second is a Partial Eclipse of the Moon on May 1. The Moon does not rise here on this day till 7h. 32m. p.m., and therefore the eclipse is not visible here.

The third is an Annular Eclipse of the Sun on Oct. 10. It is visible as a partial eclipse only from England. At London it will begin at 9h. 3m. a.m., the middle of the eclipse will be at 10h. 7m. a.m., at which time about three-tenths of the Sun will be obscured, and it will end at 11h. 15m. a.m. At Edinburgh the eclipse will begin at 8h. 43m. a.m., its middle at 9h. 49m. a.m., and will end at 10h. 58m. a.m., in mean time at Edinburgh. At Dublin it will begin at 8h. 34m. a.m., the middle at 9h. 34m. a.m., and will end at 10h. 37m. a.m., in mean time at Dublin.

The fourth is a Total Eclipse of the Moon on the morning of Oct. 25. It begins at 5h. 42m. a.m., but at Greenwich the Moon sets on this morning at 6h. 33m., and therefore only the beginning of the eclipse will be seen from England.

1st Sunday in Advent	Dec. 1	Nov. 29

The year 1874 is the latter part of the 5634th and the beginning of the 5635th year since the creation of the world, according to the Jews. The year 5635 commences on Sept. 12, 1874.

The year 1874 answers to the 6587th of the Julian Period, to the 2627th from the foundation of Rome, to the 2650th year of the Olympiads, and to the year 7380-1 of the Byzantine Era.

The year 1291 of the Mohammedan Era commences on Feb. 18, 1874; and Ramadán (month of abstinence observed by the Turks) commences on Oct. 12, 1874.

Inland Revenue Duties.

INCOME TAX, LAND TAX, AND INHABITED HOUSE DUTY.

Income and Property Tax.

100*l.* per annum for every 1*l.* arising from Property, Profession, Trade, or office	0 0 3
Exceeding 100*l.* but less than 300*l.* rated at 80*l.* less.	
In respect of occupation of Lands, Tenements, &c. for every 1*l.* in England	0 0 0½
Scotland and Ireland	0 0 1½

Exemptions of Premiums from Income Tax.

Premiums paid by a person for an assurance on his own life, or on the life of his wife, or for a deferred annuity to his widow, are declared free from income tax, provided such premiums do not exceed one-sixth of his returnable income.

Inhabited House Duty.

For every private Inhabited Dwelling House which with the Household and other Offices, Yards, and Gardens therewith occupied and charged, is or shall be worth the rent of Twenty Pounds or upwards by the Year, there shall be charged for every Twenty Shillings of such annual value the sum of	0 0 9

Alteration in Date of Payment.

The Land and House Taxes in England, shall be payable on or before Jan. 1st., in each year, and Income Tax for both England and Ireland, shall be payable in like manner.

ASSESSED TAXES, AND EXCISE LICENSES.

Servants, Carriages, Horses, Armorial Bearings, &c.

For every male servant	0 15 0
For every carriage—	
If such carriage shall have four or more wheels, and shall be of the weight of four hundredweight or upwards	2 2 0
If such carriage shall have less than four wheels, or having four or more wheels, shall be of a less weight than four hundredweight	0 15 0
For every horse or mule	0 10 6
For armorial bearings—	
If such armorial bearings shall be painted, marked, or affixed, on or to any carriage	2 2 0
If such armorial bearings shall not be so painted, marked, or affixed, but shall be otherwise worn or used	1 1 0

And such duties shall be paid annually upon licenses to be taken out and granted by such officer as the Commissioners of Inland Revenue shall direct, shall be dated on the day of granting the same, and shall expire on the thirty-first day of then next following.

The Garden.

THE NEW ROSES OF 1873.

HYBRID PERPETUALS.

Félicien David (Verdier).—Deep red, shaded with bright carmine; a very nice, compact rose of very large size, and very full; highly scented, and a free bloomer.

Madame Emma Combey (Gounod).—A finely-built flower, and a free bloomer, of full average size, say 4in. diameter; the colour is a brilliant carmine, very showy; it is quite full, and opens well.

Alexander Dickson (Dickson).—Deep rose, the outer petals shady rosy lilac; a large full flower, of the most perfect form, and very fragrant; one of the best for exhibition. The inside petals are bright, and about the same colour as Annie Wood. In form it is in the way of Comtesse de Chabrilliant, but larger in size. It was raised by Mr. Dickson, a nurseryman near Dublin.

Bessie Johnson (Curtis).—A very pretty blush white rose, with a good habit of growth, large and full, quite a ladies' flower, and very sweet. It is a sport from Abel Grand, a well-established favourite. Mrs Curtis obtained for it a first-class certificate at Kensington.

Madame Lacharme (Lacharme).—One of the gems of the year. A white hybrid perpetual of large size; true, it does occasionally show a tinge of pink, but it is a large and grandly built-up flower, with great depth of petals, and, as a new white hybrid perpetual, it is quite an acquisition. A good white rose has long been wanting at the exhibition tables. The present one is very large and full, far surpassing any of the hybrid Noisettes of the Louise d'Arzens type, which Lacharme sent out some years ago.

Mrs. Veitch (Verdier).—A vigorous-growing rose, of good size, fine form, and full, colour deep rose. A good rose, but no improvement on existing varieties of the same colour. From its habit I think it will make a good pillar rose.

Mademoiselle Marie Cointet (Guillot Fils.)—A very pretty and effective rose; form compact and imbricated, colour delicate glossy rose. The growth is scarcely satisfactory, being only moderate; it appears as if it would make a nice pot rose, but we have many better of the same colour.

Mademoiselle Julie Pereard (Pernet).—The flowers of this rose are very large and full; colour a beautiful bright pink; blooms freely in autumn; growth satisfactory, and a very desirable new rose.

Claude Levet (Levet).—This is decidedly one of the best amongst the new batch for 1873; it is a grandly built-up flower, with great depth of petals, and is a great acquisition. It is described in the catalogues as of a velvety currant-red colour; but the best idea that can be conveyed to the reader is that it is much like a good bloom of Madame Victor Verdier; though it will be somewhat darker than that variety. This is undoubtedly one of the finest dark roses we have, and one of Levet's best productions; it ought to be in every collection.

Monsieur Pierre Seletzky (Levet).—This is a very desirable variety, and an addition to M. Levet's dark roses. It is a large full-petalled rose, of the finest form: the colour dark red, shaded purple, the same colour as Pierre Notting. It obtained a premier prize when exhibited at Lyons.

Souvenir de la Princesse Amelia des Pays-Bas (Liabaud). — This is another good rose in the dark class; red shaded purple, the colours very rich; large and full, a finely-built flower, and very effective. Its habit is also good.

The year 1873 is remarkable on account of the large number of tea-scented and Noisette roses sent out by Ducher and Levet (two celebrated men), and these roses, or most of them, were of a new style of colouring—viz., orange, apricot, copper, and yellow of various shades blended together, and changing colour continually according to age and weather. They open well when grown in the open air, and many of them are novelties; such as turn out hardy may be grown as standards to reinforce our old and faithful Gloire de Dijon, which always pleases, and is one of the best roses known for growing in the suburbs of large towns—for as a rule all yellow roses are impatient of smoke, and will not live within a mile of it. I have seen Gloire de Dijon surviving many of the hybrid perpetuals, all grown, or attempted to be grown, in the suburbs. Tea-scented roses are generally best under glass, but beds of them can be grown in the country, and very beautiful objects they are. They must be planted deeply in the soil, as they are nearly always cut down in winter, but Phœnix like, they will rise up again.

THE BEST NEW TEA-SCENTED ROSES OF 1873.

Madame Cheverel (Levet).—This rose has bloomed very freely with us in a pot immersed in the soil. It is very beautiful and distinct, quite new in character; the foliage is thick, and of a dark green colour, shining like the leaves of Ophirie. Outer petals creamy fawn, centre deep apricot, very beautiful. It appears to be a great improvement on Saffrano. When fully expanded it is four-quartered, and shows very plainly that it contains a mixture of the blood of Ophirie.

Amazone (Ducher).—A very pleasing rose, of moderate size; colour deep yellow, the outer side of the petals veined rose. A nice sort for a pot rose.

Madame Denis (Gounod).—White, with sulphur-coloured centre. A beautiful sweet-scented, free-blooming rose, large and very full. This has bloomed well with me in the open garden this summer, and made good growth. It is now in bloom (Oct. 4). It is more sulphur-coloured than Devoniensis. The form is globular.

Madame Docteur Jutte (Levet).—Grenade yellow, which means a new shade of apricot yellow; the colour varies. It is large, full, and very sweet; blooms freely; the wood is short jointed, and the habit good. Said to be a seedling from Ophirie, which is a copper-coloured rose, with very beautiful shining dark green foliage.

Madame François Janin (another of Levet's).—Orange-yellow, with salmon or coppery centre; very full, with thick petals; opens freely, and blooms abundantly. A seedling from Vicomtesse de Cazes, a well-known bright sulphur-coloured rose. I fancy this rose has some of the Ophirie blood in it, which will harden its constitution.

Mademoiselle Marie Arnaud (Levet).—Flowers of good size and quite full, beautifully formed; pale canary yellow or sulphur, outer petals nearly white; very sweet; a free grower and liberal bloomer. A good rose for exhibition. It is an improved Niphetos, and obtained a premier prize at the exhibition of Lyons.

Marcelin Roda.—A very fine rose, with good habit of growth; vigorous; colour white, with yellow centre, very sweet.

Mont Rosa (Verdier).—A pretty free blooming rose of medium size, full; the colour a rich rosy salmon, the reverse of the petals rose colour.

Perle de Lyon (Ducher).—This is the best yellow tea-scented rose of the season; very vigorous growth; sometimes the colour is a rich apricot. It is large and very full, opening freely in the open air. It will be useful where Maréchal Niel cannot be grown. It has strong short-jointed wood, which blooms at every break; the foliage is handsome being of a rich dark shining green. It has the good property of throwing up strong shoots from the base, which will most probably give flowers large enough for exhibition. It is not likely to equal the Maréchal Niel, which is very difficult to grow in the open air, in the northern counties particularly, as a few fine days in early spring cause the buds to break, which are nearly always destroyed by the late spring frosts.

Ville de Chamounix (Ducher).—The flowers of this rose are only of medium size; copper and yellowish white, or creamy. It is a good vigorous grower; the blooms are distinct and fine for button-holes.

THE BEST NOISETTE ROSES OF 1873.

Bouquet d'Or (Ducher).—Colour deep yellow, shaded copper in the centre; large and double; the habit is climbing. A distinct and remarkable variety; will probably make a good wall rose.

Madame Caroline Kuster (Pernet).—Habit of growth good; flowers very fine, of an orange yellow colour, very full, the form globular; a very distinct and pleasing variety. We do not know whether it can be obtained large enough for the English exhibition table, but it has obtained a premier prize at the Lyons Exhibition.

Leaves for garnishing the Dessert.—A rare old leaf is the ivy, green or golden. And yet its smell is anything but sweet, its taste is rank and poisonous, and it leaves somewhat of both on the fruit it adorns. Therefore it ought not to be brought into contact with fruit. The Portugal or common laurels are much better. Unless bruised, they give out little odour, and no taste. Their size is suitable, and their bright glossy surface cleanly. The colour, especially of the Portugal variety, is a rich dark green, and the forms of both are well adapted for dishing up fruit. Hollies, especially the plainer leaved varieties, form beautiful garniture for desserts, and give out neither smell nor taste. Even the pricklier varieties, both green and variegated, may be turned to useful purpose by using terminal tufts instead of single leaves. Aucuba leaves are very handsome, but they smell rather strong. The common A. japonica is the best for this purpose, and, barring its smell, is very pretty. The Berberis aquifolium and the Mahonias are among the most useful of all leaves for the garnishing of the dessert. They yield so many leaves of different sizes and colours as to afford a rich variety; they are also clean and scentless, and fit in well with most fruits. Rhododendron leaves are bright and glossy, and look well either singly or in terminal branchlets. Laurustinus is clear, bright, shapely, and has a good effect. The Arbutus is also clean and pretty, in terminal bunches or single file; and the Sweet Bay is light, glossy, and sweet, without, however, flavouring the fruits that rest upon them. Many, however, elect to cushion their fruit on the variegated or green kale. It is pretty enough, but both the sight and smell are suggestive (often highly so) of cabbage. All leaves from the outside should be cleaned and strained before being used. Frozen leaves will lower the quality of most fruits that touch them. Therefore gather the leaves for the garniture of your dessert early in the morning, sponge them perfectly clean, if not already so, and lay them aside in a temperature ten or more degrees above freezing, but not in the sunshine; they will then be in a proper state for use when wanted. Those who grow stove or greenhouse plants in quantity—and especially climbers—or force early fruit and flowers, will hardly ever be scarce of choice leaves for the garnishing of their desserts. The whole family of pelargoniums must be set aside, from their excess of perfume. Pleasant enough in itself, it is apt to taint the fruit with the flavour of pelargoniums. There are other beautiful leaves, again, that are too thin to go through a dinner without shrivelling up. Such is to a great extent the case with Abutilons of all varieties. The variegated and plain Cobæa scandens have the same failing. Again, there are some of the passion flowers that give out a disagreeable odour, and some of them, like quadrangularis, are too large; and kermesina, in a young state, is almost too tender. Still, this noble family is rich in leaves for garnishing. P. alata, edulis, and racemosa being among the very best species, are also rich in beautiful leaves; but some are fragile, and those that are suitable have more or less scent. Camellias are models of smooth, glossy beauty; while those of oranges, lemons, &c., are too highly perfumed. Stephanotises are too leathery. Even common leaves out of season acquire an uncommon beauty. Of course those who have vine leaves need no other. Early fig leaves are also admirable. Even early peach, plum, pear, apple, and cherry leaves are admirable; while the leaves of forced roses have a cleanly beauty that is seldom seen on those out of doors. The lily of the valley leaf, with a flower or two here and there, gives one of the choicest, sweetest finishes to a dessert, without flavouring the fruit. A fine Czar violet and leaves of the common primrose are by no means to be despised. That most useful of all plants for cutting, the Hoteia japonica, yields a harvest of exquisite leaves for the adorning of the dessert. Again, forced lilacs, especially all the varieties of the Persian, are invaluable.

Our Portraits.

The Shah of Persia.

(See page 1.)

His Majesty Nasr Eddin, Shah of Persia, is the fourth sovereign of the Kadgar dynasty, which came to the throne in 1794. He was born in 1830, and on his father's death assumed the reins of government in October, 1848. While Crown Prince he lived at Tabriz, and governed the province of Aderbeijan, being assisted by Tagi Khan, one of the most gifted and honourable of Persian statesmen, who afterwards became his Prime Minister, and remained so during the first four years of his reign. On ascending the throne in his eighteenth year, Nasr Eddin at once introduced a variety of useful administrative reforms and undertook to reorganise the army on the European model. Not unmindful of the arts of peace as well as of the necessities of preparation for war, the Shah has entered into engagements for the construction of railways, roads, and tramways throughout his dominions, and has taken measures for the exploration and working of all the mines within the borders of the state. Mr. Mounsey, whose work on Persia is an authority, tells us that the Shah's preoccupations with these grave affairs of state do not prevent him from having a strong turn for practical joking. He recounts how his Majesty, having been present at a skating party of Europeans in Teheran, the Persian capital, expressed a desire to see his courtiers try their feet on the ice. Accordingly the skates were attached to their feet, and they were launched. Our author likens the effect of this unaccustomed exercise on the grave long-robed Persians to that which would be produced by several Lord Chancellors in their state robes taking their first skating lesson on Virginia Water.

The Shah usually passes five or six months of the year under canvas. He is generally accompanied by forty ladies of the harem, and his own and their marquees, which are scarlet, form the centre of the encampment. At some distance are grouped the white tents of ministers, courtiers, and guards—the abode of the chief executioner, distinguished by the display before it of several felleks and a plentiful supply of sticks, being conspicuous amongst them—and around these, soldiers and servants to the number of three or four thousand bivouac.

The Shah is under the average height, well proportioned, and has regular features, though his forehead is rather low, and his nose somewhat prominent. His eyes are dark, and overhung by thick black eyebrows. He wears a moustache and closely-cropped beard. The magnificence of his dress adds not a little to his appearance. In his hat he wears an aigrette (the distinctive emblem of royalty) of diamonds and rubies, his tunic, cut square and descending to his knees, is a blaze of brilliants and pearls, and in his belt, from which hangs a jewelled sword and scabbard, glitters the Darya-i-Noor, or Sea of Light, a sister diamond of our Koh-i-Noor.

The Persian monarch, having been officially invited to the Universal Exhibition at Vienna of 1873, decided on making a visit to the kingdoms of the West. The moolahs or priests opposed the journey, but he remained firm in his purpose. He was proud of the idea that he would be the first Shah who abandoned the old usages which have been hitherto maintained by the priests, and have prevented the sovereigns of Persia from leaving their own dominions, and above all from setting foot on European soil. At the usual public reception on the last Persian New Year's Day the Shah himself explained the motives of his impending journey to his people. He desired, he said, to develope his relations with the sovereigns of Europe, to improve the commercial intercourse of Persia with other countries, and to inform himself by personal experience of the institutions which it might be desirable to engraft on the domestic administration of his realm. In pursuance of his plans he visited the powerful European capitals during the summer months of 1873, returning to his capital on September 23.

The Shah's European tour and the warm reception he met with at every court, has been an absorbing subject of interest, during the season of 1873. His Majesty was accompanied in his travels by a numerous suite of high officials, as becomes a "king of kings." Thirteen of its members are dignitaries of the first rank, the remainder of the eighty being made up by minor officials of all kinds, but mostly of rank. It is the custom of the Shah of Persia to be waited on by a set of gentlemen, who are named *peishkidmets*, or waiters in the presence. They correspond in rank and title to the lords and gentlemen in waiting at the courts of Europe; but, unlike them, they perform the actual duties of servants. The Shah's dishes at breakfast and at dinner are placed upon the tablecloth by men holding a high position in the country, some of them being the sons of his ministers, and others being themselves governors of provinces. The Shah's pipe is held by a nobleman when his Majesty smokes, and when he leaves the room the royal slippers are placed before his feet by a man who may any day be called on to fulfil some high office.

The Shah has two children, Muzaffer-ed-Din, born in 1850, and Dijilal-el-Daulob, born in 1853.

The Queen of Sweden.

(See page 8.)

Sophia, Queen Consort of Sweden, is a princess of German origin, daughter to the late Duke of Nassau. This union of the Bernadotte dynasty with German blood is the first fusion of the kind that has taken place since the soldier of fortune, who won his marshal's baton under the leadership of Napoleon I., was chosen to fill the vacant throne of Sweden. King Oscar I., the son of Bernadotte, had a strong predilection for German literature and philosophy, so that during his life-time German influence was strong in the Swedish court. His son, the late King Charles XV., was as decidedly French in his tastes and sympathies, and a strenuous worker for Scandinavian unity, which was naturally distaseful to the Germans. The present King Oscar II. is reported to be much influenced by his wife's German tendencies, and their son, the heir to the crown, has been brought up in a specially German manner. The Queen of Sweden was born in 1836, and married in 1857 to the Prince Oscar, now King of Sweden. The royal pair have three sons, of whom the eldest was born in 1858. The coronation of the King and Queen of Sweden took place during the month of July, 1873. The English Court was represented on the occasion by H.R.H. Prince Arthur.

Her Imperial Highness The Grand Duchess Maria Alexandrovna of Russia.

(See page 9.)

We have much pleasure in laying before our readers a portrait of the young Princess, the announcement of whose betrothal to H.R.H. the Duke of Edinburgh has caused so universal a feeling of satisfaction throughout the country. It is authoritatively stated that his Royal Highness first formed an intimate acquaintance with the Princess when he was a young midshipman at St. Petersburgh, and that further association with her at Hesse-Darmstadt deepened the original impression. Thus the approaching marriage will not only be one of the most splendid to which any prince could aspire, but will be one of affection. The Grand Duchess Marie Alexandrovna, only daughter of the Emperor and Empress of Russia, was born on the 17th of October, 1853; she is said to be endowed with great personal attractions and intelligence, and, what promises still better for the future happiness of the royal pair, with a sweet and amiable disposition. It is said that it was proposed as a condition of the alliance that the Duke of Edinburgh should reside a certain period of time every year in Russia, but that he refused to bind himself. This difficulty is now happily overcome. The Princess, too, being a member of the Greek Church, special arrangements were necessary as to matters of religious observance. It is at present understood that H.I.Highness will remain in the faith in which she was born and brought up. The children of the royal pair, if their union should be blessed with offspring, will, it is stated, be brought up in the Protestant creed of this country. The Grand Duchess will bring her husband a dowry of £20,000 a year, besides a sum of £200,000; whilst on his side Parliament has sanctioned an increase of £10,000, making the Duke's income £25,000 per annum, and £6000 per annum to the Grand Duchess in case of widowhood.

Their Imperial Highnesses, the Cesarevna and the Czarewitch of Russia.

(See pages 12 and 13.)

The Grand Duchess Cesarevna of Russia will always be known to the majority of English people as the Princess Dagmar, the name under which, ten years ago, her Imperial Highness accompanied her sister the Princess of Wales, on her entry into London. She is but little altered since that day—the personal charms which then captivated all hearts, the clear pale complexion, the masses of black hair, the sweet expression of countenance, are as striking now as they were then. Born in 1847, the Princess Dagmar was brought up in a quiet, simple way, like the rest of that family whose destinies have since called them to live in "that fierce light which beats upon a throne." That the training received by these kings, empresses, and queens "to be" was thoroughly good in itself has been proved by the manner in which they have fulfilled the duties of the elevated positions circumstances have placed them in. The visit to London of her Imperial Highness with her consort and two sons has been the event of the London season of 1873. She accompanied her sister, the Princess of Wales to every entertainment. The two sisters were inseparable and always dressed alike.

Alexander, the Czarewitch and Heir Apparent of all the Russias, was born on the 10th of March, 1845, and, as a matter of course, went through the usual military curriculum indispensable to the princes of the Russian royal family. According to the Russian custom, the Danish Princess was obliged to lay down her own charming name, and adopt the more high-sounding name of Maria Federowna when she entered the royal family of Russia. It will be remembered that the Princess Dagmar was first betrothed to the brother of the present Czarewitch, and the time appointed for their marriage was near, when the Grand Duke was struck down by a fatal illness. He had been travelling at the time in Western Europe, and the Emperor of Russia, the present Czarewitch, and the Princess Dagmar were hastily summoned to his death-bed at Nice. They arrived in time to hear his last words, and to enable him to express his last wish. This he did by taking the hand of his brother and the hand of the Princess Dagmar and joining them together. The desire thus signified on his deathbed by the dying Czarewitch was fulfilled. Two sons have been born to the royal pair—Nicholas in 1868, and George during the last year. The Czarewitch is in his twenty-eighth year. He is thought by the Russians to bear a

strong resemblance to the late Emperor Paul; is over 6ft. in height, broad-shouldered, powerful, and majestic in mien, like most of the Russian Princes of the blood.

Archduchess Gisela of Austria and Prince Leopold of Bavaria.

(See pages 16 and 17.)

THE MARRIAGE on the 20th April, 1873, of the Crown Princess the Archduchess Gisela of Austria with her cousin, Prince Leopold of Bavaria, was an event which interested the Austrian royal family alone, but excited the liveliest interest in the population all over the country. The marriage was celebrated by Cardinal Rauscher, who performed the same ceremony for the parents of the bride nineteen years ago.

The bride, who is the only daughter of the Emperor and Empress of Austria was born on the 12th of July, 1856. She is tall and slight, and has the haughty expression of countenance that characterises her mother and her aunt, the Duchess d'Alençon. From her mother, the Empress Elizabeth, she seems to have inherited her taste for horsemanship, an accomplishment in which she is second to no lady in the empire. So anxious was the Empress on this matter, that she undertook the entire training of the Princess in equestrianism, and has succeeded in her aim to her utmost desires. The trousseaux of the royal bride was laid out for inspection in Vienna, and contained a number of valuable as well as beautiful objects. Besides sets of costly lace and magnificent shawls and robes, a complete toilet table in silver with all its appendages was much spoken of for its exquisite design. There was also a prayer book painted on vellum in the cinquecento style, and, a perfect antithesis, a fan of our day, set with precious stones and painted by Lebrun of Paris. The Grand Duchess Alice of Tuscany gave the bride a set of antique cameos of great beauty and value; and the Countess of Chambord, who is related to both bride and bridegroom, added to the collection a costly ornament of pearls and diamonds.

The bridegroom, Prince Leopold, is ten years older than his youthful bride. He is a son of Prince Luitpold, uncle to the reigning King of Bavaria, who is recognised as the chief of the Anti-Unity party in the Southern Kingdom.

Marshal Macmahon, President of the French Republic.

(See page 20.)

MARSHAL MACMAHON, Duc de Magenta, succeeded to the Dictatorship of France upon the resignation of M.-Thiers. He is of noble and ancient Irish extraction, and was born in 1808. His full baptismal name is Marie Edmé Patrice Maurice. He received his early education in the house of his father, and afterwards entered the military school of St. Cyr, whence he passed to the staff corps, and within five years of his entering the military service he was sent to Africa, where he took part in the Algerian wars. In 1830 the young soldier began to distinguish himself in such a manner by his reckless daring and bravery, that he had conferred upon him on the field of battle, at the hill of Mongai, the cross of Legion of Honour. MacMahon shortly afterwards became a lieutenant in the 8th Cuirassiers, and in 1832 we find him engaged in the siege of Antwerp, where he acted as aide-de-camp to General Achard. His gallant conduct in this expedition won for him the cross of the Order of Leopold. In the following year he returned to Africa, holding the rank of captain, and was present at the assault of Constantine in 1836. In this engagement he was slightly wounded, and for his distinguished bravery he was promoted to the grade of officer of the Legion of Honour. Four years later he was raised to the rank of Major of the Infantry Chasseurs, and in 1842 he assumed the rank of lieutenant-colonel of the Second Foreign Legion. In 1845 he was appointed colonel of the 41st Regiment of the Line, and in 1848 he became general of brigade and governor of Tlencen. In 1849 he was made a commander of the Legion of Honour, and advanced to the governorship of the provinces of Oran and Constantine—a position in which he had a still wider field for the display of his genius both as a warrior and a statesman. He became grand officer of the Legion of Honour, general of division, and commander of the Army of the North in 1852. Then came the Crimean War. When Marshal Canrobert was obliged to return invalided from the Crimea in 1855, General MacMahon, who was then in France, was selected by the late Emperor to succeed to the command of a division; and when the chiefs of the allied armies resolved upon the final assault of Sebastopol, the post of carrying the strong works of the Malakoff was assigned to General MacMahon. In this famous and successful assault he took a personal part; establishing himself in that formidable work, and holding it, notwithstanding the repeated and prolonged efforts of the Russians to dislodge him. In reward for his brilliant success on this occasion, he was presented with the grand cross of the Legion of Honour, and on the establishment of peace with Russia, General MacMahon returned home to receive the dignity of a Senator of the Empire; he was also nominated by Her Majesty an honorary Knight Grand Cross of the Order of the Bath. In 1857 he was again in Africa, commanding an expedition against the Kabyles, and was afterwards appointed commander-in-chief of the sea and land forces in Algeria.

On the breaking out of the Austrian war, he was appointed commander-in-chief of the second *corps d'armée* of Italy. For the conspicuous part he took in this campaign, more especially at the great and memorable battle of Magenta, he was made a Marshal of France and created Duke of Magenta—honours conferred upon him by the late Emperor on the field of battle. In 1861 he represented France officially at the coronation of the King of Prussia, a position which he sustained with great pomp and dignity. In the following year he was nominated to the command of the third *corps d'armée*, and in 1864 he was nominated Governor-General of Algeria.

He was recalled from Algeria to take the command of the first *corps d'armée* at the breaking out of the Franco-Prussian war, being appointed to the command of the first army corps, with its headquarters at Strasburg. On the 6th of August he was attacked by the Crown Prince of Prussia at Woerth, where, in spite of a desperate charge of cavalry under his orders, he was driven back, and on the 30th was again defeated, and forced to retreat from Beaumont beyond the Meuse. He was chief in command at the Battle of Sedan, but received a severe wound in the thigh at the beginning of the engagement. Having been disabled by his wound for several months, during which he kept to his sick bed at Wiesbaden, he returned to France in the following March, when he was nominated commander-in-chief of the army at Versailles. He successfully conducted the siege of Paris against the Commune, and aided M. Thiers in the reorganisation of the Army. In December, 1871, he was requested to become a candidate for the representation of Paris in the National Assembly, but he declined to accept the nomination; and it was only with great reluctance, and because he felt that his refusal might probably throw Paris and France into sudden anarchy, that he undertook in the early days of June, 1873, "relying on God and the army," the arduous task of the "Dictatorship" of France as successor to M. Thiers.

The New Bishop of Winchester.

(See page 21.)

THE Right Rev. Edward Harold Browne, D.D., hitherto Lord Bishop of Ely, who has been translated to the see of Winchester, as a member of the Episcopal Bench has been hitherto known rather for sound judgment, sober views, and theological learning than for any great brilliancy as a speaker or preacher. He was one of the contributors to "Aids to Faith," to Dr. Smith's "Dictionary of the Bible," and also to "The Speaker's Commentary on the Holy Scriptures," now in the course of publication; and his "Exposition of the Thirty-Nine Articles," first published in two large octavo volumes in 1850-53, has so far superseded Bishop Tomline's and Bishop Beveridge's treatises on the same subject as to have reached a ninth if not a tenth edition. According to "Crockford's Clerical Directory," he is also known as the author of "Sermons on the Atonement and other subjects," "The Messiah Foretold and expected," and "The Pentateuch and the Elohistic Psalms, in reply to Bishop Colenso."

Dr. Browne is a brother of Sir Thomas Gore-Browne, of New Zealand celebrity, being the youngest son of the late Lieut.-Col. Robert Browne, of Morton House, Bucks, who was a magistrate and deputy-lieutenant of that county. His mother was Sarah Dorothea, daughter of the late Mr Gabriel Stewart, of Nottington, in Dorsetshire, sometime M.P. for Weymouth. He was born at Aylesbury in the year 1811, and received his early education at Eton College, under Dr. Keate.

From Eton he passed to Emmanuel College, Cambridge, where he took his bachelor's degree in 1832, obtaining honours in both the classical and mathematical tripos. He proceeded Master of Arts in 1835, and about the same time was elected to a fellowship in his College. In 1836 he was ordained deacon by the then Bishop of Ely (Dr. Allen), and priest in the following year. He acted for a short time as one of the tutors of his college, and in 1842, on the death of Mr Courtenay, was appointed to the incumbency of St. Sidwell's Church, Exeter, then lately notorious for its surplice riots. From this sphere of duty he was promoted in 1850, by the patronage of Bishop Phillpotts, to the rectory of Kenwyn, in Cornwall. In 1857 he returned to Exeter as one of the canons of that cathedral, holding also the rectorship of the neighbouring parish of Heavitree. Having held for some years the office of vice-principal and professor of Hebrew at St. David's College, Lampeter, in South Wales, he was appointed in 1854 to the Norrisian professorship of Divinity at Cambridge, which he held until his elevation in 1864 on the recommendation of the then Prime Minister, Lord Palmerston, to the bishopric of Ely. In 1840 the Bishop married Elizabeth, daughter of Mr Clement Carlyon, and granddaughter of the late Mr Thomas Carlyon, of Tregrehan, Cornwall. Extensive as his former diocese was, Dr Browne will find that together with higher dignity and an increased income, his new diocese will be still more arduous, extending as it does from London Bridge very nearly to the coast of Normandy. The diocese of Winchester includes parts of Surrey and the whole of Hampshire, with the Isle of Wight, Guernsey, Jersey, Alderney, and Sark; it ranks third in precedence among episcopal sees, only those of London and Durham standing before it.

Mr. John Stuart Mill.

(See page 24.)

MR. JOHN STUART MILL closed his eyes at Avignon, on Friday, the 9th of May, 1873, after a few days' illness, from an attack of erysipelas, having all but completed his 67th year. He had left England for Avignon, in order to follow up his botanical studies, near the end of April, apparently in his usual health, so that his death was unexpected. The son of Mr.

Digitized by Google

James Mill, a gentleman well known in his day as the historian of British India, John Stuart Mill, was born in the northern suburbs of London, on the 20th of May, 1806. He was educated chiefly at home, under his father, until 1820, when he was sent to France to learn the language, and to attend lectures in science and philosophy. In 1823 he was appointed to a clerkship in the old East India Company's establishment in Leadenhall-street, entering the Examiner's Department under his father, and for upwards of thirty years continued to be employed in that and the Political Department, lending occasional aid in other departments also, as, for instance, those of public works and education. Rising by gradual steps of promotion, in 1831 he became an Assistant Examiner (without, however, any great change in his duties); and in 1856 he succeeded to the headship of the Examiners' Department. In 1858 the management of the company was transferred by Act of Parliament from the Board of Directors to the Crown; and, although Mr. Mill was most firm in his opposition to the transfer, yet so high a sense of his experience and acquaintance with Indian subjects was entertained, that Lord Stanley offered him a seat upon the New Indian Council of Her Majesty. Mr. Mill pleaded in excuse for declining it, his services of upwards of thirty-five years, and a desire to recruit his health by rest from labour. He retired from his official duties in the October of that year upon a well-earned pension.

After a few years of repose, he entered political life, and at the general election of July, 1865, he was chosen, as an advanced Liberal, as the colleague of Captain Grosvenor, in the representation of Westminster. In Parliament he made his mark; and, whether it was in dealing with such subjects as those of the Women's Suffrage, or the Irish Land Question, or the question of Standing Armies, he was always ready to espouse the weaker side, if he felt that it was in accord with his preconceived notions of abstract justice. In the House of Commons, though far from being in his native element, his wonderful stores of wisdom and learning caused him to be regarded with respect, and an educated audience could hardly *fail to* appreciate his superior attainments, even though its members disliked his sentiments. But the result of this line of action was far different in its effect on the electors of the constituency of Westminster, who, at the *last* general election, emphatically showed their own estimate of him as a practical senator, by leaving him at the bottom of the poll. For his own part, he was glad to escape from the bustle and turmoil of Parliamentary *life*; and during the latter period of his days he spent considerably more than half his year at his favourite home at Avignon.

In 1865, Mr. Mill was elected Lord Rector of the University of St. Andrew's. Mr. J. S. Mill from a very early period of his life connected himself with literature, and contributed to many of the more thoughtful periodicals of forty years since. From the time of the French Revolution of July, 1830, throughout the exciting period of the first Reform Bill, and even to a later date, he was a frequent and even constant writer in the leading London newspapers on the side of advanced Liberal opinions; and from 1835 to 1840 he carried on the *Westminster Review*, at first as the friend and associate of the late Sir William Molesworth, and afterwards on his own account. During this period also he contributed several papers on literary, philosophical, and political questions to the *Edinburgh Review*.

It was not until the year 1843 that Mr. J. S. Mill's name became extensively known, out of London, as an original writer and powerful thinker. In that year he published his "System of Logic, Ratiocinative and Inductive," in two large octavo volumes. This work has had a wonderful effect on the study of logic in the University of Oxford, which has always made that subject a special branch of teaching, and has largely helped to dethrone the older gods of logic from their seats of authority. A year or so later, Mr. Mill published his "Essays on some Unsettled Questions in Political Economy." In 1848, proceeding a step further in the same direction, Mr. Mill published a treatise on "The Principles of Political Economy, with some of their Applications to Social Philosophy." Mr. Mill was among the first who came publicly forward to advocate the redress of "Women's Wrongs;" and the fact of the cause of Englishwomen finding such a mouthpiece and advocate on the platform and in Parliamen, has had an immense influence in turning the tide of public opinion into the right channel, and conquering those prejudices of old standing which, more than anything else, were in the way of ameliorating the condition of women in this country.

The following is a list of Mr. Mill's chief publications:—"A System of Logic" (1843), "Essays on Unsettled Questions of Political Economy" (1844), "Principles of Political Economy" (1848), "Liberty" (1859), "Considerations on Representative Government" (1861), "Utilitarianism" (1862), "Auguste Comte and Positivism" (1864), an "Examination of Sir William Hamilton's Philosophy" (1865), "England and Ireland" (1868), and "The Subjection of Women" (1869). Mr. Mill was elected a Corresponding Member of the French Academy in 1860, and an Associate of the Belgian Academy in 1870. In 1851 Mr. Mill married Mrs. Harriet Taylor, the widow of one of his oldest friends, and the daughter of Mr. Thomas Hardy. She died a few years since, and lies buried at Avignon, and Mr. Mill had no family by his marriage. To his wife, while she lived, he was devotedly attached; she was ever the sympathiser of his thoughts and aspirations, and the companion of his leisure hours; and, happy in her society at home, he seldom went abroad, either at Blackheath, or in London, or at Avignon. He dedicated his work "On Liberty" to her memory as "the inspirer, and, in fact, the author of all that was best in his writings," and in the same page he commemorates her "unrivalled wisdom." After her death his chief companion and friend was his stepdaughter, Miss Helen Taylor, who kept his house, acted as his amanuensis, and entertained his friends. Mr. Mill was buried at Avignon, by the side of his wife.

The Late Lord Lytton.

(See page 25.)

WHATEVER Lord Lytton—the Bulwer of our earlier recollections— undertook, from government as a Cabinet Minister rejoicing in the addition of a new province to the empire, to the composition of a magazine article—as orator, novelist, dramatist, poet, satirist, essayist, translator, critic—he did all well, and some things more than well. This great writer, who contributed to give the English literature of the nineteenth century its unprecedented richness and variety, died on the 18th of January, 1873, at Torquay. The Right Hon. Edward George Earle-Lytton Bulwer-Lytton was the third son of the late General William Earle Bulwer, of Heydon Hall, Norfolk, by Elizabeth Barbara, daughter and sole heiress of the late Richard Warburton Lytton, Esq., of Knebworth Park, Hertfordshire. He was born in May, 1805, and received his first education from his mother. He took his degree of B.A. at Cambridge in 1826, and became M.A. 1835, receiving the honorary degree of LL.D. from the same University in 1864. His love for literature was early displayed, and at the age of fifteen he appeared in print as the author of "Ismael, an Oriental Tale." Passing over, however, the list of immature works which used to give point to the gibes of *Fraser's Magazine* forty years ago, his novel "Pelham," anonymously published in 1827, was the first that marked the advent of a great master. This was at first coldly received, but afterwards attained a brilliant success. His next novels followed in rapid succession. "The Disowned" appeared in 1828, "Devereux," in 1829, "Paul Clifford," in 1839, "Eugene Aram" in 1832, and "Godolphin," in 1833,

Somewhere about the latter year Bulwer succeeded Campbell the poet in the editorship of the *New Monthly Magazine*, to which he contributed a series of papers, afterwards republished in 1835, under the title of "The Student." With "The Last Days of Pompeii" Lord Lytton may be said to have commenced his second manner as a novelist; and in "Rienzi," published in 1835, his increase in breadth and mellowness was still more marked. He now also began his career as a dramatic writer, with the play in five acts of "The Duchess de la Vallière;" and in 1836 appeared an uncompleted historical work, "Athens, its Rise and Fall." In fiction, "Ernest Maltravers" and its sequel, "Alice;" and in the Drama "The Lady of Lyons"—perhaps the most widely popular play of modern times—"Richelieu," "The Sea Captain," and "Money," a comedy, were all produced before 1840. In 1838, on the occasion of the coronation of her present Majesty, Mr Bulwer was created a baronet, in conjunction with Sir John Herschel, as representatives respectively of literature and science. The *Monthly Chronicle*, a short-lived periodical which he started in conjunction with Sir D. Brewster and Dr. Lardner in 1841, will perhaps be best remembered by its containing the germ of what afterwards became the remarkable romance of "Zanoni;" though to this magazine Sir Edward also contributed an "Historical Review of the State of England and Europe at the Accession of Queen Victoria," which received the highest commendations from M. Guizot. Sir Edward's career as a novelist, which had been for a while interrupted, was renewed in 1841 by the production of "Night and Morning," followed in 1842 by the completed "Zanoni"—"the well-loved work of his mature manhood." The result of the German studies to which about this time he devoted himself, appeared in his translation of the "Poems and Ballads of Schiller," in 1844. This, however, had been preceded by his ambitious and picturesque romance, "The Last of the Barons" (1843). Passing over the labours of intermediate years, about the beginning of 1848 was inaugurated Bulwer Lytton's latest and best "manner." He began to contribute to *Blackwood's Magazine* "The Caxtons," which was published in a completed form in 1849. In 1848 also was published his fine historical romance, "Harold." The last three novels of this great and prolific author are "My Novel," and "What will He do with it," both contributed to *Blackwood*; and "A Strange Story," which appeared serially in *All the Year Round*, and in which the author returned to that weird debatable ground between the natural and supernatural which he had formerly explored in "Zanoni."

Our notice has necessarily the form of a catalogue, yet we have by no means exhausted the list of Lord Lytton's works. His poems alone form no brief list; but of these we shall only mention his "King Arthur," which, first published anonymously, and completed in 1849, was republished two or three years since by its author as the work upon which he elected that his fame as a poet should rest.

As a politician Lord Lytton played a distinguished part. He entered Parliament in 1831 as a member for St. Ives, in the Liberal interest, and in 1832 he was returned to the new Reformed Parliament for Lincoln, which he continued to represent till 1841, when he lost his seat. He now for some years kept aloof from the strife of parties, and his political views underwent a change; when he re-entered Parliament as one of the members for Herts in 1852, his sympathies were with the Conservatives. It was as a Conservative that he became in 1858 Secretary of State for the Colonies, under Lord Derby as Prime Minister, and it was during his term of office, and under his auspices, that the colonies of Queensland and British Columbia were added as new commonwealths to the British Empire. Sir Edward, who had added his mother's name to his patronymic by royal licence in 1844, on

Digitized by Google

her decease, elected to retain that name on his elevation to the dignity of the peerage, and in 1866 entered the Upper House as Baron Lytton; and certainly no name in that august chamber has been more illustrious.

Lord Lytton died in harness. For some years he had passed his winters at Torquay, and here he had just finished revising the last proof sheets of a new novel, "Kenelm Chillingly; His Adventures and Opinions." He had recently enjoyed unusually good health, and a week before his death letters written by his own hand had been received in London. He had been subject, however, to occasional attacks of violent ear-ache; and which ended fatally with violent inflammation.

Thomas Faed, R.A.

(See page 28.)

MR. FAED is the most distinguished representative of the school of painters founded on the practice of the late Sir David Wilkie. His works, though falling short of those of his prototype in delicacy of insight and refinement of rendering, are conceived in the same spirit and show a true congeniality of idea with that master. The characteristics of both are a close imitation of external nature united with the expression of human feeling told with a considerable amount of dramatic force. In Mr. Faed's works these peculiarities are most strongly exemplified in his two popular pictures, "The Last of the Clan" and the "Mitherless Bairn."

Thomas Faed was born at Burley Mill, near Kirkcudbright, in 1826. His father, who was a man of considerable mental power, with a genius for mechanical contrivances, which he had no opportunities for developing, there carried on business as an engineer and millwright. The beauty of the surrounding scenery, and the marked character of the peasantry, soon attracted the attention of the incipient artist. When the mill was standing still in the summer time for want of grist, he converted the smoke-begrimed room into a studio, and there painted assiduously, from the rustic world around him. Faed's father died while he was yet in his boyhood, but the eldest brother John, who had already achieved distinction as a painter in Edinburgh, appreciated Thomas's drawing talent, and invited him to his house in that city in 1843. At the Scott Centenary banquet in August, 1871, a large panel, with Sir Walter Scott's full coat of arms, was placed on the wall of the hall. Concerning this coat of arms it was related that it was painted some thirty-two years ago for the Scott Monument Festival, by Thomas Faed. The artist commissioned to paint the panel fell ill, and a lad, then a mere student in painting, was employed to do the work. This lad was the now celebrated artist, and it is further stated that the payment for this work was the first money his brush ever earned him. The design was painted afresh for the festivities in 1871, but, in deference to the artist's reputation, the gigantic supporters—a mermaid and a black man—were left untouched. Thomas Faed remained in his brother's house for some years, cultivating his talent for painting by studying with assiduity in the Edinburgh school of design, under Sir William Allan, annually carrying off prizes in various departments of art. The first work he exhibited in public was a drawing in water colours, "The Old English Baron," but he afterwards devoted himself to oil painting. In 1849 he became an associate of the Royal Scottish Academy, and produced amongst other works the picture of "Scott and his friends at Abbotsford." In 1852 he turned his face southwards, and settled permanently in London. His works exhibited at the Royal Academy in 1851 and 1852 attracted attention, his first decided hit being made in the picture entitled "The Mitherless Bairn." From that time Mr. Faed was an established favourite with picture buyers and picture dealers, and continued painting pictures of the same tone of feeling, exhibiting in 1856 his "Home for the Homeless" and "Highland Mary." In 1857 Mr. Faed's "First Break in the Family" appeared, a picture representing a young man leaving his cottage home and all his early ties, another work appealing directly to the domestic feelings, and full of those pathetic incidents which "all who run may read." In his "Listener ne'er hears good of Himself" Mr. Faed showed the humorous side of his talent; returning to his original style in "My Ain Fireside" and "Sunday in the Backwoods." The last-mentioned picture is popularised to an immense extent by engravings, woodcuts, and photographs; it was purchased by the late Mr. Holdsworth for 900 guineas, and resold at the dispersion of his pictures for 1310*l*. Another favourite picture of Mr. Faed's is "His Only Pair," a work full of nature and humour, showing a poor little ragged urchin waiting while his boots are being patched. The most dramatic of his works, "From Dawn to Sunset," is also in most respects the most powerful picture he has ever painted. This picture ensured Mr. Faed his election to the associateship of the Royal Academy, of which he became a full member in 1865.

G. F. Watts, R.A.

(See page 29.)

MR. WATTS represents among English artists the ideal school, of which the principal leaders are himself and Mr. Leighton. It is perhaps as a painter of portraits that Mr. Watts is most widely known and admired. His power of perceiving the most prominent mental characteristic of his sitters, and of placing them on canvas, is very great, and shows to a marked extent how much his manipulative capabilities are informed by his perceptive faculties. His portrait heads of Alfred Tennyson, Thomas Carlyle, Mr Gladstone, Herr Joachim, and many other personages famous in the world of intellect and art, are highly appreciated. It is understood that Mr. Watts selects his sitters, admitting no one to the honour of being transferred to canvas by him, unless they possess some special distinction of intellect, avocation, or charm of personal appearance. All his heads illustrate in various degrees the qualities that interest us in his work in general, and raise his portraiture into the region of the ideal, the mental atmosphere in which his mind usually works. Hence no one would care to see him break his rule and employ on common-place subjects those powers which are now fitly consecrated to the perpetuation of originals either beautiful or artistic, powerful of mind or distinguished in some way.

George Frederick Watts, R.A., was born in London in 1818, and studied at the Royal Academy. His name occurs in the exhibition catalogue as early as 1836, and we find some historical pictures of his included in the catalogues of subsequent years. He first came into public notice in 1843, on the occasion of the cartoon exhibitions in Westminster Hall, where his "Caractacus" secured a first-class prize of 300*l*.

Mr. Watts then went to Italy, in order to study the works left us by the great masters of religious and historical painting, and there acquired a bias towards the early Roman manner, which influenced some of his subsequent productions. On his return to England he engaged in the fine arts competition in 1847, and was again successful, his oil painting of "Alfred encouraging the Saxons to resist the Danish Invaders" having been awarded a first-class premium of 300*l*., and been subsequently purchased by the Royal Commissioners. It now forms the chief ornament of one of the committee rooms in the new Houses of Parliament, where its quiet tone, broad manner, and harmonious colour form a favourable contrast with others of the pictorial decorations of the building. Though so successful in the competitions for the decoration of the Parliament Houses, Mr. Watts was only employed to paint one of the actual decorations of the building—the fresco of St. George in the Poets' Hall. Of this work, as of the others in this apartment, but little now remains on which to base any judgment. Fortunately, Mr. Watts has had other opportunities afforded him for displaying his powers in mural painting. His most important work of the kind is "The School of Legislation" in the great hall of Lincoln's Inn, a picture in which are assembled the chief lawgivers of every name and country, somewhat after the manner in which Raffaelle has assembled the great teachers of religion in his "School of Theology." The subject has been thoughtfully conceived, and regarded throughout from a noble point of view; the colouring is harmonious and grave. Another specimen of fresco decoration from the hand of Mr. Watts is the "Majesty" in the church of St. James the Less, Westminster. His easel pictures are mostly of classical and scriptural subjects. From amongst them we may cite his "Time and Oblivion" and "Love and Death" as very fine examples of his peculiar style of art and feeling. The meeting of "Jacob and Esau" is remarkable for its Titianesque richness of colour and pathos of conception; the "Orpheus and Eurydice" a most poetical rendering of the old Greek myth; and the "Dove returning to the Ark over the waste of waters" a most original and impressive conception of the subject. Mr. Watts has turned his attention to the kindred art of sculpture as well as to painting, and has exhibited a bust of Clytie, which was held to indicate much plastic power. He has contributed some critical notes on the art of the ill-fated B. R. Haydon to the biography of that painter's life written by Mr. Tom Taylor. These pages show a considerable amount of ability on matters relating to painting, and form not the least interesting portion of a deeply interesting book.

Miss O'Neill (late Lady Becher).

(See page 32.)

LIKE so many gifted and beautiful women, Miss O'Neill was of Irish birth and parentage. She owed but little to education beyond which she might have acquired in the theatrical company at Drogheda, of which her father was manager. It would seem that until the year 1812, when she must have been twenty years of age, she was acting with her father's company in Dublin, with only such success as resulted in a life of misery. The luck, however, for which she waited was not long in coming. A favourite actress of the day, presuming on her hold of the public, repaid their somewhat generous admiration with a waywardness of temper that in the case of so many stage heroines has been the despair of the *impresario*. For some obscure reason, just as the curtain was about to be raised, the lady refused to appear in her part, which was a principal one. In this dilemma the manager was told of the clever and beautiful girl, who was acting at some barn or shed in the proximity of the theatre. A few words will tell the story. She took the part with success, and the Dublin people by storm. There was no manner of doubt about it; one night had decided the question.

From the T. R. Dublin to the metropolitan boards was but a step. In October, 1814, she came out at Covent Garden as Juliet. London was in a *furor* of admiration. Old and established favourites were forgotten, and nothing was heard of but this beautiful Irish girl. We can scarcely realise a Juliet with a brogue, but it would seem to have been as attractive on her lips as we know it is on those of her fair compatriots generally; and we gather that it was not felt to be a drawback, as we are told that "for grace, sweetness, delicacy, and refinement, she was unequalled," not only amongst her contemporaries, but also amongst her predecessors of that generation. Something possibly of her attraction might have been owing to her youth. The public, for the first time for many years, saw before

DESIGN FOR BORDER.

A. GOATER, NOTT.M

Digitized by Google

them an actress who not only enacted, but who looked the part; and (with reverence be it spoken), whatever may be the potency of genius, there are occasions when we prefer to worship it with our eyes open. An aged Juliet lies under a crushing disadvantage. Mrs. Siddons, with her good sense, evidently felt this, and finding the *débutante* occupying with *éclat* the principal characters that were once considered almost exclusively her own, prepared to retire from the stage. Perhaps the relative merits of the two actresses were best expressed in the terse and epigrammatic remark of Sir Thomas Lawrence, "Siddons is Melpomene always; O'Neill is nature and herself."

Notwithstanding her natural physical advantages, her success in comedy was by no means great. It was in serious and pathetic parts that her genius shone to its full advantage; consequently, as Juliet, Belvedera, Isabella, and Bianca, in "Fazio," she reigned unequalled, a reign, however, that was destined to be a brief one, as in 1819 she bade adieu to the stage, preparatory to becoming the wife of Mr. Becher, afterwards Sir William Wrixon-Becher, Bart., of Ballygiblin, co. Cork.

After becoming established in her domestic circle, she took but little interest in the stage or things relating thereto. Once only did she forget herself, it is said, in this new *rôle*. A few years since she witnessed the success of Miss Kate Terry in the part of Juliet, and in the impulse of the moment she sent to her "the congratulations of a Juliet of a long past time." She passed away at the close of the year 1872, at the age of eighty-one years, leaving a family of three sons and two daughters.

The late Mrs. Somerville.

(See page 33.)

Mrs. Somerville was in many respects the foremost woman of our own time. Her death took place at Naples on the 4th December, 1872, when she had attained the great age of ninety-one. In all the enumerations of women, who, from time to time have broken through the bonds of conventionality with regard to mental acquirements, Mrs. Somerville has always been, and will continue to be, mentioned as one of the few women remarkable for scientific attainment. In 1869 Mrs. Somerville gave to the world her last important work, "Molecular and Microscopic Science." The publication of such a work as the last-mentioned by a lady in her ninetieth year is altogether without a parallel. Mrs. Somerville's labours were rewarded by the receipt of a pension of £300 a year, bestowed upon her by the nation. The scientific world showed its estimation of her attainments by conferring on Mrs. Somerville the "blue ribands" of science. In addition to the award of the Geographical medal, the Royal Astronomical Society elected her in 1834 one of its honorary fellows, the same honours being at the same time bestowed upon Miss Caroline Herschel, the only two ladies upon whom such a distinction was ever conferred. The Fellows of the Royal Society subscribed for a bust of her, which was executed by Chantry, and now adorns the library of the Royal Society.

Mrs. Somerville was born on the 26th of December, 1780; her maiden name was Mary Fairfax. She is said to have been sent to school at Musselburgh, and to have always shown a strong love for reading. She obtained her first insight into arithmetic and geometry by listening to the lessons her brother received from his tutor. She became so interested in the problems, that she always managed to carry off her brother's Euclid to her own room, so that she might go over the ground by herself.

In early life, Mary Fairfax married Capt. Creig, of the Russian navy, an officer of scientific attainments and tastes, to whom she is said to owe the culture of her mathematical talents and her devotion to the physical sciences. At his death she married her cousin, Dr. William Somerville, and went in 1839 to reside at Florence. Sir Henry Holland tells us, in his pleasant "Reminiscences of Past Life," that he saw the Donati comet in 1858 at Florence, in company with Mrs. Somerville, of whom he speaks as "probably the only woman in Europe capable of calculating the orbit of a comet from the elements given by observation. By both marriages she had children, Mr. Woronzow Greig, who died a short time ago, having been her son by the first marriage.

The work by which Mrs. Somerville is best known, and the one which is necessarily the most popular, is her physical geography. In this she treats of the whole organisation of the earth, and, to enable her to do this thoroughly, she lays under contribution many cognate sciences, such as geology, meteorology, botany, and many others. This book has done more than any other to render physical geography a matter of real interest. Her "Connexion of the Physical Sciences" appeared earlier than her "Physical Geography," and reached a ninth edition. Mrs. Somerville's scientific life extended over a period of sixty years, the first public distinction gained by her being a medal awarded in 1811 by the Edinburgh Philosophical Institution. The "Mechanism of the Heavens" was not published until her thirty-fourth year. Mrs. Somerville took an active interest in all branches of science down to the last, and suffered but little from bodily ailment, except from extreme deafness. She was noted for her cheerfulness and her love for the society of young people. No subject, we are told, could be started in which she did not take a lively interest. Till within a short period of her death a portion of every morning was devoted to reading and writing; and in the spring of last year she amused herself for several hours in the day with mathematical studies. The last years of her life, it is said, were partly occupied in the compilation of her autobiography.

The Lady's Work Table.

INTRODUCTION.

An important exhibition of art needlework has been held at the South Kensington Museum during the year 1873, which has given fresh life to designers and fancy workers. An inspection of the wonderful treasures displayed therein imbued them with more ambitious aims as to the destination of their productions, the object of the exhibition being to make decorative needlework a prominent feature in the ornamentation of household furniture. The specimens exhibited comprised articles worked before the present century; and all who have studied the contents of the exhibition must have felt a certain sense of humiliation on comparing the work of the present day with that of the past, as there are signs of retrogression in almost every particular—in material, in workmanship, and in colouring. Many of the specimens worked a century ago will not only proudly bear comparison with, but will bear off the palm against the greater part of the work of the present day; even in such details as quilting, where the modern worker has the advantage of that most useful invention, the sewing machine. Let us hope that the incitement given by a band of Royal and high-born ladies, through whose exertions the exhibition was collected, may prove beneficial, and serve to illustrate the point that needlework is not only one of the most useful, but also a most ornamental accomplishment. If thoroughly cultivated and developed, it serves as a prominent agent in producing very artistic and pleasing effects.

The lucrative industries practised by ladies during the past year have been fan painting, tile painting, illuminating books and albums—autograph and photograph—screen painting, and screen making. Broderie Persse is a novelty for screens and borders. It is cretonne chintz cut out—that is, the figures and flowers are cut out, and then *appliqué* on an écru linen ground, the flowers and stems being painted in. Fern work has been made a remunerative employment. The ferns are preserved so that the colour is retained, and these are arranged between panes of ground glass, so as to produce pleasing effects for windows, doors, screens, &c., &c.

In lace there is some alteration in the braids, wider ones are made, and close imitations of Louis Quinze are produced with it. Attempts are being made to copy leaves and flowers with braid, and the hand-screen we here give in colours is the most successful design of the sort yet produced. Macramé lace is once more revived. It is worked on a pillow with twine, and is found useful for trimming écru dresses as well as furniture. The accompanying designs show the latest patterns in Renaissance embroidery, knitting, point lace, crochet, and tatting, guipure d'art, &c., all of which are popular in the fancy-working world.

Description of Coloured Plates.

Bannerette in Point Lace.

Designed by Madame de G.

(see frontispiece.)

After tracing the design on kid or tracing calico, and tacking the braid on the scrolls and butterflies, commence tacking on the fern leaves, at the end leaf; double in a small piece of braid, and tack it flat down to the first pair of leaves, then turn the braid, and tack it on each leaf, and carry it flat on to the next pair of leaves until the spray is complete. Then with a fine linen thread, whip round and form the first leaf into shape by drawing the thread a little where required, and sewing it tight at the beginning of stalk; for the stalk, fold each edge of the braid over towards you, and overcast it into the round form required; continue forming the leaves and stalk to the end of the spray, then with soft flax thread (such as is ordinarily used in working satin stitch on cambric) sew over and over evenly all down the stalk. Fill in the scrolls and butterflies with the various stitches, and work the bars with thorns, and the edge last. There must be a thick thread tacked along the edge, before working, to make it firm.

Coloured Design for Border.

By Madame de Boutellier, 125, Oxford-street, W.

This border, which is a mixture of Greek and Renaissance styles, is suitable for a variety of purposes. It serves as a bordering to table covers, or *portières*, or window curtains, and it likewise looks well used alternately with velvet or cloth stripes for chairs, ottomans, cushions. It is worked in Penelope canvas with single Berlin wool. Filoselle is used for the lighter shades of yellow. We are indebted for the design to Madame Le Boutellier, 125, Oxford-street, W.

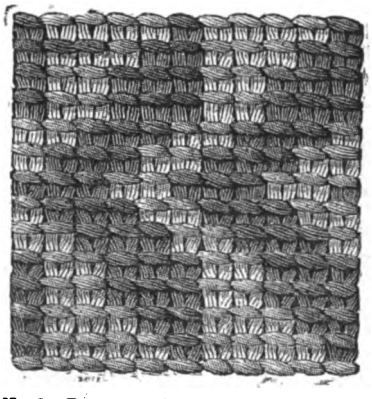
1. Opera Cape with Hood (Knitting).

THE opera cape with hood is designed by Mrs. Mee, of 8, Brook-street, Hanover-square.

Three oz. of white Shetland wool and a pair of long ivory or wooden needles No. 5 are required. Cast on 368 stitches.—1st row. Knit 1, make 1, * knit 1, slip 1, knit 2 together, pass the slipped stitch over, knit 1, make 1, knit 1, make 1; repeat from *; at the end make 1, knit 1. —2nd row. Plain knitting.—Repeat these two rows alternately until 16 are done.—17th and 18th rows. Plain knitting.—19th row. Make 1, knit 2 together; repeat.—20th and 21st rows. Plain knitting. Take off, on separate needles, 5 patterns of the border at each end, and the 2 plain stitches of the knitting (these will afterwards have to be joined up the fronts of the cape), and knit the stitches remaining in the centre in the following pattern: 1st row. * purl 5 stitches together, pass the wool back, knit 1 stitch, but do not let it off, pass the wool over the needle to the back; again knit the same stitch, pass the wool over the needle to the back; knit the same stitch a third time and let it off; this forms one pattern; repeat from * to the end. Take up one of the stitches of the side border, and knit it with the last stitch as one.—2nd row. Purl.—3rd row. * Knit the 1st stitch, but do not let it off, pass the wool over the needle to the back again; knit the same stitch, pass the wool over the needle again, knit the stitch again and let it off, seam 5 together, and repeat from *.—4th row. The same as 2nd. Repeat from 1st row once more. In the next or 9th row, only the 14 centre patterns are to be knitted; slip off the stitches till you come to these, take a fresh ball of wool and knit 14 patterns; turn and knit these same stitches as before for 3 more rows, break off the wool, leaving a good needleful to draw the knitting together, and fasten off the end into one of the bumps (but this need not be done until the knitting is finished). Now return to the first ball of wool, and knit the whole number of stitches for 8 rows, joining to the side border whenever the rows go to the end. Then knit 120 stitches only in the centre, for 4 rows in the same way as before; then knit all the stitches for 8 rows. Knit 168 stitches in the centre of the knitting for 4 rows. Repeat the 4 first rows 6 times, next row knit 8 patterns, purl 6 together twice following, pass the 2nd stitch on right hand needle over the last, knit 4 patterns, repeat the decreasing with 4 patterns between, till only 7 patterns remain, knit these. Repeat the 4 first rows 6 times more with the whole number of stitches, then cast off. For the Hood cast on 150 stitches, knit 5 plain rows.—6th row. Purl 2 together, make 1, repeat; knit 6 plain rows, * knit 4 patterns in the centre of the knitting for 4 rows in the same stitch as the cape; then 6 patterns for 4 rows, then 8, 10, 12, 16, and 20 patterns, each for 4 rows. Repeat from * twice more, then knit the whole number of stitches for 4 rows, draw in the last row of the cape to about half a yard, and the same with the hood, bind them together with a coloured satin ribbon, leaving enough at each end for strings to tie round the neck, run a narrower ribbon of the same colour into the row of holes round the cape and hood. Work a row of crochet round the hood in the following manner: Work * 7 extra long stitches into 1 loop, make 3 chain, miss 2 loops, work a stitch of double crotchet into the next 3 chain, miss 2 loops, and repeat from *. A pretty bow of satin ribbon of the same colour as the strings, sewed in the centre of the hood in front, completes it.

2. Cross-over Fichu (Tricot).

MATERIALS REQUIRED.—Pearl-grey, black and white single Berlin wool, a long wooden tricot needle No. 4, a short bone crotchet needle, and one large jet button. The body of this fichu, which is also to be worked in crochet tricoté, is the same as that at No. 4, except that the basque is open up the centre. The fichu is commenced at the back of the waist by 7 stitches, and the back, shoulder pieces, and front are to be worked from the directions given for No. 4. After these are completed, the basque is to be crocheted, as follows: On half of the 7 stitches at the commencement of the back, *i.e.*, up to the 4th stitch, 6 stitches are to be raised and worked back, for which purpose the upright loops of the 1st row and the horizontal ones of the foundation chain are to be employed. In the 2nd row the number of stitches are to be doubled, by raising them both in the upright loops and in the chain stitches between, and the same is to take place again in the 3rd row. The 24 stitches thus made are to be worked straight for 12 rows, and then rounded off, by taking in a stitch on each side, and in every row (in the manner directed in No. 4), until only 8 remain. The second portion of the basque is of course to be worked like the first, upon the remaining stitches of the original 7 at the waist. The border, which is shown in detail at No. 2*a*, is worked separately in the tricot stitch with white and black wool, and sewn to the fichu. For the width make 14 Ch., and work, as the detail shows, with both colours at once. Of course the black stitches are raised and worked back with black wool, and the white ones with white, and care must be taken in passing the colours at the back not to tighten them. The number of stitches of each colour can be plainly seen in the detail. After the border is completed and sewn on, an outer scolloped edge of 4 rows, like the one in No. 4, is to be added to it in black and white wool, and the first three rows of it are to be repeated on the inner side of the fichu. The cross-over fastens with a button and two loops at the back, as described in No. 4.



No. 2*a*. DETAIL OF CROSS-OVER FICHU (No. 2).

3. Lady's Vest, in Russian Crochet.

THIS vest is worked with single Berlin or Saxony wool, of any colour preferred, in Russian or ribbed crochet, which consists in always taking up the lower part of the stitch, or that nearest to the first finger of the left hand when holding the work. Before commencing, an exactly fitting pattern of the vest must be cut out in stiff paper, with the plaits in front basted in their proper places, and basques shaped according to those in the design No. 3, and to this pattern the crochet work must be fitted. In cutting the pattern allowance should be made both in the depth and width of the front for the border, which is to be added when the rest of the vest is completed. Begin by one of the fronts, making a chain of the required length for the edge, and crotchet up and down lengthways in rows (turning the work every time), gradually increasing at the top for the throat, and also at the other end for the shape of the basque, in both of which the paper pattern must be consulted. The first row is plain DC., in the next the ribbed crochet begins, and at the end of each row 1 Ch. is made to turn with, otherwise a stitch is lost. To increase, add one or more Ch. at either end of a row as you may require stitches, and work back upon them in the next. After a certain number of plain rows begin to slope the shoulder; leaving out the Ch. to turn with will diminish a stitch in each row, but if this be not sufficient, stop short of the end of the last row by one or two stitches, as may be required, in going up, and work the 1st stitch of the descending row as a single to keep the edge smoother. At the same time the shape of the gore in front must be attended to in the following way: when you have arrived at the place where it ought to begin, work a row down to the top of the plait, and turn back without going on to the edge of the vest, make no Ch. to turn with, and work the first stitch of the ascending row as a single; in coming down again stop one stitch before the last of the preceding row, and go back as before. Continue in this way till the gore has the shape required by the pattern; then work a row from the edge of the vest the whole way up, carefully taking up the ends of all the sloped rows, and do a few more long rows, but begin again to decrease at the top for the armhole, according to the pattern. Afterwards the rows must turn back at the height of the armhole, and be continued only between it and the waist for one slit of the basques, which must be left sufficiently open to admit of the border being added on both sides. This completes one front, as the back is to be made to meet it under the arm. The second front must be worked to correspond, taking care that the two pieces, the gore, &c., should face each other, which will not be difficult, as the ribbed crochet is alike on both sides. The back must be worked to fit the paper pattern, beginning by the edge of the basque under the arm, increasing the rows at the top gradually for the other portion of the armhole, sloping the shoulder to correspond with the front, and keeping several of the following rows straight at the top for the centre of the back at the throat, in short by increasing and decreasing where requisite, the shape of the paper pattern must be followed. The basque at the back is open up the centre to the waist, which gives it room. The pockets are merely simulated by a piece of the border being placed along in the proper position. This border, which is to be added (either in a darker shade or in black) to the edge of the vest, and round the throat and armholes, consists of 4 rows of crochet tricoté done with a rather smaller crochet needle than the rest of the work.—5th row. For the scollop; insert the needle under the horizontal stitch, between the upright loops, *DC. in 1st space, 2 trebles in each of the next two, and DC. in the 4th; repeat from *; this will form a kind of open heading to the scollops. It will be found more convenient to measure the length required for the armholes, throat, &c., make a chain for each, and work them separately, running them down afterwards on the edge of the vest. The border only goes up the sides of the slits in the basques meeting at the top. In putting it on round the basques, make a plait at the corners to turn with. Sew six jet buttons at equal distances on the border of the right front, and make the six button-holes in the border of the opposite one in the following manner: When raising the stitches of the 2nd row of the crochet tricoté, miss 3 upright loops of former row at regular intervals, to correspond with the position of the buttons, passing the wool along at the back, not straining it too tightly. In working the same row back make 3 Ch. to supply the place of the stitches missed, wherever they occur, treating the rest as usual. In the following row raise stitches in the 3 Ch., taking up at the same time the loose wool left at the back so as to conceal it, and work the rest in the usual manner. Should some workers, however, think this too troublesome, hooks may be placed at the back of the buttons, which will easily fasten into the border of the other side of the front.

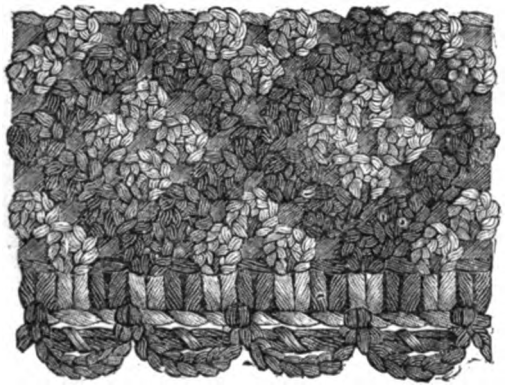
4. Cross-over Fichu in Tricot.

MATERIALS required: Pearl-grey, violet and white, single Berlin wool, a long wooden or bone tricot needle, No. 4, a short bone crochet, of suitable size, and one large jet button. The body of this fichu is worked in crochet tricoté with pearl-grey single Berlin wool; the border, with violet and white wool in looped crochet, is done separately and sewn on. The fichu is commenced by the basque at the back, for the width of which 66 chain are to be made. In the first row raise stitches in the first 36 of these, and work back 6 of them.—2nd row. Raise stitches again in these last 6 stitches, and in the following 4 chain, and work back the first 14 stitches, or 4 more of the original 36.—3rd row. Raise stitches again in these 14, and in the following 4 Ch., and work back 22 stitches. Continue in this way, lengthening the rows by 4 stitches at each end until the whole 66 stitches are taken up (the last turns there will only be 2 stitches to increase.) After 5 plain rows, a stich is to be decreased in the next 20, on each side of every row, by taking up as one the 2 perpendicular loops after the edge in raising the stitches, and also the 2 before the last stitch. This will diminish the stitches to 26, which are to be still further reduced in the next row to 13, by taking 2 together every time in raising the stitches, and these in the next row are to be decreased again in the same manner to 7, which completes this portion of the fichu to the waist at the back. After one plain row a stitch is to be increased after the 1st stitch of each row, and before the last, by raising a stitch in the chain between the perpendicular loops; and this increase is to be continued for 34 rows, when there will be 75 stitches, and the top of the back is reached. You then proceed to crochet the two pieces that go over the shoulders, each separately, leaving the 7 centre stitches of the back unworked. The outer edge at the side next the shoulders is kept straight for the next 45 rows, whilst on the side next the throat in the same rows the number of the stitches is to be reduced to 16. For this purpose decrease in the manner before directed in the 2nd, 3rd, and 4th rows, then 5 times with one row between, and 10 times with 2 rows between; 12 rows follow, in which, by taking in at both edges in every row, the end is brought to a point of one stitch, which completes one side of the fichu. The other must be worked from the shoulder to correspond, and the whole have a row of DC. crocheted round it.

The border, the detail of which is given at No. 4*a*, is worked in raised loops with violet and white wool. The three lengths required for the two sides of the fichu and the edge of the basque are worked each separately. For the width of the border 7 Ch., and one for the edge, must be made in violet wool. It is worked in the tricot stitch, and the loops (which are made in the working - back row) consist of 5 Ch., the loops in the border there is a white loop between the 2nd and 3rd stitches, a violet one between the 4th and 5th, and again a white one between the 6th and 7th, then work the edge stitch with violet.—Next row. Raise stitches with the violet wool in all the perpendicular loops as usual, taking care to take up those that are close behind the raised loops (keeping the latter of course in front), as this it is which will bring them into their proper places, and see that you always have the proper number (8) on your needle before beginning the working back. In the 2nd row of loops there will be a white loop between the 1st and 2nd stitches, a violet one between the 3rd and 4th, another violet one between the 5th and 6th, and a white one between the 7th and 8th. With these directions the worker must carefully follow the position of the loops in the detail No. 4*a*, so as to form the pattern regularly. After the border is sewn on, the following edge is to be crocheted round the outside of it, and also along the whole of the plain side of the fichu.—1st row. DC. with violet wool.—2nd row. Alternately a violet and a white DC. (to make these distinct, each DC. must be finished with the colour required for the next one).—3rd row. Like 1st.—4th row. With violet wool, * 1 DC., 5 Ch., 1 long (thread twice over) on the 1st of the 5 Ch., missing 3 stitches of last row; repeat from *. To fasten the fichu, make a loop on the under side of each point by a DC., 10 Ch., DC., and sew a large jet button on the middle of the back at the waist, over which both loops will pass.



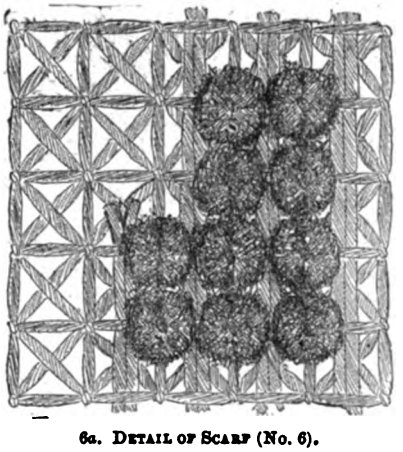
4a. DETAIL OF CROSS-OVER FICHU (No. 4).

5. Knitted Petticoat.

THIS PETTICOAT is knitted with white fleecy wool and two rather coarse bone needles; it is knitted in seven parts, which are crocheted together upon the wrong side. It may be knitted in fingering with No. 8 needles, but of course a much smaller petticoat will be made. You knit for each of the seven parts in exactly the same manner. Cast on 46 stitches, and knit them back.—1st row. Knit 5, * 2 purl, 2 knit; repeat from * to the end of the row, and knit 5 stitches plain again. These five plain stitches are represented in the engraving by the plain stripe running up the skirt. Repeat this first row eight more times, then in the next ten rows reverse the pattern. Knit the 5 edge stitches, and the two following, so that the little rib forming the pattern will be broken; knit 9 more rows in this way, reverse the pattern again. In these directions "a row" signifies one needle being knit off. Work as described until you have 9 little sets of patterns; in the 10th pattern and each of the following until you come to the 17th pattern, counting from the bottom of the work, just after the first five edge stitches; decrease by knitting two stitches together; then follow the pattern, and decrease at the end of the needle in the same manner before the last five stitches, then work without any decreasing until you have 22 patterns in the whole stripe, and fasten off; repeat this stripe 6 more times. The front stripe is knitted with 56 stitches instead of 46. The pattern and edge are formed in the same manner as the other stripes. If when all these are finished the petticoat is too narrow, a plain stripe should be knitted for the back; by a plain stripe we mean a stripe with no decreasings. When all the stripes are finished and joined together you should knit on the foundation row 6 rounds of purl knitting (more needles will be required for this), and then two rounds plain knitting, and fasten off loosely. For the width of the border round the bottom of the petticoat you cast on 22 stitches.—1st row. Knit plain.—2nd row. Purl.—3rd row. Knit plain.—4th row. Purl.—5th row. Knit plain.—6th row. Purl.—7th row. Purl.—8th row. Plain.—9th row. Purl.—10th row. Plain. Commence again from the first row; repeat this until you have the necessary quantity, and sew to the bottom of the petticoat. On the under edge of this border you crochet a small edge as follows: In the next stitch work 1 DC., 3 treble, 1 DC., * miss the next stitch, and work 1 DC., 3 treble, 1 DC. in the following; repeat from *. The waistband of this petticoat should be elastic, and a vent hole be left behind.

6. Scarf.

THIS scarf is of German manufacture, and the fabric is certainly a novelty in England. We have seen similar work made in machines; but, though we have not yet had sent to us the proper frames for the work when done by the hand, we think many of our readers will be able to copy our illustration, and have a very satisfactory result by using the old-fashioned square frame used for mats, with the little holes at equal distances from each other in the centre, or more easily still by stretching a length of the very wide coarse Leviathan canvas, cut the necessary length and width, in an embroidery frame. The detail gives the manner of crossing the wool on the frame, and this, it is easily seen, can be quickly followed on canvas. The slanting lines should be laid on first, then the perpendicular, lastly the horizontal, and these horizontal lines are worked twice over, and the last time you tie all the threads underneath together, but *not* to the canvas. It is very pretty work, and very effective without any balls, and should be mounted on silk of a bright colour, with cotton wool inside as a wadding; this must be cut the exact size required, and the woolwork laid on. We can recommend this work done in a simple manner, like our engraving, as a nice employment for boys.



6a. DETAIL OF SCARF (No. 6).

7. Under Petticoat (Crochet Tricoté).

MATERIALS required—¾lb. scarlet "petticoat wool," or 4-thread fleecy, and 2oz. of black 4-thread fleecy, 3 long wooden or bone tricot needles, the stem measuring No. 4 of the Bell gauge, and a short bone crochet needle of about the same size. The Scotch "petticoat" wool is a particularly nice wool for the purpose, softer than 4-thread fleecy, and about the same thickness, to be had at Haig and Vince's, 209, Oxford-street; but it is only made in scarlet and white, so that for the black, 4-thread fleecy must be used. The upper part of the petticoat, which is gored, is worked first in rows up and down, and then the lower border crocheted upon it in straight rows across. Make 85 Ch. (which can all be held on one needle), with the scarlet wool, for the length of the upper part, and work 9 rows in plain crochet tricoté. In the 10th row the slope for the first gore must be begun in the following manner: Raise stitches in all the loops as usual, but work back the first 30 only of them. Raise stitches again in these 30, and work them back, and 5 more from the reserve, thus making 35 stitches. Proceed in this manner, taking 5 more stitches from the reserve in working back each row, till the whole 85 are used up, which forms the gore.

Digitized by Google

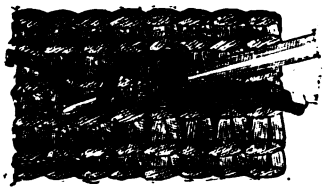
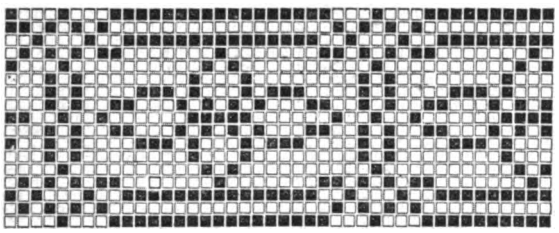
Four similar gores, with 9 plain rows between them, are to be crocheted for the first half of the petticoat, then 12 rows for the middle, and the other half is to be worked to correspond, but the gores of course must be reversed.

For the lower portion or border.—1st row. With black, plain, raising the stitches the whole way along in the ends of the rows of the parts already worked (to hold which two more tricot needles will be required); this will make the upright loops at right angles to the former ones. Work back as usual; but, as the next row is scarlet, that colour must be taken through the two last loops on the needle (the black, however, not being broken off, but left at the back) and this must be done each time the colour is changed.—2nd row. Scarlet; but, instead of the usual way of raising the stitches, they are to be worked from the back of the upright loops, which gives a different and raised appearance to the stitch. This row, in working back, must have the black wool taken through the last 2 stitches. 3rd row. Plain, with black, preparing at the end for the scarlet, with which the 4th to the 21st row are to be worked plain; and it is on this stripe that the black pattern seen in detail at No. 7*b*, is to be afterwards crocheted.—22nd row. Plain with black.—23rd row. Scarlet, raising the stitches as directed for the second row.—24th row. Plain with black. Now join up the petticoat at the back to the height of the placket hole.—25th row. DC. in black with the short crotchet needle, taking up each of the upright loops.—26th row. Begin the scollops for the edge with the scarlet wool, *DC. on the 1st stitch, 1 Ch., miss 2 stitches of last row, 3 treble, with 1 Ch. between each, in the following one, 1 Ch., miss 2 stitches, and repeat from*.—27th row. With black. *DC. taken entirely over the 1st scarlet DC. and into the black stitch of the row below, 3 DC.



7*a*. Detail of Under Petticoat (No. 7).



7*b*. Detail of Under Petticoat (No. 7).

in the Ch., treble and Ch. of last row, 3 DC. in the centre one of the 3 treble, 3 DC. in the next Ch., treble and Ch., and repeat from*.—This completes the scollops. The border, which is to be done in single crochet in black on the wide scarlet stripe prepared for it, must be worked from the detailed pattern given at No. 7*b*, the manner of doing which is shown in the detail No. 7*a*. As this, however, may be considered too troublesome by some, it is as well to mention that the petticoat will look very well if the alternate rows from the 4th to the 20th—viz., the 5th, 7th, 9th, &c.—be worked plain in black; but to make both sides of the stripe correspond there should be only 20 rows altogether instead of 21. The petticoat is to be put into a linen band at the waist.

8. Baby's Shoe with White Stocking.

Materials required—¾oz. of coloured single Berlin wool, ¾oz. of white ditto; 4 needles, size 14 or 15 for a loose knitter; pink rosette for instep and pink ribbon to tie round the ancle.

You commence by knitting the heel of the shoe, only using two needles, with pink wool cast on 30 stitches.—1st row. Knit 2, purl 2 alternately; in this row you knit the 2 first stitches, but in every other row always slip the 1st stitch instead of knitting or purling it, and knit or purl the next according to the directions.—2nd row. Purl 2, knit 2 alternately.—3rd row, Purl 2, knit 2 alternately.—4th row. Knit 2, purl 2 alternately, Repeat these 4 rows five times more—25th row. Knit 20, knit 2 together; * turn your needle, slip 1, knit 10, knit 2 together; repeat from * until you have only 12 stitches left on your needle; these 12 stitches form the sole. Break off your wool.

For Sides of Shoe.—The loops are now taken up down the sides of heel. Place your heel as in diagram, and begin to take up at A. If your heel was on the right foot it would be at the top of left side, and you may also know it by the end of wool being there which you first cast on with. Beginning therefore at A, take up, and as you take up knit down the side of heel to B 12 stitches. Knit on the same needle the 12 sole loops, then down the other side of heel, take up, and as you take up knit 12 more stitches, making 36 in all on your needle. These 36 stitches are worked backwards and forwards as follows till the sides of the shoe are long enough:—1st and 2nd rows. Knit 2, purl 2 alternately for 12 stitches, knit plain the 12 sole loops, knit 2, purl 2 alternately the remaining 12.—3rd and 4th rows. Purl 2, knit 2 alternately for 12 stitches, knit plain 12 sole loops, purl 2, knit 2 alternately the remaining 12. Repeat these 4 rows five times more, 24 rows in all.

To Form the Instep.—You now use 4 needles. Slip 18 stitches on one needle, leaving 18 on the 2nd; on a third needle, with the 4th, cast on 12 stitches in the German way, to come across the foot and form the instep. The German way of casting on is to put your needle through the last loop knitted (it will be the last of the 18 on your 2nd needle), throw the wool over, draw it through, and put it on the needle. Do this 1st loop with the 3rd needle, and repeat the same with a 4th needle on the 3rd, until you have made twelve stitches. The shoe is now knitted round; the 1st needle after forming the instep is called the 1st side needle, the next the 2nd side needle, and the 3rd the instep one. With your 4th needle commence the 1st round. 1st side needle, knit 2, purl 2 alternately, end with purl 6; 2nd side needle, purl 6, knit 2, purl 2 alternately; instep needle, knit 2, purl 2 alternately.—2nd round. 1st side needle, knit 2, purl 2 alternately, end with knit 6; 2nd side needle, knit 6. Knit 2, purl 2 alternately; instep needle, knit 2, purl 2 alternately.—3rd round. 1st side needle, purl 2 together. Knit 2, purl 2 alternately, end with purl 6; 2nd 2nd side needle, purl 6. Purl 2, knit 2 alternately, end with knit 2 together; instep needle, purl 2, knit 2 alternately.—4th round. 1st side needle, purl 1. Knit 2, purl 2 alternately, end with knit 6; 2nd side needle, knit 6. Purl 2, knit 2 alternately, end with knit 1. Instep needle, purl 2, knit 2 alternately.—5th round. 1st side needle, knit 1. Purl 2, knit 2 alternately, end with purl 6; 2nd side needle, purl 6. Knit 2, purl 2 alternately, end with purl 1; instep needle, knit 2, purl 2 alternately.—6th round. 1st side needle, knit 1. Purl 2, knit 2 alternately, end with knit 6; 2nd side needle, knit 6. Knit 2, purl 2 alternately, end with purl 1; instep needle, knit 2. Purl 2 alternately.—7th round. 1st side needle, knit 2 together. Knit 1. Purl 2, knit 2 alternately, end with purl 6; 2nd side needle, purl 6. Purl 2, knit 2 alternately, end with purl 1, purl 2 together; instep needle, purl 2, knit 2 alternately.—8th round. 1st side needle, knit 2, purl 2 alternately, end with knit 6, 2nd side needle, knit 6. Purl 2, knit 2 alternately; instep needle, purl 2, knit 2 alternately.—9th round. 1st side needle, purl 2, knit 2 alternately, end with purl 6; 2nd side needle, purl 6. Knit 2, purl 2 alternately; instep needle, knit 2, purl 2 alternately.—10th round. 1st side needle, purl 2, knit 2 alternately, end with knit 6; 2nd side needle, knit 6. Knit 2, purl 2 alternately; instep needle, knit 2, purl 2 alternately.—11th round. 1st

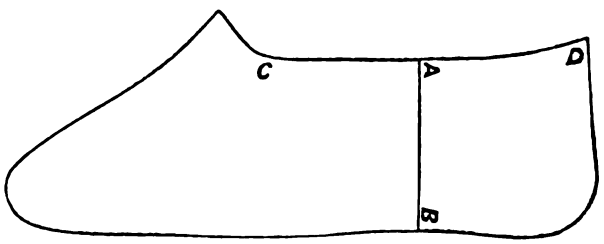


Diagram of Shoe.

side needle, knit 2 together. Purl 2, knit 2 alternately, end with purl 6; 2nd side needle, purl 6. Purl 2, knit 2 alternately, end with purl 2 together; instep needle, purl 2, knit 2 alternately.—12th round. 1st side needle, knit 1. Purl 2, knit 2 alternately, end with knit 6; 2nd side needle, knit 6. Purl 2, knit 2 alternately, end with purl 1; instep needle, purl 2, knit 2 alternately.—13th round. 1st side needle, knit 2 together, knit 1. Purl 2, knit 2 alternately, end with purl 6; 2nd side needle, purl 6. Knit 2, purl 2 alternately, end with purl 1, purl 2 together; instep needle, knit two, purl 2 alternately.—14th round. Knit 2, purl 2 alternately, end with knit 6; 2nd side needle, knit 6. Knit 2, purl 2 alternately; instep needle, knit 2, purl 2 alternately.—15th round. Same as 3rd.—16th round. Same as 4th.—17th round. Purl 2 together, purl 1, knit 2, purl 8; 2nd side needle, purl 6, knit 2, purl 2, knit 1, knit 2, together; instep needle, knit 2, purl 2 alternately.—18th round, 1st side, needle, purl 2, knit 2 alternately, end with knit 6; 2nd side needle, knit 8, purl 2, knit 2; instep needle, knit 2, purl 2 alternately.—19th round. Same as 11th.—20th round. Same as 12th. 21st round. 1st side needle, knit 2 together, knit 1, end with purl 8; second side needle, purl 6, knit 2, purl 1, purl 2 together; instep needle, knit 2, purl 2 alternately.—22nd round. 1st side needle, knit 2, purl 2, knit 6; 2nd side needle, knit 8, purl 2; instep needle, knit 2, purl 2 alternately.—23rd round. 1st side needle, purl 2 together, knit 2, purl 6; 2nd side needle, purl 8, knit 3 together; instep needle, purl 2, knit 2 alternately.—24th round. 1st side needle, purl 1, knit 8; 2nd side needle, knit 6, purl 2, knit 1; instep needle, purl 2, knit 2 alternately.—25th round. 1st side needle, purl 2 together, purl 7; 2nd side needle, purl 6, knit 1, knit 2 together; knit plain the instep needle, and knit on that needle the 1st stitch of the 1st side needle.—26th round. Knit plain the 7 remaining stitches on 1st

Digitized by Google

side needle, and on same needle the next 7 stitches off 2nd side needle, slipping the 8th stitch on the instep needle, so that you have 14 stitches on each of the two needles. Break off a short length of wool, turn your shoe inside out, carefully keeping the loops on the needles, and then knit them off together for the toe as you do in a stocking. After this, turn your shoe right before commencing the roll at the top.

ROLL AT TOP OF SHOE.—This is worked with four needles and coloured wool. Hold the shoe in your left hand, the toe towards you, take up, and as you take up knit 14 stitches across the instep. You begin to take up where marked C in the diagram. With another needle take up, and as you take up knit 27 stitches down side of shoe to middle of heel, marked in the diagram D. From D to C take up 27 more stitches on a third needle. Knit 5 rounds plain. Cast off loosely. This curls over and forms a roll at top of shoe.

WHITE STOCKING.—With white wool take up on same stitches as you did the pink roll, 12 stitches across the instep, 27 along each side.† See diagram. Observe, these stitches are to be taken up from the bottom of the coloured roll inside the shoe. Knit one round plain. Now the stitches on the instep needle only are knitted backwards and forwards, taking one at each side off the other needles, thus—1st row. Slip 1 * knit 2 together, make 1 (by throwing the wool over the needle), knit 1, make 1, knit 2 together; repeat from *. End with slip 1, knit the 1st stitch of the 27 loops on next side needle, and pull the slipped stitch over it. Turn and work backwards for—2nd row. Slip 1, purl 10, slip 1, purl the 1st stitch on next side needle, pull the slipped stitch over it; repeat these two rows 7 times more. You will have 12 loops on instep needle, 19 on each of the other needles.

COLOURED STRAP FOR SHOE.—Take your coloured wool and knit round like a stocking one round.—2nd round. Purl all the stitches.—3rd round. Knit 2, make 1, knit 2 together, knit 4, * make 1, knit 2 together, knit 2; repeat from * to end of round. These holes are to run ribbon into.—4th round. Purl all.—5th round. Knit plain.

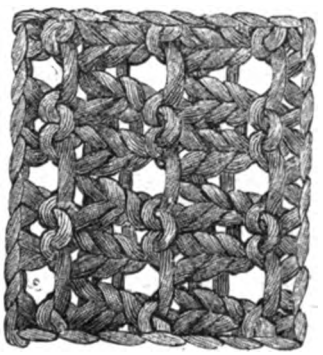
WHITE STOCKING.—With white wool—1st round. Knit plain. After this 1st round arrange your stitches thus: Knit the 1st front needle loop on to side needle, and slip the last loop on same needle on the other needle, leaving 10 on instep needle and 20 on each of the other needles.—2nd round. * Knit 2 together, make 1, knit 1, make 1, knit 2 together; repeat from * to end of round. Repeat these two rounds 7 times more.—17th, 18th, and 19th rounds. Knit 3, purl 2 alternately.—20th round. With coloured wool knit plain.—21st round. Knit 3, purl 2 alternately. Repeat these 2 last rounds in white; again in colour.—26th round. With white knit plain.—27th, 28th, and 29th rounds. Knit 3, purl 2 alternately; cast off.

9. Knitted Petticoat for Child from Four to Six Years Old.

MATERIALS REQUIRED.—Ponceau, black and white Scotch fingering, or single Berlin wool, if preferred, and 5 wooden needles, No. 10, without knobs. This petticoat is commenced by the lower edge, for the entire width of which 164 stitches are to be cast on, or 41 on each needle, with ponceau wool, and knitted in rounds.—1st round. * Over, 1 plain, over, 2 plain, slip 1, knit 1, pass stitch over, 1 plain, slip 1, knit 1, pass stitch over; 2 plain; repeat from *.—2nd round. Plain. These two rounds are to be repeated to the 6th round.—7th round. Purl.—8th round. Plain.—9th round. Purl.—10th and 11th rounds. Plain, with white wool.—12th and 13th rounds, with black wool, * 1 plain, take off a stitch as if about to purl, keeping the thread at the back; repeat from *.—14th round. Plain, with white wool; continue repeating the last three rounds, to the 35th round. It must be observed that the black stitches are always to be alternated, and the stitch that is taken off in one round is to be knitted in the following one. With the 36th round, the upper part of the petticoat begins, which is to be knitted throughout with the ponceau wool. Two plain rounds, and then a purl one. At the 11th repetition of the purl round, the opening for the placket-hole is to commence; and from this point, instead of continuing to knit round, it must be done backwards and forwards in rows, in such a manner that the pattern, of 2 plain and 1 purl row, should be kept up on the right side of the work. In this way repeat the 2 plain rows 7 times, and the purl row 6 times, and in the row after these, decrease the stitches to 112, by knitting 2 together, at short intervals, as may be required. With this number of stitches, knit the waistband in ribs of 1 plain, 1 purl alternately; it has 4 black and 3 white stripes of 2 rows each, keeping up the rib. When completed cast off all the stitches, and make a ponceau string of chain stitches, finished with tassels, to tie the petticoat together.

10. Shawl (Knitting and Crochet).

MATERIALS.—¾ lb. of Ponceau or rich crimson double German wool, 2 long wooden or bone needles, No. 9, and a coarse short bone crochet. This shawl, which is three-cornered, is knitted, and has a crochet edging round it, into which the fringe is tied. No. 10*a* shows the detail of the stitch, which is to be knitted backwards and forwards in rows.—1st row. * over, slip 1, knit 1, pass stitch over, 1 plain; repeat from *.—2nd row. Purl.—3rd and 4th rows. Plain.—5th row. Begin again at the 1st, and repeat these 4 rows throughout the shawl, which is commenced from the top or longest side with 270 stitches. At the beginning of every row a decrease is to be made by knitting the 2nd and 3rd stitches together. This must not be allowed to interfere with the pattern of the knitting, in which the holes made by the "over" must always be kept in a line over each other. The stitches are continued to be reduced in the above manner until only 5 are left, which are to be cast off for the point of the shawl at the back. The following edging is to be crocheted round the shawl when completed: * DC. on the 1st stitch, 3 Ch., 2 long (thread twice over) on the next 3 Ch.; repeat from *. The wool for the fringe is to be cut in lengths of 6 inches, 8 of which are to be tied in between every 2 longs of the edging.



10*a*. DETAIL OF SHAWL.

† N.B.—Only 12 stitches are taken up across the instep now, not 14 as in coloured sole.

11. Child's Petticoat (Crochet).

THIS petticoat is crocheted in plain crochet tricotee, in black and white or red and black. Fleecy wool should be used, and a wooden crochet needle that measures No. 2 by the Bell gauge. The crochet is commenced just above the border, and with white wool. Make a chain of 206 stitches, work 5 plain rows. In the 6th row work 24 stitches plain, then decrease by taking 2 together, * 11 more plain, 2 together; repeat from * 13 more times, then work 5 more rows plain, and repeat the 6th row for the 12th row; this row is repeated again in the 18th, 24th, 30th, and 36th rows, all the intervening rows being plain. In the 37th row you begin the band, and you should have for this 96 stitches. Work the 1st row of the band with the coloured wool, and work it plain.—2nd row. With white wool, but instead of taking up the long loop take up the horizontal loop at the top of the long one.—3rd row. Plain, taking up the long loop.—4th row. Like the 2nd, with coloured wool.—The 5th row like the 2nd, with white wool; this finishes the band. You now work 5 rows with white wool quite plain for the waist, then divide the stitches for the backs; 24 stitches are taken for each back, the remainder for the front. Work 6 rows on the first 24 stitches, and decrease at the end of each row for the shoulder one stitch; then take up the last 24 stitches, and work 6 rows on these stitches, decreasing one stitch at the commencement of each row; then you work the stitches left in the middle, and decrease at each end of the row one stitch; work 6 rows in this manner, fasten off. You next take up 5 stitches on the shoulder for the sleeves, and work 12 rows plain on these 5 stitches; join this piece to the other shoulder. You now work the border round the top and sleeves; this is done with DC. crochet in the coloured wool; the edge to the sleeve is worked with a DC. on the sleeve, 2 Ch., a DC. on the next stitch. The detail gives the design for the border round the bottom. You crochet the first row plain round the bottom of the skirt with coloured wool, taking up the chain stitch and continuing the border in crochet tricotee.—2nd row. With white wool, taking up the loop lying at the top of the long loop.—3rd row. With colour, working as the last row.—4th row. With white.—5th row. In this row you commence the design, following the detail for your pattern; the dark stitches represent the coloured wool. In the next four rows continue the design.—10th row. White and plain.—11th row. Coloured wool.—12th row. With white, and in DC. crochet.—13th row. In this row commence the edge with white wool, 1 treble on each of the next 5 stitches, * 1 Ch., miss one stitch, 1 treble on each of the next 5 stitches; repeat from *.—14th row. With coloured wool, * 1 treble on each of the next 5 treble, 1 Ch.; repeat from *.—15th row. Same as the last row.—16th row. With white wool, * 1 treble on each of the next 5 treble, 3 Ch., 1 DC., taking up the chain stitch of the three last rows, 3 Ch.; repeat from *, and fasten off. You must crochet a row of DC. round the rent which is made in the back, and a piece of 4 stitches wide, which should be edged with coloured wool like the sleeves, then make two little loops and buttons to fasten it with.

12. Knitted Overalls, Combining Drawers, Gaiters, and Socks.

By Miss H. Ryder, Richmond, Yorkshire.

Materials required: 4 needles, No. 8 or No. 9, for a loose knitter; bone needles pointed at *each* end are necessary; 3½oz. of white Berlin fingering wool. The upper part of the drawers is knitted first, round and round like a stocking. The size given will fit a child of from eight months to eighteen. If wished for a younger child use smaller needles. Cast on 160 stitches, 52 on two needles, 56 on the third. Rib (that is knit) 3 purl, 1 alternately for a length of 4½ inches.

Pattern.—1st round. Purl all the stitches.—2nd round. Knit 3, purl 1 alternately.—3rd round. Knit 1, purl 1 alternately.—4th round. Knit 3, purl 1 alternately. Repeat these 4 rounds *eleven* times more. If you count the ribs formed by the purled rounds, you will find you have twelve.

To arrange the stitches for the leg.—Without knitting slip 32 stitches on one needle. Take a wool needle threaded with coloured wool, and draw the wool through the next 80 stitches, which are afterwards taken up for the left leg, and knot the wool securely to prevent any loops being let down. On a second needle slip the next 32 loops; 16 will be left on the 3rd. These 80 stitches on the 3 needles are knitted round and round for the leg. The last stitch on the first needle is the centre stitch down the back of the leg: it is always purled, and on each side of this stitch the narrowing, when commenced, is done. Knit once the 4 rounds that form the pattern.

Narrowing of leg.—1st round. Purl all.—2nd round. Knit 3, purl 1 alternately until within 4 of the end of the 1st needle, when knit 1, knit 2 together, and purl the last or centre stitch. On 2nd needle knit 2 together, knit 1, purl 1, and then knit 3, purl 1 alternately the rest of the round.—3rd round. Knit 1, purl 1 alternately until within 3 of the end of 1st needle, when knit 2, purl the centre stitch. On 2nd needle knit 2, then purl 1, knit 1 alternately rest of round.—4th round. Knit 3, purl 1 alternately until within 3 of the end of 1st needle, when knit 2 together, purl centre stitch. On 2nd needle knit 2 together, purl 1, then knit 3, purl 1 alternately rest of round.—5th round. Purl all.—6th round. Knit 3, purl 1 until within 6 of end of 1st needle, when knit 3, knit 2 together, purl centre stitch. On 2nd needle knit 2 together, then knit 3, purl 1 alternately rest of round.—7th round. Same as the 3rd.—8th round. Knit 3, purl 1 alternately until within 5 of end of 1st needle, when knit 2, knit 2 together, purl centre stich. On 2nd needle knit 2 together, knit 2, purl 1, then knit 3, purl 1 alternately rest of round. Repeat these 8 rounds until you have only 12 stitches on your 1st and 2nd needles, 16 on the 3rd. Knit the 4 rounds that form the pattern *four* times without any decreasing.

To form the holes for running in ribbon round the ankle.—Purl the 1st round.—2nd round. Knit 1 and make 1, knit 2 together alternately to end of 2nd needle. On 3rd needle (the one with 16 stitches) knit 1 and make 1, knit 2 together alternately twice. Knit 5, make 1, knit 2 together, knit 1, make 1, knit 2 together.—3rd round. Purl all.—4th round. Knit 3, purl 1 alternately.—5th round. Knit 1, purl 1 alternately.

To arrange loops for heel.—Without knitting slip all the loops on 1st and 2nd needles on one needle. Slip the 16 stitches on two needles, 8 on each.

Heel.—The 24 stitches on one needle are worked backwards and forwards for this. Always slip the 1st stitch at the beginning of each row though written knit 3, it is worked slip 1, knit 2.—1st row. Knit 3, purl 1 alternately.—2nd row. Knit plain.—3rd row. Knit 3, purl 1 alternately.—4th row. Slip 1 stitch, purl 1, knit 1 alternately. Repeat these four rows *three* times more.—17th row. Knit 15, knit 2 together, * turn your needle, slip 1st stitch, knit 6, knit 2 together. Repeat from * until you have only 8 stitches left on your needle.

To form the Foot.—Knit the 8 stitches, and with the needle that has these 8 stitches on it take up, and as you take up knit 9 stitches from side of your heel. On a 2nd needle, knitting 3 and purling 1 alternately, work the 16 stitches off the two needles. With a 3rd needle take up, and as you take up knit 9 stitches from other side of heel, also knit 4 stitches from next needle on this. You will have 13 stitches on each side needle, 16 on the centre one.—1st round. Purl all.—2nd round. Knit 3, purl 1 alternately, excepting at end of 1st and beginning of 3rd needle, when you must knit 4, purl 1.—3rd round. Knit 1, purl 1 alternately, excepting at end of 1st and beginning of 3rd needle, when knit 2, purl 1.—4th round. Same as 2nd.—5th round. Purl all, but reduce by purling 2 together at end of first and beginning of 3rd needle.—6th round. Knit 3, purl 1 alternately.—7th round. Knit 1, purl 1 alternately.—8th round. Knit 3, purl 1 alternately; repeat the last four rounds until you have only 8 stitches left on each side needle. After each narrowing you will have at the end of 1st needle and beginning of 3rd an imperfect pattern, but knit it as near like the pattern as you can; but observe the *last* stitch on the 1st needle must always be purled; the *first* on the 3rd knitted. Knit the 4 rounds that form the pattern without any reducing once or twice more according to the length you wish the foot to be.

To cast off.—The neatest way is to place all the stitches on the side needles on one needle. Turn your work inside out, and knit the toe together as in a stocking; or the stitches may have a piece of wool slipped through them and be sewn together, but always sew them together in the inside.

For other leg.—Arrange the 80 loops you have on the wool thus: Place 32 on two needles, 16 on the centre one. Your 1st needle, on which you commence to work, is the one that with 32 stitches on it ends with a purl loop which form your centre stitch. Be very particular to observe this. Knit *once* the four rounds that form the pattern. The rest of this leg is knitted exactly like the other from narrowing of leg.

Place a rosette of ribbon or wool on the shoe; ribbon or wool to tie round the ankle, and the same along the top of drawers to tie round the waist. Ribbon is easily run through with a wool needle.

Saxony wool, sold by Mr. Helbronner, 265, Regent-street, is suitable for these overalls; it is softer than the Berlin fingering, but thicker than single Berlin wool.

---

13. Child's Jacket (Knitting).

This jacket, which makes a nice out-door garment for children in autumn weather, is knitted with single Berlin wool, of any colour preferred (bright blue, scarlet, or violet look well), in rows backwards and forwards, with two long wooden needles, No. 10; but, in taking up the stitches for the neck, two or three more will be required, which may be shorter. No. 10 needles will make the jacket three-eighths of a yard deep without the edging, and, if a smaller size be desired, use needles No. 12. The pattern consists of the following 6 rows: 1st row. * 3 purl, 1 plain; repeat from *. This is on the right side of the work.—2nd row. * 1 purl, 3 plain; repeat from *, knitting the stitches as they *appear* on the wrong side, in order that they may continue the same as before on the right.—3rd row. Like 1st.—4th row. Like 2nd.—5th row. Purl throughout.—6th row. Plain throughout. Begin again at the 1st row. The jacket is commenced at the edge of one front by casting on 68 stitches, and after a plain row begin the pattern given above, and continue it for 48 rows. In the next 7, from the 49th to 55th row, increase 1 in each row for the slope of the neck, at the end of the 49th row, at the beginning of the 50th, and so on, as the increase must be all at the same end. The best way of increasing is to knit twice in the last stitch but one before taking it off the needle, and the same in the first stitch of the next row, and the pattern must be set right as soon as possible. The next 20 rows from the 56th to the 75th, are to be knitted in the pattern without increase, and in the 76th row the first 26 stitches are to be cast off for the armhole. The gore under the arm is commenced in the 77th row, for which knit the first 36 stitches only, going up.—78th row. Knit these back again.—79th row. Knit only 32 stitches.—80th row. Knit the same back. Continue in this way, shortening each uneven numbered row by 4 stitches, till in the 91st row there will be only 8 stitches knitted. Knit these back again in the 92nd row. Then in the same manner lengthen the number of stitches by 4 in each uneven numbered row, knitting those that have been left before, till in the 103d row you knit 32 stitches, and knit these back again in the 104th. In the 105th row knit all the 36 stitches, and in the 106th row knit them back again. At the end of the 107th row 28 stitches are to be cast on for the back of the armhole, and 21 rows, to the 128th, are to be knitted without increase or diminution. In the following 7 rows, viz., to the 135th, as in the front you increased a stitch in each row to shape the neck, so now a stitch must be decreased by knitting the 2 stitches before the last together at the end of one row, and the 2 first at the beginning of the next, in each of these 7 rows; after which, 29 rows are to be knitted without increase or decrease, to the centre of the back, and the second half of the jacket must be worked precisely the same, but of course reversed. When completed, all the stitches (68) must be cast off. To finish it round the throat, the edge stitches are to be picked up, placed on three or four needles as may be found most convenient, and after a plain row, the next is to be knitted as follows: 1 purl, * over, purl 2 together, repeat from *; then a plain row; this will form a row of holes through which afterwards a cord or narrow ribbon is to be passed to fasten the jacket. A notched edge composed of 7 rows follows.—1st row. Purl.—2nd row. Plain.—3rd row. Purl.—4th row. 1 plain, * over, knit 2 together; repeat from *.—5th row. Purl.—6th row. Plain.—7th row. Purl, and cast off. Turn this edging down at the row of holes, which will then form a notched edge, and run down the cast-off row, on the wrong side, to the plain one after the first row of holes. The edging for trimming the jacket is knitted separately and sewn on. Cast on for it 7 stitches with two needles (which makes it looser), and knit backwards and forwards in rows, as follows: 1st row. 1 plain, over, knit 2 together over, knit 2 together, over, 2 plain.—2nd row. 8 plain (knitting twice, once from the back, in each of the 2 first overs), over, knit 2 together.—3rd row. 1 plain over, knit 2 together, 7 plain.—4th row. Cast off four stitches, knit the remainder, 4 plain, over, knit 2 together.—5th row. Begin again at the 1st, and continue the pattern as given till you have a sufficient length. The sleeves are also knitted separately and sewn into the armholes. Cast on 50 stitches for the lengh of the sleeve, and knit in the same pattern as the rest.—1st row. Only 5 stitches.—2nd row. Knit them back again.—3rd row, 9 stitches.—4th row. Knit the 9 back again. Continue in this way, knitting 4 additional stitches in each unevenly numbered row until all the stitches are used up, knitting 5 more instead of 4 the last time; knit 12 rows with the 50 stitches, and at the end of the 12th row (to shape the top of the sleeve) increase a stitch; do the same at the beginning of the 13th, end of the 14th, and beginning of the 15th row, and continue this till 10 stitches in all have been increased, and the number on the needle has reached 60. Then follow 35 straight rows to the middle of the sleeve, the second half of which must be knitted the same, but reversed, decreasing where the first half was increased, &c. When completed, cast off the stitches, sew the sleeve together on the wrong side, and trim round the wrist with the same edging as the rest. By looking at the illustration No. 13, it will be seen that the jacket crosses over considerably

in front. Three or four rather large mother-of-pearl buttons must be sewn accordingly on the left front, and brought through the open stitches of the edging.

14. Gentleman's Knitted Ribbed Sock in Scotch Fingering.

MATERIALS.—Four and a half ounces of Scotch fingering, needles No. 14; or if a loose knitter, No. 15. Needles are numbered by Chambers's registered bell gauge. This sock is reduced in the leg. The term rib used here means knit 3, seam 1, alternately. Cast 96 stitches on one needle, knit them off on three needles, knitting two more on the first than on the last, which, when you join the sock by knitting two off last needle on the first, will give 32 stitches on each needle. (This first needle you must consider your heel or back needle throughout the sock.) Knit 3, seam 1, every round until you have knitted about five inches in length. You now commence to narrow down the leg, the narrowing is always on the *back* needle. 1st round. Knit 3, seam 1, knit 3, seam 1, knit 3, seam 1, knit 3, knit 2 together, knit 2, seam 1. Knit 3, seam 1, to end of round. In next round * knit 3, seam 1, knit 3, seam 1, knit 3, seam 1, knit 6, seam 1. Knit 3, seam 1, to end of round. Repeat from * four times. On back needle, where you have 31 stitches, knit 3, seam 1, knit 3, seam 1, knit 3, seam 1, knit 2, knit 2 together, knit 2, seam 1. Knit 3, seam 1, to end of round. In next round * knit 3, seam 1, knit 3, seam 1, knit 3, seam 1, knit 5, seam 1. Knit 3, seam 1, to end of round. Repeat from * four times. On needle you have 30 stitches, knit 3, seam 1, knit 3, seam 1, knit 3, seam 1, knit 2, knit 2 together, knit 1, seam 1. Knit 3, seam 1, to end of round. In next round * knit 3, seam 1, knit 3, seam 1, knit 3, seam 1, knit 4, seam 1. Knit 3, seam 1, to end of round. Repeat from * four times. On needle you have 29 stitches, knit 3, seam 1, knit 3, seam 1, knit 3, seam 1, knit 1, knit 2 together, knit 1, seam 1. Knit 3, seam 1, to end of round. In next round * knit 3, seam 1, to end of round. Repeat from * four times. On needle you have 28 stitches, knit 3, seam 1, knit 3, seam 1, knit 3, seam 1, knit 1, knit 2 together, seam 1. Knit 3, seam 1, to end of round. In next round * knit 3, seam 1, knit 3, seam 1, knit 3, seam 1, knit 2, seam 1. Knit 3, seam 1, to end of round. Repeat from * four times. On needle you have 27 stitches, knit 3, seam 1, knit 3, seam 1, knit 3, seam 1, knit 2 together, seam 1. Knit 3, seam 1, to end of round. In next round * knit 3, seam 1, knit 3, seam 1, knit 3, seam 1, knit 1, seam 1. Knit 3, seam 1, to end of round. Repeat from * four times. On needle you have 26 stitches, knit 3, seam 1, knit 3, seam 1, knit 3, seam 1, seam 2 together. Knit 3, seam 1, to end of round. In next round * knit 3, seam 1, knit 3, seam 1, knit 3, seam 2. Knit 3, seam 1, to end of round. Repeat from * four times. On needle you have 25 stitches, knit 3, seam 1, knit 3, seam 1, knit 3, seam 2 together. Knit 3, seam 1, to end of round. In next round * knit 3, seam 1 to end of round; this completes the reducing of leg, and you have 24 stitches on back needle and 32 on each of the other two. You must now rib every round until you have knitted about two inches and a half from the last narrowing. Prepare for heel by ribbing to the end of your back needle, and from first side (or next needle) rib on to back needle 12 stitches, rib the remaining 20 stitches from 1st side needle to another needle, rib 2nd side needle to within 12 stitches of the end; these 12 you must pass to the heel or back needle without knitting. You ought to have 48 stitches on heel, and 20 on each side needle. (The two front needles are not used again until the heel is completed.) The heel is made by ribbing alternate *rows* until it is long enough, which it will be after 36 rows. The first stitch of every row must be slipped on the needle. The front row is knit 3, seam 1; the back row is knit 1, seam 3. The 37th row, which commences round of kneel, is knitting, you no longer rib under the foot. Knit 31 stitches, knit 2 together * turn your needle, seam 15 stitches, seam two together, turn your needle, knit 15, knit two together, repeat from * until you have only 16 stitches left on your heel needle; this finishes heel. With this needle on which you have the 16 stitches take up, and as you take up knit 20 stitches from side of your heel, rib four stitches off from front needle on the same, rib all the stitches from the two front needles excepting the four last on another needle. (Observe the front needle is ribbed throughout until you commence narrowing for toe.) These 4 stitches must be ribbed on a third needle, with which take up, and as you take up knit 20 stitches from side of heel; also knit 8 stitches from other side needle to this. You will now have 32 stiches on each side needle, and 32 on front needle. In next needle, which is your *first* side needle, knit plain excepting the last stitch, which is seamed. Rib front needle. 2nd side needle.—Knit 3, seam 1, knit plain to end of needle. 1st side needle.—* Knit plain until within six stitches of the end, then knit two together, knit 3, seam 1.—Front needle. Rib. 2nd side needle. —Knit 3, seam 1, slip 1, knit 1, pull the slipped stitch over the knitted one; knit plain to end of needle. 1st side needle.—Knit plain, excepting the last stitch, which is seamed.—Front needle. Rib. 2nd side needle.—Knit 3, seam 1, knit plain to end of needle; these last three needles to be repeated *once*, then repeat from * until the foot is sufficiently reduced, which will be when you have 86 stitches in all left on your needles. Knit the foot about 8½in. long, including the heel; but this entirely depends on the length of foot required. It is all plain knitting on the *side needles*, excepting the last stitch on first side needle, and the fourth stitch on 2nd side needle; these stitches are always seamed, the front needle is always ribbed.

To reduce for Toe.—All the needles are now knitted plain. Take 6 stitches off one side needle and 5 off the other, place them on front needle, which leaves 21 on one side needle and 22 on the other side needle. You have 43 stitches on front needle. Commence the toe at front needle by knit 1, slip 1, knit 1, pull the slipped stitch over the knitted one, knit plain to within 3 of the end, when knit 2 together, knit 1. 1st back needle.—Knit 1, slip 1, knit 1, pull the slipped stitch over knitted one; knit plain to end of needle. 2nd back needle.—Knit plain to within 3 of the end, knit two together, knit 1. This reducing is repeated every third round, the intervening rounds being knitted plain until you have about 36 stitches in all left on your needles; then knit the front and back needles together, and as you knit cast them off. The term "round" here used means knitting round the sock or stocking. The term "row" means the length of one needle.

15 and 16. Dessert d'Oyleys in Point Lace.

(Designed by MRS. DE G.)

TRACE the design on kid or tracing calico, then tack the braid carefully on, whip the edges where it is at all full in the turns, and draw it as flat as possible. Work the stitches in the various leaves and scrolls where indicated, and the bars with thorns on and edge last. It is intended to give several different designs of these d'oyleys. They can either be used without linings on coloured plates, or they form a lovely set when each is mounted on a different coloured piece of satin, particularly if the white tablecloth remains on for dessert.

17. Square for Couvrette (Crochet).

THE engraving represents a square of crochet; these should be joined together either with a fancy insertion, bands of satin ribbon, or thick linen. Use Arden's cotton No. 30 and the finest size of Penelope crochet hook. You commence in the centre of the square with 5 Ch., which form into a ring.—1st round. 5 Ch., 1 treble on the ring, * 1 Ch., 1 treble on the ring; repeat from * 6 more times, then 1 single on the 4th of the 5 Ch.—2nd round. 5 Ch., * 1 treble on the next stitch of the last round, 1 Ch.; repeat from *, and at the end of the round work a single on the 4th of the 5 Ch.—3rd round. 2 DC. on the next chain stitch of the last round, * 20 Ch., 1 single on the 6th of the 20 Ch., 5 Ch. 1 single on the last DC., 2 DC. over the next Ch., DC. over the following Ch.; repeat from * 7 times. At the end of the round work a single on the first DC. in the round.—4th round. * 5 Ch., 1 treble on the 6th of the next 20 Ch., 7 Ch., 2 DC. on the 13th of the 20 Ch., 7 Ch., 1 treble on the single stitch worked in the last round on the 6th Ch., 5 Ch., 1 DC. just between the 2nd and 3rd of the next 4 DC.; and repeat from *.—5th round. 2 Ch., miss 1 Ch., work a treble on each of the next 3 Ch., taking up each of these in the usual way, but do not finish them until the 3rd is taken up, then take off all three as one, * 1 treble on each of the next 9 stitches, then on each of the 2 DC. work 3 treble, 1 treble on the next 9 stitches, and then 3 worked as the first 3, then commence these three again on the 2d of the next 5 Ch.; and repeat from *.—6th round. 1 DC. on the first treble, which is the three worked together, 1 DC. on each of the six following treble. Now work the first leaf in the pattern; for this make 12 Ch., work back on it 1 D.C. on the 10th, * 1 treble on the 8th and each of the next 6 Ch., 1 DC. on the first, 1 D.C. on each of the next 12 treble; now a leaf like the last, then 1 DC. on each of the next 6 treble, 1 DC. on each of the next 6 treble in the next point, 11 Ch. for the leaf, draw the stitch through the point of the last leaf, 1 DC. on the 10th Ch.; and repeat from *; at the end of the round join the last leaf to the first, and when the round is finished fasten off. You now work the corner, consisting of a ring and 5 leaves just over the point of treble and DC. stitches. Commence with a ring of 5 Ch., 1 DC. on the first of the same 5 Ch., 1 treble over the ring; then 2 Ch., 1 treble over the ring 5 times, 2 Ch., 1 single on the 3rd of the 5 Ch. at the beginning of the round.—2nd round. * 3 DC. over the next 2 Ch., a leaf worked in the same manner as those in the last round of the centre part; repeat from * 3 times, in the last leaf join to the two leaves on the left-hand side of a point of treble worked in the centre; then 3 DC. over the next 2 Ch., 1 single on the top of the point, 3 DC. over the next 2 Ch., a leaf, and join this leaf to the two leaves on the right-hand side of the same point; then work a single on the 1st DC. in this round, and cut the thread off. Work the other three corners in the same manner; then you work the half star in the middle of each side; for this make 5 Ch., unite, 5 chain, 1 treble over the ring, then 2 Ch., 1 treble over the ring, three times, turn, over the last 2 Ch., work 3 DC., then a leaf, join to the three leaves on the right-hand side the side point, 3 DC. over the next 2 Ch., 1 DC. on the point, 3 DC. over the next 2 Ch., a leaf, joining to the three leaves on the left-hand side of the same point, 3 DC. over the next 2 Ch., and fasten off. Work these four pieces; you then work the picots in the corners. Commence with a DC. on the 4 leaves together in the corner, 3 Ch., a picot worked to fall under the bar. These picots are worked with 5 Ch., and the needle is put into the first loop, then the 5th, drawn through, 2 Ch., an under picot, 3 Ch., 1 DC. on the first single leaf in the corner, * 3 Ch., an under picot, 2 Ch., an under picot, 3 Ch., 1 DC. on the next leaf; repeat from * twice more, and fasten off. Work 3 more of these corners; you then frame your work with a row of chain and D.C. stitches. Commence with a long on the leaf in the corner, then work a sufficient number of chain to reach to the 3rd of the three chain before the picots, 1 DC. on that

32. Square (Guipure d'Art).

Digitized by Google

stitch, the point of the leaf, and the next Ch. stitch, then chain to the 1st DC. on the half ring; work in single crochet on the ring to the last DC. on it, then chain to the 3rd of the next Ch. by the leaf, a DC. on it, the leaf, and the next Ch., then chain to the corner, on which work a long or double long as necessary. When this round is complete join with a single on the first long, and work the last round, for this 9 Ch., 1 treble on the long, *, then 1 Ch., miss 1 Ch. of last round, 1 treble on the next stitch; repeat from * to the next long, work a treble on it, 6 Ch., 1 treble on the long again, then repeat again to the end of the round, and finish by working 1 single on the 3rd of the 9 Ch.; fasten off.

18 and 20. Small Squares in Guipure d'Art.

These two small specimens of guipure d'art, which will be found useful for a variety of purposes, are both worked on squares of 8 meshes of netting each, which must be stretched in a small wire frame to be embroidered. In No. 18, a small wheel occupies each of the 4 outer corners; between these is a border of vandykes in Maltese point, and the next row is filled in point d'esprit. The centre star is composed of 2 vandykes on each of the 4 sides, also in Maltese point, within which the halves of the 4 centre meshes are filled in diagonally in the same stitch, and a wheel, the radiating threads of which pass over the last mentioned, finishes the centre. It will be seen from the illustration No. 18 that four sets of 3 long leaves, each in relief, done in point de réprise, and only attached to the foundation netting by the two ends, spring from the centre star, extending to the corner wheels and vandyke border between, completing the design. In No. 20, 3 meshes of the netting at each corner of the square are filled in with point de toile, between which are 2 rows of vandykes in Maltese point facing each other, but only taking up one mesh, and then a mesh all round in point d'esprit. The 4 circles towards the centre are worked in point de toile, each being on one mesh only, but the desired shape is given to them by passing a thread 3 times round their outer edge. Stars in relief, of 4 leaves each, are worked at the corners over the point de toile and the point d'esprit, and 4 similar ones meet round the centre, forming it into a square, which has a wheel of corresponding shape in the midst.

19. Medallion (Cordon Braid).

This medallion is worked with the fine cordon braid and Evans's cotton No. 30, the finest size of the Penelope crochet hook. You work the inner circle of crochet first, for this—1st round. 1 DC. on the first loop of the braid, * 3 Ch., 1 DC. on the next or second loop of braid, 5 Ch., draw the last chain through the 1st of the 3 Ch., 1 DC. on the three first of the 5 Ch., 8 Ch., turn, work on this 8 Ch., 7 DC., then 1 DC. on each of the three next of the 5 Ch., 1 Ch., 1 Ch., 1 DC. on the next or the 3rd loop of braid, 2 Ch., 1 DC. on the 4th loop, 2 Ch., 1 DC. on the 5th loop, 1 Ch., 1 DC. on the 6th loop; and repeat to the 12th loop of braid, then 1 DC on the 13th loop and each of the next 6 loops, 1 Ch., 1 DC. on the 19th loop, 9 Ch., take the needle out, draw it through the DC. on the 11th loop of braid, and draw the 9th chain through, 1 DC. on the 9th Ch., 1 treble on the 8th and 7th, 1 long on the 6th, 5th, and 4th Ch., 1 treble on the 3rd and 2nd, 1 DC. on the 1st Ch., then 1 Ch., 1 DC. on the 20th loop, 1 Ch., 1 DC. on the 21st loop, 1 Ch., 1 DC. on the 22nd loop, 7 Ch., draw the chain through the DC. on the 7th loop, 1 DC on the 7th Ch., 1 treble on the 6th and 5th, 1 long on the 4th, 1 treble on the 3rd and 2nd, 1 DC. on the first of the 7th Ch., 1 Ch., 1 DC. on the next loop of braid, 2 Ch., 1 DC. on the next loop, 2 Ch., 1 DC. on the next loop, 4 Ch., draw the last chain through the Ch. between the 4th and 5th loops; on this 4 Ch. work 1 D.C., 2 treble, 1 DC., 1 Ch., 1 DC. on the next or 26th loop, 3 Ch., 1 DC. on the 27th loop, 3 Ch., draw through the DC. on the 3rd loop, 1 DC. on the 3rd Ch., 1 treble on the 2nd, 1 DC. on the first, 1 DC. on the next; loop and repeat from *; when you have worked the 7th chain for the bar in the centre draw through the point of the last 8 Ch. You must repeat until you have 8 bars or scollops, then join neatly and fasten off. The first outside round. Commence * with a DC. on the loop between the 9th and 10th loops on the left-hand side of the scollops, holding the right side of the work towards you, 10 Ch., 1 DC. on the 5th loop, working to the bottom of the scollop, 4 Ch., 1 DC. on the 8th, 9th, and 10th loops, turn, 1 DC. on the 4th and 3rd of the 4 Ch., turn, 2 Ch., 1 DC. on the 13th loop, 2 Ch., turn the work, now work on the 10th Ch., 1 DC., 2 treble, 2 long, 2 double long, beginning on the 7th of the 10 Ch., and working to the first 2 Ch., 1 DC. on the 17th loop of braid, then a 5 long on the 1st DC. in this round, then 2 Ch., 1 DC. on the next loop of braid 10 times, which brings you to the 27th loop, from where you commenced, then 2 Ch., and repeat from the 1st *; finish the round with 5 Ch., after the join to the first DC.—2nd round. * 1 DC., 1 treble, 1 DC. on the five long, 5 Ch., 1 DC. on the chain between the 19th and 20th loops in the last round, then 4 Ch., 1 DC. on the next two chain, 7 times, 5 Ch., and repeat from *; at the end of the round fasten off neatly. These medallions should be joined together in the three centre loops of four chain at the top of each scallop, and one of the many stars so constantly appearing in our pages, or a wheel worked in thread introduced in the spaces left between the medallions.

21. Medallion (Tatting).

This medallion forms a good lappet worked in very fine cotton, and several of them joined together for the ends. You work first the eight ovals in the centre, leaving a sufficient quantity between each oval to correspond with the engraving. Each oval is worked with 6 double, 1 purl, 5 double, 1 purl, 5 double, 1 purl, 6 double, draw up. The ovals are joined together in the first and last purl stitches. Before you proceed further these ovals should be fastened in their places on a piece of paper, and a wheel worked in the centre with the same thread, and the connecting thread between the ovals also worked over; then a twisted thread worked between the top of each oval. The next round of ovals is worked separately, and joined to the last as you work over the thread; there are 20 ovals in the round, 8 of them being larger than the others; these 8 are worked with 6 double, 1 purl, 5 double, 1 purl, 5 double, 1 purl, 6 double; the small ones with 4 double, 1 purl, three times, 4 double. You will here observe that two small ovals are worked together on the four sides. When this round is finished you must join in the centre as before; then join two threads together, and unite them to the top of one of the large ovals. Work over the 2nd thread 2 double, 1 purl, 5 times, 2 double, knot to the top of the next oval; continue to work in this manner, but when the two small ovals come together, you work instead 2 double, 1 purl, 2 double; fasten off very neatly at the end of the round.

22. Fancy Knitting Stitch.

The stitch can only be knitted in rounds on 4 needles, and an additional one must also be provided; the number of stitches to be cast on must be divisible by 9.—1st round. * 1 purl, 2 plain, over, slip 1, knit 1, pass stitch over, 1 purl, 1 turned (knitted plain from the back of the stitch), 1 purl, 1 turned; repeat from *.—2nd round. * 1 purl, knit 2 together, over, 2 plain, * 1 purl, 1 turned, 1 purl, 1 turned; repeat from *.—3rd round. * 1 purl, 2 plain, over, slip 1, knit 1, pass stitch over, 1 purl, 1 turned, 1 purl, 1 turned; repeat from *.—4th round. * 1 purl, knit 2 together, over, 2 plain, 1 purl; take off the next 2 stitches, a turned and a purl, on a separate needle, and keeping it at the back, knit the following stitch, on the original needle, plain, then knit the 2 on the extra needle, 1 purl, 1 turned, and repeat from *.—5th round. Like the first.

23. Medallion (Crochet and Tatting).

You commence the medallion by working the centre ring of the tatted star with 1 double, 1 purl, then 2 double, 1 purl 7 times, 1 double; draw up; join the cotton to the first purl, and work an oval of 6 double, 1 purl, 6 double, 1 purl, 6 double, 1 purl, 6 double; draw up; join to the next purl, and repeat the oval, joining to the last one worked in the first and last purl stitches; fasten off at the end. With a very fine crochet needle you work the border to this star.—1st round. 1 DC. on the centre purl stitch of the first oval, * 11 DC. on the next oval; repeat from *.—2nd round. 1 treble on the first DC. 3 Ch. must be worked for this treble at the commencement of the row, * 1 Ch., miss 1 stitch of last row, 1 treble on the next; repeat from *.—3rd round. 1 treble on the first treble, * 2 Ch., 1 treble on the next treble; repeat from *.—4th round. 1 treble on the next treble, * 2 Ch., 1 treble on the following treble; repeat from *. In the next round you commence tatting again; join the thread to the first of the two next chain. With the shuttle work 4 double, 1 purl, 4 double; draw up and join to the 2nd chain, crochet in single crochet over the next 2 treble stitches and intervening chain stitches, and repeat this little oval on the next two chain, repeat all round.—2nd round of tatting. Commence by drawing the cotton and fastening it to the treble just before the next little oval, work an oval of 8 double, 1 purl, then 1 double, 1 purl 4 times, 8 double, draw the oval partially up, but leave enough space in the opening for it to lie flat at the back of the small oval, then with the crochet hook join the thread to the crochet stitch and knot it, then to the treble before the next oval, repeat the oval, joining it to the last in the first purl stitch, fasten off carefully at the end of the round.

24. Square for Crochet.

These squares are very effective worked in fine thread and arranged alternately with squares of guipure d'art. Muslin or lace for antimacassars. Commence with a chain of 5 and unite; in this ring work 8 DC. for the 1st round. 2nd round. 16 DC.—3rd round. 6 Ch., 1 treble on the 2nd DC. of the last round, * 3 Ch., miss 1 DC., 1 treble on the following, repeat from * 6 times, then 3 Ch., 1 single on the 3rd of the first 6 Ch.—4th round. Over every 3 Ch. work 5 DC.—5th round. 6 Ch., * 1 treble on the 3rd of the next 5 DC., 3 Ch., 1 treble just over the next treble in the 3rd round, 3 Ch., and repeat from *, at the end of the round work 3 Ch., 1 single on the 3rd of the 6 Ch.—6th round. 4 DC. over each of the next 3 Ch. in the last round, * 3 Ch., a leaf: for this leaf work 6 Ch., 1 DC. on the 5th Ch., 1 treble on each of the 4th, 3rd, and 2nd Ch. stitches, 1 DC. on the 1st Ch., then 5 Ch., a leaf, 3 Ch., two leaves close together, 3 Ch., a leaf, 2 Ch., 1 single on the 3rd of the 5 chain between the two first leaves, 2 Ch., a leaf, 3 Ch., 1 single on the last DC. in the round, then 4 DC. over each of the next 4 sets of 3 Ch. in the last round, and repeat from * at the end of the round: after the spray work 2 sets of 4 DC., 1 single on the 1st DC. in the round.—7th round, 3 Ch.; this three chain is for the first treble stitch in the round; miss the next DC., 1 treble on the next, * 5 Ch., 1 DC. on the top of the 1st leaf, 3 Ch., 1 DC. on the 2nd leaf, 8 Ch., 1 DC. on the 3rd leaf, 11 Ch., 1 DC. on the 4th leaf, 8 Ch., 1 DC. on the 5th leaf 3 Ch., 1 DC. on the 6th leaf, 5 Ch., 1 treble on the 3rd of the second set of

Digitized by Google

4 DC. in the last round, 1 treble on the 1st of the next 4 DC., 1 treble on the 3rd of the same 4 DC.; repeat from *; at the end of the round work a single on the 3rd of the 1st three chain in the round.—8th round. 3 Ch. for the 1st treble, * 1 treble on each of the next 5 Ch., miss the DC., 1 treble on each of the next 3 Ch., miss the DC. on the next leaf, 1 treble on each of the next 3 Ch., then 3 Ch., 1 treble on each of the next 5 Ch., the DC., and next 6 of the 11 chain, 3 Ch., 1 treble on the 6th of the 11 chain again, and each of following 5 Ch., the DC., and next 5 Ch., 3 Ch., 1 treble on the 3 next Ch., miss the DC., 1 treble on the following 3 Ch., the 5 Ch., and 1st of the 3 treble, miss the next treble, a treble on the following, and repeat from *; at the end of the round work a single on the 1st Ch.—9th round. 3 Ch. for the first treble stitch, * a treble on the 3rd, 5th, and 7th treble stitches of the last round, then 1 treble on each of the following treble until you come to the first three Ch. of the last round, work a treble on the two first of these, a treble again on the 2nd Ch., 1 treble on the 3rd Ch. and each of the following stitches to the 2nd of the next three chain, work a treble on it, 3 Ch., a treble on the second chain again, on the 3rd Ch., and each of the next treble and first of the next 3 Ch., 2 treble on the 2nd chain, 1 treble on each of the next treble until you come to the 7th stitch from the centre of the scollop, work a treble on it, the 5th, 3rd, and 1st; and repeat from *, at the end of the round work a single crochet on the 3rd of the first 3 Ch., and fasten off securely.—10th round. Commence on the 2nd of the 3 Ch. at the corner with a treble long stitch or the thread three times round the needle, 1 Ch., a treble long on the same stitch, 6 Ch., a treble long on the same stitch again, * miss 5 treble of the last round, a treble long on the following stitch, 5 Ch., a treble long on the same stitch, miss 4 treble, a treble long on the following, 5 Ch., a treble long on the same treble again, miss 5 treble, a treble long on the following 6 Ch.; now work a leaf. For this make 8 Ch., 1 single in the same stitch as the last treble long, turn, on the 8 Ch., work 1 DC., 6 treble, 1 DC. a 6 long on the 6th treble from the last treble long; now work the centre leaf with 12 Ch, 1 single on the centre treble in the scollop of the last round, turn, work on this 12 Ch., 1 DC., 10 treble, 1 DC., a 6 long on the 6th treble from the next corner, then a leaf of 8 Ch. on the next corner; when this is worked, make 6 Ch., a treble long on the corner stitch, miss 5 treble, a treble long on the next stitch, 5 Ch., a treble long on the same stitch, miss 4 treble, a treble long on the next stitch, 5 Ch., a treble long on the same stitch as the last treble long, a treble long on the next corner stitch, 6 Ch., a treble long on the corner stitch, 1 Ch., a treble long on the same corner stitch, 6 Ch., a treble long on the same stitch; again repeat from *; end the round with 6 Ch., 1 single on the 1st treble long.—11th round. 1 single on the next chain, 9 Ch., 1 treble on the chain stitch again, then 1 Ch., miss the next stitch, 1 treble on the following to the next corner, on it work 6 Ch.; repeat to the end, and work a single on the 3rd of the first 9 Ch., and fasten off securely.

25. Fancy Knitting Stitch.

This stitch is given for 4 and 2 needles. For 4 needles cast on any number that will divide by 27.—1st round. * 1 turned (knitted plain from the back), 1 purl, over, slip 1, 1 plain, knit 2 together, pass the slipped stitch over both the others, over, 1 purl, 1 turned, 2 purl, slip 1, 1 plain, pass stitch over, 5 plain, over, 1 plain, over, 5 plain, knit 2 together, 2 purl; repeat from *.—2nd round. * 1 turned, 1 purl, 4 plain, 1 purl, 1 turned, 2 purl, slip 1, 1 plain, pass stitch over, 4 plain, over, 3 plain, over, 4 plain, knit 2 together, 2 purl; repeat from *.—3rd round. * 1 turned, 1 purl, 4 plain, 1 purl, 1 turned, 2 purl, slip 1, 1 plain, pass stitch over, 3 plain, over, 5 plain, over, 3 plain, knit 2 together, 2 purl; repeat from *.—4th round. * 1 turned, 1 purl, 4 plain, 1 purl, 1 turned, 2 purl, slip 1, 1 plain, pass stitch over, 2 plain, over, 7 plain, over, 2 plain, knit 2 together, 2 purl; repeat from *.—5th round. * 1 turned, 1 purl, over, slip 1, 1 plain, knit 2 together, pass the slipped stitch over both the others, over, 1 purl, 1 turned, 2 purl, slip 1, 1 plain, pass stitch over, 1 plain, over, 9 plain, over, 1 plain, knit 2 together, 2 purl; repeat from *.—6th round. * 1 turned, 1 purl, 4 plain, I purl, 1 turned, 2 purl, slip 1, 1 plain, pass stitch over, over, 11 plain, over, knit 2 together, 2 purl; repeat from *.—7th round. * 1 turned, 1 purl, 4 plain, 1 purl, 1 turned, 2 purl, slip 1, 1 plain, pass stitch over, 5 plain, over, 1 plain, over, 5 plain, knit 2 together, 2 purl; repeat from *.—8th round. * 1 turned, 1 purl, 4 plain, 1 purl, 1 turned, 2 purl, slip 1, 1 plain, pass stitch over, 4 plain, over, 3 plain, over, 4 plain, knit 2 together, 2 purl; repeat from *.—9th round. * 1 turned, 1 purl, over, slip 1, 1 plain, knit 2 together, pass slipped stitch over both the others, over, 1 purl, 1 turned, 2 purl, slip 1, 1 plain, pass stitch over, 3 plain, over, 5 plain, over, 3 plain, knit 2 together, 2 purl; repeat from *.—10th round. Like 4th.—11th round. * 1 turned, 1 purl, 4 plain, 1 purl, 1 turned, 2 purl, slip 1, 1 plain, pass stitch over, 1 plain, over, 9 plain, over, 1 plain, knit 2 together, 2 purl; repeat from *.—12th round. * 1 turned, 1 purl, 4 plain, 1 purl, 1 turned, 2 purl, slip 1, 1 plain, pass stitch over, over, 11 plain, over, knit 2 together, 2 purl; repeat from *. Commence again at 1st round. For antimacassars use two wooden needles, No 10 or 9, and a coarse number of Ardern's cotton. Add 3 purl stitches at each edge to sew the fringe or edging on, and repeat the pattern, consisting of 27 stitches, three times, making, with the three edge stitches, 84, then, to make both edges alike, repeat the first 8 stitches of the pattern, and add 3 purl stitches at the end, making in all 95 stitches. The edge stitches are to be purled on the right side of the work, and plain in the alternate rows, and will not be mentioned in the pattern. Knit a purl row, except the edge stitches which are plain.—1st pattern row. Some as 1st round given above, and after the third repetition of the pattern, knit again the first 8 stitches of the row, ending with "1 turned."—2nd row. * 1 purl, 1 plain, 4 purl, 1 plain, 1 purl, 2 plain, purl 2 together, 4 purl, over, 3 purl, over, 4 purl, 1 purl, put back on left hand needle, draw the next stitch over it, and pass to right hand needle, 2 plain; repeat from * twice more, then knit again the first 8 stitches of row.—3rd row. Same as 3rd round given above, repeating at the end the first 8 stitches.—4th row. * 1 purl, 1 plain, 4 purl, 1 plain, 1 purl, 2 plain, purl 2 together, 2 purl, over, 7 purl, over, 2 purl, 1 purl, put back on left hand needle, pass next stitch over, 2 plain; repeat from * twice more, then knit again the first 8 stitches.—5th row. Same as 5th round, repeating at the end as before.—6th row. * 1 purl, 1 plain, 4 purl, 1 plain, 1 purl, 2 plain, purl 2 together, over, 11 purl, over, 1 purl, pass next stitch over as before, 2 plain; repeat from * twice more, and knit again the first 8 stitches.—7th row. Same as 7th round; end as before.—8th row. * 1 purl, 1 plain, 4 purl, 1 plain, 1 purl, 2 plain, purl 2 together, 4 purl, over, 3 purl, over, 4 purl, 1 purl, pass next stitch over as before, 2 plain; repeat from * twice more, and knit again the first 8 stitches.—9th row. Same as 9th round; end as before.—10th row. Same as 4th row.—11th row. Like 11th round; end as before.—12th row. * 1 purl, 1 plain, 4 purl, 1 plain, 1 purl, 2 plain, purl 2 together, over, 11 purl, over, 1 purl, pass next stitch over as before, 2 plain; repeat from * twice more, and knit again the first 8 stitches. Commence again at 1st row.

26. Medallion for Antimacassar (Braid and Crochet).

You work this medallion with the Vandyke braid No. 4 and Evans's cotton No. 30, the finest size of the Penelope crotchet hook. You commence the rosette with the crotchet star in the centre *, 5 Ch., 1 long on the 2nd of the 5 Ch., 3 Ch., 1 single on the 2nd of the 5 Ch.; this forms the first of the six leaves in the centre; repeat from * 5 more times, and when the sixth is worked join the first and last leaf together by working a single on the 1st Ch. of the first five made. 2nd round.—6 Ch., * a picot of 5 Ch., 1 single on the first of the 5 Ch., 2 Ch., a picot worked as the last, 6 Ch., 1 long on the chain just between the two next little leaves of the last round, 2 Ch., and repeat from *. At the end of the round work a single stitch on the 4th of the first six Ch., and fasten off. Now take a piece of braid, 25 points should be cut and joined together firmly in such a manner that there will be 24 points inside the circle.—3rd round. In this round you join the braid to the two first rounds. Commence with a treble on a point of the braid, 2 Ch., 1 DC. on the top of the 2nd picot of the two first picots in the last round, * 1 treble on the next point of the braid, 2 Ch., 1 treble on the next point of braid, 2 Ch., a picot worked as before, 1 treble on the next point of braid, 2 Ch., 1 treble on the next point of braid, 2 Ch., 1 DC. on the 2nd of the two next picots in the last round; repeat from * and fasten off securely at the end of the round. Commence the next round on the other side of the braid.—4th round. 1 DC. on the first point of braid after the join. *7 Ch., 1 DC. upon the next point of braid, 8 Ch., 1 DC. upon the next point of braid, repeat from *, and at the end of the round work in single crotchet to the 3rd of the first 7 Ch. in the round.—5th round. 1 DC. upon the 4th of the 7th Ch., * 5 Ch., 1 DC. on the second and the first of this 5 Ch., 5 Ch., 1 DC. on the second and first of this last 5 Ch. 5 Ch., 1 DC. on the 2nd and first of this last 5 Ch., 1 DC. on the 4th of the 7 Ch. again. 8 Ch., 2 long on the 4th of the next 8 Ch., 2 long upon the next of the 8 Ch., 5 Ch., turn, work a single on the last of the last 8 Ch., which is the stitch nearest the first of the 4 long stitches just worked, 6 Ch., 1 D.C. over the 5 Ch. just worked, 6 Ch., 1 DC on the next stitch of the 5 Ch., 6 Ch., 1 DC. on the next of the 5 Ch., 6 Ch. 1 DC. on the next of the 5 Ch., 6 Ch., 1 D.C. on the first of the 5 Ch., 8 Ch. 1 DC. on the 4th of the next 7 Ch.; repeat from *, and fasten off neatly at the end of the round. These medallions should be joined together in the 3rd of the 5 picots over the 4 long stitches in this last round, and one of the many small circles so constantly given in our pages introduced to fill up the space between the medallions.

27. Fancy Knitting Stitch.

This stitch is given both for 4 and 2 needles, with the latter (say No. 10 wooden needles and a coarse number of Ardern's cotton), it is a handsome pattern for antimacassars, and with needles No. 17 or 18, and fine crochet cotton, it would be very pretty for the top of a toilet pincushion. For 4 needles cast on any number that will divide by 26.—1st round. * 1 plain, over, knit 2 together, 2 purl, † over, slip 1, 2 plain, pass the slipped stitch over the two others, repeat from † 3 times more; then 2 purl, 1 plain, over, knit 2 together, 1 purl, over, knit 2 together, 1 purl; repeat from *.—2nd round. * knit 2 together, over, 1 plain, 2 purl, 12 plain, 2 purl, knit 2 together, over, 1 plain, 1 purl, 2 plain, 1 purl; repeat from *.—3rd round. * 1 plain, over, knit 2 together, 2 purl, 12 plain, 2 purl, 1 plain, over, knit 2 together, 1 purl, 2 plain, 1 purl; repeat from *.—4th round. Like 2nd.—5th round. * 1 plain, over, knit 2 together, 2 purl, slip 1, 1 plain, pass slipped stitch over, † over, slip 1, 2 plain, pass slipped stitch over the others, repeat from † twice more; then over, 1 plain, 2 purl, 1 plain, over, knit 2 together, 1 purl, knit 2 together, over, 1 purl; repeat from *.—6th round. Like 2nd.—7th round. Like 3rd.—8th round. Like 2nd.—9th round. Repeat from the 1st.

For antimacassars with 2 needles, add 3 purl stitches at each edge to

sow the fringe or edging to, and repeat the pattern consisting of 26 stitches three times, making, with the 3 purl edge stitches, 81; then, to make both sides alike, repeat the first 22 stitches of the pattern, and add 3 purl stitches at the end, which will make in all 106 stitches, wide enough on No. 10 needles for a good-sized antimacassar.—1st row. Same as 1st round given above, adding 3 purl at the beginning, and after 3rd repetition of the pattern knit again the first 22 stitches, ending with "knit 2 together," and add 3 purl as at the commencement.—2nd row. 3 plain (for edge), 1 purl, over, purl 2 together, 2 plain, 12 purl, 2 plain, 1 purl, over, purl 2 together, then * 1 plain, 2 purl, 1 plain, 1 purl, over, purl 2 together, 2 plain, 12 purl, 2 plain, 1 purl, over, purl 2 together; repeat from * 3 times more, and 3 plain edge stitches.—3rd row. Same as 3rd round given above, adding 3 purl at the beginning and end, and after 3rd repetition knit again the first 22 stitches of the row.—4th row. Like 2nd.—5th row. Like 5th round given above, adding the edge stitches, and repeating the 1st 22 stitches at the end as before directed.—6th row. Like 2nd.—7th row. Like 3rd.—8th row. Like 2nd.—9th row. Commence again at 1st row.

28 and 30. Round Cover (Crochet).

THIS cover is worked in rosettes of white cotton, which are joined together in the outside round; worked in fine cotton they make a very good toilette cushion. We give the rosette full size: use Ardern's cotton No. 40, and the finest Penelope hook. Make a chain of 14 stitches, and unite into a ring.—1st round. Work 24 DC. over the ring.—2nd round. Work a DC. on each DC. of the last round.—3rd round. 8 Ch., the first 8 of these chain form the first long stitch, 1 long, with the thread three times round the needle on the next DC., * 2 Ch., 1 long as before on the next D.C., repeat from * 22 more times, and at the end of the round work a single on the 6th of the eight chain.—4th round. Over each of the two chain in the last round work 3 DC.—5th round. 1 DC. on each stitch of last round, and if the work should be too tight, increase a stitch here and there.—6th round. 1 DC. on the next DC. of the last round, * 6 Ch., 1 DC. on the first of the 6 Ch., miss the next DC., work a DC. on the following; repeat from *. At the end of the round fasten off. Join all the rosettes together in working the picots of this last round, in three picots, one after the other, as shown in the engraving.

29. Fancy Knitting Stitch.

THE stitch seen at No. 29 requires 11 to be cast on for each repetition of the pattern, and we give it both for 4 and 2 needles. For 4 needles.—1st round. * 2 plain, 2 purl, slip 1, knit 1, pass stitch over, 5 plain, over twice, repeat from *.—2nd round. * 2 plain, 2 purl, slip 1, knit 1, pass stitch over, 4 plain, over, 1 plain, on the "over twice" of last round, taking it as one stitch.—3rd round. * 2 plain, 2 purl, slip 1, knit 1, pass stitch over, 3 plain, over, 2 plain, repeat from *.—4th round. * 2 plain, 2 purl, slip 1 knit 1, pass stitch over, 2 plain, over, 3 plain, repeat from *.—5th round. * 2 plain, 2 purl, slip 1, knit 1, pass stitch over, 1 plain, over, 4 plain, repeat from *.—6th round. * 2 plain, 2 purl, slip 1, knit 1, pass stitch over, over, 5 plain, repeat from *.—7th round. Commence again at 1st round. For 2 needles, add 2 edge stitches at each side to any number of elevens that may be required for the width of antimacassar, &c.; the edge stitches to be always knitted plain, taking off the first stitch. The 1st, 3rd, and 5th rows will be the same as those given above.—2nd row. * 1 purl, on the "over-twice" of last row taken as one stitch, over, 4 purl, purl 1, put it back on left-hand needle, keeping the thread in front, draw the next stitch over it, then take it on the right-hand needle, 2 plain, 2 purl; repeat from *.—4th row. * 3 purl, over, 2 purl, purl 1, put it back on left-hand needle, draw next stitch over, keeping the thread in front, and take it on right-hand needle, 2 plain, 2 purl; repeat from *.—6th row. * 5 purl, over, purl 1, put it back and draw next stitch over as before, 2 plain, 2 purl, repeat from *.—7th row, Like 1st.

31. Square (Renaissance Guipure).

THIS style of work is much in vogue at the present time. Our model, which produces a charming effect on a coloured ground, is quickly and easily worked. The grecque, which forms the principal motif, can be executed either on a plain square of linen, the outlines embroidered in button-hole stitch, and the remainder cut away, or braid the width of pattern may be used. The bars are button-holed.

32. Square (Guipure d'Art).

THIS square is in the new style of guipure d'art, in which a great part of the netted foundation is cut away after the embroidery is done. A complete square of 26 meshes must be netted as usual to work upon, washed, stiffened, and stretched in a wire frame, and all the embroidery must be done before any of the ground is cut away. Flemish thread of different sizes (to be had at Helbronner's, 265, Regent-street) is used. All the thick white lines in the pattern are to be closely button-holed with the coarser thread; wherever the design admits of it, the button-hole stitch is to be worked on the meshes of the netting, making the picots or thorns by taking 2 or 3 stitches, where they occur, on the thread of the netting at right angles, and in order to continue the previous line of button-hole, pass the needle back through these stitches to the place where it was interrupted, and go on again. Where, from the form of the design, this manner of working is impossible, the overcasting must be done in relief, *i.e.*, on a thread passed in the desired shape without taking hold of the netting, but fastening it at the ends to the work or previous line of button-hole, as the case may be. Commence by the large star in the centre, which is worked, as usual, in relief in point tissé, then button-hole the frame round it, and the small squares at the corners of the same. The lace stitch (point de tulle) to be done in finer thread, and the button-hole line inclosing it, are worked in relief. The four corners of the square are in point de toile, with centre star in point tissé and at the angles smaller wheels and ovals in buttonhole stitch crossing each other; in these last, where the lines of button-hole cross, the thread must be taken through the previous line (but not the netting below), which will make them firm and keep them in their place. The alternate squares have a larger wheel in the middle, button-holed round, encircled by smaller wheels, framed in with button-hole, and cones at the angles, in point de reprise, or interlaced. One mesh of the netting round the outer edge of the whole square is filled in with point lace, in which the thread is laced in and out, forming a V in each mesh. When all the embroidery is completed, with a small and sharp pair of scissors carefully cut away the netted ground from the picots and wherever indicated by the black spaces in the design.

33 and 44. Edgings (Guipure d'Art).

THESE borders will be found useful for trimming either furniture or antimacassars. Instructions for the netted foundation have so often been given that we will not repeat them here. The stitches used in darning are point de toile, reprise, d'esprit, and wheel stitches.

34, 35, 45, and 46. Borders and Insertions (Renaissance Embroidery).

THE edging and insertion are worked in the same manner with linen and lace braid. The pattern is traced on the linen, either buff or white, and the outlines and bars are all button-holed. The dots are worked in satin stitch. The braid is added after the design is worked, and the linen cut away.

36. Border (Tatting and Crochet).

THE stars forming this border are all worked separately, and are joined together as they are finished. Commence the star in the centre with a ring of 1 double, 1 purl, then 2 double, 1 purl, 5 times, 1 double, draw up, * join to the first purl on the ring, and work an oval of 9 double, 1 purl, 9 double, draw up; repeat from * 5 more times, and then fasten off securely. In working the next star join to the preceding one in the 5th and 6th ovals, joining to the purl stitches in the two last ovals of the star; repeat these two stars the length required, then work the upper row of stars. For the first star work the three first ovals and the ring in the same manner as the first star in the last row, in the next oval join to the first oval of the star underneath, in the fifth oval join to the purl stitch connecting the two stars in the row underneath, in the 6th oval to the top oval of the next star in the under row; fasten off. Work the next star in the same manner, only joining the 3rd oval to the first of the last star, the 4th to the 6th oval and the star underneath. When these two rows are finished, you work the row of crochet. Work a DC. on the 2nd oval of the star, * 12 Ch., 1 DC. on the next star; repeat from *.—2nd row of crochet, 1 treble on the first DC., * 2 Ch., miss 2 Ch., 1 treble on the next stitch; repeat from * and fasten off. You now work the row forming the edge of the pattern. Join two threads together, and then join them to the purl on the 4th oval of the first star in the first row. * over the 2nd thread, work with the shuttle 11 double, join to the purl on the next oval of the star. With the shuttle only work an oval of 2 double, 1 purl, 9 times, 2 double; draw up, over the 2nd thread, work 11 double; then join to the purl stitch connecting the two stars, and repeat from *. Fasten off securely at the end of the row.

37. Square of Guipure d'Art.

A QUARTER of the design for this square is given at No. 37. For the whole, a square of 25 meshes of netting is required, which for embroidering upon must be stretched in a wire frame as usual. The small wheel seen in the right-hand upper corner of the illustration is the centre of the whole square; from it proceed 4 diagonal lines of 3 stars, worked in vandykes of Maltese point, with light wheels in the centre of each. These lines of stars are to be framed in, according to the design, in point de toile, and the ground beyond filled with point d'esprit and 4 large stars in relief, done in the usual point de reprise, and only attached by the two ends of each ray to the meshes of the netting beneath.

38. Tatted Border.

YOU work first in this pattern the half stars, which are in the centre of each scollop; there should be several made before the other part is commenced, or you would not be able to follow the pattern. Each half star commences with a ring of 3 double, 1 purl, this purl is made very long, 3 double, a short purl, then 2 double, 1 purl, three times, draw up. Now

Digitized by Google

work the first outside oval of 5 double, 1 purl, 5 double 1 purl, 5 double, 1 purl, 5 double, draw up; join to the next purl on the ring, and repeat this oval joining to the last one in the first purl stitch; then join to the two succeeding purl stitches, working on each an oval like the last one joining them to each other, fasten off carefully. You next work the outside edge, join two threads together, and over the second work an oval of 4 double, then with the shuttle only work an oval of 6 double, 1 purl, 2 double, join to the second purl on the first oval of a half star, 6 double, draw up. * Over the second thread work 4 double, 1 purl, then 2 double, 1 purl 4 times, 4 double; reverse the work, and make an oval with the shuttle of 6 double; join to the purl on the 2nd oval of the star, 2 double 1 purl, 4 double; draw up, reverse the work: over the 2nd thread work 4 double, 1 purl, then 2 double, 1 purl 4 times, 4 double; reverse the work, and work an oval of 6 double; join to the purl on the last oval, 2 double, 1 purl, 6 double; draw up, reverse the work; over the 2nd thread work 4 double, 1 purl, then 2 double, 1 purl 4 times, 4 double; reverse and work the 3rd outside oval with 4 double; join to the purl on the last oval, 2 double; join to the next oval of the star, 6 double, draw up; over the 2nd thread work 4 double, 1 purl, 2 double, 1 purl 4 times. Work the middle oval of the border with 6 double; join to the next oval of the star, 2 double: join to the first oval of another half star, 6 double; draw up and repeat from *. The foundation row must be worked next. For this work a circle of 3 double, 1 purl 5 times, 3 double. The 2nd and 4th purl stitches should be joined to the stars on each side; draw the thread tight after the last purl, and fasten off. Work as many of these as you require, then take a fine crochet hook, and make a DC. in the centre outside purl stitch of this oval, and work a sufficient number of chain stitches to the corresponding stitch in the next oval; repeat in this way; at the end of the row turn, and work a DC. in each stitch of the last row.

39. Tatted Border.

You work first in this border the trefoils which are in the centre of each scollop. Commence with the first side oval of 10 double, 1 purl, 10 double, draw up; work close to this the large oval of 8 double, 1 purl, 5 double, 1 purl, 8 double, draw up. The third oval is worked like the first; fasten off securely. Work several of these trefoils, then commence the outer edge, this requires two shuttles or threads; make an oval, 6 double, join to the purl on the first oval of the trefoil, 6 double, draw up; over the next thread work 5 double, then with the shuttle only work another oval like the last, joining it to the first purl stitch on the large oval, 10 double over the 2nd thread, an oval as before joining to the next purl stitch on the large oval, 5 double over the 2nd thread, an oval joining to the purl on the next oval, 3 double over the 2nd thread, and repeat from the first small oval, taking up the next trefoil. The heading of the border is crocheted. Work for the 1st row 1 treble on the first purl on the trefoil, * 9 Ch., a DC. just between the three ovals of the trefoil, 9 Ch., a treble on the purl of the third oval in the trefoil, and also on the purl in the next trefoil; repeat from *.—2nd row. 1 treble on the first treble of last row, * 4 Ch., miss 4 Ch., 1 treble on each of the two next chain stitches; repeat from *.—3rd row. 1 treble on the 2nd and 3rd of the first four Ch. of the last row, * 4 Ch., 1 treble on the 2nd and 3rd of the next four chain; repeat from * and fasten off securely.

40. Border (Tatting).

Work this border with Arden's cotton No. 26. You commence by * working the first three small ovals in the 2nd row of the foundation. These are worked with 5 double, 1 purl, 5 double, leave rather more than the 8th of an inch in the centre of each in drawing up; then reverse the work, and work the little scollop of 5 ovals, for the first oval work 6 double, join to the thread left in the 2nd small oval, 6 double, 1 purl, 6 double, 1 purl, 6 double, draw up, leave half an inch of thread, and work another oval with the last, and joining to it in the first and last purl stitches, then leave a quarter of an inch of thread, and work the large oval at the top of the scollop, for this work 5 double, join to the last oval, then 3 double, 1 purl, 6 times, 5 double, draw up, work opposite to the second of these large ovals, another oval like the first of them, joining it to the last oval, then knot into the thread between the ovals, work another oval joining to the last, then knot to the cotton in the 3rd small oval, now reverse the work and work 3 more small ovals in the foundation row; in working the 2nd take up the purl of the last large oval on the loop, after the 3rd small oval reverse the work and work a single oval of 5 double, join to the purl on the last large oval, 3 double, join to the purl on the next large oval, then 3 double, 1 purl 5 times, 5 double, draw up; now repeat from *, and in working the next spray join to the last single oval as illustrated in the engraving.—2nd row. Work a row of small ovals, joining each one in the purl stitches to the row of small ovals worked with the sprays.

41. Edging (Crochet).

You work the edging with the coloured thread and a Penelope crochet hook suitable to the thread. The row of rings is worked first. Commence the 1st ring with 18 Ch., and join into a ring, then work over the ring 3 DC., 7 Ch., * 2 DC. 7 Ch. from the last *; repeat until you have 6 loops of 7 Ch., then work 5 DC. over the ring, then 7 Ch., 2 DC. over the ring 6 times, and work 1 single on the 1st DC. in the ring.—2nd round. 5 Ch., 1 treble on the top of the first loop of 6 Ch. in the last round, * 5 Ch., 1 treble on the top of the next loop of 6 Ch.; repeat from * 4 more times, then 5 Ch., 1 DC. on the 3rd of the 5 DC. between the two next loops in the last round, then 5 Ch., 1 treble on the next loop of 6 Ch. 6 times, 5 Ch., 1 single on the 1st DC. in the ring; turn the work round on the finger, and work across the ring, 2 Ch., a picot of 5 Ch., 1 DC. on the first of the 5 Ch., 2 Ch., 1 DC. on the under part of the DC. worked on the 5 DC. on the other side the ring; now work for the bar between the two rings 7 Ch.; then commence the next ring with 18 Ch. again, and repeat from the commencement of the pattern. In the beginning of the 2nd round, after the first treble on the 1st loop of 6 Ch., draw the thread through the corresponding stitch on the last ring; work as many rings as you require, then work the foundation row.—1st foundation row. Commence on the 3rd loop of five chain on the first ring, * 1 DC. on the 3rd, 4th, and 5th Ch. stitches in this loop, 1 DC. on the 2nd, 3rd, and 4th of the next 5 Ch., 1 DC. on the 1st, 2nd, and 3rd of the next 5 Ch., 7 Ch.; repeat from *, beginning on the 3rd loop of the next ring.—2nd row. 1 treble on each stitch of the last row.

42 and 53. Pocket Handkerchief Border (Guipure d'Art.)

At Nos. 42 and 53 are given designs for pocket-handkerchief borders in guipure d'art, the netted foundation for which may be either purchased ready-made at Mmes. le Boutillier, 125, Oxford-street, or Helbronner's, 265, Regent-street; or, if the worker prefer to net it herself, detailed instructions for doing so will be found in an illustrated article on "The Art of Netting" in *The Queen* of Nov. 30, 1872. Both the borders here given are 10 meshes in width. No. 53 has a row in *point de toile* one mesh deep, immediately next to both the outer and inner edges, all the way round, and next to it a similar row in *point d'esprit*. It will be seen that the principal feature of the border No. 53 is the repetition of a kind of star, formed of 4 squares of 3 meshes each way in *point de toile*, with a smaller centre one of 2 meshes. The larger squares have the thread passed 4 times along the edges and across the corners, giving them their peculiar shape, and bars worked in relief traverse them, springing from the corners of the centre square. In the intervals of these stars is a design in *point d'esprit* and Maltese point, for which the illustration must be carefully consulted.

The pocket-handkerchief border, No. 42, has a row of *point d'esprit* one mesh deep all round, next to the outer and inner edges; and a line of one mesh being left clear next to both, the *point d'esprit* is repeated according to the design given. It will be observed that there is a slight inaccuracy in one part of the pattern, where the *point d'esprit* occupies 4 meshes between two flowers instead of 3, as in the other corresponding parts; this can be easily remedied by the worker. Smaller stars or flowers than those in No. 53, similarly composed of 4 squares in *point de toile*, but of only two meshes each way, occupy the spaces marked out by the *point d'esprit*; and an inner star of 8 points in Maltese stitch, with a wheel in the centre, and leaves in relief springing from it to the 4 outer corners of the larger flower or star, complete the design.

43. Tatted Border.

This border should be worked with Ardern's cotton No. 30. The work is commenced with the row of trefoils at the edge of the pattern; commence each trefoil with a ring for the centre. This is worked with 1 double, 1 purl, then 3 double, 1 purl, 3 double, 1 purl, 3 double, 1 purl, 2 double, draw up, join to the first purl in the ring, and work an oval of 10 double, 1 purl, 10 double; draw up, join to the two next purl stitches successively, and repeat the oval; then fasten off securely; work several of these, joining them together in the first and last ovals.—2nd row. You commence this row with the ring which is joined to the purl stitch connecting the two trefoils; * for the ring work 8 double, join to this purl stitch, making a long purl, 8 double; draw up and join the thread to a second thread, over it, work 3 double, 1 purl, 2 double, 1 purl, 2 double, 1 purl, 3 double, join to the purl at the top of the next oval, then over the 2nd thread work 3 double, 1 purl, 2 double, 1 purl, 2 double, 1 purl, 3 double, draw up, repeat from *, and fasten off. You next work a row of crochet above the trefoils; * work 1 DC. on the purl in the ring, 5 Ch., 1 treble on the purl stitch connecting the two ovals, 5 Ch., repeat from *. The two following rows are of ovals. Commence * with an oval of 3 double, 1 purl, 2 double, join to the DC. stitch in the last row, 2 double, 1 purl, 3 double, draw up, reverse the work and work an oval of 3 double, 1 purl, 2 double, 1 purl, 2 double, 1 purl, 3 double, draw up, reverse the work, and repeat from *, joining this oval to the first one worked, and to the centre chain stitch of those betwen the DC. and treble; then reverse and join to the second oval, and so on, using the engraving as your guide. The last row is crochet. Work a DC. on the purl stitch at the top of the first oval, * 3 Ch., 1 DC. on the next oval; repeat from *, and fasten off.

47. Border (Tatting).

This border is worked with two threads or shuttles. You commence by working the first or foundation row of ovals, which is worked with the shuttle only. Use Ardern's cotton No. 30. Begin with * a small oval, for which you work 5 double, 1 purl, 5 double, 1 purl, 5 double, 1 purl, 5 double, draw up, leave a quarter of an inch of cotton, and work the large oval of 5 double, join to the last purl stitch in the last oval, 10 d

purl, 10 double, 1 purl, 5 double, draw up, leave a quarter of an inch of cotton, and work from *, join the next oval to the one preceding it in the first and last purl stitches.—2nd row. Join the threads from the two shuttles together, then join them to the purl stitch at the top of the first small oval in the last row; work over the 2nd thread 10 double, * join to the purl on the top of the large oval, 10 double over the 2nd thread, join to the purl on the small oval, 10 double on the 2nd thread; repeat from *, fasten off at the end of the row.—2nd row. This row is worked with the two shuttles; join the two threads to the last row just at the top of the first large oval, * 10 double over the 2nd thread. With the shuttle only work the trefoil; for the 1st side oval work 6 double, 1 purl, 6 double, 1 purl, 6 double, 1 purl, 6 double; draw up. Close to the last oval work the 2nd oval of 6 double, join to the last purl stitch in the last oval, 6 double, 1 purl, 2 double, 1 purl, 2 double, 1 purl, 6 double, 1 purl, 6 double, draw up; now repeat the 3rd oval, and join to the last in the first purl stitch, then 10 double over the 2nd thread, join to the last row just over the large oval, and repeat from *, joining the trefoils together at the top of the side ovals.

48. Square of Guipure d'Art.

In this, as in No. 37, a quarter only of the design, which requires a square of 26 meshes of netting is given. The centre pattern, it will be seen, commences at the left hand upper corner of the illustration. Work first the figures in point de toile, and fill in the point d'esprit, according to the pattern; each corner has a flower composed of 4 meshes filled in point de toile, with a wheel in the centre; the outer edges of these flowers have the thread run round them four times. The long sprays of leaves proceeding from the four angles of the centre squares are worked in relief in point de reprise, and are detached from the ground of the netting, to which they are fastened only at the ends.

49. Edging (Crochet, Vandyke Braid, and Lace Stitch).

The materials required for this very strong and durable edging, which is suited for trimming sleeves, underlinen, &c., are fine vandyke braid No. 3. Ardern's cotton No. 22 or 26, and a fine crochet needle. The stars are first to be prepared singly with the vandyke braid, and when completed joined, by sewing a point of each together with fine thread. For a single star 9 vandykes of braid are requisite, which are to be formed into a circle by sewing the first and last points over each other. Each inner point of braid is drawn together in the centre by a buttonhole stitch from one to the other, so as to leave only a small opening, as seen in the illustration No. 49. When a sufficient number of stars are completed, the rings for the outer edge are to be crocheted separately, as follows: * make 12 Ch., join, work 10 DC. over one half of the circle, and repeat from *, till you have the requisite length, then complete the rings by working back 10 DC. over the other half of them. The second row of rings is worked in the same manner as the first, except that to join the rows in working the second half of each ring, after the 5th DC. take out the needle, insert it in the 5th stitch of one of the 1st row, draw the loop through, and continue the remainder of the 10 DC. as before. The rings and stars are afterwards united by twisted bars of lace thread, for which purpose they must be tacked in their places on a strip of stiff paper or *toile cirée*, and the bars worked according to the illustration, passing the thread when necessary through the braid. When completed, the edging is run or felled closely with fine thread round the upper half of the stars, upon the material to be trimmed.

50. Knitted Edging.

For this edging cast on 13 stitches.—1st row, 3 plain, over, knit 2 together, 2 plain, over, knit 2 together, 4 plain.—2nd row. 2 plain, over three times, 2 plain, over, knit 2 together, over, knit 2 together, 3 plain.—3rd row. 5 plain, over, knit 2 together, over, knit 2 together (1 plain, 1 purl, 1 plain, 1 purl) all on the "over three times" of last row, 2 plain.—4th row. 8 plain, over, knit 2 together, 2 plain, over, knit 2 together, 3 plain.—5th row. 5 plain, over, knit 2 together, 2 plain, over, knit 2 together, 6 plain.—6th row. 10 plain, over, knit 2 together, 2 plain, over, knit 2 together, 1 plain.—7th row. 3 plain, over, knit 2 together, 2 plain, over, knit 2 together, 8 plain.—8th row. Cast off 4 stitches, knit 12 plain. Commence again at 1st row.

51. Knitted Edging.

The needles and cotton to be selected for this edging depend on the purpose for which it is intended. If for trimming round an antimacassar, the same sized needles and cotton should be employed as were used for knitting it; if wished fine for the cover of a toilet cushion, or anything similar, then needles Nos. 15 or 16, and Ardern's cotton No. 26 should be used. Cast on 15 stitches.—1st row. 8 plain, knit 2 together, over, 3 plain, over, 2 plain.—2nd row, 2 plain, over, 5 plain, over, knit 2 together, 7 plain.—3rd row, 6 plain, knit 2 together, over, 1 plain, knit 2 together, over, 1 plain, over, knit 2 together, 1 plain, over, 2 plain.—4th row, 2 plain, over, 1 plain, knit 2 together, over, 3 plain, over, knit 2 together, 1 plain, over, 7 plain.—5th row. 4 plain, knit 2 together, over, 1 plain, knit 2 together, over, 5 plain, over, knit 2 together, 1 plain, over, 2 plain.—6th row. 2 plain, over, 1 plain, knit 2 together, over, 3 plain, over, knit 2 together, 2 plain, over, knit 2 together, 1 plain, over, knit 2 together, 3 plain.—7th row. 5 plain, over, knit 2 together, 1 plain, over, knit 2 together, 3 plain, knit 2 together, over, 1 plain, knit 2 together, over, 1 plain, knit 2, together.—8th row. Cast off one, 1 plain, over, knit 2 together, 1 plain, over, knit 2 together, 1 plain, knit 2 together, over, 1 plain, knit 2 together, over, 6 plain.—9th row, 7 plain, over, knit 2 together, 1 plain, over, slip 1, knit 2 together, pass slipped stitch over, over, 1 plain, knit 2 together, 1 plain, knit 2 together.—10th row. 2 plain, over, knit 2 together, 3 plain, knit 2 together, over, 8 plain—11th row. 9 plain, over, knit 2 together, 1 plain, knit 2 together, over, 3 plain.—12th row. Cast off 2, 1 plain, over, knit 3 together, over, 10 plain. Commence again at 1st row.

52. Crochet Edging.

This is a very useful edging, crocheted in Ardern's cotton No. 30 or 26. You commence the first little star by working 4 picots close together; each picot is worked with 5 Ch., 1 single on the first of the 5 chain; when the four are finished join to the first picot with a single crochet, then 1 Ch., pass this behind the last picot, and work a single between the 3rd and 4th picots; now work 3 Ch., then 4 picots again. These four picots must be made to fall under by taking the needle out of the last Ch., then putting it into the first of the 5 Ch. and drawing the fifth chain through the first. After the 4th picot join to the first, then 1 Ch. behind the last picot, and 1 single between the 4th and 3rd picots; 3 Ch. repeat, from *, joining the first of the next four picots to the first star, work the length required and fasten off.—2nd row. This row is worked above the row of stars that are connected together; begin with a long or the thread twice round the needle between the 1st and 2nd picots. * 3 Ch., 1 long between the two next picots, 2 Ch., 1 long between the two first picots of the next star; repeat from *.—3rd row. * 5 DC. over the first 3 Ch. in the last row, 3 DC. over the next 2 Ch., repeat from * and fasten off.

54. Crochet Edging.

The little scollops in this pattern are crocheted as you go on, and when the length is finished you work the foundation rows upon them.—1st row. 1 Ch., a picot of 5 Ch., 1 DC. on the 1st of the 5 Ch., 7 Ch., a picot of 5 Ch., 1 single on the first of the 5 Ch., a picot of 7 Ch., 1 single on the first of the 7 Ch., 3 picots close together, each of 5 Ch., a picot of 7 Ch., and another of 5 Ch., 1 single on the 7th of the 7 Ch. before the first picot, 4 Ch., 1 long upon the 2nd of the same 7 Ch., 1 Ch., a picot, 1 Ch., and repeat from the first 7 Ch.; in the row, in working the picot of 7 Ch., draw it through the corresponding picot in the last little scollop.—2nd row. 1 DC. on the first single little picot, * 5 Ch., 1 DC. on the long stitch in the last row, 5 Ch., 1 D.C. on the chain before the 7 Ch., 5 Ch., 1 DC. on the Ch. after the picot, repeat from *.—3rd row. * 1 DC. on the 3rd of the next 5 Ch., 3 Ch.; repeat from *.

HOW TO CLEAN ANTIQUE LACE.

Antique lace has once more taken its well-deserved rank amongst the paraphernalia of ladies' dress. Diamonds, precious stones, and gold ornaments can be replaced; antique lace cannot. Every effort should therefore be made to preserve the comparatively scanty relics of an art irretrievably lost in this age of feverish bustle and restless superficiality. Rather a high-flown introduction to an article about lace cleaning, but to be forgiven to a lover of antique lace who has seen the finest points, the labour of a lifetime, perish under the scrubbing brush of an English laundress, or disfigured by the darning needle of a lady's maid. Fortunately there is such a power of resistance in the very material lace was made of in times of old, that only the rudest treatment can entirely destroy the fabric. Home-spun and home-bleached flax thread, not impaired by machine twisting and bleaching powder, defies time; and lace made therefrom requires but trifling attention to last for centuries.

How this can be achieved a few practical rules will show.

Should any lady be fortunate enough to possess old point which never before passed through the ordeal of the washtub, but shines in its pristine beauty as it left the hand of the worker, let her keep the same as a treasure. Such lace, yellow as it probably will be, is invaluable for the sake of the regularity and the sharpness of the work. In this state alone the incredible patience and perseverance of the lace worker can be appreciated to its full extent. The yellow tint will show better on contrasting colours than the glaring white; but should it be desirable to give to the lace a lighter colour let it be done by carefully powdering the same for the occasion.

If lace has been washed before and requires cleaning, first of all the yellow stains frequently occurring in antique lace must be removed by placing the stained spot on the linen-covered surface of a hot iron, and then moistening the stain with a more or less strong solution of oxalic acid. The lace is then put in lukewarm water until thoroughly softened and freed from starch or gummy matters, and afterwards subjected to the action of the finest white soap by beating it gently between the hands in the lather. Rubbing of any kind must be carefully avoided, as well as the use of hot water, which contracts and stiffens the lace. When the soap has taken effect the lace is rinsed out several times in hand-warm soft water. The lace will now be white; but if a yellowish tint is desired, cold coffee is mixed with warm water until the required colour is attained, and the lace dipped in the mixture. There are other methods of cleaning lace—by tacking it to linen, or winding it round a wooden pole covered with linen, before using soap; but none is so simple and effective as the above.

Digitized by Google

The lace has now to be dried, and much depends upon this process. Wringing of any kind, to remove the water, must be carefully avoided. Narrow pieces are folded up in layers of 6in. to 10in. long, and the moisture pressed out by hand between a clean towel. Then the lace is patted in single layers between clean linen until it remains just damp. In this state it is superficially straightened, flattened, and placed in lengths of 2ft. to 3ft. between the folds of a towel, and put under gentle pressure for about twelve hours. After this sufficient moisture will be left in the lace to submit it to the operation of stretching and pinning. Should the lace have become too dry it must be slightly damped again. A cushion board 2yds. long, 1yd. wide, is used for the purpose of pinning by professional lace cleaners; but of course for short and narrow laces a smaller size will do. The lace is placed on the board, and the upper edge fixed in a straight line with pins, which are inserted in a slanting position between the interstices of the lace ½in. apart. When the piece of lace is too long to pin it on the board in one length, it is turned under at right angles to a second parallel length about 3in. distant from the former. The upper edge fixed on the board, the lace is gently stretched bit by bit until the original lines of design and ground are satisfactorily arranged, and then the lower edge pinned to the board as described above, the pins being inserted in the opposite slanting direction. Pins may be inserted in double and treble rows as required, to keep the design and the open spaces in the proper position. In each loop of the edge a pin should be inserted, and holes secured by pinning to prevent their becoming larger under the procedure of stretching. The ornamental edges and *brides* of Venetian and Spanish rose point must be arranged by pinning.

The lace is left on the board until dry, then removed, and ironed from the back. Flat points and pillow laces are now ready for wear. Raised points, as Venetian, Spanish, Argentan, Alençon, and Brussels are put with the front side upwards on a piece of white soft paper placed on a layer of thick cloth, and the flat work of the design inside the button-holed *cordonnet* is straightened and polished with a dog's tooth fixed in a handle, a lobster's claw, or any blunt point of ivory,

The fashion of raising the design of pillow lace by bulging it out is most objectionable, injures the lace, adding nothing to its beauty, but being simply a false pretence to give pillow lace the appearance of raised point. The clean lace ought not to be folded, but rolled, wrapped in tissue paper, and kept in a dry place guarded against dust and smoke. Lace after having been worn and taken off the dress must be slightly damped and ironed before putting it away.

ON FANS AND FAN PAINTING.

In painting fans when mounted it is necessary, and renders facility to the artist, to stretch the fan as tightly and flatly as possible, so that the plaits should not be inconvenient. This can be done by placing the fan on a table or board, and inserting moderately sized nails or pins between each pannache and its neighbouring radiant. Then, taking the fan by the extreme end of the handle, push it forward until the fan is stretched quite flat, and make it secure from moving by a nail or pin. Mark out the four quarters, and draw a line through the centre of the leaf of the fan, in order that the design may be placed correctly on it. Any fault in this respect will completely spoil the appearance of the fan when finished. Pains should be taken to draw the design as elegantly and freely as possible. A very pretty design can be made of a small bouquet of dog-roses, with the leaves and buds forming a trail or spray, and reaching as far as the half of the leaf of the fan: To set this off and give completeness, a butterfly or bird should be placed midway in the corresponding half. The butterfly or bird must be drawn, of course, in proportion with the flower. A nest of young birds in one end of the fan, with the old bird flying from the opposite corner with food in its mouth, forms a pretty picture. Pinks, geraniums, convolvuli, bunches of lilac, fruit, such as peaches, grapes, all have a pleasing effect. We could enumerate hundreds of designs, but the most graphic description would not be of much benefit. We cannot too strongly recommend continuous practice, and great patience is essentially necessary to success. After a few designs have been constructed, facility in producing them will be found to come without much difficulty. When a fair amount of perfection has been obtained, and the student has acquired a knowledge of mixing colours, the best designs and copies are to be obtained by grouping natural flowers. A great deal may be learned by looking at and studying the works of others, and a visit to the South Kensington Museum would be of much value to the student.

The design having been finished, the tracing completed and transferred to the material, the colouring—the most pleasant part of the work—can be commenced. In painting silk and satin fans all colours must be mixed with Chinese white, excepting those colours which are opaque, and also those when it is necessary to reduce the colour in tone. Painting in this method is termed painting in body colours by the English masters, and *gouache* painting by the French. Body-colour painting is an imitation of painting in oils. By mixing white with transparent colours they are transferred into opaque colours, thus obtaining in water colours the same great distinction as in oils between the transparent and opaque colours. Chinese white is the best white to mix with colours. It is a preparation of zinc, and appears to be quite permanent. There are other whites that can be purchased, but they are generally prepared from lead, and when used with water are changeable even to blackness, and sully other tints with which they come in contact.

The colours necessary for beginners are the following: French ultramarine, cobalt, vermilion, Prussian blue, indigo, emerald green, carmine, cadmium yellow, yellow ochre, chrome No. 1, lemon yellow, pink madder, crimson lake, burnt sienna, vandyke brown, neutral tint, Indian purple, Indian ink, lamp black, and Chinese white. These colours can be procured either moist, in small tubes averaging about one shilling each, or for about the same price in dry cakes or in earthenware pans. The latter colours are considered by many to have advantages over those in tubes as regards purity of tone and perfection of wash, and to be more suitable for flower painting.

When the colours are required for use a supply is obtained by dipping the cakes in water and rubbing them on a china palette or a common plate. In using the tubes, take off the small stopper, and, squeezing the tube, the colour will come out. Be careful to replace the stopper, otherwise the colour will dry, and it will be difficult to get it out of the tube. A small quantity of gum water should be mixed with the colour when ready to be placed on the work. It serves to heighten the shadows, and give brilliancy to parts which otherwise might appear dull. Care must be taken to apply it only in very small quantities, for, if not, a glazed appearance will be given to the colour, and it will look commonplace and vulgar. A simple recipe for making gum water is to put one ounce of white gum arabic and half an ounce of double refined sugar in a quart of spring water, and, when dissolved, bottle it off for use, straining it through a piece of muslin, and keeping it free from dust. Camel-hair brushes should be used—a large one for washing on the colour, a moderately-sized one, and a small one for stippling and hatching. Hatching consists of working small lines with the brush; stippling, of dots. In painting do not lay the colours on too thickly, they will then be liable to crack. Begin with the dark shades, then the intermediate tints, gradually working up to the high lights, which are put in last, and give the most striking effect to the picture. When painting on black or any dark material a wash of Chinese white should be first laid on: this prevents in a great measure the colour from fading, by sinking into the material. Gamboge should never be used, for when used in any quantity it will become sticky, and form a disagreeable ground to work upon.

When the lights and shades of a flower have been painted, the small veins, which are in almost every flower, should be stippled on. Hatching is most useful in effect in such flowers as the convolvulus, the dog-rose, the large outermost leaves of roses, and the lily. Stippling gives effect to the foxglove, the wild rose, and many other flowers, and is especially useful in painting fruit. When painting the convolvulus from nature, be sure to begin as early as possible in the morning; for these flowers, especially those of a bright blue colour, change to a red hue until the middle of the day, when they become entirely withered. Use Prussian blue for the dark shades of the flower, and cobalt or Prussian blue, moderated with white to the proper colour, for the intermediate tints and high lights. When painting the flower, be careful not to paint over the centre, which is of a greenish description, and which can be put in with chrome No. 1 and cobalt. The veins should be stippled in with crimson lake, and the large streaks which are in this flower should be painted in with the same colour. For the leaves and stems, Prussian blue should be used for the darkest shades; chrome No. 1 and Prussian blue for the intermediate tints, and yellow ochre, moderated with Chinese white, for the high lights. In painting leaves on a fan, do not put them in too much shade. The darkest parts should be at the stems and veins of the leaf; the intermediate shades should cover one half of the leaf, or in smaller proportions, according as the light falls on it; and the high lights which generally fall on the veins of the leaf can be put in with much effect.

TO MOUNT SKELETON LEAVES.

Mounting skeleton leaves into a group is rather a troublesome matter, requiring both taste and practice. Cut a circle in a rather stiff piece of cardboard exactly to fit the stand to the groove which is to hold the glass shade. Having procured a large bung cork, 3in. in diameter, proceed to shave off the edge, so as to make it into somewhat the shape of a "Sally Lunn" teacake, sloping it off gradually so as to avoid hard or square edges. Fasten this down on the centre of the circle of cardboard by passing threads across it in quarters through the latter; but do not draw them too tightly, as it would be apt to warp the circle. Wadding must then be put round and round between the bung and the edge of the cardboard (some being pushed under the thread), so as to make a good shape, sloping gradually from the centre to the edge, and a very thin piece of the same laid over the top of the cork. Now cut a circle of deep crimson silk velvet, an inch larger than the cardboard itself, run it round the edge with coarse thread, as you would for covering a pincushion, and leave a long end that you may be able to undo it easily, as you may have to do so more than once to put in or take away little bits of wadding here and there before the shape is quite to your mind, then lace it across to keep it in place, but very loosely, not to warp the cardboard. Two bradawls, one large and one small, and a pair of forceps, will be requisite for further use. Before beginning to mount the skeleton leaves it is well to have a supply of branched twigs, such as may be gathered in the hedges during the winter, also the stems of Canterbury bells and other similar ones, painted with white oil colour and dried thoroughly, on which to fasten some of the leaves. With the bradawls bore a number of holes in the cork, through the velvet, and, commencing in the centre, take any of the torn or damaged leaves, and tie them on one of the twigs (not a high one), one below the other, with very fine sewing cotton wound round and round and tied in a knot (if the cotton shows you must paint it over with Chinese white); this will help to conceal the stalks of leaves afterwards placed in front, by forming a background, and this method must be resorted to occasionally when found requisite, as it gives a group a very thin and poor look to see all the detached stalks of the leaves used. Arrange the leaves according to your taste, sometimes tying two or three together, such as pear or small poplar leaves, on a stalk, painted stick, or wire, and push into a hole. To fill up interstices, with the forceps place bits and scraps between the stalks, taking care to keep the perfect leaves for the outside. Magnolia leaves are most useful, as they go in with their own stalks, and help to conceal much. Seed-vessels of the Canterbury bell and poppy are effective, but the latter have such short stalks that they require to be mounted on wire, painted over. A wreath of small ivy leaves and those of *Ficus repens*—retaining the stalk of the latter, which must be painted, as it will not bleach—is nice to lay down on the velvet round the group, also pieces of Adiantum or maidenhair fern, bleached.

Dress and Fashion,

MOVEMENTS OF FASHION, 1873-74.

THE changes in ladies' dress during the year 1873 have been unimportant both as to form and colour. The composite order has prevailed: several styles have been adopted, and so far as we can judge no radical change will take place suddenly. All transformations in dress have been wrought of late years with circumspection, existing fashions are modified by degrees until they insensibly glide into other styles. Take crinoline, for example—notwithstanding all prognostications to the contrary, it was not suddenly laid aside—it was first contracted, then shortened, then cut in two, suppressing the front, and finally it was replaced by a tournure, and four years were needed to attain this result.

The form the figure assumes at present is somewhat exaggerated and peculiar. All drapery clings closely in front, and is as flat as possible, while at the back it projects suddenly below the waist almost like a shelf; all the puffings and fulnesses of the skirt being worn immediately below the belt. Dresses are still divided into costumes and toilettes, the former for street wear, as the skirts just clear the ground, and the latter for ceremonious occasions and for balls and parties where a train skirt is *de rigueur*; but, whether short or long, all skirts are tied back from the hips so as to produce the fashionable form.

Another peculiarity of prevailing fashions is that the front and back of a dress are dissimilar; the front is plain, and the back is a mass of flouncings and puffs while the sides are ornamented with quilles or robings. Two materials are also used in one dress, and so skilfully combined, that it is impossible to say which one predominates. For instance, cashmere and silk, velvet and silk, cloth and velvet, are used in the composition of a dress, with either the silk or cloth velvet will be used either for the sleeveless jacket, or the waistcoat, the lower part of the tunic, the deep cuffs, the sash, and the silk, cashmere, or cloth for the remainder.

The popular colours during 1873 have been blue of all shades, from turquoise to indigo; yellow greens from the palest serpent green to the darkest olive; and bronzes, both green and brown, of all shades. The combinations have been eccentric, blue has been used to trim violet, the curious serpent greens have been trimmed with sickly pink shades, and bronze silk dresses have had a large proportion of canary yellow silk in their composition.

Embroidery and buttons have formed very conspicuous points in the dresses of 1873. Not ball dresses have been darned with floss silks of the brightest hues so as to produce the happiest results in the shape of corn flowers, poppies, wheat, &c., roses of varied colours and foliage, pinks, daisies, &c. Flowers are also worked with silk on muslin and *appliqué* on to tulle; they are also worked with wools and *appliqué* on to cashmere, tweeds, serges, and other woollen materials. This form of *appliqué* embroidery has been found very convenient for trimming dresses. Braiding with round cord, and with bugles and beads interspersed has also been most fashionable. English embroidery worked with silk is in vogue for cashmeres.

The size of buttons on both dresses and mantles has been exaggerated, varying from that of a half crown to a five shilling piece, and even larger. Oxydized silver, and what is known as old silver chased and perforated, smoked pearl, jet, and steel, have all been used for buttons. Large buckles are also in vogue for looping up tunics, puffings, and sashes; these are made of the same material as the buttons, the steel being cut in diamond points, which glitter effectively.

The polonaise still obtains favour; it was worn considerably during the London season in butcher blue linen spotted with white, and in all sorts of sateen and *écru* fabrics, but mantelets somewhat divided its popularity during the summer season. These mantelets were principally made of cashmere; if colour was used, such as blue, pink, violet, then yak lace and insertion ornamented them; but if black cashmere, then black yak and black watered ribbon. The insertion was unlined, the cashmere being cut away from the back. Jackets, made double-breasted, with cords and tassels, revers and deep cuffs of velvet, have also been worn. A new feature in travelling costumes have been what are termed "tailor-made suits." These are made like men's coats, rows of stitching and braid being their only ornamentation. The same forms have been to some extent adapted to ladies' figures. Ulster coats and jackets have been made exactly on the same plan as if for gentlemen, allowance being made for differences of figure, and a not unfrequent sight in Scotland, Wales, Ireland, and indeed, in any place where British tourists congregate, has been a gentleman and his wife wearing jackets and coats almost similar.

In bonnets and hats there has been no great change, with one exception, that in bonnets, strings have to a great extent disappeared, and how they remain perched on the back of the head without being tied on is in some a miracle to an outsider. Hats are large, high, and picturesque rather than otherwise. Felt, trimmed with shaded ostrich feathers of the same colour, and with buckles of either jet or steel, are worn during the present winter, the form called "Brigand" or "Tyrolean," with wide brim, one side of which is turned up, is perhaps more abundantly sold than any of the great variety of shapes manufactured.

There has been a change not so much in the manner of arranging the hair as in the position in which the hair is placed. Quite as much, if not more, false hair has been worn as during 1872, but it is arranged at the top of the head, and no longer in stiff chignons, but in Josephine knots, small *crépé* curls, light *crépé* and plaited coronets; these are pinned on to suit individual styles, and not in one mass of plaits as the chignon of yore.

In lingerie there has been great change; soft ruffs have almost taken the place of hard white linen collars; and latterly these ruffs have assumed almost Elizabethian proportions. They are made of *crêpe lisse*, of tulle spangled with jet, of Valenciennes lace and muslin, and of blonde. They are exceedingly becoming to slender long throats, and suit well the informal manner of dressing the hair now in vogue. It will be seen in this brief review of the fashion that, republican though the Government of France be, there is no trace of simplicity in her fashions.

Fashionable Toilettes.

No. 1. DINNER TOILET.—Black faille dress. The front of the skirt, which is ornamented with narrow flounces, is separated from the train by a double quille edged at both sides with jet and gimp ornaments; black silk bows ornament the quilles. The train is likewise trimmed with gathered flounces. A tunic of white China crêpe falls over the first skirt; the low corslet and short sleeves are trimmed with floss silk and chenille fringe. The tunic is looped up with a wide black velvet sash, and there are velvet bows on the front. The bodice is trimmed *en berthe* with black velvet, forming a heading to a beautiful fringe which matches that round the tunic.

No. 2. TOILETTE DE VILLE.—Réséda faille, trimmed with velvet of a darker shade. Bodice with round basques, open at the sides, and forming plastron or waistcoat. The front and the lining of the basques are velvet. Bands of silk bar the velvet front across the chest. The outside edge of the plastron is finished off with a row of réséda guipure and a band of silk. The basques are festooned at the back. The first skirt is trimmed with a plaited flounce in front, robings of velvet and bows of silk at the sides, and gathered flounces at the back. Full silk upper skirt, trimmed with velvet. Felt hat of the sailor form, to match the dress, with a Montpensier feather over the crown.

The Newest Head Dresses.

No. 1. HEADDRESS FOR A MATRON.—This is placed at the side of the head, and consists of two large tea roses, encircling a violet tulip, occupying the centre. A violet faille bow intermixes with the flowers, and terminates with long ends below the shoulder.

No. 2. THE NINON HEADDRESS.—This small pouf is a combination of blonde and satin ribbon. It is intended for a young married woman, and should be worn at the top of the head. The hair is combed up from the nape of the neck and fastened in loose Apollo bows.

Fashionable Bonnets and Hats.

No. 1. STRAW HAT.—The brim is bound with bronze velvet, and the crown is encircled and surmounted with turquoise silk of a brighter shade of brown than the velvet. The feather is shaded, and the flowers descending the back are dark crimson roses and brown leaves.

No. 2. WINTER BONNET.—Black velvet or felt. The brim is lowered in front and turned up at the back, with a double loop and a spray of roses. A torsade round the crown, and a bow at the right side.

No. 3. VELVET BONNET.—The brim is lowered in front over a wide velvet bandeau. The crown is trimmed round with ribbon, and at the side there is a large tuft of ribbon loops, with a bouquet of flowers. Long loops and ends fall at the back.

No. 4. FELT HAT.—Réséda felt hat, with upturned brim. All round the crown there is a rouleau of turquoise of a lighter shade than the hat. The feather is shaded, being light at the top. The flowers are shaded réséda velvet.

The Housewife.

PRACTICAL DINNERS.

SPRING.

Potage à la Purée de Pois Verts.
Salmon——Tartare Sauce.
Filets de Maquereaux à l'Italienne.
Stewed Sweetbreads.
Lamb Cutlets and Cucumbers.
Fillet of Beef à la Française.
Roast Quails.
Lettuce Salad.
Asparagus——Poivrade Sauce.
Fondue.
Gooseberry Tartlets.
Charlotte Russe.

POTAGE À LA PURÉE DE POIS VERTS.—Take one pint and a half of green peas, boil them in salt and water with a little mint; when thoroughly cooked pound them and pass them through a hair sieve; put a piece of butter into a stewpan, when melted put in an onion and a carrot, cut in thin slices, fry until they begin to colour; add a quart of stock, a little salt, pepper, and a pinch of white sugar; leave it to boil for a quarter of an hour, stir in the purée of peas, let it come to the boil, strain it, and serve with small croûtons of bread.

SALMON—TARTARE SAUCE.—Have the salmon cut in slices not less than ¾in. thick, sprinkle with pepper and salt, and wrap each slice in a piece of oiled paper and grill them on a brisk fire five minutes on each side; then remove the paper and serve with the following sauce (in a sauceboat): —Break into a small basin the yolks of two eggs, add a pinch of salt, put in some salad oil drop by drop, stirring it all the while until it thickens; add a squeeze of lemon, half a teaspoonful of French mustard, a few drops of white vinegar. Take a little tarragon, chervil, one gherkin, half a tablespoonful of capers, chop all these very finely, but separately, stir all in together, and add salt to taste. Keep it in a cool place till wanted.

FILETS DE MAQUEREAUX À L'ITALIENNE.—Split a couple of mackerel, remove the bone, cut off the head and tail, and trim the four halves into a dozen fillets; remove the skin from each, sprinkle them with pepper and salt, and set them to cook in a sauté-pan with plenty of butter, or in a tin in the oven. Put all the bones and trimmings of the fish to boil for an hour in a saucepan, with an onion, a carrot, some parsley, sweet herbs, pepper, salt, and cloves to taste, and a little common stock; then strain it. Fry in oil three or four shallots finely minced, until they are a light brown; then add three tablespoonfuls of white vinegar, mix well, and let it reduce by one-third. Add the above liquor and a little chopped parsley, and dish up the fillets with this sauce.

STEWED SWEETBREADS.—Take a pair of calves' sweetbreads quite fresh, wash them, and put them in a large stewpan full of cold water, with a little salt; let them boil ten minutes, remove them with a slice into a large basin of cold water; when quite cold put them on a cloth to dry, and lard them neatly with finely-cut bacon. Place them into a stewpan with carrots, onions, thyme, parsley, and a bay leaf, a little salt and pepper, and cloves; half a pint of stock. Put them to stew gently for one hour and a half, basting them with the broth occasionally to prevent their getting dry. Place them on a dish, strain the gravy into a small basin, remove the fat, pour round the sweetbread, and serve.

LAMB CUTLETS, WITH CUCUMBERS.—Trim the cutlets neatly, egg and bread-crumb them and fry them in butter, a light brown colour; drain and arrange them in a circle on a dish, placing in the centre some cucumbers prepared as follows: Cut up a large cucumber in rounds an inch long, cut each round into four quarters, remove the seeds and rind, and trim each piece to a uniform shape; then let them remain in salted water for a couple of hours; drain them, throw them into boiling salted water, and when they are nearly cooked strain and put them into cold water, there to remain till wanted. At the time of serving, take the pieces out of the water, and put them into a sauté-pan with a piece of butter, some parsley finely minced, and a sprinkling of white pepper; shake them gently till quite warm, and they are ready.

FILLET OF BEEF À LA FRANÇAISE.—Take a piece of the undercut of sirloin of beef, trim off the fat neatly, and the thin skin next to it; lard (not too finely) that side of it with fat bacon, and lay it for a whole day in a pie dish, with plenty of olive oil, pepper, salt, parsley, slices of onion, and laurel leaves. Put it on the spit, cover the larded side with a piece of buttered paper, roast it at a brisk fire, and do not let it be overdone. Baste it frequently with its own gravy, and a short time before serving remove the piece of paper to let the larding take colour. Serve with its own gravy, and round it new potatoes, tossed in butter until done.

ROAST QUAILS.—Pluck, draw, singe, and truss them; then cover the breast with a vine leaf (if obtainable), and over that place a thin sheet of fat bacon; tie this on with thread and put the quails on a long skewer, attach it to the spit; roast for about ten minutes before a clear fire, and serve (if preferred) on toast.

LETTUCE SALAD.—Wash two heads of lettuce, dry them thoroughly, and break the leaves, or cut them into convenient pieces. Put the yolks of two hard boiled eggs into a basin, with a teaspoonful of mustard, pepper and salt to taste, and one tablespoonful of oil; work the mixture into a smooth paste, and add consecutively three tablespoonfuls of oil and two of strong vinegar, then add a handful of garden cress, a little tarragon finely minced, and the whites of the eggs coarsely chopped. The mixture must be stirred all the time. Lastly, add the lettuce, turn it well over, and serve.

ASPARAGUS—POIVRADE SAUCE.—Scrape each head with the back of a knife and tie the asparagus in small bundles of a dozen heads each; cut off the ends evenly. Put them into a panful of fast boiling water, with plenty of salt, and in about ten minutes they will be done. Drain at once, untie the bundles, and serve on a napkin with the following sauce in a boat: three parts of olive oil, one of tarragon vinegar, a little mustard, plenty of pepper and salt to taste, beaten up with a fork until perfectly amalgamated.

FONDUE.—Melt half an ounce of fresh butter in a saucepan, stir into it a tablespoonful of flour; when the two are well amalgamated put in a small quantity of milk and about three ounces of grated Parmesan cheese. Stir the mixture on a slow fire till it assumes the appearance of thick cream, but be careful not to let it boil; then add one pod of garlic, a small quantity of flour of mustard, a dash of powdered nutmeg, and some white pepper; mix thoroughly, and, if required, add a little salt; keep on stirring the mixture at a very moderate heat for about ten minutes, then remove the pod of garlic, take the saucepan off the fire, and stir the contents occasionally until quite cold, when you stir into them the yolks of three eggs beaten up with a little milk, and strained, and finally the whites of five eggs whisked into a stiff froth. Pour the mixture into a deep round tin, put it into the oven, which must not be too hot; in about twenty or thirty minutes the fondue will have risen and taken colour. Pin a napkin round the tin, and serve quickly.

GOOSEBERRY TARTLETS.—Make a short paste with one white and three yolks of egg, one ounce of sugar, one ounce of butter, a pinch of salt, and flour *quant. suf.*; work it lightly, roll it out to the thickness of a quarter of an inch. Line some pattypans with it, fill them with uncooked rice to keep their shape, and bake them in a moderate oven till done. Remove the rice at the time of serving, fill each patty with some gooseberries previously stewed with a little water and a good allowance of lump sugar.

CHARLOTTE RUSSE.—Line the bottom and sides of a plain mould with finger biscuits (sponge), which you trim for the purpose; beat up into a froth one pint of double cream, sweeten to taste with pounded lump sugar; add one ounce of the finest isinglass dissolved in a tumbler of milk, with a liqueur glass of maraschino. Pour this mixture into the mould, set it on ice for a couple of hours, then turn out and serve.

SUMMER.

Consommé de Volaille.
Rougets en Papillote.
Whitebait.
Boudins de Volaille aux Truffes.
Filets de Bœuf à la Béarnaise.
Fricandeau aux Épinards.
Roast Grouse.
French-Beans Salad.
Cheese Straws.
Riz à la Impératrice.——Salade de Fruits.

CONSOMMÉ DE VOLAILLE.—Cut into small pieces the remains of a couple of roast fowls, bones and all; put them in a saucepan with a pound of knuckle of veal and a piece of lean ham, cover with water, add salt to taste, and put the saucepan on the fire, skimming carefully all the scum that rises; just before it begins to boil put in three or four carrots, two or three onions, a head of celery, some thyme, parsley, marjoram, a bay leaf, a few cloves and whole pepper to taste; then place the saucepan at such a distance from the fire as will let the contents simmer, but not boil. In about four hours strain the liquor through a napkin, effectually free it from fat, and clarify it with raw meat, or with the white of an egg. Serve the soup with sprigs of chervil or with any garniture in it you like: peas, French beans, asparagus points, quenelles of fowls, &c.

ROUGETS EN PAPILLOTE.—Cut one carrot and two onions into thin slices; add thyme, parsley, and marjoram, with pepper and salt to taste, and three tablespoonfuls of salad oil; mix these well together, cover each

Digitized by Google

mullet with the mixture, and roll up in a piece of white paper, previously oiled; bake them in a moderate oven half an hour, then carefully open the paper, place the fish neatly on a dish, ready to be served, and keep it warm. Melt a small piece of butter, add a large pinch of flour, half a tumblerful of good stock, and the vegetables, &c., the fish were cooked in. Let the sauce boil five minutes, add salt if wanted; strain, skim, pour it over the fish, and serve.

WHITEBAIT.—Drain the fish from water, lay it on a cloth, sprinkle flour on it, double up the cloth and shake it about from side to side until the fish is well covered with flour. Transfer it to a frying basket. Shake it gently to get rid of the superfluous flour. Have a panful of boiling lard, try it with a small piece of bread; if the fat hisses sharply and the bread colours at once, the fat is hot enough; plunge the basket into it, and never cease shaking until the whitebait is cooked (two or three minutes). Turn the fish out on a napkin in front of the fire, and sprinkle it freely with salt at the time of serving. It is a good plan when practicable to have two pans of boiling fat, and when the whitebait has been cooked in the one to take it out, drain it, and plunge it for a second or two in the other pan, the fat in which should be boiling hot.

BOUDINS DE VOLAILLE AUX TRUFFES.—Put half a pint of water into a stewpan with a pinch of salt and a small piece of butter; when it boils stir into it enough flour to make a thick paste; put it by to get cold. Take the flesh of a fowl and pound it in a mortar, then add half its bulk of the above paste, and half that quantity again of butter, then salt, pepper, and grated nutmeg to taste. Mix the whole well with the pestle, then work into the mixture one whole egg and three yolks of eggs. Pass the whole through a sieve; work a gill of cream into the composition. Take a number of small plain moulds, butter them well, cut some truffles in slices and stamp them into any shape you like, arrange them inside the moulds by pressing them against the butter, and fill them with the above composition; then place the moulds in a flat stewpan half full of water, and steam them for 15 to 20 minutes. Turn them out carefully, arrange them in a circle on a dish over a sauce made with the trimmings of the truffles.

TRUFFLE SAUCE.—Rub a saucepan with a shallot, melt a piece of butter in it, add a very small quantity of flour, and the trimmings of the truffles chopped coarsely, moisten with some good stock free from fat, and a little white wine, season with pepper, salt, and the least bit of nutmeg. Let the sauce simmer about 10 minutes, and it is ready.

FILLETS DE BŒUF À LA BÉARNAISE.—Take a piece of the under-cut of the sirloin, cut it into neat fillets (pear shape), sprinkle them with pepper and salt, and cook them with a little butter in a tin in the oven. Do not let them be overdone; add a piece of glaze the size of a walnut, and when dissolved turn the fillets over in it. Cut some potatoes into small balls, fry them in butter till done, and of a nice colour. Dress the fillets round the potatoes heaped up in the middle of the dish, with the following sauce under the fillets: Put three or four shallots and a little garlic with some allspice, roughly pounded, and a little mace into a saucepan, with a tumblerful of water and half that quantity of tarragon vinegar; let the whole boil till reduced to one tumberful; strain this liquor, and let it get cold. Strain the yolks of three eggs, mix gradually with them the above liquor, add salt to taste, and a 2-oz. pat of fresh butter. Stir the mixture over a slow fire until it thickens, then add a small quantity of tarragon finely minced.

FRICANDEAU AUX ÉPINARDS.—Neatly trim a nice piece of fillet or cushion of veal, lard it thickly with bacon on one side. Place in a large stewpan a layer of slices of bacon, then some carrots and onions cut in slices, with a bundle of sweet herbs, pepper, salt, and spices to taste; lay the piece of veal in the middle, and moisten with about a pint of stock. Let the meat stew gently for three or four hours, basting the top occasionally. Then strain off the gravy, put it into a small saucepan, skim off superfluous fat, add to it a little butter mixed smooth with a small quantity of flour, and let the gravy reduce nearly to a glaze; pour it over the meat, the top of which should be previously browned with a salamander if necessary, and serve with a border of spinach.

SPINACH.—Pick and wash perfectly clean two or three pounds of spinach; put it into a saucepan with a little water, and let it boil till quite done. Turn it out on a hair sieve to drain, squeeze the water out, and pass the spinach through the sieve. Put a good lump of butter into a saucepan, fry it a light brown, add a pinch of flour, mix well, put in the spinach, pepper and salt to taste, and a little milk; stir well and serve.

ROAST GROUSE.—Pick, draw, singe, and truss, tying a thin slice of fat bacon over the breast. Roast at a brisk fire, baste frequently, and remove the bacon a few minutes before the bird is done. Serve with bread crumbs, bread sauce, and plain gravy, in a boat. Time of roasting fifteen to twenty minutes.

FRIED BREAD CRUMBS.—Put the bread crumbs in a baking-tin with a lump of butter, place it in the oven and stir them occasionally until they have absorbed all the butter, and are of a golden colour.

BREAD SAUCE.—Pour half a pint of boiling milk on a teacupful of fine bread crumbs, add a small onion stuck with three cloves, a small blade of mace, a few peppercorns and salt to taste; let the sauce simmer five minutes, add a small pat of fresh butter, and at the time of serving remove the onion and mace.

PLAIN GRAVY.—Mince an onion finely, fry it in butter to a dark brown colour, then add half a pint of broth or stock, pepper and salt to taste, a small piece of lean ham or bacon, minced small, a little Worcester sauce, a sprig of thyme and one of parsley. Let it boil five minutes, put it by till wanted, and strain it before serving.

FRENCH-BEANS SALAD.—String some French beans and boil them whole in plenty of salted water, when cold, dress them with oil, vinegar, pepper, and salt, some tarragon and capers finely minced, and garnish with hard-boiled eggs, anchovies, and beetroot. The dish must be well rubbed with a shallot.

CHEESE STRAWS.—Half a pound of dried flour, ¼lb. butter, ¼lb. grated Parmesan or Gruyere cheese, a teaspoonful of flour of mustard, a saltspoonful of cayenne, and a saltspoonful of salt. Rub the butter into the flour, then mix the whole well together; beat the whites of two eggs with a quarter of a pint of cold water, and stir in enough to form a firm paste; knead the paste well, then roll it out the eighth of an inch thick, and cut it into straw-like strips about five inches long. Bake in a quick oven till of a pale brown colour—about five minutes. Pile them on a dish prettily, and serve either hot or cold.

RIZ À LA L'IMPÉRATRICE.—Boil three tablespoonfuls of rice, picked and washed clean, in a pint of milk, with sugar to taste, and a piece of vanilla; when quite done, put it into a basin to get cold. Make a custard with a gill of milk and the yolks of four eggs; when cold, mix it with the rice. Beat up to a froth a gill of cream with some sugar and a pinch of isinglass dissolved in a little water; mix this very lightly with the rice and custard, fill a mould with the mixture, and set it on ice. When moderately iced turn it out, and serve.

SALADE DE FRUITS.—Take equal parts of strawberries, red currants, white currants, raspberries, very ripe cherries. Remove all the stalks, the stones from the cherries, and pick the currants one by one; sprinkle plenty of powdered lump sugar over the fruit, and a wine glass of the best pale French brandy, or more according to the quantity of fruit; toss them lightly until the sugar is all dissolved, and serve.

AUTUMN.

Game Soup.
Boiled Turbot——Sauce Hollandaise.
Sole à la Lyonnaise.
Mutton Cutlets——Soubise Sauce.
Chartreuse of Partridges.
Saddle of Mutton à l'Anglaise.
Roast Pheasant.
Stuffed Tomatoes.
Croustades aux Huîtres.
Soufflé of Apples.
Caramel Pudding.

GAME SOUP.—Chop up the remains of a couple of roast grouse, or any other kind of game bird; put them into a saucepan with an onion, and a carrot cut up in pieces; a bundle of sweet herbs, a bay leaf, and pepper and salt to taste. Fill up the saucepan with sufficient common stock to cover the contents; let the whole boil till the meat comes off easily from the bones; strain off the liquor, pick all the meat from the bones, pound it in a mortar, pass it through a wire sieve, and add the liquor to it. Amalgamate in a saucepan a piece of butter, with a tablespoonful of flour; add the soup to it; let it come to boiling point, and stir in (off the fire) the yolks of a couple of eggs, with or without a little lemon juice, according to taste. Serve on very small dice of bread fried in butter.

BOILED TURBOT, SAUCE HOLLANDAISE.—Lay the fish in the kettle with plenty of cold water, the juice of two or three lemons, a good bunch of parsley, and salt to taste. Place the kettle on the fire, and directly the contents approach boiling point, draw it aside and let it simmer till the fish is quite done. An ordinary sized fish will be done shortly after the water boils. Lift up the fish carefully, let the water drain off, and serve garnished with "quarters" of lemon and parsley.

SAUCE HOLLANDAISE.—Put three tablespoonfuls of vinegar in a saucepan, and reduce it on the fire to one-third; add a quarter of a pound of butter and the yolks of two eggs. Place the saucepan on a slow fire, stir the contents continuously with a spoon, and as fast as the butter melts add more, until 1 lb. is used. If the sauce becomes too thick at any time during the process, add a tablespoonful of cold water and continue stirring. Then put in pepper and salt to taste, and take great care not to let the sauce boil. When it is made—that is, when all the butter is used and the sauce is of the proper thickness—put the saucepan containing it into another filled with warm (not boiling) water until the time of serving.

SOLE À LA LYONNAISE.—Fillet the soles, twist each fillet in a knot, and cook them in the oven in a tin with plenty of butter and a sprinkling of salt. Put the bones and trimmings to boil with carrots,

Digitized by Google

onions, celery, mushroom trimmings, a bundle of savoury herbs, pepper and salt, and spices to taste, and enough water to cover them. When these have boiled two or three hours, strain the liquor, and add to it the butter out of the tin in which the fillets have been cooked; then fry in butter some onions finely minced, or a mixture of onions and shallots to a gold colour; add a little flour to thicken the sauce, and then the above liquor. Arrange the fillets round the dish, with the sauce in the middle, adding at the time of serving a little parsley finely minced.

MUTTON CUTLETS, SOUBISE SAUCE.—Cut the cutlets out of a piece of the best end of a neck of mutton. They should be less than half an inch thick, and neatly trimmed, with not too much fat left on them; give them a few blows with the bat, and grill them on, or in front of, the fire, which should be clear and fierce, so that each cutlet be full of juice when cut. Sprinkle with salt, and arrange them in a circle on the dish, overlapping each other.

SOUBISE SAUCE.—Parboil some onions a few minutes, mince them roughly, and put them in a saucepan with plenty of butter, a pinch of sugar, and pepper and salt to taste; let them cook slowly so that they do not take colour, and add a tablespoonful of flour. When they are quite tender, pass them through a sieve. Dilute the onion pulp with sufficient milk to make into a sauce; make it hot and serve.

CHARTREUSE OF PARTRIDGES.—With a column cutter cut a quantity of long round pieces—about half an inch in diameter—out of turnips and the red part of carrots, then cut these into slices an eighth of an inch thick. Be careful to have all these pieces, which should be like very small counters, of uniform shape. Boil them separately in salted water with a pinch of sugar, do not let them be overdone, and turn them out on a sieve to drain quite dry. Boil a cabbage or any kind of greens in salted water, and when quite done drain and press out all the water from them. Take a couple of partridges, cut up the breast and wings of each into four or six neat joints, and put them aside. Cut the carcases into several pieces, and put them into a saucepan with a piece of ham, sweet herbs, spices, pepper, and salt to taste, some of the trimmings of the carrots, and a couple of shallots. Cover the whole with good stock, and let it simmer a couple of hours; then strain the liquor, and lay in it the pieces of breast and wings to simmer gently till they are cooked. Oil a plain round mould with fine salad oil, then cut a round of kitchen paper to fit the bottom, and a long strip to go round the side of the mould. Oil the paper, and fit it well into the mould. Line the bottom with the pieces of carrots and turnips in circular rows, making each piece overlap the other a little in the same row as well as the piece next to it in the next row. Lay two rows of carrot and two of turnip alternately. Use the point of a larding or of a trussing needle to place the pieces in position, and press them lightly with the fingers as you go on. When the bottom of the mould is finished, proceed to build up the sides with alternate rows, on the same principle and in the same way. Let all the pieces be uniformly pressed into position, and be careful to place them regularly. Having finished the sides, take some of the cabbage or greens, and line the bottom and sides of the mould with it, pressing it in carefully, and leaving a kind of well in the middle. Into this place the pieces of partridge, with a little of the gravy they have been cooked in, packing them carefully, and filling the space between each piece with greens—packing them, in fact, as you would glass in a hamper. Fill up the mould with cabbage pressed lightly down, put a piece of paper on the top, and set the chartreuse to steam for half an hour. In the meantime set the gravy on the fire to reduce a little. Put a piece of butter in a saucepan, mix with it a little flour, and when it begins to colour stir in the gravy, and when the chartreuse is turned out the sauce is to be poured on the dish, but not over the chartreuse. The chartreuse being steamed, take the mould out of the saucepan, take away the piece of paper which is on the top, invert a dish on the mould, and turn it up gently. Let the mould so remain for a few minutes, and then, holding it in place with one hand, drain off the water that will be in the dish, then gently take off the mould, and with the utmost care proceed to remove the paper from the chartreuse bit by bit. Just before pouring in the gravy wipe off with a cloth any further moisture which may have oozed out on the dish.

SADDLE OF MUTTON À L'ANGLAISE.—Trim the joint carefully, roast it at a brisk fire. When done dredge plentifully with salt, free the gravy absolutely from fat; garnish the joint with potato croquettes.

POTATO CROQUETTES.—Stir an egg or two into some cold boiled potatoes that have been passed through a sieve, add a few finely-powdered spices, pepper and salt to taste, and some minced parsley; mix well, roll the mixture into balls, or any shape you like, dip them in egg, cover with fine bread-crumbs, and fry a nice golden colour in plenty of boiling lard.

ROAST PHEASANT.—Pick, draw, singe, and truss, placing a couple of shallots and one ounce of butter inside the bird. Lard the breast very finely, tie a thin slice of bacon over the larding, and roast the bird at a moderate fire, basting it frequently with butter. A few minutes before the bird is done, remove the slice of bacon so as to let the larding take colour. Serve with plain gravy, fried crumbs and bread sauce, recipes for which are given at p. 66. Time, 30 to 40 minutes.

STUFFED TOMATOES.—Peel your tomatoes, cut them in halves, empty them, and place them on a dish that will stand the fire, and in which you have poured a small quantity of olive oil; make a mixture of bread-crumbs, ham, parsley, basil, marjoram, thyme, some shallot (all very finely minced), pepper and salt. The bread-crumbs should be in the proportion of two to one with the ham; the other things should be in such proportions as the talent of the cook can devise. This mixture should be strewed over the tomatoes so as to almost cover them; a moderate quantity of salad-oil should be poured over the top, and a few minutes' baking will produce a dish of the most toothsome description.

CROUSTADES AUX HUÎTRES.—Cut the crumb of a loaf of stale bread into slices 2 inches thick, and then with a round paste cutter, about 2 inches in diameter, cut out of each slice as many pieces as you can; with another paste cutter, about 1½ inches in diameter, mark one side of each cylinder of bread-crumb. When they are all ready, fry them a golden colour in very hot lard. A deep frying-pan and plenty of lard should be used, so that the croustades swim freely in the fat. When done, lay them in front of the fire to drain, and afterwards remove the cover (marked with the smaller paste cutter), and with the handle of a teaspoon scoop out all the inside of each croustade. Parboil a quantity of oysters in their own liquor, remove the beards, cut each oyster into four or six pieces. Melt a piece of butter in a saucepan, add to it a pinch of flour, the liquor of the oysters, a little cream, salt, pepper, nutmeg, the least bit of cayenne, and some finely minced parsley. Put in the oysters and toss them in this sauce just long enough to make them quite hot. Stir into them, off the fire, the yolk of an egg beaten up with the juice of half a lemon, and strained. Fill the croustades, warm them in the oven, and serve.

APPLE SOUFFLÉ.—Boil some apples with very little water, plenty of lump sugar, and a few cloves or a little cinnamon, until you get a well-reduced marmalade, which you pass through a hair sieve. Mix a very little potato flour with a gill of milk; stir it over the fire until it thickens; add the yolks of four eggs, and as much apple marmalade as will give you a mixture of the proper consistency; work it well so as to get it of a uniform smoothness, then add the whites of six eggs whisked to a stiff froth, mix them in quickly with the rest, pour into a plain mould, and put into the oven at once. It will take 20 minutes to cook.

CARAMEL PUDDING.—Put a handful of loaf sugar to boil with a very little water until the syrup becomes a deep brown; warm a small basin, pour the syrup in it, and keep turning the basin in your hand until the inside is completely coated with the syrup of caramel, which will by that time have set. Strain the yolks of eight eggs from the whites, and mix them gradually and effectually with one pint of milk. Pour this mixture (which may be left plain, or may be flavoured with orange-flower water, essence of vanilla, or of lemon, &c.) into the prepared mould, lay a piece of paper on the top, and set it in a saucepan full of cold water—taking care that the water does not come over the top of the mould—put on the cover, and set the saucepan by the side of the fire to boil gently for one hour. Then remove the saucepan to a cool place, and when the water is quite cold take out the mould, wipe it dry, and turn out the pudding very carefully.

WINTER.

Gravy Soup.
Codfish and Oyster Sauce.
Whitings au gratin.
Larks in cases.
Grenadins of Beef à la Macédoine.
Braised Turkey.
Roast Woodcock.
Russian Salad.
Maccaroni Cheese.
Chartreuse of Oranges.
Gateau Savarin au Rhum.

GRAVY SOUP.—Take from 3lb. to 4lb. of shin of beef, cut off half a pound of lean, and put what is left into a stewpan, add four quarts of cold water and a large pinch of salt; when boiling skim it well, and put in one large carrot, one turnip, two large onions, four or five cloves, a few peppercorns, any trimmings of leeks or celery; leave it to boil gently four or five hours, skim off the fat, strain it through a cloth into a basin, leave it to cool; cut the lean meat very small, pound it, and work into it one whole egg, a little salt, and any trimmings of cooked veal or fowl, a few trimmings of uncooked carrot, onion, and celery; pour in the stock, stir it over a quick fire until it boils, leave it to boil from ten to fifteen minutes, strain through a napkin into a clean stewpan, let it come to the boil, and serve.

CODFISH AND OYSTER SAUCE.—Tie the fish several times over with string, lay it in cold water plentifully salted, and let it boil gently, carefully skimming the water; when done lift it up and let it drain, then serve. An ordinary-sized piece will be done two or three minutes after the water comes to boiling point.

OYSTER SAUCE.—Parboil the oysters in their own liquor, beard them, and reserve all the liquor. Melt a piece of butter in a saucepan, add a little

Digitized by Google

flour, the oyster liquor, and enough milk to make as much sauce as is wanted. Put in a blade of mace and a bay leaf tied together, pepper and salt to taste, and the least bit of cayenne. Let the sauce come to the boil, add the oysters, and as soon as they are quite hot remove the mace and bay leaf. Stir in a few drops of lemon juice, and serve.

WHITINGS AU GRATIN.—Take a few mushrooms, a couple of shallots, and some parsley, all finely minced; mix them together. Butter a tin very plentifully, strew in it some of the above mixture and some fine baked bread crumbs with a little pepper and salt. On this place the whitings, on them place the remainder of the mushrooms, &c., more pepper and salt, and cover up the whole with a thin layer of baked bread crumbs. Pour in at the side a glass of white wine and a sufficient quantity of stock to come up to the fish, and soak the bread crumbs without washing them off. Put the tin in the oven to bake for twenty minutes.

LARKS IN CASES.—Bone the larks skilfully, put the livers on one side, and set the bones and trimmings to boil in some good stock, broth, or even water with carrots, onions, parsley, pepper, salt, a few cloves, a bay leaf, and a few pieces of ham or bacon. When well reduced, strain this gravy and put it by. Cut up the larks' livers, as also some fowls' livers, or some calves' livers all in small dice; do the same with half their quantity of bacon. Fry a few shallots a bright yellow in plenty of butter, then put in the liver and bacon with minced parsley, pepper, and salt, and a little powdered spices. Toss the whole on the fire for a few minutes, then turn out on a sieve and pass them through while hot. Have your paper cases ready oiled, put a layer of this *farce* in each, then a moderate-sized piece in each lark, which you roll up neatly, and place in its case with a thin slice of fat bacon over it. You then bake them in the oven not longer than ten or fifteen minutes. At the time of serving thicken the gravy mentioned above by mixing a little flour with some butter, and then adding the gravy to it. Fill with gravy, and strew a little finely-minced parsley over each case. The pieces of bacon may be removed or not at pleasure before serving.

GRENADINS OF BEEF À LA MACÉDOINE.—Cut some rump steak in slices a little more than half an inch thick, trim them all to the same size in the shape of cutlets, and lard them thickly on one side with fine lardoons of bacon fat. Lay them out, the larded side uppermost, into a flat pan, and put into it as much highly-flavoured rich stock or gravy as will come up to the grenadins without covering them. Cover the pan, and place it in the oven to braise gently for an hour. Then remove the cover, baste the grenadins with the gravy, and let them remain uncovered in the oven till the larding has taken colour; they are then ready. Take equal quantities of carrots and turnips cut into the shape of olives, also an equal quantity of small sprigs of cauliflowers. Boil all these vegetables in salted water, then melt a piece of butter in a saucepan, add a tablespoonful of flour, stir in sufficient milk to make a sauce, add pepper, salt, and a little grated nutmeg. Put all the vegetables into this sauce, of which you should have just enough to hold together; toss them gently in it to make them quite hot. Dress them in the middle of a dish, round them dispose the grenadins in a circle, and, having removed the superfluous fat from their gravy, pour this round the grenadins, and serve.

BRAISED TURKEY.—Mince one pound of fat bacon and a couple of shallots, give them a turn on the fire in a saucepan, then put in one pound of chestnuts boiled and peeled, and half a pound of truffles, both cut up in moderate-sized pieces. Add pepper, salt, and spices to taste, with a little powdered thyme and marjoram. Give the mixture another turn on the fire, and then stuff the turkey with it. Line the bottom of a braising pan with slices of bacon, lay the turkey on these, and place more slices of bacon on the top of it and round it; put in two carrots and two onions, both cut in slices, and sweet herbs, parsley, a bay leaf, a clove of garlic, and whole pepper and salt to taste; moisten with some stock and a tumblerful of sherry. Lay a round of buttered paper on the top, cover up the pan, and braise with a moderate fire (under and above) for about four hours, then serve with the gravy strained and freed from excess of fat.

ROAST WOODCOCKS.—Remove the gizzard from each bird, truss and wrap the birds in bacon, and roast them at a brisk fire, basting them continually with butter. A slice of toast should be placed in the dripping-pan to catch the trail, and the birds are served on that toast. Plain white sauce to be served in a boat with them. Time of roasting ten to fifteen minutes.

PLAIN WHITE SAUCE.—Melt a piece of butter in a saucepan, add a tablespoonful of flour, pepper and salt to taste; mix well, then add milk, and keep on stirring till the sauce acquires the desired consistency.

RUSSIAN SALAD.—Boil some carrots and some turnips in salted water with a small piece of butter, but do not let them be overdone; when cold cut out of them, with a vegetable scoop, a number of pieces the size of an olive; cut some beetroot in the same way, and likewise some truffles. Take equal parts—say a cupful—of each of the above, and a similar quantity of preserved fresh (not dried) haricot beans ready cooked, and of asparagus points preserved in the same way. Two tablespoonfuls respectively of capers, of French pickled gherkins, which you cut into the shape of capers, and of anchovies, perfectly cleaned, and cut into small pieces; a couple of dozen or more olives stoned, one tablespoonful of tarragon and chervil minced fine, and half that quantity of chives, also minced. Mix the whole lightly together into a sauce, made with raw yolks of eggs, oil, vinegar, pepper, and salt, well worked together. Dress within a border of aspic jelly, and ornament with hard-boiled eggs, caviare, lobster spawn, olives, pickles, truffles, &c. N.B.—The Spanish preserved sweet capsicums (Pimientos dulces) are a great addition to the above not only for their exquisite taste, but on account of their brilliant colour.

MACCARONI CHEESE.—Boil 2oz. of maccaroni in water, drain it well; put into a saucepan 1oz. of butter, mix it well with one tablespoonful of flour, moisten with four tablespoonfuls of veal stock and a gill of cream, add 2oz. of grated Parmesan, one tablespoonful of mustard, salt and cayenne to taste; put in the maccaroni, and serve as soon as it is well mixed with the sauce and quite hot.

CHARTREUSE OF ORANGES.—Make a very clear orange jelly with a pint and a half of water, six oranges, sugar to taste, a wine-glassful of sherry, and an ounce and a half of isinglass. Divide two or three oranges into quarters, and with a sharp knife carefully remove from each quarter every particle of skin of any sort. Have two plain moulds, one about an inch and a quarter more in diameter than the other. Pour a very little jelly at the bottom of the larger mould, and place in it a layer of orange quarters prepared as above (if too thick they should be split in two lengthways); cover them with more jelly, but only put enough to get a smooth surface. Lay this on ice to set. When it is quite firm put the small mould inside the large one, taking care to place it exactly in the middle, so that the vacant space between the two moulds be of the same width. In this vacant space you now dispose prepared orange quarters, filling up the interstices with jelly as you go on, until the whole of the space is filled up. Place the mould upon ice, and proceed to whip a pint of cream with half an ounce of isinglass and some sweetened orange juice, which must be added to it a very little at a time, else the cream will not rise into a froth. When the cream is ready and the jelly set, remove the inner mould by pouring warm water into it, and fill up the inner space of the chartreuse with the cream. Set it on ice for an hour, turn out and serve.

GÂTEAU SAVARIN AU RHUM.—The following recipe was given in *The Queen* some time ago: Take 1lb. of fine sifted flour, 4oz. of pounded loaf sugar, ½lb. of fresh butter, eight eggs, and 1oz. of German yeast. Dissolve the yeast in rather less than half a pint of tepid milk, strain it, and work into it so much of the flour as will produce a soft dough. Roll this into a ball, place the remainder of the flour into a deep basin, lay the ball of dough on it, cover up the basin, and leave it in a warm place until the ball of dough (the sponge) has risen. You now add the sugar, the butter (just liquified), the eggs, and a pinch of salt, and work the mixture lightly with the fingers until you get a smooth paste. Butter plentifully a large plain border mould (Savarin mould), mince some blanched almonds, not too fine, and strew the mould with as many of these as will stick to the butter; then pour in the cake mixture, which should not fill the mould more than three parts full. Place the mould, covered up, in a warm place, and when the cake has well risen bake it in a moderate oven for about one hour and a half. Before turning the cake out of the mould stab the top of it (which will be the bottom when the cake is turned out) with a knife in several places, and pour all over it a mixture of two parts of old rum, and one of very sweet syrup, so as to soak it well, but not too much, to the depth of an inch: then turn it in a dish, and serve. It may be eaten either hot or cold.

HINTS TO HOUSEWIVES.

TO DESTROY INSECTS.

ANTS.—Set a trap—a head of game, a piece of cake or sugar, and then kill them. Turpentine on a sponge wiped over the parts where the ants are numerous will prevent their coming.

BLACKBEETLES.—A hedgehog kept in the house will devour any number. Cucumber parings on the floor where the blackbeetles appear will effectually destroy them. Or, set dishes containing some beer at the bottom, and with a few sticks placed against the outside as a sort of gangway for them to climb up by. When they become fewer place a powder made up of equal parts of red lead, sugar, and flour, nightly near their haunts. Ground borax will destroy them by thousands.

CRICKETS.—Sprinkle a little chloride of lime about the holes, or some strong Scotch snuff.

FLEAS.—A few drops of essential oil of lavender distributed about a bed on small pieces of wadding or jeweller's cotton will drive away either bugs or fleas.

MOTHS.—In carpets: camphor pounded, Keating's insect powder, and the herb called in France vetivert sprinkled over carpets will generally destroy moths.

In furniture: Vetivert is the best remedy. Pieces of tallow candle wrapped up in paper placed in the stuffing are also recommended.

In furs: Sew the furs up in a bag made of four thicknesses of coarse brown wrapping paper, doubled over at the seams and sewn through, making eight thicknesses at the edges. Pasting may be used instead of sewing.

BUGS may be destroyed by washing the bedstead well with boiling soda and water. Then paint all joints over at intervals of a week with common paraffin oil.

Pastimes.

THE GAME OF BADMINTON.

A CORRESPONDENT in India has sent us a little pamphlet, entitled "A Handbook of Badminton, with Rules for Playing the Game," by Major Forbes, S.C., and published at Calcutta by the Great Eastern Hotel Company. A note accompanying the pamphlet, says: "Your Indian readers will be glad to see a notice of these rules." We think, however, it will be of more interest to a larger number of our readers if we give them complete. People in England would scarcely send to Calcutta for the rules, and residents in India will not be debarred by our publication from obtaining them in the much more handy form of the original pamphlet.

PREFACE.

At present great diversity of opinion prevails as to the rules in force in playing the game of "Badminton." Many people also complain that, owing to the want of any general published rules, they are unable to play the game properly after they have provided themselves with all the requisite materials for doing so. To meet these difficulties, the rules embodied in this handbook have been framed from a careful study of those generally in force at present in different places, and which upon the whole have been found to answer best and to give the most general satisfaction. It is not pretended that these rules are either absolute or infallible, and if the publication of them draws attention to the subject, and is the means of improvements or alterations being suggested in them, which may eventually lead to the adoption of one fixed set of rules (sadly wanted at present) all over the country, the object for which they have been compiled will have been more than accomplished. In the meantime it is hoped that, in the absence of anything better or more permanent, this handbook may at all events serve to illustrate the general principles of the game, and be sufficient to enable any person to learn how it is played.

I should remark that I am aware that the size of the courts and of the ground laid down in this handbook is very different to that which is generally in force. This arrangement was originally adopted with the view of making the game as fair as possible for ladies when playing against gentlemen, so as to neutralise the greater strength and force with which the latter usually play. It has been tried, and with success; and has been greatly approved of by such ladies as have played in these courts. By making the ground and the courts smaller than is generally done, and by placing the top of the net to 5½ feet from the ground, a great check is placed upon the hard and cutting hitting of gentlemen (especially those who are good racket-players), as they are very apt either to hit the net or to send the shuttlecock out of bounds; and as Badminton is especially intended to be a game for ladies, every advantage in this respect ought to be given to them in playing it. There is, however, no difficulty in making the courts and neutral ground any size that may be found most suitable and pleasant, after actual experience and trial, as the size of the ground in no way affects the general principles of the game, or the rules in force in playing it.

THE GAME OF BADMINTON.

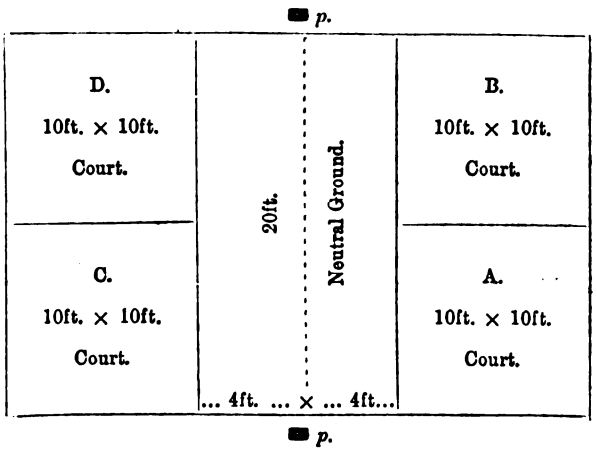
Badminton may be considered as a kind of "Ladies' Rackets," but instead of being played with bat and balls, it is played with battledores and shuttlecocks. In rackets the players stand in front of a wall, against which the ball is struck by each side alternately. In Badminton, the players who are opposed to each other in the game stand facing each other with a rope or net between them, and the shuttlecock is hit backwards and forwards over this net. There is, however, sufficient similarity between the two games to make the rules in force for one applicable to the other; and this has been done, as far as practicable, in the Rules for Badminton which are here laid down.

Badminton is played by two, four, six, or even more players, the numbers on each side being equally divided, and the sides standing opposite to each other. Previous to showing how the game is played, it will be proper to point out how the ground should be marked out, and the posts and net (or rope) set up.

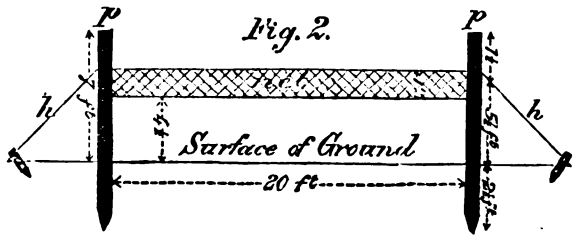
MARKING OUT THE GROUND.

A level piece of ground should be selected, and a space of 28 feet long by 20 feet broad marked out on it by means of pegs and strings. The four courts, each 10 feet square, are then laid off in the same manner (*vide* Fig. 1). The courts are separated, as shown in the figure, by a piece of neutral ground, 20 feet by 8 feet, so that two courts are left close together on one side of it, and two courts also close together, and exactly opposite to the other two, on the other side of it. The ground and the four courts being thus defined by strings and pegs, should then be carefully picked out by cutting a small trench about 2 inches deep and 2 inches broad along the lines where the strings are. A piece of straight wood, about ten feet long, is the best for marking out the ground. It is placed against the string, and should be firmly pressed down while the trench is being nicked out to prevent its moving, so as to get perfectly straight lines for the courts and ground. As soon as the lines of the trenches are all nicked out, the earth in them should be taken out and the trenches carefully filled in with whitewash. This will give well-defined courts and prevent disputes about line balls. As soon as the trenches are completed and the ground perfectly marked out, the posts and net are put up in the following manner. At the centre points on each side of the outer boundary of the neutral ground, and just touching its outer edge, are fixed the two posts (shown in Figs. 1 and 2 by *p p*), between which, and at a height of 5½ feet

FIG. 1.



from the ground, is stretched a net 1 foot deep (*vide* Fig. 2). Each post is 3 inches square and 9½ feet long, of which 2½ feet are fixed firmly into the ground, and 7 feet remain above ground. The posts should be pointed at



the bottom, and shod with iron tips, and they should be painted green. Four hooks are fixed to the outer side of the posts (two to each post), to which the net is fastened by two pieces of cord running along the top and bottom of the net. The posts should be kept straight and perpendicular by means of guy ropes (one to each post as shown in Fig. 2 by *h h*), fastened to a couple of tent pegs driven firmly into the ground —otherwise the net is apt to dip in the middle. If these guy ropes and the top and bottom cords of the net are covered over with red cloth or "saloe," it adds considerably to the neatness of their appearance.

THE GAME.

The game with four players (which is the one usually played) is played thus: A. and B. are partners on one side of the net (*vide* Fig. 1), each standing in his own court, opposed to C. and D., who are partners on the other side of the net, and who also stand each in his own court.

The game begins either by spinning, or playing a hand for the lead off. Suppose, however, that the side of A. and B. have won the lead, and that A. begins to serve (it is quite immaterial which of these two begins, as they have the right to settle this between themselves), A. begins by hitting the shuttlecock over the net across to D., who stands in the court diagonally opposite to him. If the shuttlecock alights all right in D.'s court, then D. hits it back anywhere he pleases, so long as it is over the net, and does not hit it, or touch it, and does not fall outside the boundary, or *on* any of the boundary lines. If then D. hits it back all right over the net, then either A. or B., standing wherever they please on their side of the net, may hit it back again over the net to C. or D., who also stand wherever they please on their side of the net, and either of whom may hit it back again over the net to A. and B.; and so the game proceeds till one side or the other makes a miss, or a wrong hit, which is either "hand out" (*vide* "Terms"), or scores an ace against the striker, according as his side is in or out at the time. The neutral ground, and the divisions of the respective courts on each side, are only observed in the serve or first hit. After that, the partners on each side may stand where they please on their own side of the net. Suppose after A. has returned the shuttlecock the second time to C or D. either of them misses, or fails to hit it back properly, then this counts an ace or one point for the side of A. and B.

A. still being in, then changes courts with his partner B., and serves into C.'s court, as he had previously done into D.'s court; and each time A. makes an ace, he has to change courts with his partner B., so as to serve alternately to each of his opponents. When A. is "hand out," his partner begins to serve across into the court diagonally opposite to him, as A. had done previously, and so on till he is "hand out," when it is "side out" for them. Their opponents then begin serving across in the manner already described

Digitized by Google

and they change courts with each other with every ace they make. When C. is "hand out" then D. goes in, and when D. is "hand out" the other side go in again; and thus the game proceeds till one side has made the 15 aces, which make the game. If, however, both sides are 13 or 14, the game is allowed by the consent of both sides to be set or put back to 0 all, or "love all" as it is generally termed. When both sides are 13, then the set is five, that is, either side must take five aces to win, and when both sides are 14, then the set is three, or three aces have to be made by either side to win the game. At the first start off of the game only one of the two partners who have won the lead is allowed a hand, and as soon as he is out, instead of his partner going in, the opposite side goes in with both their hands, and after this both sides play both their hands, or turns, before the other side goes in again. The reason for this is, that it gives too great an advantage to the side which begins if they are allowed two hands at starting. This is also the rule at rackets, and is a very fair one.

Terms Used at Badminton.

"Hand in" is the term used when it is the turn of either of the players whose side is in to begin his hand and commence serving.

"Hand out," is the term used when the player who is in and serving at the time is put out, and has to give way to his partner to have his "hand in." The server is "hand out," if in serving he fails to hit the shuttlecock clear over the net, or if in serving it goes under the net, or hits, or touches either the net, ropes or posts, or if it falls short of the proper court into the neutral ground, or if he serves it into the wrong court, or if it falls outside the boundary of the ground, or *on* any of the lines either of the boundary, neutral ground, or of his partner's court.

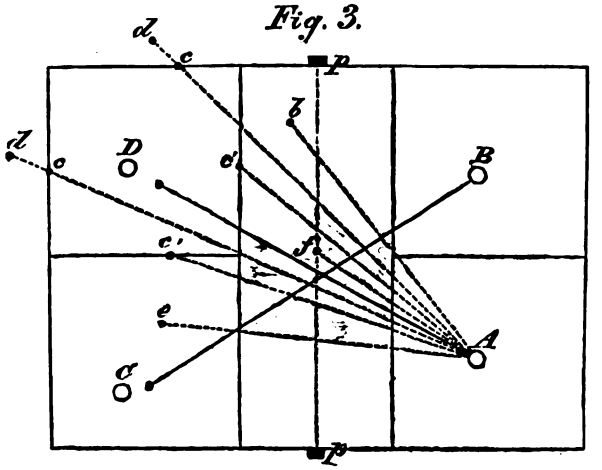
He is also "hand out" if, subsequent to the serve, and after it has been hit back all right by the person he served to, either he or his partner misses the shot altogether (unless it falls out of bounds, or on the boundary lines, in which case his miss is nothing unless he touches the shuttlecock in the act of hitting), or fails to hit the shuttlecock over the net, or if it is hit under it, or hits it, or touches the posts, ropes or net, or if it falls outside the boundary, or *on* the boundary lines.

"Side out" is when both players on one side are out, and it is the turn of their opponents to go in, and begin their serving.

The "serve" is the *first* hit of any player who is "hand in," and who leads off. In this case the server must hit the shuttlecock clear over the net, into the court diagonally opposite to him thus (Fig. 3): A. must serve into D.'s court, or *vice versa*. When the other side is in, C. must serve into B.'s court. In the return hit, and in all subsequent hits, it may be hit back anywhere as long as it goes over the net, and does not hit, or touch it, or go outside the outer boundary lines or on to them.

An "Ace" is one point scored by the side who are "hand in," at the time when their opponents fail to hit the shuttlecock back again over the

Fig. 3.



net after getting a serve, or after any return hit in the game, or when in hitting it back the shuttlecock goes under the net, or hits or touches any part of the net, ropes or posts, or when it is hit outside any of the boundary lines, or *on* to any of the boundary lines. An "Ace" is also scored to the server when the wrong person takes the serve, thus if A. serves to D., and C. takes it, whether it comes back right or not, it is an ace to A.'s side.

A "Let"—properly speaking there can be no such thing as a "let" at Badminton. At rackets, if during the game a striker hits either of his opponents with the ball before it touches the wall, or if in striking at the ball either of the opponents gets in the way so as to prevent his hitting it, a "let" is allowed, by which is meant that the stroke counts for neither side, and the person who was serving at the time has to give another serve. No case similar to either of these can possibly occur at Badminton, and in all other cases where the shuttlecock either falls short in serving, or falls on to any of the lines in the cases noted above, or hits the ropes, net or posts, it should always be either "hand out," or score an ace, as the case may be.

A "Cut" is the term used when either in serving or in hitting back again the shuttlecock goes under the net, or hits it, or touches the ropes, posts or net, and is either "hand out" or scores an ace, as the case may be.

A "Foul Shot" is when the shuttlecock is hit up with the hand or any part of the dress instead of with the bat, or when two hands are used to the bat in hitting at it; and it counts as "hand out," or an ace, as the case may be.

General Rules.

I.—If the scorer strike the shuttlecock over the net, but short of his opponent's court, as is shown in Fig. 3 by the dotted line *A-b*, or if he strike it outside the boundary as *A-d*, *A-d*, or if the shuttlecock, after being served, falls into the wrong court, as *A-c*, or if it falls on any of the lines *A-c*, *A-c*, *A-c*, *A-c*, or if it passes under the net, or hits it, or if it touches the net, ropes, or posts at all, it is "hand out" for the scorer, so long as the opponents do not take the serve. If they offer at it, and do not touch it at all with the bat, it is "hand out" for the server, but if they touch it, however slightly, with the bat, and fail to hit it back properly over the net, it scores an ace for the server.

II.—The side which begins the game is in the first time only allowed one hand is, but on all subsequent occasions both sides have two hands each, before being "side out."

III.—If a shuttlecock after being hit touches the ropes of the net, or the posts, it is the same as if it had hit the net, and is either "hand out," or an ace, as the case may be, even if it be taken properly, or offered at and missed, or offered at and not hit up properly, by the opposite side.

IV.—Similarly, if a shuttlecock is at any time hit outside either of the posts, it is either "hand out," or scores an ace, as the case may be, even though the opponents offer at it and miss it, and it falls inside the ground, and even though it is taken by them and hit back properly or not.

V.—If a serve is properly delivered, and into the right court, the person who is served to is bound to take it, no matter how difficult it may be, and failing to do so and to hit it back properly over the net, as explained above, it counts an ace for the server. This is the strict rule, but by courtesy where a serve is, in the general opinion of the players, manifestly too difficult to take, as in the case of very sharp, over-hand, cutting service, a lady is generally allowed to have another serve given to her. This is a very useful custom, and one which is hardly ever abused in practice. The rule should be either that a player is obliged to take any serve he gets (whether he likes it or not), or else that he has the option of refusing any serve he chooses, till he gets one to suit his fancy. The objection to the first rule is that, where ladies are playing against gentlemen (especially those gentlemen who happen to be good racket players), they are placed at a very unfair disadvantage in being forced to take serves which they find it impossible to hit back; and the objection to the second rule is that, in addition to its being unfair to the server to be obliged at last to give a serve which his opponent can kill, it also needlessly prolongs the game, as in some instances as many as twelve serves have been known to be given before one was taken. It should be remembered that the object of the game is to afford amusement as a "ladies'" game, and, therefore, to make it too difficult for them is to do away with that object altogether. In serving, the point to be kept in view is not so much to serve so as to render it impossible for your opponent to hit it back, but to serve so as to force him, after he has hit it back, to give either you, or your partner, an easy shot, which you can dispose of, or, as it is generally termed, "kill."

VI. If the shuttlecock, during the game, touches the dress or battledore of the striker's partner, it is "hand out" for the striker, or scores an ace against him, as the case may be.

VII.—The shuttlecock must be hit with the battledore, and if hit back with the hand, even though it may go all right over the net, it is "hand out" for the striker, or scores an ace against him, as the case may be.

The game is 15, and whichever side gets this number first wins.

VIII.—When both sides are 13, the game can, with the consent of both sides, be set to 5, and when both sides are 14, it can be similarly set to 3. Both sides put the score back to 0 or "love," and the game is then 5 in the first case, and 3 in the latter.

IX.—The scorer, when serving, must stand with both his feet inside his own court, and without touching the four lines which bound it, otherwise it is a wrong serve, and he is obliged to give another serve.

X.—A server is allowed three attempts at serving, provided that in doing so he does not either hit or touch the shuttlecock with his bat. If it does, unless the serve is a proper one over the net, it is "hand out." After three misses in serving, without hitting or touching the shuttlecock with the bat, it is "hand out" for the server.

XI.—If the wrong partner takes a serve, it scores an ace to the server, thus: if C. and D. are partners, and A. serves to D. and C. takes it, then it scores an ace to A. This of course only refers to taking the serve, or first shot, as after that either partner can take it.

XII.—After the first serve has been taken, either of the two partners on either side may attempt to hit the shuttlecock, or both may at the same time. If the first one misses it altogether, and his partner hit it back all right over the net, it is quite fair and is allowed. If, however, the first partner hits or touches it ever so slightly with his bat and then his partner hits it over all right, then it is either "hand out" for the striker, or scores an ace against him. Two hits are not allowed, and the touch or hit of the first striker, if it fails, is sufficient to cause the shuttlecock to be considered as "dead."

THE QUEEN.

The Royal Family.

Her Majesty, ALEXANDRINA VICTORIA, of the United Kingdom of Great Britain and Ireland Queen, Defender of the Faith, born May 24, 1819; succeeded to the throne, June 20, 1837, on the death of her uncle, King William IV.; crowned, June 28, 1838, and married, Feb. 10, 1840, to the late Field-Marshal His Royal Highness Francis ALBERT Augustus Charles Emanuel, PRINCE CONSORT, DUKE OF SAXONY, PRINCE OF COBOURG AND GOTHA, K.G., K.T., K.P., G.C.B., G.C.M.G., K.S.I., P.C., consort of Her Majesty, born Aug. 26, 1819; died Dec. 14, 1861. Her Majesty is the only child of his late Royal Highness Edward, Duke of Kent, 4th son of King George III.

1. Her Royal Highness Victoria Adelaide Mary Louisa, PRINCESS ROYAL, born Nov. 21, 1840; married, Jan. 25, 1858, to his Royal Highness the Crown Prince of Prussia, K.G. (only son of the Emperor of Germany), and has issue His Royal Highness Prince Frederick William Albert Victor, born Jan. 27, 1859; Her Royal Highness Princess Victoria Elizabeth Augusta Charlotte, born July 24, 1860; His Royal Highness Prince Albert William Henry, born Aug. 14, 1862; His Royal Highness Prince Francis Frederick Sigismond, born Sept. 15, 1864; died June 18, 1866; Her Royal Highness Princess Frederika, Wilhelmina Amélie Victoria, born April 12, 1866; Prince Joachim Frederick Ernest Waldemar, born 1868; Princess Sophia Dorothea Ulrike Alice, born June 14, 1870; and Princess Margaret Beatrice Feodora, born April 22, 1872.

2. GENERAL His Royal Highness Albert Edward, PRINCE OF WALES, DUKE OF SAXONY, CORNWALL AND ROTHESAY, EARL OF DUBLIN, K.G., K.T., G.C.B., K.P., G.C.S.I., K.T.S., P.C., Colonel of the 10th Hussars, Colonel in Chief of the Rifle Brigade, born Nov. 9, 1841; married, March 10, 1863, to the Princess Alexandra (born Dec. 1, 1844), eldest daughter of the King of Denmark, and has issue His Royal Highness Prince Albert Victor Christian Edward, born Jan. 8, 1864; His Royal Highness Prince George Frederick Ernest Albert, born June 3, 1865; Her Royal Highness Louisa Victoria Alexandra Dagmar, born Feb. 20, 1867; Her Royal Highness Victoria Alexandra Olga Mary, born July 6, 1868; Her Royal Highness Maude Charlotte Mary Victoria, born Nov. 26, 1869; and His Royal Highness Prince Alexander John Charles Albert, born April 6, 1871; died April 7, 1871.

3. Her Royal Highness ALICE MAUD MARY, born April 25, 1843; married, July 1, 1862, to His Royal Highness Prince Frederick William Louise of Hesse, K.G., and has issue Princess Victoria, born April 5, 1863; Princess Elizabeth Alexandrina Louise Alice, born Nov. 1, 1864; Princess Irene Marie Louise Anna, born July 11, 1866; Prince Ernest Louis, born Nov. 25, 1868; Prince Frederick William, born Oct. 7, 1870 (killed by accident, May, 1873); and Princess Alice, born June 6, 1872; another Princess, born May 22, 1874.

4. His Royal Highness Alfred Ernest Albert, DUKE OF EDINBURGH, EARL OF KENT, and EARL OF ULSTER, K.G., K.T., G.C.S.I., G.C.M.G., P.C., born Aug. 6, 1844; Captain Royal Navy, Feb. 23, 1866; married to Grand Duchess Marie Alexandrovna, only daughter of the Emperor of Russia, Jan. 23, 1874.

5. Her Royal Highness HELENA AUGUSTA VICTORIA, born May 25, 1846; married, July 5, 1866, to Major-General His Royal Highness Prince Frederic Christian Charles Augustus of Schleswig-Holstein-Sonderbourg-Augustenbourg, K.G., and has issue Prince Christian Victor Albert Ludwig Ernest Anton, born April 14, 1867; Prince Albert John Charles Frederick Alfred George, born Feb. 26, 1869; Princess Victoria Louise, born May 30, 1870; and Princess Franziska Josepha Louise Augusta Marie Christiana Helena, born Aug. 12th, 1872.

6. Her Royal Highness LOUISA CAROLINA ALBERTA, born March 18, 1848; married, March 21, 1871, to John Douglas Sutherland, Marquis of Lorne, K.T., M.P., eldest son of the Duke of Argyll, K.T.

7. His Royal Highness ARTHUR WILLIAM PATRICK ALBERT, K.G., K.T., K.P., G.C.M.G., P.C., born May 1, 1850; Captain in the Rifle Brigade.

8. His Royal Highness LEOPOLD GEORGE DUNCAN ALBERT, K.G., K.T., born April 7, 1853.

9. Her Royal Highness BEATRICE MARY VICTORIA FEODORE, born April 14, 1857.

His Royal Highness George Frederick Alexander Charles Ernest Augustus, DUKE OF CUMBERLAND (EX-KING OF HANOVER), K.G., G.C.H., cousin to Her Majesty; born May 27, 1819; married, Feb. 1843, Princess Mary of Saxe-Altenberg, and has issue a son and two daughters.

Her Royal Highness Augusta Wilhelmina Louisa, DUCHESS OF CAMBRIDGE, daughter of the late Landgrave of Hesse Cassel, born July 25, 1795; married, in 1818, the Duke of Cambridge (who died July 8, 1850), and had issue His Royal Highness George Frederick William Charles, DUKE OF CAMBRIDGE, Field-Marshal Commanding-in-Chief, K.G., K.P., G.C.B., G.C.H., G.C.M.G., P.C., D.C.L., cousin to Her Majesty, born March 26, 1819; Her Royal Highness Augusta Caroline Charlotte Elizabeth Mary Sophia Louisa, cousin to Her Majesty, born July 19, 1822; married, June 28, 1843, Frederick, Reigning Duke of Mecklenburg-Strelitz, K.G., G.C.B., and has issue Adolphus Frederick, Hereditary Grand Duke, born July 22, 1848; Her Royal Highness Mary Adelaide Wilhelmina Elizabeth, cousin to Her Majesty, born Nov. 27, 1833; married, June 12, 1866, to H.S.H. Francis Paul Charles Louis Alexander, Duke of Teck, G.C.B., and has issue Princess Victoria, born May 26, 1867; Prince Adolphus, born Aug. 13, 1868; Francis Joseph Leopold, born Jan. 9, 1870; and a son born April 14, 1874.

Titles of the Eldest Sons of Peers.

The eldest Sons of Dukes, Marquises, and Earls usually assume (by courtesy) the second titles of their fathers. The younger Sons of Dukes and Marquises take the title of Lord as a prefix to their Christian and Surnames.

The younger Sons of Earls take the title of Honourable.

All Daughters of Dukes, Marquises, and Earls, take the title of Lady.

All Sons and Daughters of Viscounts and Barons take the title of Honourable.

The following are the titles which are or would be borne by the eldest Sons of Peers, with the titles of their fathers:—

Those marked thus * are the second titles of Irish Representative Peers,

Those marked thus † are the second titles of Scotch Representative Peers.

BISHOPS.

Style, *Right Reverend.*

The Bishops of London, Durham, and Winchester to take precedence in right of their respective sees; the other Bishops in the order of their consecration. The Bishop of Sodor and Man has no seat in parliament. The statute 10 & 11 Vict. c. 108, enacts that, upon a vacancy in an English or Welsh bishopric, the newly consecrated bishop (unless elected to one of the archiepiscopal sees, or to one of the sees of London, Durham, or Winchester), shall not be entitled to sit; but the summons is to be issued to such one of the other bishops as has not previously been summoned.

Advent Sunday	Nov. 30	Nov. 23

The year 1875 is the latter part of the 5635th and the beginning of the 5636th year since the creation of the world, according to the Jews. The year 5636 commences on September 30, 1875.

The year 1875 answers to the 6588th of the Julian period; to the 2628th from the foundation of Rome; to the 2651st of the Olympiads; and to the year 7083-4 of the Byzantine Era.

The year 1892 of the Mohammedan Era commences on Feb. 7, 1875. And Ramadan (month of abstinence observed by the Turks), commences on October 1, 1875.

The Chinese civil year is lunar, and consists of twelve months, of twenty-nine and thirty days alternately. The Japanese divide the year into twelve months, corresponding to the twelve signs of the zodiac. The months, however, vary in length, and are regulated by the Religious Emperor. The Mohammedans reckon from July 15 or 16, the date of Mohammed's flight. Their months are lunar, and consist of thirty and twenty-nine days alternately, with a day added eleven times in a cycle of thirty years. The Parsees' year consists of 365 days; no leap-year is known, but in every 120 years one month is added to make the conventional year correspond with the solar.

Inland Revenue Duties.

RECEIPTS.

For 2*l.* and upwards, One Penny. (Persons receiving the money are to pay the duty.)

Receipts may be stamped within fourteen days of date on payment of 5*l.*, or within the month on payment of 10*l.* penalty; after that time they cannot be stamped. Penalty for giving a receipt without a stamp, 10*l.* Penalty for not effectually cancelling or obliterating adhesive stamps when uses, 10*l.*

CHEQUES, DRAFTS, OR ORDERS ON DEMAND.

All Drafts, Warrants, or Orders for the payment of money on demand are chargeable with a stamp duty of one penny, which may be denoted by an impressed or adhesive stamp.

TAXES—INCOME TAX.

From April, 1874, to April, 1875, all incomes of 200*l.* per annum and upwards are taxed at the rate of 2*d.* in the pound; an abatement of the duty on 80*l.* is allowed in respect of incomes not exceeding 200*l.* per annum.

Exemption of Premium from Income Tax.—The premiums paid by a person for an Assurance on his own life or on the life of his wife, or for a deferred Annuity to his widow, are declared free from income tax, provided such Premiums do not exceed one-sixth of his income.

DUTIES PAYABLE ON INHABITED HOUSES OF THE ANNUAL VALUE OF £20 OR UPWARDS.

The duty is 6*d.* in the pound in respect of Dwelling-houses occupied by any person in trade who shall expose to sale and sell any goods in any shop or warehouse, being part of the same dwelling-house, and in front and on the ground or basement storey thereof; or by a person licensed to sell therein, by retail, beer, &c.; or as a farm-house by a tenant or farm-servant, and *bond fide* used for the purpose of husbandry only. Coffee Houses and Temperance Hotels are now chargeable at 6*d.* The duty is 9*d.* in the pound for dwelling-houses not occupied and used for any of the purposes described in the preceding.

Exemptions—Market-gardens and nursery-grounds are not to be included in valuation of inhabited houses, and not more than one acre of pleasure-grounds.

DUTIES ON LEGACIES AND SUCCESSION TO REAL PROPERTY.

	£	s.	d.
To children or their descendants, or lineal ancestors of the deceased ...	1	0	0
Brother or sister or their descendants	3	0	0
Uncle or aunt, or their descendants	5	0	0
Grand uncle or aunt, or their descendants	6	0	0
All other relations or strangers	10	0	0

The husband or wife of the deceased not chargeable with duty.

Probate and Letters of Administration are exempt, if the effects are under £100 in value.

DUTIES.

	£	s.	d.
Voting papers, to enable any person to vote by proxy	0	0	1
Letters of allotment of any company or proposed company, or letter of renunciation	0	0	1
Scrip certificate, or other document	0	0	1
Letter of power of attorney for the sole purpose of voting by proxy ...	0	0	1
For the receipt of the dividends or interest of any stock—			
If made for receipt of one payment only	0	1	0
In any other case	0	5	0
For the sale, transfer, or acceptance of any of the Government stocks or funds—			
When not exceeding £20	0	5	0
In any other case	0	10	0
Lease or tack, for any definite term less than a year and rent not exceeding £10 per annum	0	0	1
Of any furnished dwelling-house or apartments where the rent of such term exceeds £26	0	2	6

LIFE AND OTHER INSURANCES.

	£	s.	d.
Policy of insurance made upon any life where the sum insured shall not exceed 10*l.*	0	0	1
Exceeding 10*l.* and not exceeding 25*l.*	0	0	3
Exceeding 25*l.*, but not 500*l.*, for every 50*l.*	0	0	6
,, 500*l.*, ,, 1000*l.* ,, 100*l.*	0	1	0
,, 1000*l.* for every 1000*l.* or fractional part	0	10	0
Policy of assurance for loss or damage by fire	0	0	1
Against accident, or for plate glass	0	0	1
Settlement of Money or Stock, per 100*l.*	0	5	0
Transfer of Stock, not public—	1	10	0
If upon sale, 10*s.* per cent.			
If upon mortgage, 2*s.* 6*d.*			
Passport Stamps	0	0	6

BIRTHS, MARRIAGES, AND DEATHS.

Certified copy or extract of or from any register of births, baptisms, marriages, deaths, or burials, 1*d.* (To be paid by the person requiring such copy or extract.)

HACKNEY CARRIAGE FARES (CABS).

FARES BY DISTANCE.—Carriages drawn by one horse—If taken from a regular cabstand, 1*s.* for any distance within and not exceeding a mile; and 6*d.* for every mile, and for every part of a mile over and above any number of miles completed within a circumference of four miles from Charing Cross. 1*s.* per mile for every mile or part of a mile beyond the four-mile circumference when discharged beyond that circumference.

FARE BY TIME.—2*s.* for any time not exceeding one hour; 6*d.* for every fifteen minutes over the hour.

MARRIAGE LICENSES.

Special License	5	0	0
Not Special	0	10	0

Eclipses in 1875.

In the year 1875 there will be two Eclipses only, both of the Sun.

The first is a Total Eclipse, on April 6, invisible at Greenwich and throughout Europe, but partially visible generally in the South of Africa, parts of Asia, and in the Indian Ocean.

It begins on the earth generally at 3h. 58m. 2s., mean time Greenwich, a short distance from the southernmost point of Africa, in the Indian Ocean, and in the confines of Natal. The central line passes across the Indian Ocean, south of Madagascar, north of Sumatra, at 4h. 54m. 4s., in longitude east of Greenwich 35deg. 40sec. south latitude, and ends on the earth, generally, at 9h. 16m. 12s., in longitude 134deg. 19sec. east of Greenwich. At the Cape of Good Hope a partial Eclipse is visible at 6h. 8m., and ends at 7h. 5m. Sun rises at 6h. 8m. The duration of the total Eclipse, at the most favourable point, exceeds four minutes of time.

The second is an Annular Eclipse of the Sun, on September 29, which is visible as a partial Eclipse. It is visible as a partial Eclipse over Africa, parts of Europe, America, and the Atlantic Ocean, including Greenland, Iceland, England, Spain, and the greater part of Africa.

It begins on the earth, generally, September 29, 1875, at 10h. 1m. a.m., in longitude 60deg. 56min. west of Greenwich, and latitude 38deg. 10min., north, in the North Atlantic Ocean, at a point east of Philadelphia, and south of Nova Scotia, passing nearly over the Cape Verd Islands, north of Sierra Leone, across the Gulph of Guinea, and over Africa. The central Eclipse begins at 11h. 7m., a.m., in longitude 76deg. 56min. west of Greenwich, and latitude 43deg. 15min. north. Central Eclipse at noon, 0h. 43m., in longitude 13deg. 1min. west of Greenwich, and latitude 31min. north.

The central Eclipse ends generally at 2h. 48m. 6s., in longitude 46deg. 4min. east of Greenwich, and latitude 15deg. 6min., south.

It ends, generally, on the earth September 29, at 3h. 54m. 6s. p.m., in longitude 29deg. 55min., east of Greenwich, and latitude 20deg 14min. south.

This Eclipse will be partially visible at Greenwich, Cambridge, Oxford, Liverpool, Edinburgh, Dublin, and the Cape of Good Hope.

At London the Eclipse begins at 11h. 25m. just before noon, and ends at 47m. after noon.

Beginnings of the Seasons.

Spring	21st March, 9h. 0m. a.m.	Autumn	23rd Sept., 11h. 6m. a.m.
Summer.....	21st June, 9h. 23m. p.m.	Winter	22nd Dec., 5h. 0m. a.m.

The sun is at its greatest distance from the earth on January 1st, and its shortest distance on July 1st.

Our Portraits.

The Empress of Austria.

(See page 1.)

HER Imperial Majesty the Empress of Austria, was a visitor to Her Majesty in that pleasant garden of England, the Isle of Wight, during the months of August and September—and during her stay in this country paid occasional visits to the metropolis, busily occupied in sight-seeing and paying and receiving visits. Her Majesty is still in the prime of life, having been born the 24th of December, 1837; she is the daughter of Duke Maximilian and Princess Ludovica of Bavaria, her youth was spent at Munich, the Athens of modern times; and the refined taste for art and literature, created and fostered by King Ludwig amongst all classes of Bavarian society, powerfully influenced the impressible mind of the young princess. Her special domain was poetry and the romances of the old and modern Minnesänger were her favourite study.

An accomplished lady, with all the charms of youth and beauty, Princess Maria married the Emperor of Austria on the 24th of April, 1854, and with her a bright star entered the gloomy house of Hapsburg.

Although a strict Catholic by descent and education, her creed is not of the austere kind, but allows ample latitude for the joys of this world. The Empress's sprightly spirits and kindliness of disposition soon won her the hearts of the Viennese, and, a daring horsewoman, she is idolised by the Hungarian cavaliers. The Emperor Francis Joseph was not born under the same lucky star as his consort. His father, the Archduke Francis Charles, was for a time the presumptive heir to the throne of his childless brother the Emperor Ferdinand I. The young prince, who was educated according to the tenets of absolutism by Count Henri Bombelles, a Frenchman, was called to the Austrian throne in December, 1848.

The Imperial couple have three children: the Archduchess Gisela, born in July, 1856, and married to Prince Leopold of Bavaria; the Archduke Rudolph, heir apparent to the crowns of Austria and Hungary, born in August, 1858; and the Archduchess Maria, born in April, 1868.

Of late years the health of the Empress has been rather delicate, but we rejoice to add she derived great benefit from her sojourn in this country.

During her stay in the Isle of Wight her Majesty resided at Steephill Castle, a modern Gothic building, standing on the slope of a hill about a mile from Ventnor, on the road to the little church and well of St. Lawrence. It is the property of Mr Dudley Albert Hambrough.

The Czar and Czarina of Russia.

(See pages 4 and 5.)

THE CZAR OF RUSSIA, who visited this country during the month of May is, to use the current phrase, "the Imperial Autocrat of all the Russias." And so he may well be called, seeing that he holds absolute sway, from the Baltic to the Pacific, over one-seventh of the territorial surface of the globe, his empire being about 7,770,000 square miles in extent, and containing a population of upwards of 82,000,000 souls.

His Imperial Majesty Alexander II. is the eldest son of the late Emperor Nicholas I., by his wife, the Princess Charlotte of Prussia. He was born on the 17th of April (or 29th new style), 1818, so that he has completed his fifty-sixth year. He was educated, under the supervision of his father, partly by General Moerder, a learned German, and partly by the Russian poet, Joukowski. He entered the Russian army in 1831, and in 1835, at the age of seventeen, was appointed to a colonelcy in the Grenadier Guards. In 1837 he was nominated Chancellor of the University of Helsingfors, in Finland. In the years 1840 and 1841 he spent some time in a tour in Germany, for the purpose of completing his education in arts and sciences. In 1849 he was appointed superintendent of the military schools of the empire under his father, and in 1850 was advanced to a command in the army of the Caucasus.

He succeeded his father in February, 1855. Soon after the conclusion of the Russian war and the signing of the Peace of Paris the new Emperor was solemnly crowned at Moscow at the end of August, 1856.

The Emperor is of a shy and retiring disposition, averse to pomp and display (except on extraordinary occasions), and prone to fits of depression and melancholy. In European politics he has always shown himself, if not absolutely impartial, at all events a supporter of non-intervention. In Asia, his policy has been one, if not of aggression, at all events of activity and energy. And, speaking generally, it may be said that he has thoroughly inherited the traditional system of his ancestors, so far as concerns his efforts to Russify—if we may coin such a term—the various nationalities, Poland, for instance, which go to make up his empire. True to the same principles, he has always strongly opposed all encroachments on the part of the Russian nobles upon his divine prerogative, of which he is as strong an assertor as was our own Henry VIII. or James I. Almost regarded as a demi-god amongst his people at large, he has favoured and encouraged the emancipation of the serfs in his dominions.

The Emperor is well educated, and has not only a great taste for, but skill in, at all events one of the fine arts, that of sculpture, in which he was a pupil of the great sculptor, Schmidt von der Launitz. He is said to have been very happy in his family life, very fond of his children, and especially of his only daughter (whom he always made his counsellor). The death of his eldest son, the heir apparent to the throne of "All the Russias," which happened at Nice, in April, 1865, nearly broke his heart. He is said to be also much attached to his maternal uncle, the Emperor William of Germany.

The Government of Russia is an absolute and hereditary monarchy, in which the whole judicial, executive, and legislative power is vested in the Emperor, whose will alone is law. The right of succession to the throne, as settled by the Emperor Paul in 1797, is that of regular descent, with a preference of male over female heirs, as in England; and it is a fundamental law of the realm, so proclaimed by Peter I., that the Sovereign of Russia, his consort, and his children, must be members of the "Orthodox Eastern Church." The Princes and Princesses of the Imperial House, according to a decree of Alexander I., must obtain the consent of the Emperor to any marriage which they may contract. By an ancient law, the heir apparent to the Crown is held to be of age at sixteen, and the rest of the Royal Family at eighteen years of age.

The reigning family of Russia descend in the female line from Michael Romanof, elected Czar in 1613, after the extinction of the elder house of Rurik; and in the male line from the Duke Karl Friedrich, of Holstein Gottorp, a scion of a younger branch of the ducal family of Oldenburg.

The Emperor married in April, 1841, Marie-Alexandrovna, formerly Maximilienna Augusta Sophie Marie (born Aug. 8, 1824), daughter of the Grand Duke Ludwig II., of Hesse Darmstadt, and by her he has surviving issue five sons and one daughter, Marie Alexandrovna, married to H.R.H. the Duke of Edinburgh. The Czar's eldest son, the Czarovitch, Alexander Alexandrovitch, hereditary Grand Duke, born in Feb., 1845, married on Nov. 9th (Oct. 28th), 1866, the Princess Marie Sophie Frederica Dagmar, daughter of Christian IX., King of Denmark, the sister of our Princess of Wales, and by her has two sons, born in 1868 and 1871 respectively. The Emperor's other four sons are the Grand Dukes Vladimir, Alexis, Sergius, and Paul. The Emperor has two sisters—Marie Nicolaievna, married first to Maximilien Joseph Eugene Auguste Napoleon, Duke of Leuchtenberg, and secondly to the Count Gregory Stroganow; the Czar's second sister, Olga Nicolaievna, is the wife of Charles I., King of Wurtemberg.

His three brothers, too, the Grand Dukes Constantine, Nicholas, and Michael, are married, and all have issue; and his uncle Michael Paulovitch has one daughter, Catherine Michaelovna, who is married to George, Duke of Mecklenburg-Strelitz.

The Crown Prince and Princess of Germany.

(See pages 8 and 9).

OUR PRINCESS ROYAL and her warrior husband visited the Isle of Wight for seven weeks during the months of July and August of 1874. During their stay they took part in several public ceremonials, and were everywhere enthusiastically and affectionately welcomed. They so seldom visit our shores, that we feel justified in showing our readers, by illustration, what has become of our first-born Princess, and of the youthful Prince who took her away.

Not the acutest politician could then foresee the soaring flight the Prussian eagle was to achieve within the next decade—a flight that landed the House of Hohenzollern on the top of the European tree, Austria and France prostrated on the ground. No German Empire, although for centuries the fondest dream of a nation of dreamers, was then thought of; three dozen sovereigns shared the rule over German destinies with ambitious Prussia. The time for Bismark's statecraft and Moltke's strategy had not come yet.

It may well be said that if ever a lady of high degree accepted a husband for better or worse, it was the Princess Royal of England when she married the Prince Frederic of Prussia. Had the Austrians won the day at Sadowa—and the chance of victory trembled in the balance for several hours—Prussia would have been reduced to a third-rate power, to associate on terms of sovereign equality with princely families like that of Reuss-Greitz Lobenstein-Ebersdorf, whose subjects are less numerous than the inhabitants of Westminster parish. The ancient house of the Guelphs, amongst others, had to be dethroned to raise a daughter of the English branch to the rank of an Empress.

Contemplating our illustration, it strikes us that the thought of so proud a future must have guided the brush of the artist who painted this portrait of the Princess Victoria. A daughter of kings and a mother of emperors she looks in her right royal parure of diamonds and pearls; the minor attributes of her mission indicated by the cross and badge of mercy on her shoulder, and the unsevered connection with the old country hinted at by the Honiton bordering of her bodice.

About the portrait of Princess Victoria's consort we have but little to say. His name and countenance belong to history. He won laurels in war; he will add the palm branches of peace when his time comes. As a good omen we may consider that, although rulers in the north, the Crown Prince of Prussia and his house belong by descent to the south—the representant of the higher intelligence in Germany, and the birthplace of statesman, philosophers, and poets innumerable.

The Crown Princess of Germany was born on the 21st of November, 1840, and has six children—three sons and three daughters. Her eldest son, Prince Frederick William, born in November, 1859, was confirmed at Berlin on the 1st of September, 1874, H.R.H. the Prince of Wales being present at the ceremony.

The Grand Duke Alexis of Russia.

(See page 12).

His Imperial Highness the Grand Duke Alexis of Russia, who was the companion of his father during his visit to this country in the month of May, 1874, is the fourth, but third surviving, son of the Czar, by his wife Maria, the Empress. He was born on the 2nd of January old style, or the 14th of January new style, in the year 1850, so that he was quite a child when the Crimean war broke out. As a young Prince of four-and-twenty, and unmarried, of course his Imperial Highness is a "great catch" in the royal matrimonial market, and, if report be true, fortunate will be the Princess who hereafter secures him as her husband. Although not such a favourite of his father as the eldest son and as is the Duchess of Edinburgh, yet it is understood that the Grand Duke Alexis holds a higher place in the Czar's affections than his eldest surviving brother, the Grand Duke Alexander, the heir apparent to the throne, who is reported to belong to the old Russian party, which his father detests, and also to be as unfriendly to Germany as his father is friendly.

His Majesty King William III., of Holland.

(See page 13).

On the twelfth of May, 1874, the Netherlands celebrated the twenty-fifth anniversary of King William's accession to the throne. Although the great political changes that have taken place in the rest of Europe during this period affected but little the peace-loving Dutch, it proved a period of constitutional development for Holland, marked by important measures of internal reform.

When William III. succeeded his father, in 1849, it fell to his lot to carry out the new fundamental charter, granted under the pressure of the revolutionary movement which swept over the continental states in 1848. And with a right royal good will he entered into the spirit of the times, supported by his able minister Thorbecke, the leader of the Liberal party.

First of all William III. initiated financial reforms in all branches of the public service, beginning with himself by reducing the civil list to a material extent, and increasing the taxability of his people by advantageous commercial treaties and the development of railways, telegraphs, and canals. The draining of the Bay of Harlem, one of the greatest achievements of modern engineering, belongs to this period. In 1853 the strife with Rome, the implacable enemy of liberal institutions, began. An allocution of Pio Nono's reinstated the bishoprics in Protestant Holland, and the Ministry of the day could not see its way to oppose this measure on constitutional grounds. A storm of petitions from all parts of the land, however, drove the Liberals from office, and under the new administration an Act was passed which secured to the State the control over the Church. This important victory over Romish pretensions was completed in 1857 by a law which introduced strictly secular education in the public schools. Although vigorously opposed at the time and ever since, by Ultramontanes as well as by orthodox Protestants, the good sense of the Dutch people upheld this truly liberal measure.

In the spring of 1867 the Luxemburg question arose; and, though the Tory Heemsker Cabinet felt inclined to listen to the allurements of Napoleon III., the imminent danger of a war was avoided through the London conference. During the Franco-German war in 1870 Holland remained neutral, guarding her frontier until after the catastrophe of Sedan. In 1871 the Thorbecke Cabinet—in power for the third time—completed the transfer of the Dutch possessions on the west coast of Africa to England. The result was for this country the war with the Ashantees, and for Holland the expedition against Atchen.

King William, a worthy descendant of the house of Orange-Nassau, which has ruled over Holland for three centuries, was born the 19th of February, 1816; he married Sophia of Wurtemberg, a highly gifted princess, in 1839; she bore him two sons—the Prince of Orange, heir apparent to the throne, and Prince Alexander.

The Duke and Duchess of Westminster.

(See pages 16 and 17).

Among the shower of honours which fell right and left upon the friends and adherents of Mr. Gladstone's Administration, the popular vote, if it could have been polled, would have been very strong in favour of the bestowal of a ducal coronet upon the popular and amiable nobleman whom at the opening of 1874 we knew as the "Marquis" of Westminster. The head of the noble house of Grosvenor—Le Gros Veneur, the chief huntsman, as his direct ancestor was styled eight hundred years ago, when he accompanied the Conqueror to the shores of England—by repute also the wealthiest of our territorial magnates, and one who well knows how to employ his great fortune in the way most serviceable to the interests of those with whom he is brought into contact, it is not too much to say that the present Duke of Westminster, in the four brief years during which he has held his seat in the Upper House, has shown himself in a variety of ways a pattern of true nobility; so that when he looks back to the time when his ancestor contested with the scarcely less noble Scropes for the right of bearing the shield in the presence of Garter King of Arms and all the Court of Heralds, he can at least congratulate himself that he has done nothing to disgrace the escutcheon which has come down to him by descent, either by uncourtly word or by unworthy deed.

Like most of the noble though untitled families who held broad acres under the Plantagenet kings, the Grosvenors were of Norman extraction, and their very name points to the fact that they were "mighty hunters" in their day in Normandy. The founder of the fortunes of the family was Gilbert, nephew of Hugh Lupus, Earl of Chester, uncle of the victorious William. From him was directly descended Ralfe, a Grosvenor, who married Joan, only daughter and heiress of the Etons or Eatons of Cheshire, whose great-great-grandson was Sir Thomas Grosvenor, a worthy knight in favour with Henry VIII. and his court. His grandson, high sheriff of Cheshire in 1602, had a son Richard, who was created a baronet in 1621, just ten years after the institution of that order.

From him, down to a period little more than a century ago, the Grosvenors lived as country gentlemen at Eaton and Chester, acting as county magistrates and high sheriffs, and standing fast and firm by the Crown in the strife between the "Cavaliers and Roundheads." It is recorded that Sir Thomas Grosvenor was one of the thirteen gentlemen of Cheshire selected in 1660-61 as Knights of the intended Order of the Royal Oak.

It was this gentleman's nephew, Sir Richard Grosvenor, the seventh baronet, and twentieth in direct male descent from Gilbert "le Gros Veneur" already mentioned, who won his way to the peerage, first as Baron and and afterwards Earl Grosvenor; and it was Robert, the second Lord Grosvenor, who, on account of his large property and high standing with the Whig aristocracy, was advanced to the Marquisate of Westminster at the coronation of King William IV.

The Duke of Westminster was born in the year 1825; was educated at Eton and at Baliol College, Oxford; was elected M.P. for Chester in 1847, and succeeded to the peerage at his father's decease in 1869. He is lieut.-colonel of the Cheshire Yeomanry Cavalry, and his connection with the volunteer rifle movement in London is too well known to need more than a passing allusion here. He has purchased that truly classic residence, Cliveden, near Maidenhead, and he has lately almost remodelled his ancestral home of Eaton, which even in his father's days was reckoned a palace.

The Duke of Westminster married in 1852 the Lady Constance Leveson-Gower, eldest daughter of the late Duke and Duchess of Sutherland—his own cousin, as his mother was a daughter of the first, and sister of the second duke. By his marriage his grace has a large family; his eldest son is Victor Alexander, Earl Grosvenor, who was born in 1853, and to whom Her Majesty stood sponsor in person.

The late Dr. Livingstone.

(See page 20).

Considering that for many a long year the great African explorer pursued his work of civilisation in those tropical districts where he must always have "carried his life in his hands," there was but little surprise felt when the news of his death reached England. This event, as appears from a communication sent by Herr R. Brenner, the German traveller, occurred as far back as the 15th of August, 1873, in the neighbourhood of Unyanyembé. It is stated that his death was caused by an attack of dysentery, brought on by wading through the water in that neighbourhood for four days in succession.

"The prince of African explorers," as the late Prince Consort styled him, was the son of parents in humble circumstances, who had fallen into that condition on account probably of the part played by his grandfather, who gallantly, but unfortunately, espoused the cause of the Stuarts, and fell at the battle of Culloden. He was a Highlander, and a Roman Catholic, almost as a matter of course; and the family were converted to the Protestant faith, as Dr. Livingstone himself tells us, in a curious and forcible fashion, namely, by the "laird" of the place in which they lived "coming round the village with a man who carried a yellow staff to compel them to attend the established form of worship."

The father of David was one Neill Livingstone, a small dealer in tea and grocories, who kept a shop in the outskirts of the town of Hamilton, in Lanarkshire, and who acted on the "Sabbath" as a "deacon" in the local Independent chapel. He taught his children, at all events, one lesson, that of honesty and integrity; and he had the satisfaction of living to see his son's name widely known to the world as an honest man and a large-hearted philanthropist, for he died so recently as the year 1856.

East Kilbride, a large parish, or rather a small town in Lanarkshire, witnessed young "Davie" Livingstone's birth, about the year 1816. While a boy he worked as a "hand" in the spinning mills in the vicinity of Glasgow; and he tells us in the sketch above referred to that during the winter months he "used to pursue his religious studies with a view to missionary work in foreign lands, resuming his daily labour in the month of summer, in order to support him through his winter courses."

Whilst working as a "hand" in the Blantyre mills he also found time to attend an evening school, where he acquired a taste for the classics, and picked up at all events a smattering of Horace and Virgil. He also read at this time with increasing interest such books as Dr. Dick's "Philosophy of Religion" and "Philosophy of a Future State," together with many volumes of foreign travels and adventures. The union of these two branches of literature helped, doubtless, to develop in him an alrea-

Digitized by Google

strong tendency towards a vocation for the life of a missionary. At first, the field of foreign labour to which he looked forward with hope was the Chinese Empire. With these aspirations he studied botany and geology, and also contrived to pick up a rough and ready practical and experimental knowledge of medicine.

He was now only just eighteen; and so, in order to fill up the time which must pass before he could hope to receive a pastoral charge, either as a minister at home or a missionary abroad, he resolved to attend the lectures of the late Dr. Wardlaw on divinity at the University of Glasgow. For him to resolve was also to execute; and here, too, he toiled at his daily handicraft and studied divinity at the same time, "placing his book on the spinning jenny, so that he could catch sentence after sentence whilst he went on with his labours, thus keeping up a constant study, undisturbed by the roar of machinery." Verily, this was a noble instance of "the pursuit of knowledge under difficulties!"

About the year 1837 he was admitted a Licentiate of the Faculty of Physicians and Surgeons, and in the following year entered into an arrangement with the London Missionary Society—an unsectarian body, mainly composed of Nonconformists—to enter their service as a missionary. The opium war at the time shut up China against him, and accordingly, attracted by the narratives of Dr. Moffat's labours in Africa, he resolved to become a toiler in that quarter of the globe.

Early in 1840 he left England for South Africa, and in due course reached Cape Town. Thence he went on to Natal, where he joined Dr. Moffat, whose daughter he subsequently married. In his earlier missionary enterprise she bore an active part, especially in his arduous journey to Lake Ngami, and her loving help sustained him till her death. A white cross now marks her grave by the side of the river Zambesi, of which we shall have to speak presently; for we are anticipating the order of events.

Following in the main, the outline of Livingstone's labours may be epitomised thus. From Natal he proceeded inland to a mission station in the Bechuana country, called Kuruman, about 700 miles north from Cape Town, where, and also at Mabotsa, he was joined by other missionaries. With them he was engaged in strictly professional labours down to about the year 1845. From that date four years were spent by him in similar work at Kolonberg and other places, aided by his wife and by a staff of three native teachers. It was in 1849 that we hear of him not only as a missionary, but also as an active explorer, for in that year he made his first expedition in search of Lake Ngami. In 1852 he commenced, in company with his wife, his second, and as he calls it, "great" journey to that lake, which is so familiar to all English readers that we need not repeat it here. In the ten years immediately previous to 1855 Livingstone led several expeditions into the interior of Southern Africa—at that time a region almost untraversed by "the white man"—during which he made himself acquainted with the languages, habits, and religious ideas of several savage tribes previously unknown to Englishmen, and twice crossed the entire African continent, a little to the south of the Tropic of Capricorn, from the shores of the Indian Sea on the east to those of the Atlantic on the west.

His father was alive in 1855 to witness—or at all events to hear of—the bestowal of the Victoria gold medal of the Geographical Society to his son "Davie" in recognition of his services to science by "traversing South Africa from the Cape of Good Hope, by Lake Ngami to Linyanti, and thence to the western coast in 10 degrees south latitude." He subsequently retraced his steps, returning from the western coast to Linyanti, and then—passing through the entire Eastern Portugese settlement of Tete—he followed the river Zambesi down its course into the Indian Ocean. In the course of these earlier African explorations, it was calculated that Livingstone had travelled over no less than 11,000 miles of land, which up to that time had been imagined to be inaccessible.

On returning to England in 1856 David Livingtone was received with a hearty welcome by men of science and literature, and by philanthropists of every shade of thought and opinion; and he enforced the necessity of encouraging the growth of cotton in South Africa as the best means of promoting trade, commerce, and that civilisation which, in its turn, paves the way for evangelisation, and must end in the suppression of the trade. Early in 1858 he returned to his old fields of labour, fortified with the strong support of Her Majesty's Government, and having been publicly entertained at a banquet at the Freemason's Tavern, while a fund in aid of his explorations was raised by the leading bankers and merchants of the city of London.

The next year or two were spent by him in explorations of the great river Zambesi, which he traced up into the regions to the north-west and west of Lake Nyassa, and also of its tributary the Shire. The universities of Oxford and Cambridge caught something of Livingstone's enthusiam, and sent out into those parts a mission, headed by Bishops Mackenzie and Tozer, the former of whom speedily fell a victim to the climate, whilst the latter was obliged to abandon the undertaking as premature.

In 1864 Livingstone again returned to this country, and spent the following winter at Newstead Abbey in writing the "Narrative" of his African labours. This work, like its precursor, obtained a sale of 30,000 copies, and its contents are tolerably familiar to all well-read and educated Englishmen and Englishwomen. Whether we admit all his arguments and inferences as true, at all events it cannot be disputed that up the valley or basin of the Zambesi he has opened a pathway towards those "central highlands" of South Africa which feed the Nile, as well as the great river that flows to the Indian Ocean, and which will probably ere long afford a home to the British colonist and trader, and help on the further development and onward progress of the Anglo-Saxon race. In this expedition Livingstone was largely aided, not only from public sources, but also by members of the Royal Geographical Society in their collective and private capacities. "By their aid," if we may use the words of Sir Roderick Murchison, "he was enabled to reach the high watersheds that lie between his own Nyassa and the Tanganyika of Burton and Speke, and to establish the fact that those lakes do not communicate with each other, and that, if so, then there is a high probability that the Tanganyika, if it does not empty itself to the west through the regions of Congo, must find an exit for its waters northwards by way of the Nile."

This third and last great journey, which alas! he has not lived to complete, occupied the last five years and a half of Livingstone's life. This journey he undertook under the auspices of the Geographical Society for the especial purpose of prosecuting researches to the north and north-west of the Zambesi, which should help to solve that long-standing mystery which has baffled all geographers from Herodotus downwards—the real sources of the Nile. Accredited also by the Foreign Office as Her Majesty's Consul for such parts of Central Asia as he should visit, and furnished with something of a "roving commission," the result was Livingstone claims to have established as a fact that "the chief sources of the Nile arise between 11° and 12° of southern latitude, or nearly in the position assigned to them by Ptolemy."

Early in 1867 England was electrified by news, first published in the *Times of India* (March 13), to the effect that Dr. Livingstone had been killed by a body of savages in the early stage of this last journey. The news was discredited by Sir R. Murchison; but sufficient alarm was felt to induce the Government and the Royal Geographical Society jointly to send out an expedition to ascertain the whereabouts of Livingstone, if alive, or his exact fate if dead. The result of this expedition was to discover sufficient traces of his presence at Marenga and near Lake Nyassa at a date subsequent to that of his alleged murder, and proofs of his having gone exploring some hundreds of miles westwards. In 1868 a similar story of his death by the hands of the "Johanna men" reached London; but it, too, met with but little acceptance. He had encountered and escaped from the African lions, and he had shown such a power of mastering the natives, that he, of all men, was least likely to allow them to get advantage over him, much less to take his life; and we know that in July, 1869, he was striking westwards for his head quarters at a place marked on the maps as Ujiji, on the Lake Tanganyika, in order to trace out a series of other lakes in that direction, which he trusted would prove to be the veritable sources of the Nile. From this expedition, details of which are now before the world, he returned; and when, in the winter of 1870-71 he was discovered by that enterprising Welshman, Mr. Stanley, who was sent out in search for him by one of the American newspapers, he was in the neighbourhood of his old haunts at Ujiji, still bent upon the solution of the grand mystery which had occupied his entire soul. All our readers are aware, from Mr. Stanley's narrative, "How I found Livingstone," that the two travellers made in each other's company a journey round the shores of that great inland sea, the Tanganyika; and the President of the Geographical Society in his last annual address seemed to express more than a hint that this journey had led Livingstone to entertain some doubts as to the correctness of his opinion as to the connection between the Tanganyika and the Nile.

Mainly through his labours it has come to pass that everywhere among the protected tribes of Southern Africa Queen Victoria is now acknowledged, not only as the greatest of sovereigns, but as emphatically "the Queen of the people who love the black man;" it followed as a matter of course that the body of "Davie" Livingstone was laid with national honours by the side of other great and noble and good Englishmen in a grave in Westminster Abbey.

Sir Garnett Wolseley, C.B.

(See page 21.)

MAJOR-GENERAL SIR GARNETT JOSEPH WOLSELEY, C.B., who led our troops on the coast of Western Africa, is the eldest son of the late Major G. J. Wolseley, of the 25th Regiment of Foot, by Frances Anne, daughter of W. Smith, Esq., and grandson of the late Sir Richard Wolseley, Bart., of Mount Wolseley, in the county of Carlow, a member of the ancient house of Wolseley of Wolseley, in the county of Stafford, one of whose younger sons went to Ireland as a captain in King William's army, fought at the Boyne by the King's side, and was created a baronet for his services.

The subject of our memoir himself was born in the neighbourhood of Dublin, in June, 1833. He obtained his first commission in 1852, and in the same year left the shores of England to take part in the war in Burmah, where he was severely wounded in action, and had the honour of being mentioned with high praise in the despatches of the general in command of that expedition. Returning home, and having recovered from his wounds, he was able to take part in the war in the Crimea, arriving at Sebastopol in December, 1854, two or three months after the battle of the Alma. From the time of his reaching the Crimea, however, to the fall of Sebastopol, he served in the trenches as an engineer, and had

Digitized by Google

the honour of being repeatedly mentioned in the despatches of Sir James Simpson, Sir Wm. Codrington, and Sir John Burgoyne. He was on duty in the trenches on the 7th and on the memorable 18th of June (1855), and subsequently on the 30th of August, when he was badly wounded in a sortie.

After the conclusion of the Russian war, he proceeded to China with his regiment, but was shipwrecked on his outward voyage. In India, too, he saw much active service during the mutiny of 1858-59; being present at, and taking part in, the relief, siege, and eventual capture of Lucknow, and at the defence of the Alumbagh under the late Sir James Outram. He afterwards acted as Quartermaster-General to General Sir J. Hope Grant in the province of Oudh, and his name was often mentioned with honour in the despatches. In 1870 we find him in China, acting as Assistant Quartermaster-General during the war, and present at the storming of the Taku forts.

In 1870-71 he was actively employed in Canada as Assistant Quartermaster-General, and in the former year commanded the expedition sent from Canada to suppress the rebels who had established a temporary government in the Red River settlement; and here he gained that experience in dealing with nomadic tribes and filibustering enemies which rendered him, in the eyes of the military authorities at home, the fittest man to be entrusted with the command of the expedition in Africa.

Sir Garnett Wolseley, who was knighted in 1870, and made also a Companion of the Bath, military division, bears the Crimean, Indian, Turkish, and China medals, as well as one for his services in Pegu; he is also a Knight of the Legion d'Honneur in France, a Knight of the Order of the Medjidie in Turkey, and also a Knight of the Order of St. Michael and St. George. He was promoted from the rank of colonel to that of major-general on being appointed to his present command, previous to which he acted for some time at the Horse Guards as Assistant Adjutant-General. Sir Garnett Wolseley is author of "A Handbook for the Auxiliary Forces," and of "A History of the Chinese War of 1860."

Sir Garnett Wolseley married, in 1867, Miss Louisa Erskine, daughter of A. Erskine, Esq., a gentleman of good Scottish family.

Miss Thompson.

(See page 24.)

It is with great pleasure that we place before our readers the portrait of Miss Elizabeth Thompson. She may fairly apply to herself Lord Byron's phrase, that she "woke one morning and found herself famous." Such a sudden success as hers is almost unprecedented in the annals of art. Even before the Academy doors were opened in May last to the public, rumours were afloat concerning a wonderful military picture painted by a young lady. The high commendation accorded to "The Roll Call" at the Academy dinner by T.R.H. the Prince of Wales and the Duke of Cambridge, who both praised its military accuracy, still further helped to stimulate public curiosity. "I am glad," said the Prince, "to take this opportunity of saying that I hope those gentlemen who have come to the Royal Academy on this occasion have not forgotten to look at one picture in the next room, which I think deserves attention; it is numbered 142 in the catalogues, and is called 'Calling the Roll after an Engagement in the Crimea.' This picture, painted by a young lady who, I am given to understand, is not yet twenty-three, is deserving of the highest admiration, and I am sure she has before her a great future as an artist." When the Academy opened, this picture was said to become invisible rather than visible, so great was the crowd that congregated around it all day. Indeed, it was found necessary to station a policeman at the spot to command visitors to "Move on." This picture, so simple in subject, so trenchant in pathos, so powerful in grasp as well as truthfulness, gave rise to various reports concerning its author. The artist's youth precluding the possibility that she had been in the Crimea, it was said she had been a nurse in the Franco-German war, was married to a surgeon, &c. These reports her father contradicted in a manly simple letter to the *Times*, stating their falsity, and saying that his daughter, of whose gifts he was justly proud, was the child of quiet people, who had watched the development of her great talent since early childhood.

The Queen newspaper was the first to give an authentic account of this rising young artist. Miss Thompson joined the Kensington School of Art in 1866, where she studied under Mr. Richard Burchett, the head master, for whom she entertains high regard. Thence she went to Florence. Her Florentine master was Signor Giuseppe Bellucci, a conscientious man and a splendid academic draughtsman. He was a fellow student of Mr. Frederick Leighton's at the Academy of Florence. Miss Thompson also studied in Rome, but not under any special guidance. Her passion for art dates from the first moment she could hold a pencil, and her childhood's drawing books are full of horses and soldiers—evidently the decided bent of her genius. That she has carefully studied her subject the recent controversy she has carried on in the *Times* with several gentleman amply proves. It was contested by some that the legs of the horse in the "Roll Call" were out of drawing. Miss Thompson proved herself in the right by reference to authorities such as Stonehenge and Meissonier. This was not the first picture, as erroneously stated, exhibited by Miss Thompson in the Royal Academy. A touching little scene of soldier life called "Missing" represented her in the previous year's exhibition. She has, besides, been favourably noticed for some time past as an exhibitor in the Dudley and other minor galleries, and, in the year 1873, to the Society of Lady Artists she sent a sketch of exceptional vigour and spirit, "The 10th Bengal Lancers at Tent-pegging." We believe that Miss Thompson's genius is too real to be spoiled by success, and we confidently anticipate for her the highest honours.

Mme. Annette Essipoff.

(See page 25.)

The first mention of the name of the Russian pianist in any publication was in the supplement to Professor Ella's *Musical Record* of the 27th of June, 1871, in the following words:—"This young, gifted pianist, nineteen years of age, has just obtained the golden medal at the Conservatoire in St. Petersburgh. The report furnished to me of her talent is highly interesting, and my readers may conclude from the rigid discipline of the examination for prizes that the distinction conferred upon the lady (Mlle. Annette Essipoff) is well merited. After a performance of Mendelssohn's G minor and Beethoven's G major concertos, she was equally successful in playing and transposing new music at sight before a critical audience. From more than one source I have heard favourable accounts of the Russian lady pianist." Herr Leopold Auer, of St. Petersburgh, the distinguished violinist, who played at the Musical Union from 1869 to 1873, expressed his opinion in 1870 that Mme. Essipoff would be the first lady pianist of the period—a judgment endorsed by Dr. von Bulow. Her teacher was M. Leschetizky; who, as he held, conjointly with Herr Rubinstein and the late Herr Dreyschock, the post of Professor of the St. Petersburgh Conservatoire, no surprise can be felt that M. Leschetizky was enabled to impart to his pupil the pianoforte works of all schools, ancient and modern. The master was naturally proud of his apt scholar, who subsequently became his wife. Her credentials do not emanate solely from St. Petersburgh, for her performance in the Philharmonic Concert in Vienna created quite a furore, and even the Germanic critics did not hesitate to promulgate their decided opinion that she was superior to Clara Wieck in her youthful and best days, although the latter bears the world-renowned name of Mme. Schumann. The first appearance in London of Mme. Essipoff was at the fifth New Philharmonic Concert on Saturday, the 16th of May, 1874, when she played Chopin's concerto in E minor, op. 11; Mendelssohn's "Andante and Scherzo" in E minor; Dr. Liszt's "Etude de Concert," in F minor; and Herr Rubinstein's valse in A flat. At the sixth concert, on the following Wednesday (May 20), the lady performed Herr Rubinstein's concerto in D minor and Dr. Liszt's "Fantaisie Hongroise." Her reception was enthusiastic. Since the departure of Dr. Hans von Bulow there had been no such decided manifestation of public opinion.

The antecedents of Mlle. Annette Essipoff do not present the varied incidents which sometimes attend a professional career. She was born in St. Petersburg on the 31st of January, 1852, of Russian parents. Singularly enough, the first indications of her musical proclivities were displayed at a concert to which she was taken. The little Annette was then only six years of age, and she never had received any musical tuition; but her ear caught the sweet sounds emanating from a pianist, and the child ran on the platform and tried to play the music she had just heard. Even with this sign of a longing for art, she remained without a master until she had reached her eleventh year; she only played from ear, with a supplement of improvisations after her own childish fashion. Her first master did not know how to treat this natural talent; he was puzzled with the exhibition of such precocious ability. At thirteen years of age Miss Annette entered the Conservatorium of Music in the Russian capital, where she remained five years, and when she left it had been invested with the diploma of all the musical sciences, as also with the prize gold medal of special distinction. Her *début* took place at a grand orchestral concert in St. Petersburg, when she performed Beethoven's concerto in G major with immense success. It is only two years since Mme. Essipoff began the Bohemian life of a great artist, to give concerts in various capitals. She first visited the north of Germany, and in Leipzig, Berlin, Hanover, Brunswick, &c., was received with enthusiasm at her performances. In Vienna she gave four concerts with signal success, besides playing at the Philharmonic series, &c. In the winter of 1873 Mme. Essipoff (Leschetizky) went to Hungary, and at Pesth was present at the fiftieth jubilee of the career of the world-renowned Dr. Liszt, who, as it has been always his custom—for a more generous and liberal-minded artist never breathed, and one more fully disposed and prompt to recognise talent in any young pianist—expressed his enthusiasm at her marvellous memory, her wonderful execution, her charm, and sensibility. After leaving Hungary Mme. Essipoff played at a series of concerts in Holland, and the Dutch, who are ardent lovers of music, and first-rate judges withal, were enchanted with the young Russian pianist. Her final performances before coming to London, having been engaged by Professor Ella for the two last *matinées* of the Musical Union of the 23rd and 30th of June, with leave to play at other concerts, were at Warsaw and her native city. She gave four concerts in the Polish capital, and, despite the antipathy felt there for anyone bearing a Russian name, created quite a *furore*. At her return to St. Petersburg Mme. Essipoff found the estimation in which her genius was appreciated by the agreeable information that all the tickets for her concert had been sold a week before her arrival. Next season the Russian lady will visit Paris professionally. A more quiet and unassuming artist than Mme. Essipoff has never been met with; she is quite free from the jealousies which are too often found in the artistic circles. Mme. Essipoff seems to feel keenly the fine points of an interpretation. At the grand pianoforte of Erard, on which she played in London, the consummate ease with

Digitized by Google

which she disposes of the most difficult passages is remarkable. Everything she plays is from memory. Her self-possession is never lost; but there is enough of animation in the facial expression to show the gifted soul. Her grand qualities as a pianist, those which render her as an executant the greatest of lady players, are accent, rhythm, and active sensibility. Players of more physical power there have been and are now existing; but for intellectual interpretation of any work, for rhythmical instinct, for delicacy of touch, and refinement of style, Mme. Essipoff is pre-eminently distinguished.

The late John Henry Foley, R.A.

(See p. 28).

Mr. J. H. Foley, R.A., the eminent sculptor, died on the 29th of August, at The Priory, Hampstead, and his remains were interred in St. Paul's Cathedral on Friday, the 5th of September. There he sleeps in the south-east corner—the artists' corner we may truly call it—close to the spot where James Barry, his countryman, Sir Joshua Reynolds, J. M. Turner, and Sir Edwin Landseer are interred.

With Foley England lost one of her greatest artists, and Ireland a famous representative of her gifted race. In the fullness of professional success and, artistically speaking, in the prime of life, he was taken away from his labours, a giant amongst English sculptors, and well-nigh the only worthy representative of this branch of art since Flaxman died.

John H. Foley was born in Dublin in 1818, and entered the Royal Academy as a student in 1834, after having conspicuously distinguished himself as a pupil of the Royal Society in his native town. He was elected Associate of the Royal Academy in 1849 and R.A. in 1855. He likewise was a member of the Hibernian Academy, and since 1862 Associate of the Academy in Belgium.

These are the principal incidents of his official life, if we may term it so, and insignificant they seem if compared with the creations of his chisel, which for grandeur of conception, for power and beauty of execution, have never been surpassed by any contemporary artist.

They began with the "Death of Abel" and a figure of "Innocence," exhibited in 1839. "Ino and Bacchus," a work which at once made its author famous, followed in 1840. This group is now in the possession of the Earl of Ellesmere, and a cast of it was shown at the International Exhibition, 1862. In 1842 Foley exhibited "The Houseless Wanderer." With his "Youth at a Stream" he gained his election at the Westminster Hall competition in 1844, and executed the celebrated statue of John Hampden for the new Palace of Westminster in 1847. A spontaneous burst of admiration hailed the equestrian statue of Viscount Hardinge, executed for Calcutta in 1846, and strenuous efforts were made to obtain a replica to be erected in London, but with no result.

This statue is Foley's grandest achievement, and the fullest vindication of English genius and power in plastic art. The dignified figure of the great warrior on his charger Meanee, which bore him through the Sutlej campaign, with the sword of the first Napoleon by his side, is of most powerful effect, and places the sculptor in the foremost rank of European art. A similar masterpiece in the same grand style is the noble equestrian group of Sir James Outram, one of Foley's later works, which was for some time on view in front of the Athenæum Club. Like Hardinge, so Outram's memorial went to India, and is lost for England. In "Caractacus," executed in 1858 for the Egyptian Hall, Mansion House, Foley personified the prototype of qualities so often found in England's great men—sublime heroism, and dauntless courage under overwhelming adversity.

Besides these masterworks Foley produced portrait and monumental statues of exceptional merit: "Comus," his diploma work; Lord Herbert of Lea, for the War Office; Sir Charles Barry, for Westminster Palace; Lord Elphinstone, for Bombay; Sir Henry March, Oliver Goldsmith, Edmund Burke, for Dublin; Father Mathew, for Cork; "Egeria," for the Mansion House; "The Mother," "The Death of Lear," "Lear and Cordelia," "Venus Rescuing Æneas," "Prospero and Miranda," "Contemplation," and the famous group of Asia at the Albert memorial.

At the time of his death the great artist was engaged upon an equestrian statue of the late Lord Canning, on a bust of Faraday, and a composition of O'Connell for the Dublin memorial. The colossal sitting statue of the Prince Consort for the canopy of the monument in Hyde Park he leaves virtually completed in the founder's hand. This last work will bring home the artist's fame to the multitude, and to his many admirers in the metropolis.

The Late Mr. Owen Jones.

(See page 29.)

The world of art and applied science sustained during the month of May, 1874, a great loss in the person of Mr. Owen Jones, whose name is so familiar to us all as the author of the "Grammar of Ornament," and as the designer, *inter alia*, of St. James's Hall and of the Alhambra Court at the Crystal Palace.

Born in Wales, and of Welsh parents, in or about the year 1809, he was articled, whilst still a youth, to Mr. Louis Vuillamy, the architect, whose name was well known to the last generation for his studies in architectural ornamentation. Here he proved himself an apt scholar, and when in 1830-4 he travelled abroad, mostly in the south of Europe, it was with the view of carrying on the education which had been commenced in Mr. Vuillamy's studio. Reaching Grenada in the last-named year, he collected, along with M. Jules Goury, the materials for the publication of his first work, the subject of which was the magnificent palace of the Alhambra itself, and which at once made his name known in the world of the lovers of art as well as in his own professional circle. The work was commenced in 1836, but was not actually completed until 1842, after the author had made a second journey to Grenada for the purpose of studying all its details a second time.

From and after this date we find Mr. Owen Jones constantly employed by Messrs. Longman and other publishers in connection with ornamental designs and painting in colours on the title pages and in the illustrations of large and expensive works. Stooping also, like the elephant, to smaller things, he made many tasteful designs for the articles of stationery manufactured by Messrs. De la Rue and Co. In 1842 he published "Designs for Mosaic and Tesselated Pavements," with an essay by Mr. F. O. Ward, on their material and structure; and in 1844 he contributed to the exhibition of decorative works sent in to the Commissioners of Fine Arts, a large plan of the New Houses of Parliament, including designs for the pavement of the halls and corridors of that building. He also was one of the first persons who devoted his attention to the introduction of colour and ornament into the shop fronts of the large establishments at the West End of London. His ornamentation, it may be remarked, was always Mahomedan or Moorish, as opposed to Gothic, in style and design, so that he seldom or never found a scope for his peculiar talents in any except secular buildings. His style was almost faultless of its kind, combining the largest variety with perfect simplicity of design, and recognising the correct but much neglected principle of surface decoration, the avoidance of any imitation of relief.

On the formation of the staff of officers for the first great Exhibition of 1851, Mr. Owen Jones found a "fair field" for the display of his peculiar talents, being appointed one of the superintendents of the works in Hyde Park, chiefly with a view to the decoration of the structure internally, and the effective grouping of its contents. In the year 1852 he appeared in public as a lecturer on the subjects to which he had given so much attention, both before the Society of Arts and at the London Institution, as well as in other places. In the May of that year Mr. Jones's name appeared in the prospectus of the Crystal Palace Company as the "director of the decorations of the building about to be erected at Sydenham;" and soon afterwards, in conjunction with Mr. (now Sir) M. Digby Wyatt, he was commissioned to visit professionally the chief capitals of Europe, in order to form the collection of casts and statues which now present so attractive a feature there. When the building was actually put in hand, the courts of architecture and sculpture were commenced, the Egyptian, Greek, Roman, and Alhambra courts, and the decorative painting of the general fabric, were completed under his direction. In his designs for the decoration of the Egyptian court, Mr. Jones was assisted by Mr. Bonomi, Mr. Sharpe, and others; but the result, as a realisation of the character of Egyptian architecture, with respect to which a claim was advanced by the newspaper press beyond what Mr. Jones himself would have put forth, has been much contested. In the polychromatic decoration of the Greek court, too, Mr. Jones's illustrations of his views regarding the ancient practice, were the subject of many comments, so that even before it was opened he saw fit to publish an "Apology" for its colouring, with arguments on the subject from two high authorities on classical subjects—Mr. G. H. Lewes and Mr. W. W. Lloyd. In this, as in other similar matters, Mr. Owen Jones was a strong advocate of the use and introduction of colour; indeed, as many of our readers may have noticed, one portion of the Elgin frieze was painted by him in colours, the hair of the figures being gilt. It was, however, in the fairy-like Alhambra Court that Mr. Jones revelled free and uncontrolled; in this he presented to our eyes the most elaborate coloured decorations that had ever then been seen in England; and almost all those visitors to the Crystal Palace who carry along with them a critical and educated pair of eyes agree that there could be no better reproduction of the glories of that noble work of art, the Alhambra. These several works occupied Mr. Jones for about three years, and required an amount of careful manipulation which could scarcely have been excelled or even equalled during the comparative leisure of the Middle Ages; and his minute supervision of them must be held by all competent judges to have extensively served the progress of decorative art in this country. In his admirable "Handbook of the Alhambra Court," Mr. Jones gave a very clear and full exposition of the real principle of ornamentation, and discussed the arguments advanced by others in a fair and candid spirit. His well-known "Grammar of Ornament" is devoted to a series of elaborate decorations appropriate to different styles of architecture.

Among Mr. Owen Jones's principal published works, besides those already mentioned, are his translations from the French of Seroux d'Agincourt's "History of Art by its Monuments, from its Decline in the Fourth Century to its Restoration in the Sixteenth," with numerous illustrations, published in 1847, in three volumes; "Views on the Nile from Cairo to the Second Cataract, from drawings made on the spot;" and "An Attempt to Define the Principle which should Regulate the Employment of Colour in the Decorative Arts," one of the lectures delivered by him in 1852. In conjunction with Mr. Henry Noel Humphreys, he brought out, between the years 1847 and 1850, a splendid work in folio, with thirty-nine plates on the "Illuminated Books of the Middle Ages." With reference to the "Grammar of Ornament" the *Athenæum* speaks of it epigrammatically and wittily, as being "beautiful enough to be the hornbook of angels."

BRAIDED SMOKING CAP.—DESIGNED BY Mr BEDFORD, 187, REGENT STREET, LONDON.

A. GOATER, NOTTINGHAM

Digitized by Google

The Lady's Work Table.

INTRODUCTION.

THE two favourite novelties in the fancy-working world during the past year have been Macramé lace and embroidery. The former is but a revival of the ancient art of knotting, and the latter is practised on almost every material, and silk, wool, thread, cotton, &c., are used on dresses, cloaks, and furniture. Beads have been lavishly used in combination with braid and lace, and thus beading has come into vogue; and is likely to develope still further as bugles of many colours and beads of many sizes are now used for ornamenting both street and evening dresses. Among the accompanying illustrations will be found designs for almost every variety of fancy work. We have given special prominence to Macramé as good patterns are scarce, and so are directions for carrying them out. The Hibernian embroidery is also well worth a trial by those who like effective results without a large amount of labour.

Description of Coloured Plates.

BANNER SCREEN IN HIBERNIAN EMBROIDERY.

(Designed by Mrs. Thurgood, of 61, Queen's-road, St. John's Wood.)

(SEE FRONTISPIECE).

THIS style of embroidery is introduced by Mrs. Thurgood, of 61, Queen's-road, St. John's Wood. Our design is a banneret worked on black velvet and trimmed with straw, colored, and green fringe, which is headed with a cord to match. The stands and mounts are ivory. The stitches are so clearly illustrated that it is needless to enumerate them. After the embroidery is terminated, a quilted crimson satin lining is added at the back. This novel embroidery is also useful for slippers, sofa cushions, sachets, and a trimming for dresses. Besides velvet, it may be worked on cloth, satin, and it is pretty likewise on either net or muslin for evening wear. It is almost as effective as satin-stitch embroidery, and is much more quickly done. Silks of various kinds are used—embroidery, purse, and sewing, also beads are occasionally introduced with good effect. The materials and traced patterns are supplied by Mrs. Thurgood, the inventor.

BRAIDED SMOKING CAP.

(Designed by Mr. Bedford, 187, Regent-street, London.)

EITHER velvet or cloth may be used for the foundation of this cap, but the former material is the handsomer. Our model is dark maroon velvet braided with gold. Space does not permit us to give the border complete, but as the pattern repeats itself the continuation is an easy matter. Mr. Bedford, of 187, Regent-street, is the designer and supplies all materials.

1 to 13. Macrame Lace.

MACRAMÉ is an old Italian lacework, and the name itself of Arabic origin, meaning a fringe.

Knotted borders occur on robes and garments of the Byzantine period, and seem to have been in use amongst Eastern nations even at an earlier date. A fringe of loose threads was formed at the end of the material—linen, silk, gold, or silver tissue—by drawing the warp threads, and then binding or knotting the weft threads together in tassels. The more artistic development of knotting in elaborate designs commences with the general revival of mediæval lace work during the second half of the fifteenth century. This kind of lacework is first mentioned in the Sforza Inventory (1493), and patterns are given in the pattern books of Taglienti and Il Specchio, between 1530 and 1550. Two kinds of Macramé are met with—the one throughout tightly knotted, and partly raised in rims or ridges (see Fig. 4); the other worked flat, and part of the design in loose knots (see Figs. 5 and 6). The patterns are mostly geometrical; in rare cases an attempt is made to reproduce more complicated designs, as beetles, lobsters, spiders, &c. (see Fig. 11). In the present century (1843) the art of knotting Macramé in ornamental designs has been revived by the exertions of the Baroness d'Asti at the Albergo del Poveri in Genoa, and spread from there to the villages along the Riviera. In olden times Macramé was used for borderings to church vestments, altar cloths, and scarfs, in gold and silver thread as trimming for state dresses. In the present day it is worked for the same purposes, and likewise for trimming ecru, holland, and other dresses of washing materials, and when made of coarse thread for mantelpiece borders, banner screens, &c. The materials required are a cushion, German pins with coloured heads, and knotting thread.

THE CUSHION.—A Macramé cushion ought to be about 16in. long by 8in. wide, fitted with lambswool (not cotton wool, which is disagreeable to stick pins in), weighted with sand, and covered with either red or dark green cotton twill, fine merino or lama, which are preferable to a silk covering. An extra piece, the size of the top, may be sewn on to the upper edge, to be turned over the work, to keep it clean. An ordinary church hassock or a weighted box pincushion may be used as makeshifts for a Macramé pillow.

The lace itself can be worked in different materials, as in ordinary knitting cotton No. 8, in bleached or unbleached linen thread or in variously coloured silk. The Macramé cord, made for the purpose, is the easiest material for beginners. To begin work a leading doubled thread is fastened horizontally to the pillow with a pin (see Fig. 1), and as many yards of it as are likely to be required wound on a piece of card-board, which may be fastened to the back of the cushion until wanted Doubled threads, about four times as long as the width intended, are then looped to the foundation threads so as to form a deep fringe (Fig. 3, A, B). When a sufficient length of fringe to begin with is thus prepared, another doubled thread is fastened horizontally to the cushion, and with the right hand held firmly across and over the vertical threads, whilst the left hand loops each of the latter in a tight knot or twice over in a button-hole knot, thus forming the cordlike row of the heading.

Instead of looping the working threads to the topmost foundation line, they may be fastened to the cushion with pins run straight on at right angles in the manner indicated in Fig. A.

Patterns are worked in the same way, using right and left hands, holding one of the vertical threads on the required slope, with either hand, and working the others over it in various knots, which may be studied and practised from the diagrams in Fig. 3.

Diagram A we have already explained.

Diagram C represents the chain bar alone, with two threads, by holding one on each hand, and keeping the left hand one quite tight, looping the other over. The loop is then run to the top. The next loop is made with the left hand over the tightly-stretched right-hand thread. This is repeated alternatively, as often as the length of the chain bar requires.

Diagram E shows the flat "Solomon" bar; diagram E the same bar twisted. Both are worked with four threads, by making a close row of "Solomon's" knots. The latter is formed by stretching the two centre threads over the first fingers of the left hand, the ends passing between the second and third fingers, and the whole being held tightly from the cushion.

How to make the knots with the two side threads is plainly shown in the diagram. Each knot must be run up close to the last one by drawing the ends of the two side threads.

In the twisted Solomon's bar (diagram D) the knot is precisely the same as in the flat bar, but done only with one hand, right or left, instead of with alternate hands. The bar takes the twist directly after a few knots are finished.

Diagram F shows open knotting used for fillings. The mode of working is best seen in Fig. 6 (first row), and will not require further explanation.

The knotting of the second row may be described as follows: Suppose the four threads are marked *a b c d* from left to right. Pass *a over b* and *c*, and *under d*. Then slip *d under c* and *b*, and through the loop *over a*. This forms the first part of the knot. The second part of the knot is done by reversing. Pass *a over c* and *b*, and *under d*. Then slip *d behind b* and *c*, and through the loop left by *a*. Pull the knot evenly together. In the circles and segments forming the lozenges round the diamond in the design, two threads of one knot take part with two threads of the next knot. Take care that the working threads do not get out of place, and never cross the ends.

FIG. 5 is worked in the same way as the second row in Fig. 6, only *two* knots instead of one are interposed between the circles and segments.

Diagram G shows the "ridge" bar, which is done by working one or more threads over one or a number of others in close loops (diagram *b*, second row).

FIG. 8 illustrates weavers' knots, which will be found useful for single points.

With the help of the diagrams given in Fig. 3, combined with the illustrations Figs. 5, 6, and 8, any piece of old Macramé lace can be copied.

An attempt to describe the working of Macramé more minutely is practically useless; the intricacies of the handling cannot be put into words. Patterns must be read from the design, and a short practice will enable any Macramé worker of average skill to do so readily. Care must be taken to draw the loops and knots closely and tightly, and as evenly as possible. The ends of the working threads, after the pattern is furnished, are cut to an equal length to form a fringe. If it is not desired that the ends of the threads should form a fringe, they may be gradually worked in by buttonhole stitch at the sides of the scallops (as shown in Figs. 4 and 11), and be then at intervals thrown out and cut off two or three at a time. Insertions and scallops may be worked in separate stripes, or together. If worked separately, the outlines of the scallops will show less bulky, and the ends of the working threads can be easier disposed of.

We now proceed to give short explanations of the working patterns.

FIG. 2, Macramé Corner (Fern Pattern). Put on 20 threads for each pattern you require, and 10 over where you turn the corner, each side of the point; and lay the first cord. Twist and form the diamonds as per drawing, and for the corner add one pair on the first cord, pass two pair into the last twists, two more pair on each upper side of the corner diamonds, and three pair down the sides of the same where they meet, making in all 16 fresh threads added. Finish off the second cord. The straight part of the pattern can be easily followed from the drawing—the leaves spring from the 8th, 14th, and 20th threads, and reversing the work for the other side. For the corner you will find 18 for the last pattern instead of 20, eight of which are the extra threads you have added. Add three more pair, passing them over the second cord, which will give the number to finish the spray as far as it resembles the others, and one pair over, which

Digitized by Google

you must keep as leaders down the corner, and on which the extra threads are to be worked; on these add six more pairs. This is easily done by fastening the threads all under one pin, placed exactly in the right direction, a diagonal line from the corner; draw them quite even, and fastening one end firmly to another part of the cushion, and turning it, work over one leader, unfix the other ends, and turning the cushion work them in the same manner; tie the leaders, and they will form the small ovals at the corners in the drawing; repeat the same thing twice more with four pairs each time to continue the spray, as drawn; and carrying on the stalks of the fern, work in the last two threads six more pairs in the same manner. Now lay a single thread as a cord all the way round, waving it a little according to the pattern, and for the edge commence at the corner, using the eight centre threads; make a leaf, knotting in the centre, adding a fresh pair four times, and at the point finish the button holes with the centre threads, four to each. The side edging is a series of so-called leaves, formed with ten threads, six for one side and four for the other; the button-hole edge is formed alternately of six and four threads. For the larger knot four firmly together; and button-hole the outer threads right and left over the centre, each six times, crossing the centre ones, so as to be able to draw them to a circle; draw all very tight but one, which makes the little loop at the end; tie the over-casting threads tightly behind this and cut off. For the smaller precisely the same, only the two threads can only be tied first, and make only five instead of six button-hole stitches.

Fig. 4 represents a border, with corner, reproduced from a pattern of the 16th century. The crosses, which form the heading are made with six and eight threads respectively. In the original, which is a fragment of a straight bordering, the chief patterns of the centre part in no way correspond in arrangement with the heading or the points of the vandyked border, but for the corner the threads have been arranged so that the points should correspond with the pattern above. The circles and points require 38 threads to complete each, and the worker must be careful to make the little twists and knots correctly, as they are the chief feature and beauty of this pattern. For the corner add four doubled threads on the first cord, six in the corner of heading, 15 where the four rows lie together diagonally, six more on the pattern below it, one on the twist below that, six at each of the three places where the rows are at right angles with the top of the lower heading, 3 in each corner cross of the heading, and one more in the centre, while working the cord to finish the lower heading. It is best, however, when reaching the lower heading, to calculate if you have the required number of threads to perfect the three corner points, as the mistake of a thread more or less can then easily be remedied.

Fig. 7 represents a Hungarian bridle ornament, with single and treble weaver knots and cross knots. It shows how to dispose of the loose fringe threads, and might be used as an ornamental tassel and for other purposes.

Pattern Fig. 9, being mainly composed of the ridge and chain bar, does not present any difficulties. The single thread crosses are worked after the principle of diagram Fig. 3 F.

Pattern Fig. 10 is a combination of flat and twisted Solomon bars, with a finishing, after the principle Fig. 6, second row. Put a double leading string lightly across the cushion, and work 5 rows same as rules in pattern No. 1, then count off 4 threads, holding the first thread to the left in the right hand, and knot each remaining thread twice; count off 4 again, holding the first nearest the right hand in the left hand, knot same as before; then count off 8 threads and take the four in the centre plait up over one and under one, twice taking the 2 from left hand, 2 from right, plait up same as before twice; then take the four centre threads and plait up same as before; this repeat to end of row. Put another leading string (see engraving), then form the insertion No. 2. 1 row of point, count off 8 threads and divide them into fours, and hold the first of the four in the right hand, knot up with the left; this repeat 3 times (see engraving), and to work the reverse hold the first from the right in the left hand and knot same as before three times to form the chain between each diamond; count off 4 threads and divide them into two sets, which will make 2 threads in each. This you knot up three times and then reverse it and knot again three times, putting a pin rather large to hold out the loop (see engraving); repeat to make the button. Count off 2 threads from each side of chain and plait over one and under one, same as insertion No. 2 (see engraving), only instead of twice you must do it six times, putting the threads through the diamond, tie it at each side, then count off the 4 threads, working them backwards and forwards same as before down to end of point (see engraving).

Pattern Fig. 11, the original of which was made in Italy during the 10th century, however intricate it looks, is composed of ridge and chain-bars only, the fringe worked into outline scallops by button-hole stitch.

Pattern Fig 12, entirely done in ridge bars, presents one novelty in the central bosses, which are Solomon bars bent round a pin. Make the leading string of double thread the length you require the lace when done.—1. Fasten leading string tight across the cushion with 2 large pins, cut the skeins of thread twice; these you knot on single to the leading string.—2. Count off 4 single threads, holding in the left hand the 3 threads, knotting up three times with the right hand the fourth thread; this repeat to end of string across the cushion.—3. Take 2 threads from the left and 2 threads from the right, holding 3 threads in the left hand, knot up the fourth, thread with right hand three times, same as before; this repeat also to end.—4. A leading string across the cushion same as first string, keeping all the threads under the leading string which you hold firmly in your right hand, knot each thread twice round it with the left hand.—5. Count off 8 threads, holding the first of the 8 from the left in your right hand, knotting up each remaining threads twice; this repeat twice to form the two rows; to reverse it you count off 8 threads and take the first thread from the *right* in your *left* hand, knotting up twice with the right hand.—6. Another leading string across same as rule 4.—7. Count off 8 threads and divide them into 4, working them same as the 8, only in 4; this is the insertion which comes between each point; work on same as rule 5 until you come down to the point (see engraving). The raised buttons are made by taking 4 threads from the centre of diamond and plaiting the threads over one, under one, and pushing it up the two threads you are holding in the hand, putting the threads through the diamond and tying it each side; work on again same as before (see engraving).

14. Gaiter for Child of Six or Seven Years Old (Knitting).

3oz. of ponceau (or any other colour), 4-ply Scotch fingering, or 3-thread fleecy, and 5 steel needles, No. 12, are required. Cast on 72 stitches, and for the upper edge knit 40 rounds in ribs of 2 plain, 2 purl.—41st and 42nd rounds. Plain.—43rd and 44th rounds. Purl.—45th and 46th rounds. Plain. Then follow 62 rounds or 31 ribs, alternately 1 purl round, 1 plain one. In the last 32 of these 62 rounds, in every 4th round, 2 stitches are to be taken in (one on each side of the centre of the back) to shape the leg, as in a stocking, so that at the end of the 62 rounds there will be only 56 stitches remaining on the needles. After 2 purl rounds, 2 plain ones and again 2 purl, 34 ribbed rounds follow, of 2 plain, 2 purl stitches alternately. In the next 12 rounds this rib is to be continued, but in every alternate round a stitch is to be increased between the 2 plain and 2 purl stitches, so that in the 12th round there will be 6 plain and 6 purl to be knitted. The stitches are then to be loosely cast off, and a fluted frill is formed. These gaiters may be knitted with 4 needles.

15. Petticoat for Child (Crochet).

This petticoat is worked in treble crochet, and is so quickly made and so inexpensive that we give the directions for making it in a large or small size, as may be required. Worked in fingering it is the least expense; in single Berlin it is very much softer, but does not wear as well. You require scarlet and white fingering—4oz. of scarlet, 1oz. of white; a short bone crochet hook (No. 4). It is crocheted in scollops; for every scollop 21 stitches are required. For a child of 4 years of age 9 scollops will make a good petticoat; so that from this it is easy to calculate the sizes. For a child of 2, eight scollops; for one of 7 or 8, twelve scollops.

You commence then for a petticoat with nine scollops by making a chain with white wool of 215 stitches.—1st row.—* 1 long, or the thread twice round the needle, on each of the first 10 stitches, in the 11th stitch work 3 long, then 1 on each of the next 10, miss 2 Ch., and repeat from * at the end of the row; turn.—For the 2nd row, miss the 1st long, * 1 long on each of the next ten, 3 on the following, 1 long on each of the next ten, miss the 2 next long, which are the last stitches of this scollop and the first of the following, and repeat from *. At the end of the row fasten on the scarlet, and work three rows like the 2nd in scarlet, then 2 rows in white, then 3 rows in scarlet, 2 in white; now join the scarlet, and work with it to the end of the petticoat.—13th row. 1 long on each long of the last scollop; do not increase at the top; then miss the 2 at the end of the scollop; repeat this row until the petticoat is about 22in. or 23in. in width; then work the first two scollops in DC., taking up 2 stitches together, which makes a little fullness, plain DC. in front, and on this row work 5 rows of DC. for the band. Now join the petticoat at the back, and work the following border round the bottom.

The Border.—1st row. 1 DC. on the first DC., * 4 Ch., 1 DC. on the 2nd of the 4 Ch., 1 treble on the 1st, miss 2 DC., 1 DC. on the following; repeat from *. At the end of the row work in single crochet to the top of the first 4 Ch., then work the 2nd row, * 4 Ch., 1 DC. on the 2nd, 1 treble on the 1st of the 4 Ch., 1 DC. on the top of the next 4 Ch. in the last row; repeat from *, and fasten off.

16. Gaiter for Child of Five or Six Years Old (Knitting).

Three ounces of 4-ply Scotch fingering, either white, scarlet, or marone, 5 steel needles No. 12, and 2 leather straps, 1¼in. broad, and 3in. long, will be required. For the upper edge of the gaiters cast on 68 stitches, and knit 30 rounds in ribs of 2 plain, 2 purl.—31st and 32nd rounds. Plain.—33rd and 34th rounds. Purl.—35th and 36th rounds. Plain. Now commence the following pattern: 1st round. Purl.—2nd round. * 1 Plain, repeat from *.—3rd round. * 2 plain, 7 purl, 1 plain, repeat from *.—4th round. * 3 plain, 5 purl, 2 plain, repeat from *.—5th round. * 4 plain, 3 purl, 3 plain, repeat from *.—6th round. * 5 plain, 1 purl, 4 plain, repeat from *.—7th round. Commence again at the 1st, and knit the pattern regularly through, till there are twelve repetitions of it, or 72 rounds. In the last 32 of these rounds 2 stitches are to be decreased in every 4th round, one on each side of the centre of the back, to shape the leg as in a stocking. With the remaining 52 stitches, knit 2 plain rounds, 2 purl ditto, and 2 plain; then follow 24 ribbed rounds of 2

Digitized by Google

plain, 2 purl stitches alternately. The heel is then to be knitted with the 12 first and the 12 last stitches of the round placed on one needle, backwards and forwards for 20 rows, keeping up the rib that was commenced. Having done this leave the heel stitches on the needle, and proceed to pick up, and knit, as you take them up, ten stitches along the edge of each side of the heel piece for the gusset; and knit these and the 28 instep or front stitches, backwards and forwards for 20 rows, keeping the rib in front, but the gusset stitches are to be knitted plain, and in every 2nd or alternate row one of the gusset stitches is to be knitted with one of those at the side of the front. When all the gusset stitches have been used up, the front or instep is to be still further lengthened by knitting 26 rows, in the last 8 of which a stitch is to be decreased at the commencement of each row, by slipping the 1st, knitting the 2nd, and passing the slipped stitch over, which will diminish 4 on each side. The stitches of the front and the gussets are then to be again united with those of the heel and knitted round.—1st round. Plain.—2nd. Purl.—3rd. Plain. After which the stitches are to be cast off, and the leather straps sewn on. This gaiter may be knitted with 4 needles instead of 5 if preferred.

17. Child's Sock (Knitted on Two Needles).

THE engraving represents a sock for a child of four years of age, knitted on two needles. The shape is good, and is copied carefully from a good loom-made stocking. Many knitters prefer the plan of knitting on two needles instead of four when once they have tried it. For the following directions a very tight knitter should use No. 16 or 17 needles, instead of the number given.

You require 1½oz. of Faudel and Philips's 4-ply coloured cotton for this sized sock. This make of knitting cotton cannot be too strongly recommended; it is soft and even, it can be had in any colour, plain or mixed, and is reasonable in price, and most pleasant to work. A pair of No. 18 knitting needles.—For a child of 3 to 4 years of age, cast on 68 stitches, knit back plain. The rib used for the sock, as illustrated by the engraving, was 6 purl, 2 plain; which is a very pretty rib. Remember throughout always to slip the first stitch in every row. Work the 2nd row, 2 plain, 6 purl, to the end of the row.—The 2nd row. Knit the purled stitches of the last row, and purl the knitted ones, work these two rows until you have 60 rows.—The 61st row. Knit 1, knit 2 together, continue the rib until the 3 last stitches, when work 2 together, knit 1.—Rib 5 more rows, then repeat the 61st row, then rib 10 more rows, and you commence the heel. The Heel: You ought to have 64 stitches on the needle; divide your stitches into four, there will be four sets of 16 stitches; work the first 16 for the right hand side of the heel, knit 15 rows containing the rib on these 16 stitches, * * then 6 rows, working alternately 1 plain row and 1 purl row; then knit 2 together twice at the commencement of the next knitted row, *. Purl a row. Knit a row, knitting 2 together at the beginning, repeat from * until you have only 10 stitches on the needle, then knit a row instead of purling and cast off, leave a long end of cotton. Now take the last 16 stitches still on the needle, work 15 rows of the rib; then begin the plain part for the heel, commencing the work from the outside and purling the row instead of knitting it, and repeat from * *, but make all the decreasings at the commencement of the purled rows instead of the knitted ones. When this is finished, work the front of the foot. For the front, take the 32 stitches left in the middle of the work. Continue the rib and work 50 rows ribbed, then 12 rows alternately, 1 plain row, and 1 purled row, and taking care to make them match the heel. * * in the next row, decrease one stitch in beginning the row, and one stitch in ending it, then 3 rows with no decreasings, * in the next row, decrease again once on each side of the work, then 3 rows with no decreasings, repeat from * three more times, then decrease every alternate row until you have only 18 stitches on the needle, knit a row and cast off. You now join the leg and heel, sewing them together, join up the two little rows of 10 stitches where the heel was finished, then take up for the under part of the foot 42 stitches on the inside of the little rows of sixteen stitches. The whole foot is worked in alternate rows of plain and purl. Work 3 rows. The 4th row, which is a knitted one. Knit one stitch, then 2 together, plain to the end, leaving 3 stitches, then 2 together, knit 1, * then a purl row, a knit row, a purl row, and repeat the 4th row. Work from * three more times, where you should have 32 stitches on the needle, now work in alternate rows of purl and plain until you have in all, from the heel 60 rows, then repeat from * * in the front part of the foot and fasten off. Sew the two sides of the foot and the toe together, and run in all the ends securely, leaving a small piece where you cut it off.

18. Scarf in the new Crochet.

THIS scarf is worked in partridge and magenta Shetland wool, and is very quickly made, and very light. You require a large wooden needle, made expressly for it, and a No. 8 bone crochet hook. The crochet is worked in the same manner as the hair-pin edging. The needles may be had from Messrs. Bedford, 126, Regent-street. You work on this pin with the partridge wool. You must hold the points of the needle uppermost, and twist it round for each stitch, always having the loop on your right-hand side, and working the DC. over the top thread of the loop on the left-hand side. The needle, which is made for the size of the scarf, must be quite filled, and as you work press the wool down; when the needle is full fasten off and draw all off. There should be on each arm for a full needle 224 loops. Join the grey wool to the first four loops on one side of the work, work a DC. in them. The loops should have just one twist in each before taking them. They fall naturally in this manner, so that no trouble will be found in doing it. Then * 7 Ch., 1 DC. in the next 4 loops; repeat from * to the end, where you work 9 Ch., 1 DC. in the middle of the work, 9 Ch., 1 DC. on the first four loops on the next side.

You now work on the wooden needle a piece like the first, but 552 loops in length. This cannot, of course, be done in one needle; so when it is full take off the work. Do not let it pull out, but pass a piece of muslin through the bottom of the needle, then put the last two loops on the needle, and sew up neatly the remainder of the work in the muslin. This prevents it getting twisted as you work the remainder, which would render it almost useless, and at any rate greatly spoil the effect of the work. When the length is complete work round it like the last, then take the magenta wool and work round the last stripe as follows: 1 DC. on the 4th of the first 7 Ch., * 4 Ch., 1 treble on the 1st of the 4 Ch., 1 DC. on the 4th of the next 7 Ch.; repeat from *. Then work on the first stripe, with the magenta wool, 1 DC. on the 4th of the first 7 Ch., * 2 Ch., draw through the 2nd of the first 4 Ch. on the last stripe, 2 Ch.; 1 treble on the 1st of this 4 Ch., 1 DC. on the 4th of the next 7 Ch.; repeat from *. When you get to the end of the stripe take up 2 points together, then 3 points together, and so work the end, making the stripe lie flat round the middle one, then continue down the side, and work the other end, making it lie flat, and join the stripe carefully where you commenced.

19. Baby's Glove (Knitting).

YOU require for this white, partridge, and pink Shetland wool, a pair of No. 21 needles, and a pair of No. 19. Commence with the No. 19 needles and the white Shetland wool. Cast on 84 stitches, and knit 18 rows of knit 1, purl 1. In the next row, the 19th, join the partridge wool, and purl 1 row. The 20th row, knit 2 together throughout the row. The 21st row, knit 1;* knit a stitch in the thread between the stitch knitted and the next. Knit 1, repeat from *.—The 22nd row. Knit plain.—23rd row. Join the white wool and purl.—24th row. Knit 1; then knit 2 together throughout the row; repeat from the 21st row. Knit in this manner until you have 4 little rows of grey knots, and 4 of white; then take the foundation row and knit a row, joining it to the foundation at the same time, thus: Take up the first stitch on the foundation, and with it the first on the needle and knit together, take up the two next and purl together. When the row is finished, join the pink wool and work a row of Brioche, for this bring the thread forward, slip the first stitch as for purling, knit the next, which makes a stitch. Now knit the next row. For this work as follows: Bring the wool forward, slip the stitch which was knitted in the last row, then knit the slipped and the thread which lies over it together, knit 18 rows in this way; in the next row knit 1, purl 1, throughout, keeping the rib, and where the two stitches lie together, knit or net them together as required. Now take the finest needles, and with the grey wool knit 10 rows of purl 1, knit 1, keeping the rib; then with the pink wool and the largest needles knit 18 rows of Brioche again, work in exactly the same manner in commencing, then knit 2 rows of partridge in Brioche, 2 rows of white; knit 18 rows in this manner alternately of grey and white wool. In the next you commence the thumb. Throughout the rest of the glove the grey and white wool are used alternately, 2 rows of each, and the Brioche stitch is followed closely, * knit 9 ribs of Brioche, that is nine sets of three stitches, then turn back and knit them again; repeat from *, changing the wool until you have 20 stripes or 40 rows, then take 2 together on each side the row, then keep the rib and work 4 more rows; decrease again, work four more rows. Now with a rug needle and a small piece of single Berlin wool take all the stitches on the thread one by one, draw up tight, and tie together very firmly. When the glove is joined this must be well sewn over. Now join the wool to the last row left on the needle, and work alternate stripes until you have 30 stripes or 60 rows; then take the finest needles and work 10 more rows. Now take the stitches off in the same way as the thumb. Sew well together, and sew up the glove; then add a little fringe of swansdown round the bottom of the glove, and a bow of white ribbon on the grey stripe of Brioche which was worked between the pink ones.

20. Robe for Child of One to Two Years of Age (Crochet).

THIS little dress is intended for a child of from one to two years of age, and is worked in plain crochet tricotee. It may be crocheted in white Saxony wool, which is excessively soft and smooth, and not quite so thick as the single Berlin; in this wool it is a very soft and light little garment for a child, and in Scotch fingering it would make a very useful and acceptable Christmas present among our poorer neighbours. The skirt is made in two parts, the back and the front, which are sewn together. Those who do not object to a large piece of work in the hand may work it in one piece and gore it. Use a bone needle (No. 4) and some white Saxony wool. For the bottom of the back of the skirt make a chain of 108 stitches.—1st row. Take all these stitches up, and work them off in crochet tricotee. 2nd row. Take up the first 84 stitches, work back all but the last 24 of these 84, leaving 60 in the middle; then take up these 60 stitches and 8 more of the first row, being the first 8 of the 24 left in the 2nd row; work

back all and the first 8 of the 24 left at the beginning of the row, turn, work back all those taken up and 8 more of the first row; work back these and 8 more at the beginning of the row; turn, take up all the stitches raised in the last row and 8 more, then work them back, and continue this until the whole 108 stitches are raisd; now, when this is done, work 2 rows plain, taking up the whole number of stitches.—The next row will be the 4th if the outside stitches are counted; in this row decrease one stitch by taking up two loops together on each side the work, * then work 2 more plain rows, and in the following decrease as in the 4th; work in this manner, repeating from * until you have 52 rows or stitches on the outside, in the next row take up 2 stitches together throughout the row, on this work 2 plain rows; you should have now 37 stitches on the needle. You next work 9 rows, increasing one stitch on each side the needle; this is for the waist; then 13 rows plain, and after this, on the first 13 stitches work 4 small rows for the shoulder piece; then take up the last 10 stitches and work in the same manner. You now commence the front with a chain of 108 stitches, and make it in exactly the same manner as the back until you come to the 29th row. In this row you commence the opening for the front, so that you work only to the middle of the row, and then work back, decreasing only on the right-hand side of the work. Continue to work as you did in the back until the whole of the front is complete, making the left-hand side of the work even, and the increasings and decreasings on the right hand side only. When this half is complete work the left half increasing and decreasing on the left-hand side of the work, and keeping the right-hand side of the work even. When all is complete sew the back and front together. You next work the sleeve. For the top of the sleeve make a chain of 42 stitches. The first row plain. In the 2nd row take up 34 stitches only, and work back all but the last 8 stitches. In the next row take up the 34 stitches raised last and 4 more, work these back and 4 more, raise all the last stitches, and all those in the first row, work all back; 6 plain rows, in the next increase 1 stitch on each side; then work plain until you have 17 rows in all; then decrease one stitch on each side the middle stitch in every alternate row until you have altogether 30 rows; then shape the sleeve, as you did at the top, by leaving the 5 last stitches on each side, and in the next row take up all and work back; then a row of DC. crochet. Now join the sleeve, and then crochet with pink, and fasten off the following edge on the sleeve and round the bottom of the petticoat; 1 DC. in the first edge stitch, * 3 Ch., 1 DC. on the 2nd of the 3 Ch., 1 Ch., miss the next stitch, 1 DC. in the following; repeat from *. This edge must also be worked round the neck. You next work the trimming, which is in Russian crochet, in white wool, edged with the pink; work the trimming with 6 Ch., and work back on it 5 DC., 1 Ch., turn. Now work the 5 DC. in the next row from the back of the loop; make a sufficient quantity of this to go round the skirt, as illustrated, on the sleeves and waist, and then with the pink wool work 1 DC. on the first side, * 4 Ch., 1 DC. in the next row; repeat from *, turn at the end, and over every 4 Ch. work 7 D.C. Buttons are required down the front, with a string of soft pink ribbon in the neck, and a girdle of pink wool with pink tassels far the waist. The girdle is worked with the pink wool, using it double. Make 2 Ch., turn, work 1 D.C. in the first Ch., * 1 Ch., turn, work 1 DC. on the last DC.; repeat from * the length required. Make the tassels by winding the wool over a piece of card or wood, 4in. wide, or even over the hand. When nice and thick slip it off, and pass the wool through and knot all the threads together; pass it round and secure it well, then attach to the girdle.

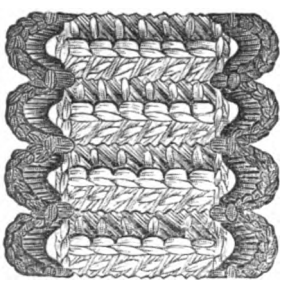

Fig. 20a.

21. Waistcoat for Boy of Seven (Crochet).

This waistcoat is crocheted in crochet tricotee, in double Berlin or fleecy wool. A quarter of a pound of crimson fleecy and two ounces of black are required for it; a wooden tricotee hook, No. 4 or 6. Make a chain of 88 stitches with the magenta wool. Work 21 plain rows. For working this tricotee do not take up the long loop as usual, but the little knot at the top of the loop; this is to be done throughout the whole waistcoat. After the 21st row you divide the work into three parts. For the first front, or the right-hand side of the work, take up the first 25 loops; work back.—23rd row. Take up all these loops again, work the two first off together, so decreasing one stitch, then work all the rest off plain.—24th row. Decrease one stitch at the end, the rest plain.—The 25th, 26th, and 27th rows plain.—The 28th row. Increase one stitch at the end before working the last stitch; this is done by working a stitch in the horizontal stitch before the last long loop; work all back.—29th row. Increase one stitch at the end.—30th, 31st, 32nd, and 33rd rows. Increase one at the end.—34th row. 3 Ch. at the end after the last loop, then take up three 3 Ch. on the needle, and work them off as long stitches; work back to the end of the row.—35th row. 3 Ch. at the end, and work off as in the last row, then 4 rows, decreasing one stitch at each end of the row. In the next row work 3 DC. in commencing, and decrease one stitch at the end of the row; then decrease one stitch at each end of every row until all are worked off; then fasten off.

Now take the last 25 stitches of the 21st row, and repeat this front, with this exception, that you make the decreasings at the beginning of the row in this front that were given at the end of the row in the last front, and *vice versâ*. For the back, commence on the 30th stitch of the 21st row, and take up all the loops until you have 4 left between these and the next front, work all off. In the next row decrease one stitch on each side the work, then 4 rows plain. In the following row make one stitch on each side, the next row plain, increase two stitches on each side in the next row, then a plain row; after this decrease 1 stitch in each row on each side of the work until there are only 4 stitches on the needle, then fasten off. Join the shoulders, then work all round the waistcoat 3 rows of DC. crochet, using the black double Berlin wool; in the last row on the right-hand side of the waistcoat make the buttonholes at equal distances, by working 1 Ch., and missing a DC. in the row below.

For the Sleeve.—With the black double Berlin make a Ch. of 16 stitches; on this work a row of DC., then work 8 ribs or 16 rows of double crochet, taking up each loop from the back of the stitch; fasten off. Now on the edge of this work with the coloured wool, take up 24 stitches, working them into the ends of the ribs; work back.—In the 2nd row increase one stitch at each end of the row, and also on each side the middle stitch.—3rd row. Plain.—4th row. Like the 2nd.—5th row. Plain.—6th row. Increase in the middle only.—7th row. Plain.—8th row. Like the 2nd.—9th row. Plain.—10th row. Like the 2nd.—11th row. Plain.—12th row. Increase in the middle only.—13th and 14th rows. Plain.—15th row. Increase 1 on each side only, then 3 plain rows.—19th row. Increase 1 on each side of the work, then 5 plain rows,—26th row. Increase 1 stitch on each side.—27th row. Plain.—28th row. Like the 26th row.—29th row. Plain.—30th row. Decrease 1 on each side of the middle stitch, then 3 rows plain.—34th row. Leave 6 stitches unraised at the end of the row, work all off but 6.—35th row. Leave 5 unraised at the end, work off all but the 5 last of the preceding row.—36th row. Leave 4 more unworked at each end.—37th row. Leave 3 unworked at each end.—38th row. Leave 3 unworked at each end.—39th row. Take up all the loops that have been left at the end of each of the previous rows, work all off on the needle, then work a plain row, and 1 row of DC. on this, and fasten off. Join the sleeve, and sew into the armholes, and add three or four buttons down the front.

22. Petticoat for Child of Two Years of Age.

This little petticoat is crocheted in scarlet and white wool; the petticoat is in white, and the border is in scarlet. For the petticoat cast on 40 stitches, work 10 rows plain (this is for the half of the front breadth), * in the next row take up all but four stitches, work back. Work this row four more times, then work four rows, leaving 5 stitches each time. The first row is only 5 stitches. In the next row take up all the stitches as they were left in each row until all are raised, then work 7 rows plain; work another gore as the last, repeating from *, then 8 rows plain, another gore like the last, then 20 rows plain. Now work a gore, beginning with 5 stitches, and gradually increase each row instead of decreasing as before, then 8 rows plain, a gore like the last, 8 rows plain, a gore like the last, then 10 rows plain, and fasten off. This last row is joined to the first, leaving an opening at the top when the border is worked.

For the border work 2 rows of scarlet crochet tricotee round the bottom of the petticoat, then 3 in white, 2 in scarlet, 3 in white, 2 in scarlet, 3 in white; now work the edge row in scarlet, * miss 1 loop, 3 treble in the next; repeat all round, and fasten off. You now join the wool to the last of the ten plain rows, and work the body, first working round the top of the skirt 2 rows in DC. stitches (there should be 72 stitches in the row); then work 8 rows in plain crochet tricotee; this brings you to the bottom of the armholes. Now divide the stitches as follows: Leave the first and the last 18 for each side of the front, and the middle 36 for the back; work the left side of the front first, work 16 stitches, work back, then 3 more rows like this; in the next 6 rows increase one stitch on the left-hand side of the work, then in the next row work 6 DC., plain on the left side, and work back, 4 DC., increase 2 on the left (this is done by making 2 Ch. and taking them up on the needle as loops), work back, 3 DC., increase 4 on the left in the same manner as in the last little row, then decrease one on each side the work until you come to one stitch, and fasten off. Work the other side the front in this manner, but reverse the increasings and decreasings. Then leave 4 stitches on each side of the 8th row from the fronts, and work the back in exactly the same way, but in one piece instead of in two. Of course, when the decreasings commence you must do it in two parts. Join the shoulders, work round the top, armholes, fronts, and opening 2 rows of DC. in scarlet wool; then the 3rd row, 1 DC. on the 1st DC. in the next row, * 4 Ch., 1 long on the last DC., miss 2 DC. on the row, 1 DC. on the following stitch; repeat from * and fasten off.

23. Necktie (Knitting).

White and sky-blue, ponceau, or grey double Berlin wool, and two long wooden needles, No. 7 or 8, are required. For this necktie, which is 4in. wide, and nearly a yard in length, cast on 88 stitches with the white wool. Knit 4 rows plain, backwards and forwards.—5th row. With the coloured

Digitized by Google

wool, 1 plain, * over, knit 2 together, repeat from *.—6th row. Purl. Repeat these 2 last rows alternately with the colour, to the 11th row. Then follow 4 rows with white, like the first 4, and the whole of the stitches are cast off plain. The ends of the neck-tie are drawn together, and finished with white tassels 4in. long.

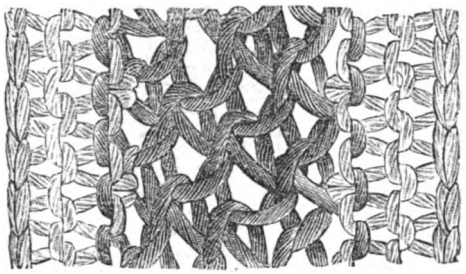

Fig. 23a.

24. Knitted Nightingale.

(By Miss E. Ryder, Richmond, Yorkshire.)

If a very warm wrap is wished for, knit this in double Berlin or fleecy wool; a medium one in single Berlin or fingering wool; and a light though warm one in the Scotch merino wool. About 11b. of wool will be required, but this depends on the length knitted. The usual sized nightingale when finished should measure two and a half yards in length. For the thick wool use needles No. 6 or 7; for finer, Nos. 9 or 10. As it is difficult, owing to people knitting so differently, to give the exact number of stitches to cast on, I think it best to direct that after you have fixed on the wool you mean to use and the size of the needles to correspond with it, you should cast on, say, 20 stitches, and, after plain knitting a few rows, measure by an inch tape what width this number of stitches gives you, then calculate by it how many stitches you must cast on to make your nightingale a yard wide, which it should fully be.

This nightingale is knitted in stripes. When you begin a fresh stripe, knit the *last* stitch in previous row with it, to enable you to slip the 1st stitch in each row, which otherwise you could not do. The different colours must never be knotted together when you commence a stripe, but break off a short length of wool, which afterwards fasten securely with a wool needle.

With Mauve Wool.—Cast on the number of stitches you will require. Knit 6 plain rows, slipping 1st stitch of each, excepting in the first row after casting on.—7th row. Slip 1, knit 3; * make 1, by throwing wool over the needle, slip 1, taking it off as if going to purl, knit 1; repeat from *. End with knit 4.—8th row. Slip 1, knit 3, * make 1, slip 1, knit crossed over loops together; repeat from *. End with knit 4.—With white wool. Repeat the 8th row 4 times.—With black wool. Repeat the 8th row 6 times.—With white wool. Repeat the 8th row 4 times.—With mauve wool. Repeat the 8th row twice.—25th row. Slip 1, knit 4! * knit crossed over loops together, knit 1; repeat from *. End with knit 4. Knit 5 rows plain. This finishes the stripe, and you commence again as at 7th row. Keep repeating these 30 rows until your knitting is long enough. End with 5 plain rows, and cast off to correspond with the casting on.

When the nightingale is finished turn back cuffs to make a kind of sleeve; form the hood at the back, putting bows of ribbon to hold it firmly down, and place ribbon to tie on the chest.

25. Boy's Scarf (Fancy Tricot).

Materials required: Violet double Berlin wool and a long tricot needle, the stem numbering No. 5 of the Bell gauge. This scarf, which is a yard and nearly a quarter in length, is crocheted across. Make a chain of 30 stitches loosely, and work backwards and forwards as in tricot.—1st row. * Bring the thread over the needle, raise a stitch in the foundation, take up the thread again, and draw it through the loop just raised; repeat from * 29 times more, being careful not to forget to take the thread over the needle between each stitch. In working back the thread is always to be taken through the stitch and the "over" at the same time, which with the loop on the needle will make 3 loops, except at the beginning and end of the row, when there will only be 2.—In the 2nd and all subsequent rows take the thread over the needle as before, and to raise the stitches * insert the needle under the two horizontal threads that lie between the long upright stitches of former row, bring the wool through in a loop, then take it up again and bring it through the loop just raised as in 1st row; repeat from *, taking care to have the same number of stitches in every row. Each row is worked back in the manner described for the 1st. When the length of the scarf is completed, work a row of double crochet at each end, into which the tufts for the fringe, consisting of 6 strands of the wool 6¼in. long are to be knotted in at regular distances. These are again to be knotted together an inch and a quarter lower down, taking 3 threads from each of two tufts.

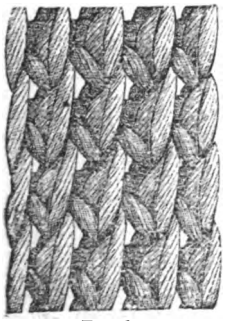

Fig. 25a.

26. Baby's Sock (Knitting).

Materials: 2oz. Shetland lambswool; 4 steel pins, No. 17. Cast on 72 stitches, 24 on to each of 3 pins.—1st round, plain knitting.—2nd round. Knit 2, knit 2 together, knit 2 together, knit 2, make 1, knit 1, make 1; repeat. Repeat these 2 rounds until 10 are done.—11th round. Knit 2, knit 2 together, knit 2 together, knit 3; repeat.—12th and 13th rounds, seamed.—14th and 15th rounds, plain knitting.—13th round. Knit 1, seam 1; repeat.—17th round. The same as 16th. Repeat from 14th round 6 times more. Take 20 stitches on one needle, and knit them in rows backwards and forwards in the same pattern as the leg. The alternate rows must be seamed for 28 rows; this forms the instep. Take the stitches that remain for the heel.—1st row, seamed.—2nd and 3rd rows, plain knitting.—4th row, seamed.—5th row. Slip 1, knit 1, * seam 2, knit 2; repeat, at the end knit 2.—6th row. Slip 1, knit 1, * knit the stitches that were seamed in last row, seam those that were knit, at the end knit 2.—7th row, the same as 5th.—8th row, seamed.—9th row, plain knitting.—10th row, seamed.—11th row. Slip 1, knit 1, * knit 2, seam 2; repeat, at the end knit 2.—12th row. The same as 6th.—13th row. The same as 11th.—14th row, plain knitting.—15th row, seamed.—16th row, plain knitting.—17th row, same as 5th.—18th row, same as 6th.—19th row, plain knitting.—20th row, seamed.—21st row, seamed.—22nd row, plain knitting. Divide the stitches on 3 pins, taking 16 from the centre on one, and 10 on each of the side pins. Knit from the 5th row of the heel till 20 are done, and with the last stitch of each row take one stitch off the side pin, and knit them together as one. Pick up 11 stitches down each side of the heel, these on each side of the 16 already on the pin to be knit in rows, and united to the insted by taking up a stitch from the edge of each row in the instep, and knitting it together with the last of sole. For the sole knit with two pins.—1st row, seamed.—2nd row, plain knitting,—3rd row. Slip 1, knit 2 together, knit to within 3 of the end, knit 2 together, knit 1.—4th row, seamed; repeat the 5th, 6th, and 7th rows of the heel.—8th row, the same as 3rd in sole. 9th row, seamed.—10th row, the same as 8th, knit 18 more rows in the same pattern without any decreasing. Take up 20 stitches across the instep, and knit in rounds 4 patterns, or 24 rows, decreasing at the beginning and end of the stitches for the sole in every 3rd row; knit a plain round, decreasing at the beginning and end of the stitches for the toe, knit a round without decreasing, knit another round, decreasing in the same place as the last, divide the stitches on 2 pins, placing the instep stitches on one, the sole on the other; cast off, taking a stitch from each pin. This completes the shoe. Take up 18 stitches across the instep, 18 down each side, and 36 round the heel, where it joins the leg, knit 3 plain rounds, and cast off. This forms a little roll, and makes the joints of the knitting neat. Shetland lambswool can be obtained from Miss A. C. Mee, 1, Langham-place, Regent-street, London.

27. Lady's Slipper (Crochet).

(By Miss M. Austin.)

Materials: Half ounce each of pretty pink and soft grey 4-thread German wool; one and a half ounces of a much darker pink; three ounces of white 4-thread fleecy, and a fine ivory crochet needle are required. For the medallion in front of slipper, make a chain of 7 stitches with grey.—1st round. Work a stitch of double crochet into each, work 3 stitches into the end, work down the other side of the chain the same number of stitches.—2nd round. Work into the centre one of 3 at the end a stitch of double crochet, make 1 chain, work another stitch of double crochet into the same place, * make 1 chain, miss 1 loop, work a stitch of double crochet, repeat from * till you come to the centre of 3 at the other end; work a stitch of double crochet, make 1 chain, work another stitch of double crochet into the same place, work down the other side to correspond.—3rd round. With pink work a stitch of double crochet into the 1 chain at the end, make 1 chain, work another stitch of double crochet into the same place, * make 1 chain, work a stitch of double crochet into the 1 chain in last round. Repeat from * till you come to the centre stitch of this side, then increase as at the ends; repeat from * till you come to the centre stitch of the end, increase as before, and work down the other side to correspond, working throughout a stitch of double crochet and 1 chain alternatively, the stitch of double crochet to be worked into the chainstitch of preceding round.—4th round. Increase at each end, only working into the chain between 2 double crochet 1 stitch of double crochet, 1 chain, and another of double crochet.—5th round. With grey, the same as 4th.—6th round. Increase at the ends, as in 4th round, and also in the centre stitch of each side.—7th round. With pink, increase at each end only.—8th round. Increase at the end, and in the 5th stitch from the end, also in the 5th stitch before the other end, work down the other side to correspond.—9th round. With grey, the same as 4th.—10th round. Increase in the second stitch before and after each end, also in the centre stitch of each end.—11th round. With pink, increase in the centre stitch of one end for the toe, and in the stitch before and after the centre stitch at the other end, working only once into the centre stitch at this end.—12th round. Increase in the centre stitch at the toe, work once into the next stitch, increase in the next, work once into each of the 5 next, increase in the next, * work once into each of the 4 next, increase in the next; repeat from * once, no increasing at the other end; work down the other side to correspond.—13th round With grey. Make a stitch of double crochet into the centre stitch at the toe, work once into each of the 3 next, increase in the next, work once into

each till you come to the centre stitch of the other end, increase in that, work down the other end to correspond.—14th round. Increase in the centre stitch of the first, increasing in last round, work once into each of the 3 next, increase in the next, work once into each of the 8 next, increase in the next, work once into each till you come to the centre stitch of the other end, increase in that, work down the other side to correspond.—15th round, with pink. Increase in the centre stitch of the first, increasing in the last round, work once into each of the 3 next, increase in the next, work once into each till you come to the centre stitch of the other end, increase in that and work down the other side to correspond.—16th round. Work a stitch of double crochet into one chain, make 5 chain, miss 3 loops (that will be 2 stitches of double crochet and 1 chain stitch), work a stitch of double crochet into the next 1 chain with pink, take up the grey wool, hold the loop of 5 pink chain down with your thumb, work a stitch of double crochet into the 1 chain missed, make 5 chain, work a stitch of double crochet into the 1 chain after the grey stitch of double crochet in pink, hold the loop of grey down, and take the loop of pink double crochet stitch on your needle, make 5 chain, work a stitch of double crochet into the next 1 chain; repeat these loops alternately of pink and grey to form an edge to the medallion, work a piece of ribbed crochet with the dark pink large enough to cover the shape of the front of the slipper, the ribs to go down the slipper, cut a piece of stiff linen to the shape of the front and cover it with the ribbed crochet, cut off any that remains over, stitch the medallion on to the centre of this by the last row, taking care to place it exactly in the centre, and that it is perfectly smooth. For the lining cast on 8 stitches with 4-thread white fleecy and pins No. 12.—1st row. Plain knitting.—2nd row. Knit 1, * insert the pin in the next stitch, wind the wool over the pin and the forefinger of the left hand, wind the wool over the pin only, and draw both loops through; repeat from * at the end, knit 1.—3rd row. Knit 1, * knit 2 together; repeat from *, at the end knit 1; repeat the 2nd and 3rd rows alternately, increasing 1 stitch at the beginning and end of the 3rd or plain row until 20 rows are done, knit 20 more rows in the same manner, but increasing at the beginning and end of every 4th row.—41st row. Knit 6 stitches only.—42nd. Decrease 1 stitch at the edge towards the centre; repeat these 2 rows until only 1 stitch remains, knit 6 stitches on the other side to correspond, knit 6 stitches in the centre, cast off 2 on each side, knit 2 stitches, cast off, sew this knitting neatly round the edge to the crochet, and work a row of loops along the upper part to match the loops round the medallion. For the sole knit with the same pins and fleecy as the lining, cast on 6 stitches, knit a plain row: repeat the 2nd and 3rd rows of lining alternately throughout, increasing and decreasing according to the following rule, keeping a plain stitch at the edges of the row with loops; increase to 8 and knit 4 rows with that number, increase to 10 and knit 10 rows, decrease to 8 and knit 8 rows, increase to 10 and knit 8 rows, increase to 12 and knit 4 rows, increase to 14 and knit 8 rows, decrease to 12 and knit 4 rows, decrease to 10 and knit 8 rows, decrease to 8 and knit 4 rows, decrease to 6 and knit 4 rows; cast off. This knitting for the sole must be done firmly, as loose knitting with loops does not answer. Sew the knitting on to a cork sole, and sew on the front; a row of loops worked round the part of the sole beyond the front makes a pretty finish; a bow of ribbon and buckle completes the slipper. This slipper worked in 8th German wool is large enough for a gentleman. The same rule may be followed for the lining, using 6-thread fleecy instead of 4.

28. Baby's Sock.

(By Miss M. Austin.)

Materials.—1oz. of white Shetland lambswool, ½oz. of white 4-thread German wool, and 1oz. of 2-thread white fleecy, a pair of pins, Nos. 10, 14, and 18. Cast on 9 stitches with Shetland lambswool and pins 18.—1st row. Knit 1, increase a stitch by picking up a loop, knit the remainder plain, cast on a stitch a stitch at the end.—2nd row. Make 1 by lifting the wool on the pin, knit the remainder plain.—3rd row. The same as the 1st the loop to be picked up from the stitch in the preceding row; repeat these two rows till 14 are done, then discontinue picking up a stitch at the beginning, but continue casting on a stitch at the end, and making 1 at the beginning of the following row, until 34 rows are done.—35th row, seamed.—36th row, plain knitting.—37th row. Slip 1, seam 2 together, * make 1, seam 2, seam 2 together, repeat from * 5 times more, seam 3, knit the remainder.—38th row. Seam 20, knit the remainder.—39th row. Slip 1, seam 2 together, * make 1, seam 2, seam 2 together, repeat from * 5 times, seam the remainder; repeat the last 4 rows until 4 rows of holes are made in the open part, then let off 19 stitches, and knit the remainder in the same way, the ribs from the toe till 16 are done, and the open part for the same distance; then cast on 19 stitches, knit the whole number of stitches till four more rows of holes are done, continuing the ribs for the toe at the same time, then knit 34 rows, the same as at first, but decreasing where it was increased before; when only 9 stitches are left, cast off, take up 34 stitches along the increased part of the foot that forms holes, and knit 8 rows, cast off, this forms a small piece for shaping the sole better; in sewing up the shoe the end of these rows at the toe end should be sewed to the centre ribs of the toe, and the remaining ribs folded to meet the casting off; take up the 19 stitches that were let off and the 19 cast on, take up 16 across the instep, put all on to one pin, knit 5 plain rows.—6th row. Knit 2, * make 1, seam together; repeat from *; at the end knit 2. Knit 6 rows.—13th row, seamed—14th row. Slip 1, knit 6, * make 1, knit 2 together, knit 3; repeat from * 8 times; knit the remainder.—15th row. Slip 1, seam the remainder, knit the last.—16th row. Slip 1, knit 5, * make 1, knit 2 together, knit 3; repeat from * 8 times, knit the remainder plain.—17th row. Same as 15th.—18th row. The same as 16th, but 4 knit at the beginning instead of 5.—19th row. Same as 15th.—20th row. The same as 16th, but 3 knit at the beginning instead of 5.—21st row. Same as 15th. 22nd row. Same as 16th, but 2 knit at the beginning instead of 5.—23rd row. Slip 1, seam the remainder.—24th, 25th, 26th, and 27th rows, plain knitting; knit 4 rows in ribs of 2 and 1; knit 4 plain rows, cast off. For the piece that turns over at the top cast on 32 stitches with white 4-thread German wool and pins No. 14.—1st row. Knit 2, * make 1, knit 2 together; repeat from *.—2nd and 3rd rows, plain knitting.—4th row, seamed. Repeat from 1st row until three rows of holes are made, knit 6 plain rows, cast off, sew the plain part of the knitting to the top of the leg, the rows of holes to turn over to the right side. For the lining, cast 6 stitches on each of 3 pins, No. 10, with white fleecy, knit 12 rounds, take 4 stitches for the heel turn, seam these, increasing in the two centre stitches, and with the last knit the next stitch to the 4 taken for heel together as one, turn, knit 5, and with the 6th knit the next stitch together with it as one, repeat this till 4 have been knitted off, knit the stitches that remain in rounds for 4 rounds, divide the stitches on two needles, decrease in the centre of back till only 3 remain on each needle; take a rug needle, and run the fleecy through these stitches and draw them up for the toe, this knitting is slipped over the wrong side of the knitting for the shoe, and tacked at the top it makes the shoe very warm for winter wear, and can be taken out in summer.

29. Jacket (Crochet) for Child of One Year Old.

This jacket is worked with Shetland wool, and a bone crochet hook No. 8. Make a chain of 128 for the bottom of the jacket; the 36 stitches at the beginning and end are for the front, the 56 in the centre for the back. Work 15 rows of plain crochet tricotée to the armhole, and in every second row decrease one stitch, taking up the 36th and following stitch together, and the corresponding stitches at the end of the row; make the decreasing in the same place throughout the back. After the 15th row continue the first front. Work for this 34 stitches, work back; in the next row raise 32 stitches, work back. Now work 12 rows plain, then decrease one stitch in every row on the left-hand side for the shoulder; in the 7th row of the shoulder work 5 stitches in commencing in DC., still decrease at the end, and in the next and succeeding rows decrease one stitch on each side the work until all are finished; fasten off. Now work the back. In the 16th row leave 4 stitches from the front, and raise the stitches until you come to 38 from the end. Then work 14 rows plain, after that decrease one stitch on each side the work for 9 rows, and fasten off. The left front is worked in the same manner. Work the other front like the first, only reverse the decreasings. The sleeve: You commence with a chain of 44 stitches, work a row.—2nd row. Raise 32 stitches, work back 20.—3rd row. Raise 16 stitches, work back 12. Now raise all the stitches, then work all off. 9 rows plain, then decrease one stitch on each side the middle stitch in every other row for 8 rows, then raise all the stitches but 3 in the next row, work back all but 3. Then leave 3 more unraised at the other end, work back all but 6; now raise all, and work all back, and fasten off. The border is also worked in tricotée, and is sewn on. Make a chain of 11 stitches on this, work with white wool 10 stitches for the first row.—2nd row. Increase 1 stitch and work beside 3 more white stitches, the rest in grey wool, work back. In the third row increase 1 stitch, and 4 more in white, the rest in grey. The 4th and 5th rows increase as in the 2nd, but work entirely in white; then for the 6th row, work 4 DC. in white on the first 4 loops, and take up all the rest in plain tricotée; now work from the 2nd row. When the length required is finished work round the edge with a row of DC. in black wool, and a row of chain in black round the little squares of grey. In the neck you work a row of DC., and then turn, * 4 Ch., treble on the 3rd of the 4 Ch., miss 2 Ch., 1 DC. on the following, repeat from *, and fasten off at the end. Add a cord and tassels.

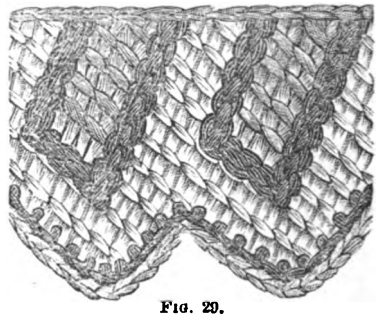

Fig. 29.

30. Cardigan Vest, with Long Sleeves.

(By Miss E. Ryder, Richmond, Yorkshire.)

This vest is knitted in Scotch fingering wool, with 2 needles, No. 10 (See Bell gauge.) It looks well knitted in single Berlin wool. Above a pound of wool will be required. You will also want 2 needles, No. 12, for the wrists, and 2, No. 14, for the vest trimming. This is an average-sized vest, but can easily be enlarged or reduced. Cast on 190 stiches.—1st row. Slip 1, knit 2, * make 1, slip 1, knit 1; repeat from *. End with knit 2. You

Digitized by Google

make 1 by throwing the wool over the needle, and take off the slipped stitch as if you were going to purl it.—2nd row. Slip 1, knit 2; * make 1, slip 1, knit 2 together. The crossed-over stitches are the 2 knitted together. This forms the *brioche* pattern. Repeat from *. End with knit 3. Repeat the 2nd row until you have knitted a length of 15 inches, or whatever length you wish the vest to be from under arm to the bottom.

To Divide the Knitting for Sides and Back.—For side: Slip 1, knit 2. Brioche, that is, make 1, slip 1, knit 2 together, 20 times. You next cast off for armhole thus: Knit 1, knit 2 together, pull the first of these over the second, knit a 3rd loop, and do the same; continue knitting and pulling over (always knitting the crossed loops together) until you have cast off 12 stitches. For Back: Knit 1, knit 2 together, then brioche pattern 39 times. Cast off 12 stitches as you did before, and for next side knit 1, knit 2 together, brioche pattern 19 times, and end with knit 3. You have now divided your vest for the sides and back. Each of these is knitted separately. You can use a third needle or not as you like.

First Side.—1st row. Slip 1, knit 2. Brioche pattern, repeated as far as armhole.—2nd row. Brioche pattern, ending with knit 3. Repeat these 2 rows until you have a depth of 7 inches.

To Shape for Shoulder and Neck.—You must begin this 1st row at armhole side.—1st row. Slip 1, knit 2 together, brioche, and end with knit 3.—2nd row. Slip 1, knit 3, knit 2 together, brioche, end with knit 2.—3rd row. Knit 2 together, brioche, end with knit 5.—4th row. Slip 1, knit 2, knit 2 together, brioche, end with knit 1.—5th row. Knit 2 together *twice*, brioche, end with knit 4.—6th row. Slip 1, knit 2, knit 2 together *twice*, brioche, end with knit 2. Repeat from 3rd row inclusive until you have only 7 stitches left, plain knit, and reduce 1 each row until only 2 remain, when knit them together and draw the wool through to cast off.

Back.—Begin to work this at armhole nearest the side you have finished. Repeat the brioche pattern every row until you have a length of 7 inches, same as at side.

To Shape the Shoulders at Back.—1st row. Slip 1, knit 2 together, brioche.—2nd row. Slip 1, knit 2 together, brioche, end with knit 2.—3rd row. Knit 2 together, brioche, end with knit 2.—4th row. Knit 2 together, brioche, end with knit 1.—5th row. Knit 2 together twice, brioche, end with knit 1.—6th row. Knit 2 together *twice*, brioche, end with knit 2. Repeat from 3rd row inclusive until you have the same length of slant for shoulder as you have at the side. Cast off; in doing so knit the crossed stitches together.

Second Side.—Knit this to correspond exactly with the first. Sew up on each shoulder.

Knitted Band, which is placed up both sides of vest and along neck. This is knitted with needles No. 14. Cast on 16 loops.—1st row. Slip 1, knit 1, * purl 1, knit 1; repeat from *, end with knit 3.—2nd row. Slip 1, knit 2, * purl 1, knit 1; repeat from *, end with purl 1, knit 2. Repeat these 2 rows until you have a length of half an inch. To make your button-hole in the next row knit as directed the first 6 stitches, then *cast off* the next 4, and knit the remaining six as usual. In the next row knit as usual the first 6 stitches, then *cast on* 4 to replace the ones cast off in previous row, and finish your row as usual. Repeat the 1st and 2nd rows until you have done about 2in, then make button-hole again. About 8 button-holes will be required (by measuring you will soon see how many), and afterwards you must knit a sufficient length without any to go round the neck and down the other side. The band should be lined and bound with braid before putting on; this is best done by a tailor, who will also work over the button-holes.

Sleeves.—Cast on 60 or 68 stitches if wished wide. Needles No. 10.—1st row. Make 1, slip 1, knit 1; repeat.—2nd row. Make 1, slip 1, knit 2 together; repeat. Continue the brioche pattern until you have made the sleeve as long as you wish it, excepting 4in., which 4in. knit the same, only with needles No. 12 to draw in the wrist; then cast off. When you sew up the sleeve, leave at the top about 2in. unsewn; these inches, when you put in the sleeve, you sew along the cast-off stitches of armhole (putting the seam exactly in the centre), and it gives room for the arm.

Pockets.—Cast on 24 stitches. In brioche stitch, knit the depth you require, then cast off. The pockets must be bound at the top with braid.

31. Jacket for Child of from Three to Four Years of Age.

THE jacket itself is crocheted in crochet tricotée in blue eider yarn, or single Berlin wool. A border is worked all round, which is in black, white, and grey, or partridge wool; use a bone crochet hook, No. 4. The jacket is commenced with blue wool, and a chain of 139 stitches, and a wooden needle No. 3. In this pattern the jacket is nearly tight fitting in the back, and to form this shape it is decreased on each side of the middle stitch. Work one row plain, then mark the middle stitch of the 139, which is the 70th, and also the 33rd from the beginning and end of the work. Work 17 rows, and in the 3rd, 6th, 9th, 12th, and 15th of the same rows decrease one stitch on each side of the middle stitch, and also before the 33rd and after the 106th stitch. In the 17th row you divide the work, and work the back and fronts separately. Leave the 33 stitches on each side for the two fronts, and then work the stitches in the centre for the back, decreasing one stitch on each side the middle, as before, and leave the two first and two last stitches in the row unworked. You now work 16 rows for the back, still decreasing every 3rd row in the middle of the back. You then work 7 rows for the shoulders, and decrease one stitch on each side of the work every row, still decreasing in the back every 3rd row. In the 8th row raise 5 stitches, work back; then raise 3, taking the two first together, work back; now raise all the stitches to the end of the row, work back 3 only, raise these three again, taking the 2 first together, work back 5, raise these 5 again, and work all off; then a row of crotchet, and fasten off. You now finish each of the fronts. Take up the left side front first, work the 2 first stitches in DC., the rest of the row in tricotée. The next row is worked in tricotée, taking the two first stitches together work 12 rows plain. In the next two rows increase one stitch in commencing; in the following row before you raise the stitches make 3 Ch., take up these stitches as loops, and finish the row; then the next row plain. Now work rows for the shoulder, decreasing one stitch in commencing every row; in the next row leave three stitches unraised, in the following rows decrease on the left-hand side of the work as well as the right-hand side, until all the stitches are worked off. Finish the other front, reversing the side for increasing and decreasing. Next work the sleeve: for this make a chain of 40 stitches, work 1 row plain; in the 2nd row raise 37 stitches, work back 34, then raise 30, work back 27, raise 24, work back 21, now raise the whole number again, taking them up in each row, then work all off on the needle; then work 25 rows plain, in the 20th of these 25 rows decrease 1 stitch on each side the middle stitch, and in each of the 4 succeeding rows; finish with a row of DC. crotchet. You next work the border round the jacket and in the neck, it is worked in DC. An engraving is given of it in an enlarged size. In the 1st row work an alternate stitch regularly of one in black wool and one in white wool, in DC. crotchet.—2nd row, work one white and one black.—3rd row, white wool.—4th row, with grey wool.—5th to the 7th rows, as the first, but make the stitches in the 6th and 7th rows come just between the stitches of the preceding rows, in order to give the slanting appearance.—8th row, with grey wool.—9th row, with white wool.—10th row, with one stitch black, one stitch white.—11th row, one stitch white, one stitch black.—12th row, with the blue wool, 1 DC. on the 1st stitch,* 4 Ch., 1 long on the 1st of the 4 Ch., miss the next 3 Ch., 1 DC. on the following, repeat from *. When the border is finished round the jacket, work the same round the sleeves, add a cord and tassels, which should be made of the wool.

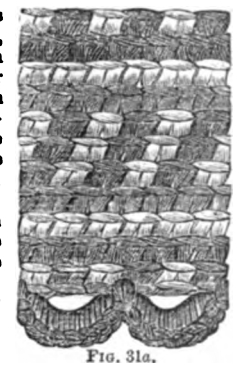

FIG. 31a.

32 and 33. Embroidered Borders.

THERE are several ways of copying these borders. They may be reproduced with cretonne chintz on écru linen ground. They may also be worked with either fine braid or cord (both beaded), and sown close to each other. If the colours are well selected the effect is first-rate.

Another manner is to reproduce the flowers in chain stitch, working the rows close to each other. They can also be embroidered in satin stitch after well padding the flowers. These borders may be worked either on ticking, cashmere, cloth, or écru, and are useful for curtains, footstools, chairs, &c.

34. Border (Crochet).

YOU require for this border Ardern's cotton No. 30, and a very fine crochet hook. Each spray of ovals is worked separately, and they are joined to each other as you finish them. Begin with a chain of 15, unite; in this ring work 6 DC., * a picot of 5 Ch., 1 single on the last DC., 1 DC. in the ring, repeat from * 5 times, then 6 DC. in the same ring, 7 Ch. for the stalk, then 15 more Ch., join with a single on the first of the 15th Ch., 6 DC. in the ring 2 Ch., join to the last picot in the last oval, drawing the cotton through the 3rd Ch. in the picot, 2 Ch., 1 single on the last DC., 1 DC. on the ring, now work the remainder of the ring like the last, repeating from the first *. After a third oval is finished, work two more close to the third, joining them together in the first picot, then 1 DC. on each of the last 7 Ch., an oval as before, joining to the last oval, 1 DC. on each of the next 7 Ch., an oval as before, then 8 Ch., 1 single on the first of the first 7 Ch., to form the picot at the top of the spray. Work as many of these sprays as you require; join them together in the three centre picots of the ovals. When all are finished work a DC. in the 2nd picot on the first oval in the first spray, * 2 Ch., 1 DC. in the next picot, 5 Ch., 2 DC. in the middle of the loop of 8 Ch. at the top of the spray, 5 Ch., 1 DC. on the first picot in the next oval, 2 Ch., 1 DC. in the following picot, then 5 Ch., 1 DC. on the 2nd picot in the next oval, and repeat from *.

35 and 42. Squares (Guipure d'Art).

THESE two engravings represent a fourth only of the designs which forms a very handsome antimacassar or covering for a cushion. Ainsworth's

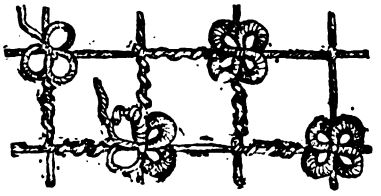
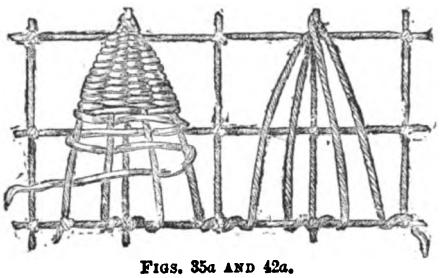
33. Border (Embroidery).

Digitized by Google

thread is the best for working these squares. When the netting is worked frame it, work the centre first, then the border. The stitches used in



FIGS. 35a AND 42a.



FIGS. 35a AND 42a.

the latter, and the mode of working them, are given in a large size in the two details we have engraved.

36. Insertion (Tatting).

THE centre part of this pattern is worked first. Commence with the large oval, * work 8 double, a long purl, then 2 double, a long purl, 3 times, 8 double, draw up; now a small oval of 10 double, draw up, then leave the 8th of an inch of cotton, and repeat the first large oval from * the length required.—2nd row. Join the thread to the first long purl on the oval, work an oval of 10 double, draw up, * knot the thread to the next purl stitch, then work close together, 3 ovals, each of 5 double, 1 purl, 2 double, 1 purl, 2 double, 1 purl, 2 double, 1 purl, 5 double, and join each oval to the one preceding it on the first and last purl stitches; at the end of the 3rd oval join to the top of the next long purl on the 3rd large oval, then knot to the 2nd purl, work an oval of 5 double, knot to the purl on the next oval, 5 double, draw up; now repeat from *, then work this 2nd row on the other side, taking up the alternate large ovals that form the centre of the pattern.

37 and 39. Insertions (Tulle Embroidery).

THESE insertions are in great demand, as they are so much used for black and white net or tulle dresses. The pattern No. 39 should be worked in bright colours, the double line forming the pattern in two shades of bright blue. The inside of the pattern is filled in according to taste with shades of red; the dots are in gold, and the outline in red.

The pattern No. 37 work in shades of green for the leaves and red for the flowers. These designs cannot be made too bright. The manner of working is as follows: Draw the pattern on prepared linen, tack on the net, and darn over the pattern.

38. Medallion (Lace Braid and Crochet).

YOU commence this medallion by working the centre first. This is then laid upon a piece of paper; the braid is sewn to it after the pattern, and the edge is crocheted to the braid. Commence in the centre with a ring of 8 Ch.—1st round. 3 Ch. for the first treble, * 1 Ch., 1 treble in the ring, twice, then 3 Ch., 1 treble in the ring, repeat from * 3 times, then 3 Ch., 1 single on the 3rd Ch. at the commencement, turn.—2nd round. Work 1 single in the 2nd of the last 3 Ch., * 6 Ch., 1 single in the middle of the next 3 Ch. in the last round, then 5 Ch., 1 DC. in the 3 Ch. 5 times, repeat from the last *; at the end fasten off.—3rd round. 1 DC. in the middle of the 3rd loop of the first set of 5 loops of Ch., * 8 Ch., 1 DC. in the middle picot of the next 5 loops, repeat from *.—4th round. DC. increasing to keep flat.—5th round. 4 Ch., * miss 1 DC., 1 treble on the following, 1 Ch., repeat from *, increase by working the treble in the next stitch when necessary; fasten off at the end of the round; twist the braid as illustrated in the engraving; work in the inner round 5 DC. on the fold of the braid, * 2 Ch., miss a stitch, 1 DC. in the following; repeat from *.—2nd round. 1 treble on the 1st DC. in the last round, * 1 Ch., miss a stitch, 1 DC. in the following; repeat from *.—3rd round 1 DC. on the next stitch, * miss a DC. in the following, work 5 Ch., 1 DC. 5 times, miss a DC., 1 DC. on each of the next 7 stitches; repeat from *, joining to the piece already worked in the middle loop of 5 Ch. On the outside of this twist of braid work 5 D.C. on each point of braid, then * 4 Ch., a picot worked to fall under of 5 Ch.; this is done by taking the hook out of the last Ch. stitch, insert it in the first of the 5 Ch. worked for the picot, and draw the last Ch. through the first, then 4 Ch., 5 DC. on the next point; repeat from *.—2nd outside round. 1 treble on the 1st DC., * 2 Ch., miss a stitch, 1 treble on the following; repeat from *.—3rd round. Work a leaf between the two first trebles of * 5 loops of 5 Ch., 1 DC. over the Ch. in the last round; then work in DC. over each of the next 3 trebles and in intervening chain stitches, and repeat from *.

40 and 47. Jetted Point Lace.

THIS style of work is quite a novelty, and will be very acceptable to those who desire a quickly made, fashionable, and effective trimming for mantles and dresses. It has been introduced from Paris by Mr. Bedford, of 186, Regent-street, who supplies all the materials for it, and has a great variety of designs for insertions, flounces, and narrow trimmings, prepared especially for this lace. The materials required to carry out the two designs are a fine black thread braid manufactured expressly for the work, and called "Granada braid," skeins of soft ingrain black silk, and black cut beads. The designs should be traced on leather, not on coloured cambric, as when the latter material is used, the braid being heavier than the cambric, it is apt to pucker it, and the lace in consequence looks most uneven when finished. It is also impossible to add beads when cambric is the foundation, as the needle inevitably passes through it when taking up the braid, and when removing the lace from the cambric the beads fall off, as the worker is obliged to cut the threads.

41. Square for Antimacassar (Tatting).

THIS square is composed of a cross-band of lace braid, and fine tatting; two shuttles are required; Ainsworth's thread No. 60. Make the braid the shape illustrated, and sew neatly. You commence with the ring in the centre of the corner, and for this work 3 double, a long purl, 2 double, a long purl, 2 double, a long purl, 3 double, a small purl, then 2 double, a small purl 4 times, draw up. Work close to this, join with the shuttle a large oval of 5 double, 1 purl, 5 double, then 1 purl, 2 double, twice, 5 double, 1 purl, 5 double, draw up, miss the next small purl on the round, join to the next purl, and work another oval like the last, miss the following purl, and work the third oval, then fasten off; fill in all these corners in the same manner, sewing the tatting in its place, then work the outside round with the 2nd thread. Commence on the top of the large oval to the left of a corner, * work over the 2nd thread, 5 double, 1 purl, then 1 double, 1 purl, twice, 3 double, join to the next purl on this oval, 2 double, 1 purl, then 1 double, 1 purl, twice, 2 double, join to the next purl, 3 double, join to the purl unused on the round, 5 double, join to the purl on the next oval, 3 double, 1 purl, then 1 double, 1 purl, twice, 3 double, join to the next purl, 3 double, 1 purl, then 1 double, 1 purl, twice, 3 double, join to the purl at the top of this oval, 2 double, 1 purl, then 2 double, 1 purl, twice, 3 double, join to the next purl, 3 double, 1 purl, then 2 double, 1 purl, twice, 5 double, join to the next purl on the oval, 3 double, join to the purl on the ring, 4 double, join to the next purl on the oval, 2 double, 1 purl, 3 times, 2 double, join to the next purl on the oval, 3 double, 1 purl, then 2 double, 1 purl, twice, 2 double, join to the top of the oval close to the braid, 3 double, 1 purl, then 2 double, 1 purl, 4 times, 3 double, join to the oval on the other side the braid, and repeat from *. These squares should be joined together by the centre and corner ovals and purl stitches.

43. Crochet and Cordon Braid.

Two pieces Cordon braid, one dozen reels of Messrs. Walter Evans and Co.'s Boarshead cotton, No. 16, and a steel crochet needle are required. Make a chain the length you wish the trimming to be.—1st row. Work 1 long stitch into the 1st loop, * make 1 chain, taking up a loop of the braid with it, miss 1 loop, work a long stitch into the next, make 1 chain, taking up a loop of the braid with it, miss 1 loop, work a long stitch, take up a loop of the braid with it, work a chain stitch and long stitch alternately till 3 of each are done; miss 18 loops of the braid; repeat from *.—2nd row, Make 3 chain, with the next chain take up the 5th loop of braid from the one first worked into, * make 1 chain across the braid, keeping the cotton at the back of the braid, make 3 chain, with the next take up the 11th loop of the braid; repeat from *. Work a stitch of single crochet into each loop of the braid inclosed by the bar of chain stitches.—3rd row. Work into the centre loop of the outer curve of braid a stitch of single crochet, make 3 chain, take up the third loop from the needle, draw the cotton through that and the loop on the needle, make 1 chain, work a stitch of single crochet into the next loop of braid, make 2 chain; take another piece of braid, work a stitch of single crochet into one loop, keeping this braid above the chain, make 1 chain with the next, take a loop of the upper braid, make 2 chain, work a stitch of single crochet into the loop of braid before the centre one in next curve, make 1 chain; repeat. Take a loop of the 2nd braid, leaving 4 loops of braid before the crossing of the oval and 22 loops inside it. Unite the upper braid after each curve as above, then work into the loop of braid, taking the inner loops. Begin where the braid crosses, work a stitch of double crochet, taking up a loop from each side. Take up the two following loops together, and work a stitch of double crochet. Work a stitch of double crochet into each of the four next loops, work a

Digitized by Google

stitch of double crochet, taking up two loops at a time, 4 times following. Work a stitch of double crochet into each of the 4 next loops, work a stitch of double crochet, taking up 2 loops, * work a stitch of double crochet, taking up 2 loops: repeat till only 8 stitches remain. Work into the outer circle of braid, take up the 3 loops of braid from the centre, work a stitch of double crochet, make 5 chain; repeat this in the 5 following loops, unite the next loop of braid to the corresponding one in the next circle; repeat. The Cordon braid must be of fine quality.

44 and 46. Borders (Guipure D'Art).

A GROUND of ten stitches wide is required for these two borders. The netting can be worked in scollops to correspond with the engraving, but it is a far better method to net it the full width, and embroider in buttonhole stitch over the edge. The stitches are so well known, and the engravings so clear, that it is unnecessary to describe them further. In border No. 46, the manner of netting the netted foundation was fully described in the *Queen Almanac* for 1874.

45. Medallion (Point Lace and Embroidery).

YOU require for this pattern a short length of point lace braid, Ainsworth's thread, No. 90, and the finest size of the Penelope crochet hook. You trace the design for the braid upon stiff paper or prepared linen, and on it tack the braid, running the corners into the proper shape, and work round the inside of the braid with DC. stitches. You commence the crochet with the little star in the centre of the square of braid. 4 Ch., join into a ring, * 1 DC. on the ring, a picot of 5 Ch., 1 single on the first of the 5 Ch., 1 Ch., 1 DC. on the corner of the braid, 1 Ch., a picot, 1 Ch., repeat from * 3 more times, then fasten off securely. You now join the thread to the centre of one of the four sides of the square; work 1 Ch., a picot of 5 Ch., 8 Ch., join with a single crochet to the right-hand corner of this side of the square, work over the last 4 of this 7 Ch. with 4 DC., stitches, 4 Ch., join with a DC. to the braid above; look at the engraving and insert the needle at about the same distance as the bar illustrated in it; if this number of Ch. does not fill the space, work one or two more, or less, as the case may be. Over this 4 Ch. work 5 DC., then 1 DC. on the 3rd to the 1st of the last 7 Ch., 1 Ch., 3 picots each of 5 Ch., 1 Ch., join to the top of the oval of braid with a DC., 1 Ch., 3 pricots, 1 Ch., 1 single on the 1st of the 8 Ch., turn the work 7 Ch., join to the left-hand corner of this side of the square, over the last 4 of this 7 Ch., work 4 DC., then 4 Ch., join to the braid again for the second bar, work 5 DC., over this 4 Ch., 3 DC., over the 7 Ch., join with 1 single to the 1st DC. over the first 7 Ch., then 1 Ch., a picot, 1 Ch., and join again to the square of braid on the same stitch where you commenced, and fasten off very neatly. Repeat this on each side the square. You next work the rounds outside the scollops of lace braid. 1st round. Commence with a DC. at the top of one of the scollops, and work round the braid in DC. until you come to the 2nd space in the braid from the corner, 3 Ch., 1 DC. on the next scollop, beginning at exactly the same distance from the corner on this side, work 10 DC. on this scallop; this should bring you to the bar which is illustrated in the design as lying over this corner, if not work one or two more stitches; then 9 Ch., 1 long, or the thread twice round the needle, on the DC. before the 1st of 3 Ch., 1 long on the DC. just after the 3rd Ch., 9 Ch., 1 single on the corresponding stitch of the scallop on which you commended. With the DC. stitch which you last worked on the 2nd scollop, turn, work over each of the 9 Ch. 15 DC., then work on the 2nd scollop again in DC., and repeat all round.—2nd round. 1 DC. on the next DC. in the last ground, * 5 Ch., miss 2 DC. 1 DC. on the following, repeat from * all round; you must have in the round 64 loops of chain.—3rd round. 1 single on the 3 first of the first loop of 5 Ch., 6 Ch., 1 treble on the 3rd of the next 5 Ch., * 3 Ch, 1 treble on the 3rd of the next 5 Ch., repeat from *. At the end of the round work 1 single on the 3rd of the first 6 Ch.—4th round. * 3 Ch., miss the next treble, 2 long on the following treble, 3 Ch., 2 long on the same stitch again, 3 Ch. 2 long on the same stitch again, 3 Ch. Miss the next treble, 1 DC. on the following, repeat from *.—5th round. * 5 DC. over the first 3 Ch., a picot, 2 DC. over the next 3 Ch., a picot, 2 DC. on the same 3 Ch., a picot, then 2 DC., a picot, 2 DC. on the next 3 Ch., a picot, 5 DC. on the last 3 Ch. Repeat from * on the next little scollop, and fasten off at the end. These rounds joined together make an antimacassar or cushion as effective as lace.

48. Edging (Crochet and Cordon Braid).

THREE pieces of fine Cordon braid, 8 reels of Messrs. Walter Evans and Co.'s Boarshead cotton, No. 20, and a steel crochet needle are required. Pass a needle threaded with the cotton through 7 loops of the braid, and unite them into a circle, pass the cotton through the wrong side of the braid, miss 2 loops of the braid on the other side, and pass the needle through the next 7 loops, unite them in a circle, and continue in this manner until you have made the length of trimming required. For the heading miss 4 loops from the first circle, work a stitch of single crochet into the 5th, make 1 chain, work a stitch of single crochet into the next loop of braid, make 4 chain, and repeat.—2nd row. Work 1 long stitch, and make 1 chain stitch alternately, missing 1 loop between each long stitch. For the festoon—1st row. Work a stitch of single crochet into the 5th loop of braid from the first circle, make 2 chain, work a stitch of single crochet into the next loop, make 9 chain, turn, miss the first chain, and work 4 stitches of double crochet into successive loops, make 6 chain, turn, miss the first chain, work 5 stitches of single crochet into successive loops, make 1 chain, work 5 stitches of double crochet into successive loops on the other side of the 6 chain, work 3 stitches of double crochet into the point, and 1 of double crochet into each of the single crochet down the other side, work a stitch of single crochet into the 1 chain which crosses the leaf, make 5 chain, turn, miss the first, work 4 stitches of double crochet into successive loops, make 1 chain, work a stitch of double crochet into each loop on the other side of the 4 chain just worked into, work a stitch of single crochet into the point, turn the work, make 9 chain, work a stitch of single crochet into the point of centre leaf, make 9 chain, work a stitch of single crochet into the point of first leaf, work a stitch of double crochet into each 4 chain in first leaf, turn the work, and work a stitch of single crochet to unite the 1st and 3rd, and 3 stitches of single crochet into successive loops of 9 chain, made at the beginning of the row. Make 1 chain, work a stitch of single crochet into the 5th loop from the next circle of braid, make 2 chain, work a stitch of single crochet into the next loop, make 3 chain, and repeat from the beginning of the row.—2nd row of festoon. Make 3 chain, * work 3 stitches of single crochet into successive loops, beginning on the one of single crochet in point of first leaf, make 5 chain, turn the work, and work a stitch of single crochet into the 5th chain from the needle; miss 1 loop, repeat from * 4 times, working into the loops of 9 chain and the stitches of single crochet at the points of the leaves; make 3 chain, work a long stitch into each of the 3 chain between the circles in the first row of the festoon; repeat from the beginning of the row.

49, 51, 55, and 57. Honiton Lace Sprigs.

Designed by Mrs. TREADWIN, of Exeter.

HONITON lace makers have decidedly improved their designs of late years, and much is due in this respect to the exertions of Mrs. Treadwin. Not many years ago Honiton guipure was an assemblage of impossible fancy leaves and flowers, indiscriminately joined together in the worst or no taste. In the Continental markets it was laughed at, and even the English public, which stands a great deal in matters of national art workmanship, would buy it no longer. The London lace manufacturers, as they style themselves, although their business chiefly consists in *buying* the handiwork of the Devonshire lace women at the lowest possible price, were obliged to look out for patterns more suitable to a taste which International Exhibitions and the teachings of South Kensington had rescued from utter debasement. The new designs were either copied from natural flowers or selected from ancient Flemish laces, the sprigs of which, with all their conventionalities of shape, still produce the most harmonious effect when skilfully arranged.

Our four illustrations represent sprigs, designed by Mrs. Treadwin; these may be used singly or in groups for many combinations, and to suit the most fastidious taste. We cannot enter into the technical details of the work, and must refer our readers for this purpose to Mrs. Treadwin's book on "Honiton Lace," published by Ward, Lock, and Tyler, 1874.

For adepts in the art of cushion work, we may add that the patterns can be worked with the best Honiton lace thread No. 195; or, if required of a more substantial appearance, with thread No. 175. Patterns ready pricked are supplied by Mrs. Treadwin, Cathedral-yard Exeter, as well as all the other appliances and materials for Honiton lace work.

50. Edging (Crochet and Cordon) for Frocks.

THREE pieces of fine Cordon, and 6 reels of No. 16 Messrs. Walter Evans and Co.'s Boarshead cotton are required, also a fine crochet needle. Bend the festoons to the form shown in the engraving, and unite 5 on each side with single crochet, leaving 12 loops of braid for the outside of each festoon; work into the loop of braid at the top of the festoon a stitch of single crochet, make 1 chain, work 5 stitches of single crochet into successive loops of braid, then work a stitch of single crochet into every alternate loop of braid till 5 are done, work a stitch of single crochet into each of the next loops, † make 4 chain, take up the 3rd from the needle, draw the cotton through that and the loop on the needle; repeat from * twice more, make 1 chain, unite to the corresponding loop on the other side; repeat from * 3 times, then unite to the same loop, work 4 more stitches of single crochet into successive loops of braid, make 3 chain work a stitch of single crochet into the centre loop of 3 chain, make 3 chain, work a stitch of single crochet into the stitch at the top, make 7 chain, unite to the stitch at the top on the other side, make 1 chain, and work a stitch of single crochet into a loop of braid alternately till 4 chain are done.

52, 53, 58, and 59. D'Oyleys (Roman Work).

A QUARTER of each of these four designs only is given, but it will be found easy to copy the pattern so as to reproduce it as a square. The squares are intended either for d'oyleys or to be used with satin ribbon for antimacassars. They may be worked on either écru or white batiste, and with either cotton to match or white.

54. Edging (Crochet).

Six reels of Messrs. Walter Evans and Co.'s Boarshead cotton, No. 16, and a fine crochet needle, are required. Make a chain the length required.—1st row. Work a stitch of double crochet into 1 loop, make 15 chain, miss 5 loops: repeat.—2nd row. Take up the 1st and 2nd of the 15 chain together, and work them as one stitch, work 5 stitches of double crochet into successive loops, work 3 stitches into the next loop, work 6 stitches of double crochet in successive loops, * miss the last loop of this 15 and the first of the next, work 6 stitches of double crochet into successive loops, work 3 into the next, work 6 stitches of double crochet into successive loops; repeat from * to the end. Work 5 more rows on the same plan.—8th row. Work a stitch of double crochet into the first point, make 5 chain repeat.—9th row. Work a stitch of single crochet into the centre one of the 5 chain, make 5 chain, take up the 5th loop from the needle, draw the cotton through that and the loop on the needle, make 11 chain, form the last 6 of these into a circle, * work a stitch of double crochet into it, make 6 chain, take up the 6th from the needle, draw the cotton through that and the loop on the needle; repeat from * 4 times more. Make 3 chain, unite to centre of next 5 chain in last row, make 3 chain, work a stitch of single crochet into the first of double crochet, make 5 chain; repeat from the beginning of the 8th row.

56. Edging (Crochet and Cordon Braid).

One piece of fine Cordon braid, six reels of Messrs. Walter Evans and Co.'s Boarshead cotton, No. 16, and a steel crochet needle are required. Make a chain 4 or 5 yards in length.—1st row. Work 1 long stitch and 1 chain stitch alternately, missing 1 loop between till 4 of each are done, then with another reel of cotton make a chain of 18, take up a loop of the braid about an inch from the end, work a stitch of single crochet to unite it, work a stitch of double crochet into the 2nd of the 18 chain, * make 1 chain, miss 1 loop, work a long stitch into the next; repeat from * twice more, make 1 chain, miss 1 loop, take up the next loop and with it the loop of the 4th long stitch of the foundation, draw the cotton through, and then through the 2 on the needle; repeat from first * 3 times, make 1 chain, work a stitch of double crochet into the last chain, miss 4 loops of braid, and unite to the 5th with a stitch of single crochet, fasten the end securely with a sewing needle, return to the foundation row, and make 1 chain stitch and 1 long stitch alternately, missing 1 loop between each till 4 chain stitches are done, with the next long stitch, unite the 2nd loop of the braid, * make 1 chain, miss 1 loop, work a long stitch with the next loop of braid; repeat from * twice more, every scollop to be done in the same way. For the outer edge * work a long stitch into the third loop from the centre of scollop, make 5 chain, repeat from * into each of the next 6 loops of braid; miss 3 loops of braid; repeat.

A FEW HINTS ON CHRISTMAS TREES.

In nearly every German family and in many English ones Christmas trees are in course of preparation at this season of the year, and many people may be glad to have a few hints on the subject. As a matter of course it is a fir tree that is chosen, and it is a very great improvement if it be dotted about with tufts of wadding, to give it the aspect of being snow laden. The next thing to be aimed at is to make it as brilliantly bright as possible, and put as many candles about it as you can, and as many knicknacks that will sparkle and reflect the light. The branches are generally supported by iron wires, having sockets for the candles, and others are inserted in small squares of tin, with a sharp point in the centre, on which a candle can be stuck. Tin reflectors behind each candle are great improvements, and it is as well to hang as many coloured glass balls about as you can, as well as strings of beads.

With regard to the gifts attached to a Christmas tree, of course everything depends on where it is shown, and for whom the presents are intended. There ought to be packets of bon-bons for all, and the forms these may assume are legion. Net purses filled with sugar plums are very suitable; they are of the old-fashioned long shape, made of white net, with tufts of coloured ribbon at either end, where the sweets are kept in their places by rings, for which purpose any of the many kinds of sugar rings are available. Tiny baskets filled with sugar plums, and their contents kept in by white net sewn over the top, small muffs made by covering a tube of cardboard with plush, and attaching a silk bag to the ends, red gelatine packets of sweets, and all the endless variety of *bonbonnières* with which the shops abound. In the way of toys, a few shillings spent on the penny ones to be bought at the German Fair will give you a large supply; and this year there are some hundreds of different grotesque figures to be had for a penny each, which are suspended from the head by elastic, such as clowns with moveable arms, pigs dressed in yellow on barrels, and Turks in gorgeous attire. The knicknacks to be bought at the perfumers for Christmas trees are endless. Bunches of glass grapes, each grape filled with scent; charming green and gold Etruscan bottles; glass chandeliers, filled with scent; butterflies, the wings made of spun glass of various colours, and the body a bottle of scent; tiny baskets, containing what appears to be a bird's egg, but is in truth a scent-bottle; portmanteaus containing bottles of scent; hampers, with what appears to be a boiled turkey in grass, made of soap, with a scent-bottle inside. All these are pretty and ingenious, and are very effective. For boys, bags filled with marbles always please, as well as knives, tools, and the like. Walnut shells, covered with tinfoil or gold leaf, and tied together with coloured ribbon, and made to contain either sweets or a thimble; bundles of straws tied together with ribbons and filled with coloured silks; pincushions, especially the small ones to hang to a chatelaine, made with two buttons having wadding between, and a band of coloured ribbon uniting the two, a few threads of coarse purse silk of the same colour as the ribbon being brought from the outside of each button into the centre; needlebooks and bookmarkers: cases for knitting needles; almanacs, especially those pretty ones in the form of cardboard fans, highly illuminated. If the tree is intended for village schoolchildren, clothing and books are acceptable, while for friends and relations in one's own family circle, almost any kind of present would be available, such as ornaments for chatelaines, the pretty gold-topped smelling bottles, for example, with chains attached, point lace, or anything in the way of needlework.

Crackers will of course find their way to the tree, and there are many new varieties this Christmas; some containing masks—an improvement on the paper patterns of last year—others with trifling gifts attached, such as pens, lockets, glove fasteners, and the like; others in the form of a pair of gloves; and, newer than all, small shells in silver and green—such as cockle, scollops, and the like. Sugar transforms itself into pianos, carrots, turnips, oats, wheats, currants, harps, &c.—all of which sparkle and add to the brightness of the tree.

It is a good plan to place the tree on the centre of a large table, surrounded by an inclined plane of wood, on which pieces of firs and moss are liberally sprinkled and glued, and, when quite dry, this forms a capital shelf for such larger presents as could not conveniently be attached to the tree.

REPAIRING ANTIQUE LACE.

Repairing antique lace is frequently considered as a secret, whereas it is simply a labour of love and patience. Although a tedious work, taxing eyesight and the needle's skill to a great extent, it amply repays the trouble by materially improving the value of the lace.

Defects most frequently occur amongst the *brides* or in the netground which connects the design in point and pillow lace. If these defects are not merely tears or rents in a straight line, but parts entirely gone, the only satisfactory method to supply the wanting piece is by sacrificing a small part of the lace to be mended, cutting out of it the required supplement, and inserting the same in the hole. Professional lace menders keep scraps and cuttings of antique lace for this purpose. *Brides* and patches of groundwork as well as deficient flowers or parts of design can be substituted in this way. All the ragged edges must be cut clean away, the mending piece carefully adjusted, as to shape, and joined to the surrounding work with very fine thread and very short stitches. Much depends upon the judicious trimming of the defective parts, in order to facilitate and hide the joining; but practice alone can teach the proper way. This method applies to all complex nets, as pillow-made Brussels, Mechlin, Valenciennes, the button-holed Argentan ground, and all kinds of *brides*. The attempt to supply the latter by new work is generally a failure. Only Alençon and needle-made Brussels ground can effectually be supplanted by new work.

The *toilé* of pillow lace is repaired by fine darning. Fillings, in point lace are imitated in fancy stitches, the *cordonnet* by overcasting the same in button-hole stitch. Care must be taken to choose, for mending, thread of the same fineness and colour as used in the original lace. As to fineness, this is sometimes very difficult, Brussels and Paris being the only places from which the real flaxen lace thread of good quality can be procured. The colour of the mending thread can be matched, by washing and tinting the same, with the lace.

Tears or rents are repaired by slipping and twisting a fine thread alternately through the parted meshes, fixing the thread at both ends. In the same manner pieces of lace are joined, taking care that the joining line restores the pattern. The overlapping parts are closely cut away *after* the joining.

If the net ground of point lace is much torn, the only way to preserve the flowers is to transfer them to modern Brussels net, or, if it can be got, to old pillow-made Honiton ground. It is preferable to transfer to a piece of net in the shape of a collar or cuff, a tie-end, a cap, or a lappet, and not to a straight length. The shaped piece of net is fixed to parchment; the point sprigs arranged in the desired pattern, and loosely tacked to the net with coloured thread, commencing with the edge. The parchment is then removed, and the point sprigs firmly sewn to the net from the reverse side with fine thread and short stitches, after which the tacking thread is picked out. Lace ought to be washed and tinted, stretched and arranged before being mended; and the materials for mending, such as threads and patches, must undergo the same process. If soiled during the repairing it must be cleaned again, and if necessary a new footing and edge sewn on. The French *engrelures* (footing) and *picots* (purl edge) are the finest, but cannot be procured in London.

CHURCH DECORATIONS.

We purpose in this paper, as Christmas is so near at hand, to give some practical suggestions on the subject of Church Decorations.

In small country parishes the labour and expense incurred in any church decoration generally falls upon the clergyman's family, with perhaps the help of one or two others; but in larger parishes there are many eager and willing helpers to be found, and by a little tact much good feeling may be created, and a bond of union formed—especially between the younger members of a congregation—by seeking their help, and making as much use as possible of their work. We all know how rumour says ladies are difficult to manage, and "ladies' working parties" are essentially so; we should therefore like to mention what appeared to us an excellent plan, and one that has been adopted and found to work well in the parish of a clerical friend, where there were many ladies all ready and willing to work, but all wishing to be the head, and each one acting independently of the other; of course there was no harmony of spirit, far less harmony in the effect of the work and the decorations in the church. Our friend talked the matter over with his wife, called all the ladies together, arranged with them the style of decorations and different colours to be used, and the effects to be gained; made his wife the head of the band; enlisted the help of the more experienced for the more prominent parts of the church, giving to each one a certain part to decorate, with several less experienced to help them. A decoration fund was also established in the parish for the purpose of defraying the expenses connected with the decorations. One result of this plan was especially successful—the prejudices and wishes of the parishioners were known and consulted, and no design was adopted that had been previously objected to.

Digitized by Google

It is essential in good decoration to have some general plan and idea for the whole church, or else one part detracts from the other. A good bold design is generally the best. Anyone having good taste and a knowledge of colour, may procure a great effect without much labour and expense. We have often noticed in churches how much a little knowledge of this colour is required, for we have seen the most gorgeous and elaborate designs completely lost in a church, the wails of which were furnished with red brick in the interior; and, on the other hand, very grey dead-looking stone walls have been decorated with green and colours that only added to the coldness and desolate look of the whole, instead of giving a warmth and colour to the church.

The chancel should always be the part most decorated. A church is generally entered at the end of the nave, the chancel viewed from thence forms the point of sight, and therefore all the anterior decorations should be subordinate to those used for it, this heightens the effect of every design used for the chancel. All decorations should be as much as possible prepared out of the church.

We will now give a few hints on the procuring of good and simple effect in the chancel of a village or small church where there is no reredos and where warmth of colour is required. A dossal is expensive, but the same effect may be had by stitching crimson, scarlet, or blue flannel together till it fits tightly; on this glue designs, at equal distances, in gold or white paper—the fleur-de-lis, Maltese cross, or anything else liked; then finish the sides and top with a cord, or with a neat band of leaves stitched on brown paper. A text on a white ground placed above this is a great improvement. We have seen these dossals made of white llama or alpaca, with designs in red, blue, and gold; but where expense has to be considered, white double cartridge paper answers the purpose, and looks nearly as well. You may procure plain flock wall paper by the yard, of good ecclesiastical design, and paste it on to the wall; and we have seen most beautiful pieces used for this purpose, which were coloured and illuminated by hand. Then, again, a lattice work of green and of coloured braid we saw used for the same purpose. A rough frame can be made to fit the space to be covered, a red braid nailed on at intervals in a slanting direction for the lattice, and where the braids cross a small design in everlasting flowers, green berries, or wheat ears, was stitched according to the season for which it is required. When the lattice is made of green it is not usually laid over a coloured ground, but we should strongly recommend this being done, as it throws up the work. The window sills in a chancel look well filled in with red bordered with green, in the same style adopted for the dossal. A window sill of moss, inlaid with designs in flowers, is almost too well known to require mentioning, but for those who have not yet tried this plan we would recommend the stone work to be covered with oil cloth or American leather to prevent the water injuring it. The frames may be made of laths, and over them red material stretched. This makes a good ground-work for a text in white or green letters.

Letters for texts, either for walls, arches, or window-sills are numerous, and the cardboard pattern alphabet can now be procured in any size and style, which is a great help and saving of time. Letters cut out of straw tissue are very good, but expensive. There are two or three other ways of making straw letters, which are less costly. Take a bundle of straws used for the little picture frames, split them in half, and stitch them regularly on letters of brown paper with coloured silk. Then sew the letters when finished on to the ground-work. Another method is to cover paper letters with a little cotton wool, and lay the whole straws on them, stitching them carefully in regular lines, and making the straws lie in the same direction in each part of the letter. Any design can be made in this manner on velvet or cloth. Then again there are letters of straw plait. We have seen these in plain and fancy plaits, and decidedly give the preference to the latter. Letters made of rice, and coloured with Judson's dyes, in imitation of coral, are very good, as also crosses, &c. We have also seen letters made of paper stars, which are effective; but perhaps the most light and bright looking of any are those made of powdered glass. They have the same appearance if made of alum, and are not so expensive. We shall give directions before we close this article for crystalising leaves and grass with alum, and the letters are done by the same process. Tinfoil may also be used, and makes a good variety. We always prefer double cartridge paper for texts made on a white ground, and for coloured grounds the coloured paper pasted on to brown paper, which can be had any length, like the cartridge paper. This is much the most serviceable.

Evergreens are, at this time of the year especially, essential for wreaths, pillars, arches, &c. The wreaths for a pillar should be made on crinoline wire. First take the measure of the pillar with the wire, form a loop at each end of it, and then with fine skein wire fasten the evergreens on to this foundation, arranging them in neat sprays. When the wreath is finished, it only requires tying through the loops in its place. Laths covered with red flannel, and with evergreen and everlasting flowers twisted on at intervals so that the flannel is not quite hidden, are generally used for arches, and look exceptionally well. Red holly berries are, of course, in the greatest requisition, and as these are often very scarce, we will describe a method we have often tried for making them. Take first some fine wire, and cut it into four-inch lengths; now take some sheets of plain white wax used for flower making. White wax bought by the pound weight at a chemist's will answer just as well Take a little bit of cotton wool, roll it up into a ball the size of a pea, run the wire through it until it is about an inch from the end of the wire; then turn this short end of the wire over it, and twist round the stalk of wire. Next, melt some wax and cover this bit of cotton wool and wire completely with it, make it the size of the berry you wish to copy, dont it at the top in imitation of the real one, make as many of these as you require, have ready a bottle of Judson's scarlet dye, which must not be mixed too thinly, and dip the berries into this until they are well coloured. They can be painted with some common powder colour mixed with gum-water, but the dye is a shorter process. The berries can be touched with a little thin gum-water to give them a bright appearance. Berries made in this way and tied together in bunches, look exactly like real ones in the distance. Evergreens may be varied with great effect by crystallizing the sprays of leaves. This is done in the following manner: Take a pound of alum, boil it in a gallon of water, then turn the liquid out into a deep pan; over the pan lay some sticks, and from these suspend the sprays of leaves. As the liquid cools the crystals form; if they are too large the liquid is too strong, and must be reduced in strength. Letters, as I said before, can be made in the same manner. Cut them out of thin cardboard, covered with wool, and suspend them in the same manner; the crystals must be removed from the plain side of the letter. There is another method of making evergreens white, which may be found useful, but we do not recommend it for a very damp church. Take some sprays of yew, dip into water, and while wet, dab them into flour until the whole is well covered, then lay them out to dry. We have seen the arches of a church decorated in a very effective and novel manner. Under the wreath of evergreen the moulding of the arch was covered with red material cut to the shape, and also the plain stone just inside the under part of the arch, this was fastened on with iron tacks, and at regular distances paper stars of gold and white paper were glued.

Ferns are almost invaluable in decorations. It is unnecessary to detail the many uses freshly gathered ferns may be put to, but we wish to draw particular attention to the use of dried ferns and grasses. We have seen beautiful designs in which these were used, which we will describe in detail. One was a large monogram, cut out of deep red velvet, and laid upon a white ground; over this monogram were entwined most tastefully sprays of dried ferns, the edge of the design was formed also of ferns arranged as a frame. Texts were made in the same manner, and lovely sprays of golden, silver, and maidenhair ferns, twined between the letters and along the sides of the text. A reredos was made of panels of white material, splendid fronds of fern arranged all round the sides forming a frame, the corners filled with the branches of the tree fern. In the centre groups of large flowers (boldly arranged on a formal design of the deep red material) were placed—these were lovely; some arum lilies and leaves in the centre panel, and lilies and geraniums on the sides; the flowers appeared so fresh, though they had been up several days, that our curiosity was excited, and we found they were all in water, in bottles or pockets made of tin, which were covered with this red material.

We saw in another place the window sills filled with tins of the beautiful greenhouse moss, or selaginella; the tins appeared to be about eight inches high at the back, and one and a half in front; the plant was growing in them most luxuriantly, and in each tin a most tasteful design in bright flowers was arranged.

Ferns should be dried with very little pressure in blotting paper; when dry dip them in Judson's dye, let it dry on them; and press them again; this keeps the ferns green for ever, and is used for those laid on glass in windows and screens, but we prefer to see some undyed, as the tints are then so various and beautiful. Some plants can be forced and others can be easily grown; thus a pretty light feathery green can be grown in tins, by getting some canary seed, cover it with water in which is mixed a little soil, then put it in the dark in a warm cupboard if you have not a hot house, in a fortnight's time you will have strong shoots, then give it light, air, and warmth, and it grows rapidly. The stalks of this grass have a bright red tint near the grain, and could be grown in tins for the base of a font, as they would be most useful for a ground work of flowers and ferns which could be mixed with the grass.

THE ART OF DRAWING ON SMOKED CHINA.

We have received the following communication from Mrs. Poole, the Parsonage, Purbrook, near Cosham, Hants; it will, we believe, interest many of our readers: "The pretty art of drawing on smoked china may not be generally known, so a description of the same may prove useful to those who are fond of the pencil or brush. I have improved on the art by not only rubbing out the lights to represent lakes, mountains, and rivers, &c., but by producing foliage, and have designed a series of sketches from Devonshire peculiarly adapted for subjects. By taking out the broad lights, and stamping out some small light touches with a jagged piece of coarse calico (cut on the cross), and afterwards touching up the middle tints with blue black and Antwerp blue, a pretty effect is produced, and looks extremely well on vases or tiles, &c. It can be fixed by a varnish made for it, and which not only prevents the drawing from rubbing out, but gives it a brightness and gloss which greatly improve its appearance. For those who would like to try it I will give a few hints to assist them. First wipe carefully with a cloth every particle of dust which may cling to the article selected for work, then with a benzine lamp smoke it, by passing it to and fro over the lamp, taking care not to hold it too close to the flame; then trace out, from the copy, an outline with a darning needle; a small piece of wool tied to a paint brush will take out the broad white lights and clouds. The foliage is afterwards done in the way mentioned, which is easily acquired after a little practice. The small touches of leaves, brambles, and branches of trees are drawn in by a thin piece of wood cut to a fine point. It is afterwards finished by dashing over it (so as to cover every part) some white spirit varnish."

STAMP SNAKE.—I lately had an opportunity of inspecting one of these so-called "stamp snakes," although the one I saw—owing, I conclude, to its being rather troublesome to collect the large number of 4000 stamps, which are necessary to make a very good snake—had three or four squares of white and different coloured cards threaded between each of the stamps. The latter are cut square, with the paper of the envelope adhering to them to make them stiffer. They face towards the head, and both they and the pieces of card were cut gradually much smaller as they approached the tail. The head is made of two pieces of card of the conventional shape of a serpent's head, covered tightly with silk like a pincushion, and sewn together at the sides, leaving an opening for the mouth. In the one I saw the silk was grey, but I think it would look better black; the eyes were formed by small round patches of scarlet flannel, with a white chalk bead in the centre, and a forked tongue of scarlet flannel protruded from the mouth. The knot of the string on which the stamps were threaded had been firmly fixed to the inside of one of the head pieces, so that the stamps should come up to it quite closely before the two are sewn together, and the tongue is fixed in like manner. A piece of scarlet worsted braid had been sewn round the knot of the string at the tail to conceal it, and an end of about a quarter of a yard left. The snake measured three-quarters of a yard long.

Dress and Fashion.

MOVEMENTS OF FASHION, 1874-75.

THE year 1874 saw many important changes in ladies' attire; the outline the figure presented differed entirely from that of the preceding year. Skirts were draped in front and at the sides so as to cling and almost show the form of the limbs; a slightly projecting tournure was added at the back; and the bodice was fitted like armour, so clearly did it mould out the figure. Composite costumes prevailed—either two different materials or two shades of the same material were used; a vast deal of gatherings or *fronces* were introduced into the front breadths and sleeves, which gave a complicated effect to the toilette; and as the bodice differed from the sleeves, and the front breadths from the back breadths, there was altogether an elaboration of detail which rendered the dress of 1874 peculiarly picturesque and uncommon. Beads and bugles formed the principal ornament; the glittering and shimmering of tunics and cuirasses surpassed all former efforts in that line, so great was the quantity and so thickly were the atoms of coloured glass massed together. The French composition known as "blue jet" or blue steel, was quite a specialty of the season of 1874. The hair was altered in style from the chignon to the *queue*, hats became suddenly large and picturesque, and the Gainsborough, Rubens, and Dorothy Vernon shapes, with wide brim coquettishly turned up at one side, were to be seen on the skating rink, at garden parties, and at polo and pigeon shooting matches, and at all fashionable gatherings. Chatelaine bags at the left side, chatelaines of old silver with the thousand and one knicknacks a lady is supposed to want (from a thimble and a smelling bottle to a pocket pistol) were to be seen dangling and heard jingling, suspended low from the waist of our most noted belles and *elegantes*. Norwegian belts, made of leather and silver, encircled the waists of these same belles. But 1874 and its fashions are things of the past; let us turn to the preparations for 1875.

One of the peculiarities of the times is that the richest and most elegant women adopt the coarsest and most unpretending materials for morning wear and rainy days. This is the result of every woman striving to wear dresses that tend to make her—as far as exterior goes—the equal of other women who are rich and able to afford superfluities. For ordinary wear all rough-surfaced goods are in favour, such as Homespuns, camels' hair, limousine, roulier, and even drugget of the olden times, and of the traditional carmelite brown said to be "coming in" in Paris. These costumes are made with a habit bodice, a tunic long, flat, and round in front, with a small pouf at the back, a short all-round skirt, a double-breasted jacket being added for outdoor wear. The trimmings are flat—either several rows of machine stitching, or bands of a coarse make of braid called Titan, Hercules, or Breton, indiscriminately. Silk dresses are made much more elegantly; the new colours are dark shades of blue, plum, purple, nut brown, olive, a rich claret shade known as "lie de Bordeaux," and invisible green. There are also reddish wood shades of mahogany and cedar, a seal brown, and a peculiar shade of rust called "rouille," which will be affected by the ultra-fashionables.

Matelassé and velvet will be used largely in the composition of rich winter silk costumes. Matelassé is a novelty which will be popular for tabliers and cuirass jackets. It is silk, with a satin face, and as thick as though it were wadded. It is woven to look like fanciful quilting, in small diamonds, arabesques and floriated designs. The best qualities are extremely costly, and it is made in black, olive green, navy blue, and nut brown; and for evening wear in pale pink, blue, and white. It is extremely handsome and rich in effect. When the tablier is made of matelassé it is single, but when it is made of faille or cashmere it is triple—that is, three aprons one above the other. The tunic is now reduced to a long apron which is either single, double, or triple, according to the fabric and its facilities for draping. A wide sash ribbon formed into hanging loops and ends secures the tablier at the back and replaces the pouf.

Bodices are made high to the throat, and entirely plain, fitting the waist and hips as closely as though they had been moulded thereon. The names of of "Joan of Arc," "cuirass," "armour," are applied indiscriminately to this make of dress. The necks of bodices are cut high, and are elaborate with frills and fraises. Sleeves are close to the arm and have but little cuff; they are usually made of the same material as the tablier. Take, for example, a winter dress of velvet and matelassé; the skirt is black velvet; the tablier is grey matelassé; the cuirass bodice is velvet, with matelassé sleeves.

The newest silk and velvet skirts are made without pouf in the back breadths, a wide box-plait in the centre takes the place of the pouf. A demi-train faille skirt measures 50in. at the back; the centre box-plait measures the eighth of a yard in width; it is lined and kept in place with rows of tape sewed across on the wrong side. This plait should be well defined to the edge of the skirt; one or two bows of long loops of doubled silk are placed on the plaits, and all horizontal flounces and other trimmings are now dispensed with.

Polonaises, which were dethroned for a time by tunics, have again been taken into favour, they are made long and double breasted, and the back is of the Princess shape. Dolmans, long cloaks lined with fur, double breasted jackets, all share popularity with the polonaise.

The newest trimmings are galloons woven with beads—blue steel, violet, and black; they are narrow and serve as beadings to black lace embroideries, with beads of the same colour; woollen braids of various widths to match the material in colour are used on woolen fabrics. Bands made of cocks' and rooks' feathers, dyed to match the silk and fur borderings, either silver fur, otter, marmozet, are used for more costly materials. But the richest ornamentation is the embroidery which, interspersed with beads and bugles, is lavished on silks, cashimere, cloth, and velvets. Each part of the costume is worked with a special design composed to suit its form, although uniform on the whole. The fronts of the bodice have their design, the back has its own, and it is the same with the revers, basques, pockets, and cuffs. The embroidery is worked either with silk or wool the same colour as the material. Swiss embroidery, which is machine work in the wheel and compass patterns known as *broderie Anglaise* is the latest style for silk flouncings.

The bonnets are all made to be worn with the Artois or Catogan style of hairdressing. They are large but compact looking, and without streamers or strings. The brims in front turn upwards and outwards, and there are both stiff and soft crowns. Two materials are used on one bonnet, satin or grosgrain for the crown, and lining to the brim, and velvet for the brim itself, and upright loops of trimming. Scarlet, carmine, and a deep red called "Cardinal," are all used in millinery, and birds of every description, from the starling to the humming bird, are laid under contribution for ornamenting the most fashionable hats and bonnets.

Felt hats to match cloth and woollen costumes are the favourites thus far, and show a decided change in their manufacture. They are soft and of fine quality, and the edge is neither bound nor wired. The colours are écru, dark brown, grey, blue, and black, and the trimmings are velvet, grosgrain, birds, wings, and tufts of roses.

So far as space allows we have given illustrations of the various styles now prevailing in hats, bonnets, hairdressing, costumes, and toilettes. The patterns cut in paper can be procured on application by letter to the *Queen* office, 346, Strand, W.C, The prices are named at the end of the descriptions, and a price list will be found among the trade advertisements.

Fashionable Bonnets and Hats.

BOTH hats and bonnets have undergone a decided change in style during 1874. The newest bonnets are at the close of the year almost all made with soft crowns, and two shades usually appear in one bonnet; in almost every case the body of the bonnet is dark, and the trimmings are light. The new brown called "seal brown" is trimmed with ecru and red Japanese roses, blue-grey velvet with blue steel ornaments and carmine roses; but the new reddish violet bonnets are, as a rule, monotone, showing varied hues of their colour alone. Soft faille and ribbed silks are more used on velvet bonnets than the perishable turquoise and twilled silks of 1873. Easy folds encircle the crown, which is of faille, while the brim is velvet. The most stylish bonnets are trim and compact-looking, without superfluous drapery or streamers. The leaves are not green, but grey or reddish brown, and the birds that nestle in front or at the sides are both larger and plumper. The accompanying illustrations will serve to show the accepted style during 1874.

No. 1. Black felt hat trimmed with black faille, a torsade round the crown and loops at the back. Two black wings stand upright between the loops.

No. 2. Black tulle crown with black velvet coronet ornamented with a black lace ruche. A tuft of roses of three colours—yellow, pink, and red—ornaments the front, and serves as a foot to a black velvet bow. Soft crown with two yellow feathers at the back.

No. 3. Black felt hat with a black and white foulard twisted round the crown and tied at the back. A wreath of poppies and periwinkles beneath the brim.

No. 4. White faille bonnet, with a wreath of marguerites as a coronet, and a ruching of white crêpe lisse falling on the train. A black velvet bow in the centre of the crown.

No. 5. Black velvet toque ornamented with ecru guipure. A tuft of marguerites and a black aégrette in front, and these rest against some black velvet loops arranged in a formal manner.

Fashionable Styles of Hairdressing.

A NEW style of headdressing was introduced and widely adopted during 1874. It is called the catogan or Comte d'Artois coiffure. In order to arrange it divide the hair immediately across the top of the head, and arrange the front hair and coronet as suits the face best. Tie and plait the back hair in four, if you have a very great deal of it. Most people would add a large loose false plait. Turn this under and hairpin it up, and tie on the bow of ribbon or velvet half-way down the queue. This is the most fashionable way; but instead of the one plait of four, some people arrange it in two plaits of three in the same way. Between the top of the plait and the coronet and also at the side of the face, what the French call "Marteaux"—viz., loose rolls of hair like sausage curls are placed carelessly where required. If you have not used your back hair for the plait, you may divide it, and, rolling the piece on your fingers, hairpin it down; but it is far easier to buy some five or six marteaux, each separate, and artificially curled, which are put on very quickly where they are wanted. The accompanying five engravings illustrate this new style.

NOS. 1 AND 1A. HEADDRESS WITH CATOGAN.—These heads represent a similar catogan, with curls arranged with the back hair. The curls are fastened with a bow of ribbon and a blue steel buckle. The rest of the

Digitized by Google

headdress consists of a plait and rouleaux. The head is studded with blue stars, and a blue comb fastens the torsades in front.

No. 2. PLAITED CATOGAN.—No. 2 is a reproduction of the catogan and which is likewise worn with loops, torsades, and plaits.

NOS. 3 AND 3A. THE ROSE CHAPLET.—This chaplet is made of roses and black grapes, and forms a coronet in front, ornaments the centre of the chignon, is narrower at the sides, and fastens with a bouquets of raisins and black grapes. We give this model with a low dress, but not only can it be worn with an evening toilette, but it serves as a theatre or concert bonnet.

Fashionable Toilettes.

No. 1. SUMMER BALL DRESS FOR YOUNG LADY.—White organdy muslin. The skirt is bordered with two plaitings, headed with a bouillonné, through which green ribbon is passed. Tunic trimmed in the same style, round in front and square at the back. Low bodice, with green ribbon bretelles crossing in front, and fastening at the back with a bow. Bow on the right side of the bodice. Pattern of skirt and tunic, 4s. 7d.; of bodice, 2s. 1d.

No. 2. THE MARGUERITE COSTUME.—Pale blue Indian cashmere tunic and bodice. The tablier is trimmed with deep bands of white faille, embroidered with black silk, and edged with fringe. Black faille sash and skirt. Bodice with round basques, and sleeves with crevés, marked with blue braid and white silk. Pattern of tablier, 2s. 1d.; bodice, 2s. 1d.

No. 3. AFTERNOON TOILETTE—GREY AND BLUE FOULARD.—The skirt of silver-grey foulard is long and plain at the back, and is bordered in front with an box-plaited flounce, narrow before and deep at the sides. This flounce is headed with an upright frill and a ruche of the striped foulard. The front is entirely of grey and blue foulard, arranged as bouillonnés and robings. Plain high bodice, with points in front, and a postillon basque at the back. The sleeves are of the striped foulard. Pattern of skirt, 4s. 1d.; of bodice, 2s. 1d.

No. 4. OUTDOOR COSTUME (VICUNA CLOTH).—Besides vicuna trimmed with velvet of a darker shade, the skirt is trimmed in front with a deep flounce, headed with a bouillonné edged at both sides with a plaiting and a band of velvet. Tunic at the back only, terminating with quilles at the sides. Double-breasted bodice with round basque. Collar, revers, and cuffs are all velvet, The buttons are cut steel and the bows on the quilles are velvet. Pattern of skirt and tunic, 3s. 7d.; bodice, 2s. 7d.

The made-up patterns of any of these costumes, together with a flat pattern for cutting out by, can be forwarded from *The Queen* Office, on receipt of postage stamps as indicated in the descriptions.

GOLD JEWELLERY. — There is very little difference between the innumerable imitations of gold, either in appearance or in composition. The Prince metal of the 17th century, invented by Admiral Prince Rupert, an amateur chemist; the Pinchbeck and Ormolu of the 18th century. French, German, Australian, Abyssinian Gold, and Oroide of the present day are all alloys of copper, zinc, and tin, in various proportions, with traces of iron. Not a particle of gold enters into their composition, and consequently they are of very trifling value as metal. In former times these base alloys were only used for mountings of articles of vertu, but nowadays they are employed largely in the manufacture of flash jewellery. Uncoated imitation jewellery can deceive nobody—the hard and brassy appearance is unmistakable; but if electro-gilt with a film of 18-carat gold, it requires some experience to detect the real nature of the article. A jeweller can in most cases tell by the weight whether a piece of jewellery is real gold or base metal, gold being comparatively so much heavier. But, to make sure, some corner is rubbed on a touchstone or scratched with a file. The coating of gold will then come off, and a drop of acid applied to the surface will betray the underlying copper alloy by bubbling. As long as the electro-gilt coating remains intact, imitation jewellery looks well enough, and cannot be distinguished from the real thing; but unfortunately the deceptive film wears away very quickly, and cannot be restored but by regilding. More durable in colour, but more expensive than the brass alloys, are the compositions known under the names of Cooper's gold (copper and platina) and aluminium gold or bronze d'aluminium (copper and aluminium). All things considered, good jewellery of 18-carat gold is the cheapest, because it always represents a real marketable value. Gold and silver are sold by troy weight, 12oz. or 240 pennyweights to the pound. The relative value of gold is expressed in carats, 24 carats representing the pure metal. But chemically pure gold, from its brittleness, could not be used for any practical purpose; therefore two parts of silver are melted with twenty-two parts of gold, and this alloy is called standard gold, worth about 78s. per ounce troy, and 74s. per common ounce avoirdupois. For plate and jewellery the standard varies from 22 carats to 18, 12, and 9 carats. The alloy is either silver or copper, in various proportions. Copper gives a deep reddish colour to the gold, and is therefore preferred as alloy for jewellery; the larger the proportion of silver, the lighter the colour of the alloy. One carat of gold in one common ounce of alloy represents the value of 3s. 4½d.; one common ounce of 18-carat gold is therefore worth 60s. 9d. The numbers stamped on pieces of plate or jewellery indicate the number of parts or carats of pure gold the alloy contains, and the value of any trinket can easily be ascertained by multiplying its weight in common ounces with the stamped number, and with 3s. 4½d. The quality of unstamped gold is decided by the "touch:" that is, by comparing the colour and other properties with those of small bars, the composition of which is known. These bars are called touch needles, and are rubbed, as well as the gold to be tested, upon a smooth piece of black basalt or flint slate. By comparing the relative colours of the rubbings and their resistance against acids, the quality of the gold can be approximately fixed. Buyers of gold jewellery ought always to have the weight and quality stated in the bill.

ACTING CHARADE.

THE SILENT SYSTEM,

An Acting Charade to the word

DUMB—FOUND—ER.

By RETLAW SPRING.

Dramatis Personæ:

MR. PINCHLEY BAKER.
MR. SIMON GRUBBE.
CAPTAIN ADOLPHUS EVERGREEN.
MRS. PINCHLEY BAKER.
MISS PRISCILLA EVERGREEN.
MISS LETITIA WAGGLETON.
SARAH JANE (Maid-of all work to the Pinchley Bakers).

SCENE: A Lodging House at Sandington-Super-Mare.

COSTUMES.

Miss Priscilla Evergreen: A large bonnet and veil, long cloak down to her feet with pockets, and capes, goloshes, and umbrella.
Mrs. Pinchley Baker: A dress of some startling colour, and caps with red ribbons.
Mr. Simon Grubbe: Frock coat and grey trousers.
Mr. Pinchley Baker: Shabby morning dress.

DUMB.

SCENE I. — *Parlour in the Pinchley Bakers' house.* — *Mr. Pinchley Baker* is discovered reading the paper. *Mrs. Pinchley Baker* dusting the mantelpiece.

Mrs. P. B.—Well! I must say that I *am* tired of this work, another week gone by, and our lodgings still to let (*gives a violent slap with her duster*). It is most provoking, that it is——

Mr. P. B.—And you've no one to blame for it but yourself; it is all your own fault. Who made such a row about Lady Careful's coals that the poor old soul had to cut and run, livery servant and all? You put thirty pounds out of my pocket with that confounded tongue of yours, and if you don't stop, you'll bring us both to the union workhouse.

Mrs. P. B.—Of *course* it was my fault, Mr. Pinchley Baker, *everything* is *always my fault.* I am sure to be in the wrong, never in the right, but I should just like to ask you a few questions, and I should very much like to know what answers you could give to them. Did *I* come in late, banging doors at all hours of the night? Did *I* smoke horrid filthy cigars? Did *I* ask her ladyship's maid to take a walk with me on the pier on Sunday evenings? No! Mr. Pinchley; I *never* put a shilling *out* of your pocket, whatever I may have put into it. You wouldn't have a coat on your back only for me. You don't deserve such a wife as I am, such a patient, long-suffering, forbearing martyr.

Mr. P. B.—Oh! I don't, don't I?

Mrs. P. B.—No; indeed you do not. Ah! If my sainted mother could but see me now, slaving all day long, running here and running there;—I, who was never allowed to do anything but crotchet antimacassars, copy out poetry in my album, and practice the last new waltzes on a grand piano.

Mr. P. B. (*aside*).—That *was* a grand piano indeed, and grand playing into the bargain.

Mrs. P. B.—What's that you're muttering to yourself, Mr. Baker? I'll trouble you to say it again.

Mr. P. B.—I was merely observing that that *was* a grand piano at the Lion and Leopard in Great George's-street, and that your playing was something . . . ahem . . . something quite remarkable.

Mrs. P. B.—I understand you, Mr. Baker; I see through your vile cowardly sneers; I see through them and defy them. Of all the men in the known world, I do believe you're the aggravatingest, the, the——

Mr. P. B. (*throwing down the paper, and yawning*).—There, there, never mind. Let's have no more about it; keep your temper, my dear; and I would not say aggravatingest, if I were you, because it really isn't grammar.

Mrs. P. B.—I don't care whether it is or no. You are enough to provoke a saint, Pinchley Baker, with your grammar.

Mr. P. B. (*picking up his paper*).—And I'm sure you're not one.

Mrs. P. B.—You're enough to provoke fifty saints. How dare you say that it is my fault the lodgings are not taken? How dare you say anything against the piano at my mamma's in Great George's-street? And how dare you say that I don't speak grammar? Grammar, indeed! I'll grammar you. I'll punish you. I'll pay you out, see if I don't (*crosses her arms and surveys him*). I've a very good mind not to speak another word to you as long as I live.

Mr. P. B. (*starting up*).—Come! that is a capital idea, a first rate proposal. Silence! Why silence means quiet, and rest, and refreshment. Some one says that speech is silver, and silence is gold. Gold! It is better than gold, it is shining all over with diamonds! I'll keep my part of the bargain, that I'll answer for. I'll be as dumb as any dumb bell that ever was swung. No one shall outdo me, so here goes for the silent system. I know who will be the first to break the ice.

Mrs. P. B.—And so do I. (*Takes up her duster, shakes it at her husband, and goes out, slamming the door behind her.*)

Mr. P. B.—She's in a sweet temper, certainly. That hit about the piano struck home, and the grammar thrust finished her. I wonder how long this new dodge will last. She can't hold her tongue for more than half an hour at a time, I suspect. Suppose I sing a song to entertain me under this change of circumstances. (*Sings.*)

When first I courted Jenny,
She was bashful, timid, shy;
She never scolded loud or long,
Or raised her voice too high.

You scarce could hear her lisping out,
"Good morning, Mr. Baker!"
The cat asleep upon the chair,
That sound could never wake her.

But now, forsooth! the key is changed,
'Tis all fortissimo;
'Tis clatter, clatter on the stairs,
And clatter down below.

'Tis "Sarah, clean that frying-pan;
You are so very slow;
An I look alive, you foolish thing,
Don't waste the dripping so.

"Your master is so tiresome,
'Tis all his fault I know
That these nice lodgings are to let.
He makes the people go."

Then to the parlour quick she darts,
And scolds, and bawls, and screams;
Her shrill voice haunts me in the streets,
It echos in my dreams.

And now she says that she'll be mum!
She never can, I know;
Water you may shut up, but words
From out her lips must flow.

Soon she'll begin to scold again
About these vacant rooms;
Of empty larders talk, and have
A precious fit of fumes.

One thing I know, I'll hold my tongue,
And smoke my pipe all day;
And she may rate just as she likes,
For not a word I'll say.

Scold as you please, I'll calmly think,
Good Mrs. Pinchley Baker,
You'll get no answer, I'll be mute
As any broad-brimmed Quaker.

[*Exit.*

FOUND.

Scene II.

Mrs. Pinchley Baker (*looking out of the window*).—Dear me! It certainly is very strange that no one comes to look at these very desirable apartments. I am sure that for size, loftiness, and comfort, there are none like them in Sandington. This very spring I laid out . . . . let me see . . . . one pound seven and sixpence on carpets, two pounds fifteen on mirrors, nineteen and ninepence halfpenny on tin kettles and dish covers, and still the bill has been up for six mortal weeks, and not a soul comes near the place. Is it the organ-grinders? Is it the public house in the next street? Is it the smell of fried herrings from the cook-shop round the corner, that drives people away? No! I'm certain there's no one to blame but Mr. Pinchley Baker. What with his smoking, and his tramping about in his great heavy boots, and shouting "Jenny, Jenny," as if I was a kitchen maid, he gives the house a vulgar air. I do wish somebody would come. I'll look down the street again. Well! now, upon my word, I think that little wizund old lady loitering about and staring up at the windows is looking for lodgings. She *is!* I'm sure she is. She has seen the bill in Mr. Grasper's window. She is stopping, she is feeling for her bag, she is turning into the gate, she is going up the steps, she is ringing the bell, she has gone in! She won't stay *there* long, I'll be bound. I know she will come to me. I wonder if that stupid Sarah is ready to open the door. (*Shouts down the stairs.*) Sarah! Sarah! Sarah Jane!

Sarah (*in the distance*).—Coming, mum, coming!

Mrs. P. B.—Run and clean yourself this instant; you are never fit to be seen.

Sarah (*still in the distance*).—I don't know how you can expect a poor servant to have clean caps and aprons, with only five pounds a year to find herself in everything.

Mrs. P. B.—Don't be talkin' your nonsense. There's the knock! I knew it would come. (*Impatient knocking at the front door. Enter Miss Priscilla Evergreen, Mrs. Pinchley Baker advances and makes a low bow*).

Miss P. E. (*dragging her dog by a string*).—These are the rooms you have to let, I presume. Very small and low.

Mrs. P. B.—Small! These rooms small; I think you make a mistake, madam! they are always considered large, lofty, and most desirable in every way. Lady Careful, who was here for more than six months, used often to say to me, "Mrs. Baker, your rooms are perfection; they have a style about them that no common lodging-house ever has." It is indeed a sad reverse of fortune (*sighing*) that obliges Mr. Pinchley Baker and myself to let our rooms at all: we only do it to most desirable parties—the best references given and exchanged. My husband, Mr. Pinchley Baker, is an extraordinary churchman; he was intended for the church, and he understands botany, astrowology, the use of the globes, to say nothing of Latin and Greek.

Miss P. E.—Oh! po, I dare say! but I didn't come from Shropshire to hear about that.

Mrs. P. B.—The Rev. Joshua Mobridge will always recommend these apartments. We are regular attendants at his chapel, and he has the highest opinion of us.

Miss P. E.—What's all that to me? Let me consider: two rooms opening into one another, a bow window with shabby red curtains, the chairs ricketty, the chintz covers quite worn out, and no view of the sea.

Mrs. P. B.—Curtains shabby! chairs ricketty! chintz covers quite worn out! no view of the sea! That I should live to hear such things! The curtains are quite new, the chairs have only been bought six months, the chintz covers have all the gloss of the shop on them; and as to the view of the sea, allow me, madam (*taking Miss P. E. by the arm*) just stand here, and look out of that top pane on the right hand side of this window. Is'nt that the ocean before you? don't you see it foaming and lashing under your very eyes? After that, will you tell me there is no view of the sea? I have often stood in that spot, and counted the ships going out in their passage to the Atlantic. I have often repeated to myself those beautiful lines, "The sea! the sea! the bold, the free, I am where I would ever be!" It almost seemed that I was *in* the sea.

Miss P. E.—Well! well! have it your own way. You may call that wretched peep a view of the sea; I should say the principal objects to be seen were your neighbour's chimneypots. However, as I don't see anything to suit me better, suppose we come to terms. What are you asking for these miserable rooms?

Mrs. P. B. (*trying to keep in her indignation*)—Miserable rooms indeed! I could not take less than four guineas a week for them.

Miss P. E.—Four guineas a week! Four fiddlesticks! Come, I will give you two.

Mrs. P. B.—Two guineas a week! and you, madam, with a dog. Why you should pay a guinea extra for that dog alone.

Miss P. E.—My dog is not a common dog, Mrs. Baker. Indeed, I rather think you should pay me for the privilege of having such a darling in your house.

Mrs. P. B. (*laughing scornfully*).—There's some that 'ud as soon let a bear into their house as a dog. They is ten times worse than children, and they is bad enough.

Miss P. E.—Well! I'll offer you two guineas, and you may take it or leave it as you like. Come, Fido, pet (*pulling the string of her dog*).

Mrs. P. B. (*in a very plaintive voice*).—I suppose I must take it, though it is less than I have ever been offered before! and what Mr. Pinchley Baker will say to me, I really don't know; but for once I will make the sacrifice.

Miss P. E.—That's settled then; and remember I come in this evening. I daresay my nephew, Captain Evergreen, may drop in also. I want to keep him here till he gets over a little affection of the heart. Oh! nothing organic; merely a foolish romance to which young people are subject. Fancy a romance with a girl called Waggleton! An Evergreen should have been above such a thing. The Evergreens, Mrs. Baker, I would have you to know, are one of the most illustrious families in the kingdom; they laugh at the Conquest, they were landowners in the days of the Heptarchy.

Mrs. P. B.—Oh! before the old coaching days, I suppose—

Miss P. E.—Why, woman, that was before coaches were dreamt of? Our crest is a laurel bush, transfixed by an arrow, with the motto, *Toujours vert*, that is to say, always green.

Mrs. P. B. (*aside.*)—That's just as it should be. The greener you are, the better pleased I shall be.

Miss P. E.—It would take too long to go into all the particulars, it is enough that anyone with such a pedigree as the Evergreens, should blush at an alliance with a girl called Waggleton, whose grandfather might be a greengrocer. I shall arrive, Mrs. Baker, at half-past six, and I shall expect tea laid out, ham and eggs, muffins, and a few prawns.

Mrs. P. B.—Certainly, ma'am, your orders shall be attended to.

Miss P. E. (*going away.*)—Well, I am glad I have found some lodgings at last. (*Stops suddenly and looks round.*) My purse, my purse, where is it? (*Searches on the floor, Mrs. P. B. searches too.*)

Mrs. P. B. (*loftily*).—It is in your hand, madam, isn't that it?

Miss P. E.—And my spectacles, where on earth are they?

Mrs. P. B. (*more loftily*).—You've got them on, madam; they're on your nose.

Miss P. E.—So I have. And my keys and my bag? Gracious! where's my bag? (*Searches on the table*) Oh dear, oh dear! what shall I do, if I have lost my bag?

Mrs. P. B. (*drawing herself up, and speaking still more loftily*).—It's on your arm, madam. Nothing is ever lost in this house, whatever may be found here.

Miss P. E.—I have always five things to remember, five exactly: my purse, my spectacles, my dog, my keys, and my bag, oh! yes, and my hankerchief! six, I declare! I have got them all safe now, but one always has to be particular in lodging-houses.

[*Exit, pulling the string of her dog, and feeling for her bag.*

Mrs. P. B.—It is very fine for her to talk of lodging-houses, but wait till I get her in here, and she'll see who's mistress. Well, I am glad that I have found a lodger at last, two guineas a week, why that's more than Lady Careful gave me; and she was such a screw with her memorandum-books and her padlock for the coal-cellar. Now Miss Evergreen may be a little stingy, but she's rich, and she says so much about being green that I expect I shall have fine times. Dear! dear! what a relief it is to have let the lodgings; but not a word to Pinchley, he shall never know a word about the old lady till she's here. But I must be off down the town to order in her things. [*Exit.*

ER.

Scene III.

Enter Mr. Pinchley Baker (*rubbing his hands, and walking up and down with an air of satisfaction*).—Well! well! who can say I have not done a monstrous clever thing? Mrs. Pinchley Baker goes out on some absurd errand; I pass her on the steps, she passes me, not a word do I say (catch me at that), not a word does she say; but, just as her back was turned, up walks a bald, red-faced, comfortable old fogy, on the hot lookout for lodgings—one could tell that by the sit of his hat, by the curl of his white whiskers, by the waves of his fat silk umbrella. In he comes, looks about, trots here and there, peeps into the coal-holes, dives into the cellar, looks out of the top garret window, and finally ends by taking the lodgings at two pounds ten a week. Bravo! at last I have succeeded in out-doing Mrs. Pinchley. What will she say when she knows it all? But I will take good care to keep my own counsel, and she shall never know about Mr. Simon Grubbe's visit, till he is safely settled in our best parlour. He has ordered supper, too, for himself and his niece, the best of everything, plenty of eggs, crumpets, shrimps, and a fresh Cobourg loaf. A moneyed man, I have not a doubt of it. Dear! dear! I have got a great deal to do. I almost wish that I and Mrs. Pinchley were friends again. I suppose I had better call to Sarah. (*Goes to the door and shouts.*) Sarah! Sarah Jane! [*Enter Sarah Jane.*

Mr. P. B.—Sarah, I suppose you will be glad to hear that the lodgings are taken at last.

Sarah.—I know that already, sir. Didn't I let out the little old lady my own self, with the fat white dog tied by a string? and didn't she ask me if she hadn't dropped her handkerchief, and after all it was safe in her bag?

Mr. P. B.—Old lady! old gentleman you mean? There was no old lady here. I let *in* Mr. Simon Grubbes, and let him *out*, and let him the lodgings into the bargain. Ha! ha! very good that; that's what you may call a pun, and not a bad one either. It is a sign that my spirits have come back, and no wonder.

Sarah (*aside*).—I 'spect he's 'ad a little drop too much; spirits always do get into his head. (*Aloud.*) There's been no gentleman near the place that I knows on. This Miss Grim, or whatsomever she calls herself, has been and took the lodgings, and Missus said to me after she'd gone out, "Sarah," says she, "do you mind and look well after that old lady and her rooms; for they're 'er rooms now, and I'll be bound she'll make it worth your while."

Mr. P. B.—Sarah!

Digitized by Google

Sarah.—Yes, sir.

Mr. P. B.—When you *have* occasion to use the possessive pronoun, feminine gender, say her, and not 'er; but in the present instance, there is no occasion for such a pronoun at all. The rooms belong to Mr. Simon Grubbe, and there is no 'er in the case. Do you see that sovereign, Sarah? (*producing one from his pocket.*)

Sarah.—Yes, sir.

Mr. P. B. (*tossing it in the air.*)—That sovereign, girl, is paid in advance. It is the first instalment of two pounds ten to be paid to me, weekly, for the use of my apartments. And as to this foolish notion about an old lady that you have got into your silly head, I can only attribute it to one of two reasons, either you are labouring under some hallucination, or you are in love. Of the two, I think the last is the most probable. I understand there is some talk about a policeman.

Sarah (*bridling*).—Oh! sir, I'm sure I never said nothin' about him.

Mr. P. B.—Very few people that you are acquainted with, Sarah, could make use of such a word as hallucination. It is a splendid word, that—one, two, three, four, five syllables—no less than five syllables; but then I'm a man of education, brought up to one of the learned professions; and if I had not met Mrs. Pinchley, who knows if I might not have been Archbishop of Canterbury? It is a painful thing to see a person of my refinement, obliged to listen to Mrs. Pinchley's trips in grammar, and to hear you with your 'er and 'ers. Remember, for the future, that these rooms are Mr. Simon Grubbe's; so you may pitch that 'er to Jericho—it is not wanted. By the way, have you got a clean table cloth?

Sarah.—Yes, sir, missus left one out before she went, for the new lodger; she said——

Mr. P. B.—What did she know about the new lodger? she is in heathen darkness with respect to him. Mrs. Pinchley Baker and I are not on speaking terms, Sarah, but never mind, she will have to knock under presently, and acknowledge herself outdone. I must stroll down the town now, to lay in provisions for Mr. Simon Grubbe's repast. He arrives precisely at 6.30, so be prepared to receive him. [*Exit.*

Sarah (*watching him go*).—Well, if there won't be a precious row, my name's not Sarah Jane. [*Exit.*

DUMB-FOUNDER.

SCENE IV.—Table laid for tea, noise of luggage being brought in.—Enter *Mr. Simon Grubbe* and his niece *Miss Waggleton.*

Mr. S. G. (*seating himself in the best arm chair, and looking round*).—Well! Letty, my dear, what do you think of our new quarters, neat, but not gaudy, eh? comfortable, but not luxurious. That's about it, isn't it?

Miss W. (*standing at the window with a listless air*).—Yes, I suppose they do as well as any other place just now. Of course (*sighing*) you can't expect *me* to enjoy anything when the heart is ill at ease . . . . .

Mr. S. G.—Oh! come, come, my dear, cheer up, don't be so low-spirited! a little sea air will soon put you to rights, and as to thinking of that precious scapegrace, young Evergreen, the sooner you put him out of your head the better. A little monkey of an aristocrat, always sneering at respectable people, who have made their money by their own honest exertions——

Miss W.—Now, don't, uncle, I beg and intreat you, don't!

Mr. S. G.—Well, then, I won't; I will only wish him a sudden order to the Antipodes, so that he may not have quite so much time to spend hanging about Hopfordshire. Leave! the fellow is always on leave. One would think he had bribed the authorities to give him unlimited leave. That's enough about him, however; he is not worth talking of. Suppose we begin our little meal, I am as hungry as a hunter, and I see the muffins are all ready toasted, I said crumpets to the landlord, but no matter. (*As they are drawing to the table, a noise is heard outside, and enter Miss Evergreen; she carries her bag, umbrella, and several small parcels, and pulls her dog by the string. A parrot in a large wicker cage is set down on chair.*)

Miss P. E. (*to the porter*).—Gently, gently! I said nothing about darling poll to the landlady. I thought it better to wait till I arrived. (*Turns round and perceives Mr. Grubbe. Aside*) My gracious! the man of the house, I suppose. (*Aloud, making a dive forward*) Good evening, sir.

Mr. S. G. (*aside*).—The landlady, I presume; a regular character, no doubt. (*Aloud, bowing stiffly*) Good evening, madam.

Miss P. E.—You are making yourself comfortable, sir, I see; warming the room, I suppose? (*aside*) I hope I have got my purse safe, this paragon that his wife boasted about so much looks to me very suspicious.

Mr. S. G. (*smiling blandly*).—Yes, thank you, madam, I am tolerably comfortable, and . . . . and . . . .

Miss P. E.—Then, perhaps, you would not mind being comfortable somewhere else?

Mr. S. G.—Somewhere else? I really can't tell what you mean, madam; of course there are a few little things which I would wish to be altered. The stuffing of this chair, for instance, seems to be made of brickbats, the hearthrug has a hole in it, and the footstools are decidedly on their last legs; but I don't mind making a few little improvements at my own expense.

Miss P. E.—You are very good, sir. (*Aside*) I never heard a landlord abuse his own furniture before.

Mr. S. G.—Good! Oh, not at all, I always like to do things liberally, it establishes a pleasant feeling between landlord and tenant.

Miss P. E.—Very satisfactory, no doubt; but I think there is nothing more to be said, and as it is getting late, I should like to be left to myself.

Mr. S. G.—I was just going to make a similar remark about the lateness of the hour. My niece and I are tired, and we have, therefore, much pleasure in wishing you a very good evening.

Miss P. E. (*sits down.*)—Good evening, then.

Mr. S. G.—Madam!

Miss P. E.—Sir!

Mr S. G.—I think I said good evening.

Miss P. E.—I think I did, too.

Mr. S. G.—Then why on earth don't you go, you and your live stock?

Miss P. E.—What do you mean, fellow? Of course I have no intention of going. Why shouldn't I stay in my own room that I have paid for, and bring in my pets, and eat my ham and my muffins that I have ordered for myself? (*Sits down at the table, reaches across for butter, and stretches out her hand for the teapot.*) I'll trouble you, young woman, to put some more water in that teapot, I always like my tea weak in the evenings.

Mr. S. G. (*helping himself to a muffin*).—For the second time, madam, I wish you a good evening! Leave us in peace!

Miss P. E.—For the second time, sir, I wish you a good evening, leave me in peace. (*Aside*) Intended for the church was he, I never saw such cool impertinence in or out of church.

Mr. S. G. (*rising*).—I really can stand it no longer.

Miss P. E. (*also rising*).—*I* really can stand it no longer.

Mr. S. G.—Then stand it no longer, and begone to your own part of the house, and eat your supper, and make yourself at home there.

Miss P. E.—I always make myself at home in the lodgings that I pay for, and which are, for the time being, my own!—my own! (*raising her umbrella as she speaks.*)

Mr. S. G.—Violence is of no avail here. Is it the slightest use again to remark that it is not only getting, but has actually become late, and that we for the third and last time, civilly but resolutely, wish you a very good evening?

Miss P. E. (*after having gazed at Mr. Grubbe for some time in silence*).—Sir, are you mad or drunk?

Mr. S. G.—Madam, are you mad or drunk?

Miss P. E. (*in a voice trembling with rage*).—I am neither the one nor the other; but your extraordinary, your unparalleled impertinence positively takes away my breath! you dumb-founder me, sir! you actually dumb-founder me!

Mr. S. G.—I never saw any one less dumb-foundered in my life. If I said that you dumb-foundered *me*, I should be more near the truth (*helps himself to a slice of ham*).

Miss P. E. (*standing over him with uplifted umbrella*).—Stop eating my ham this instant, or I will ring for the police, and have you sent to jail immediately. Forbearance is thrown away upon you—you—you—wretch!!! To dare to insult an innocent and unoffensive female of illustrious birth in her own apartments! and oh, my spectacles, my purse, my keys, my bag, my handkerchief, where are they? I do believe I have fallen into a den of thieves, and this man is the head of it. If my grandmother, Lady MacSorley was only alive, this would have been the death of her.

Mr. S. G. (*kicking the dog, who yelps loudly while the parrot screams in concert*).—Letitia, my dear, you had better retire to your own room. This good woman is evidently——

Miss P. E.—Woman! sir, woman! what do you mean by calling *me* a woman?

Mr. S. G. (*proudly*).—This good woman is evidently a little astray; something wrong with the upper story (*touching his forehead*), you understand, and so you had better withdraw till she can be removed.

Miss P. E (*who has been speechless from rage*).—Sir, I would have you to know that I am no woman; that you see before you a descendent of the ancient Saxon kings of the Heptarchy.

Mr. S. G. (*sarcastically*).—Oh! yes, I daresay; perhaps you are a reigning monarch yourself.

Miss W.—Oh! uncle, stop, do, I entreat you, stop. I really think this can be no one else but old Miss Evergreen, Adolphus's aunt; though how she comes here, I don't know.

Mr. S. G.—Whoever she is, I advise her to take herself and the Heptarchy out of the room in double quick time.

Miss P. E. (*with dignity*).—Sir, when I took your rooms——

Mr. S. G.—*You* took *my* rooms! come, I like that! *I* took *your* rooms, you mean.

Miss P. E.—I mean nothing of the sort; but I shall not be insulted much longer. I expect my nephew in a few minutes, and he will at once send for the police, and have you ejected without delay.

Mr. S. G.—Oh! yes, indeed; I wonder you don't go for them yourself. Meantime, I shall make a clearance of the muffins.

Miss P. E.—You shan't touch one of them (*rushes to the table, and upsets bag, purse, keys and umbrella*), not one of them. They're mine, I say; they're mine (*holding her hand over the plate*). [*Enter Captain Evergreen.*

Miss P. E. (*rushing towards him.*)—Oh! Adolphus, Adolphus, at last you have come! come to save me from the vulgar insults of this brutal man. Order him, and this . . . . this young person he calls his niece to leave the room instantly; and to give me up my muffins, and my ham, and my prawns, and my tea, and my everything.

Capt. E.—Why . . . . why aunt, what's all this about? And what on earth are you doing in other people's rooms (*looking round*). Is it possible? Do I see . . . . do I actually see Mr. Grubbe—and—and Letitia?

Mr. S. G. (*advancing*).—Yes, you do. I and my niece took a sudden thought. We set out from Hopfordshire this morning, and arrived at Sandington at one precisely—I left Letitia on the pier, while I set out to look for lodgings. I saw these rooms, came to terms with my landlord, paid a sovereign in advance, and we arrived this evening at half-past six. Just as we were seated at our evening meal, in bounces this good lady. . . .

Miss P. E.—Woman! sir, you said woman——

Mr. S. G.—Well! I apologise for the woman. In bounces this good lady, attacks us, we don't know why or wherefore, refuses to go away, becomes more and more excited, till a scene of utter confusion ensues.

Miss P. E.—Adolphus, my dear; I took the rooms this morning from Mrs. Baker. I paid in advance. I ordered in tea and muffins—I——

Mr. S. G.—Good gracious me! Why ain't *you* Mrs. Baker?

Miss P. E.—Mrs. Baker! I Mrs. Baker!! (*throwing herself into a chair*). I have lived long enough. I, to be taken for a Mrs. Baker! I, to be taken for a miserable seaside lodging-house woman! This is too much (*starting up and hastening over to Mr Grubbe*). Sir, will you have the goodness to observe the aristocratic arch of my nose; that aquiline nose that no plebeian ever has—will you please to mark the curve of my upper lip, that unerring characteristic of ancient and noble origin, and do you mean to tell me that I look like a Mrs. Baker? Such a mistake might have arisen with respect to a Miss Waggleton, but the blue blood of an Evergreen cannot be so easily disguised.

Digitized by Google

Capt. E.—My dear aunt; pray don't say anything against Miss Waggleton, because she is in the room, or rather the Miss Waggleton that was, Mrs. Adolphus Evergreen that now is.

Miss P. E.—What!!!

Mr. S. G.—What!!!

Capt. E.—Come, Letitia, give me your hand; we may as well stand up together, and make our confession. Yes, my dear aunt. Yes, Mr. Grubbe; the licence was bought, and this morning Letitia and I slipped out for half an hour, and were married at St. Luke's church.

Miss P. E. (*sinking into a chair*).—Oh! Adolphus, Adolphus, what have you done? Never, never, can I forgive you. Evergreen and Waggleton, Waggleton and Evergreen. It is beyond the beyonds.

Capt. E. (*eagerly*).—No! no! it isn't. You forget, aunt, things are not what they used to be; they are getting more on a level. Blue blood flows together with red, and is all the better for the mixture. Only look at Letitia, aunt, is she not fit for the haughtiest patrician in the land?

Mr. S. G. (*to Miss W.*)—Ah, Letty, silly girl! You see these proud aristocrats will only despise you.

Miss W.—No, no, they won't. Only forgive me, uncle, and all will be well.

Mr. S. G.—I suppose I must. When a thing is done we must only try to make the best of it, and I never could be angry with you, Letty, for more than ten minutes together. So take her, Captain Evergreen; she is yours now, and with her goes thirty thousand pounds, the fruits of her father's hard toil. He was a paper-bag manufacturer, and a better or an honester man never broke bread, though his blood was only common red, just like my own.

Capt. E. (*aside to Miss P. E.*)—There, aunt, don't be angry any longer. You see I shall never have to ask you for a penny again; and as for ancestors, bother them! I say. For my part, I don't know what they do for a fellow.

Miss P. E.—No more of that, Adolphus, no more of that.

Capt. E.—Well, I wont, if you will only say something kind to Letitia.

Miss P. E. (*starting up suddenly*).—Where on earth are my spectacles?

Miss W.—They are on your nose, Miss Evergreen, and perfectly safe.

Miss P. E.—And my purse? I am sure it is lost.

Miss W. (*picking it off the floor*).—Here it is.

Miss P. E.—And my bag?

Miss W.—On the table.

Miss P. E.—And my keys?

Miss W.—Under the chair (*picking them up*).

Miss P. E.—And my handkerchief, and my umbrella, and my dog? I thought I had only six things to mind, but I have seven.

Miss W.—They are all by your side.

Miss P. E.—So they are. Adolphus, I don't believe the girl is quite a fool; and, perhaps, you have not made such a very bad choice after all. Of course, it is a dreadful trial for me to have a niece without any pedigree, and nothing but the recollection of a paper-bag manufactory hanging round her neck like an incubus. But I suppose I must look over your rashness, though I shudder to think of what Lady Rachel Rake-up will say to me.

Capt. S.—Never mind what she says, prying old bag! Come, come! now we'll have nothing but peace and harmony.

Miss P. E.—No, Adolphus, two conditions must be complied with. One is, that that person (*pointing to Mr. Grubbe*) should apologise to me for his unheard of conduct.

Mr. S. G.—So I do. I apologise with all my heart; and now, Miss Evergreen, let me have the honour of conducting you to the table, where we may share together the disputed muffins.

Miss P. E. (*waving her hand with dignity*).—No, sir; not till these lodging-house people have been summoned, and the extraordinary confusion of this evening has been accounted for. Adolphus, ring the bell.

[*Enter Mr. and Mrs. Pinch'ey Baker.*]

Mrs. P. B.—Now I am going to speak——

Mr. P. B.—No, no, indeed. I know far better than you what to say. I'll speak.

Capt. E.—Come, come, *place aux dames*—that is to say, ladies first. Mrs. Pinchley Baker, you begin.

Mrs. P. B.—We have come to say that we are very sorry for all the confusion that has been made. But the fact is, my husband and me——

Mr. P. B.—My husband and *I*, you mean. I told you I knew what to say better than you do. A man of my education should not be put down like this.

Mrs. P. B. (*proceeding*).—My husband and me had a little difference this morning, and we resolved not to speak to one another; so that's how *I* let the room to Miss Priscilla Evergreen, and *he* let them to Mr. Simon Grubbe; but if one party will consent to go into the back parlour, everything will be settled, and we promise never to go on the Silent System again.

Mr. P. B.—Now I *will* have my word whether you let me or not. So here goes:—

Some say of silver speech is made,
But silence made of gold;
Yet if our tongues should never go,
We'd find that we were sold.

But we're not sold—discussion's o'er,
And peace begins to reign.
Come, friends, we long to see your smiles;
Your praise we've tried to gain!

(*Curtain falls.*)

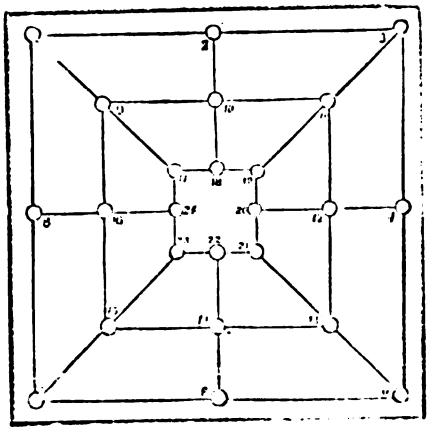
THE GAME OF "BLOCK."

Implements.

A board as diagram, the figures not being necessary, except when the game is played by correspondence—they are placed here to simplify the examples—sixteen pegs, and two King pegs. Twelve pegs and the King pegs being required for play, the four remaining pegs as a reserve force of two for each player.

How to Play the Game.

Divide the pegs, one player taking the White, the other the Black. The first to play is decided by lot. Each player then places a peg into one of the holes in turn, occupying those which he may consider the most advantageous, until the twelve pegs and



the two King pegs have been *placed*. Then each moves one of his pegs in turn, but only one hole at a time, and as the lines run.

Points of the Game.—To Block, to Force, and to Make a Line.

1. *To Block* is to get a peg on each side of one of your adversary's; this, if an ordinary peg, is its capture, and it is immediately removed off the Board.

Example.—Black having a peg in 1, and White playing a peg in 2, Black captures that peg by playing a peg in 3; but White having a peg in 4 can capture Black's peg in 3 by playing another peg in 2; or White having pegs in 1, 10, and 24, and Black a peg in 9, could Block Black's peg by playing peg 24 either into 17 or 16.

But to Block the King peg, the other holes surrounding him must be filled, though it is of no consequence by whose pegs. To Block the King peg is game. His only means of escape is by immediately capturing one of the pegs Blocking; if he cannot do this, and cannot move, the game is over.

Example.—Black's King peg being in 3, and White having a peg in 4, is not blocked by White placing a peg in 2, because the hole 11 is unoccupied. Or supposing Black to occupy 11 (King peg) and 3, and White 2, 12, and 19, the game would be lost to Black by White playing 2 to 10, which Blocks the King; but if Black had a peg in 17, 16, or 1, to immediately play into 9, he would capture 10, which is one of the Blocking pegs, and so liberate the King peg. The other Blocking peg is 12. Capturing 19 would be of no avail, neither would moving his own peg 3.

(2). *To Force* is to get two pegs on a line with one of your adversary's, in which case you *force* him to move that peg to the *first* vacant hole on its square, in whichever direction it may occur, and in the event of there not being one vacant on its square, to whichever square has the nearest.

Example.—Black, occupying hole 1, could force White from hole 3 by placing a peg in hole 2, in which case White's peg 3 would have to move to 4; or by occupying holes 14 and 19, when White would have two holes at equal distance—4 and 2, and could move into either unless the Forcer gave the preference.

If the *King peg* be Forced, a peg is thereby gained from the Reserve which is placed in the hole vacated by the King.

(3). *To Make a Line* is to get three of your pegs on one line in any way but diagonally, in which case the third or last peg moved to make the line can be at once removed to any vacant hole on the board.

Example.—By occupying holes 1 2 3, 2 10 18, 9 10 11; in fact any way but from corner to corner as 1 9 17 or 19 11 3

If your adversary insists upon maintaining a peg in a hole to your great disadvantage, play your pegs so as to *Force* him from it, having first *prepared* a hole for him to move into. That is to say, be careful that the hole you *Force* him into does not attack your position, as Black's pegs in 2, 4, 7; White's pegs in 1 and 6; now Black, moving peg 4 to 3, *Forces* White's peg 1, which is compelled to move to hole 8, and so captures Black's peg 7. On the contrary, if Black occupied holes 2, 6, 7, 9, 11, and White holes, 1, 4, 5, by Black playing peg 11 into 3, White's peg 1 is *Forced* into 8, and it being Black's next move, he occupies hole 1 with his 9 peg, or 2 peg, and so captures the peg he *Forced*. The great point is to place the pegs in a good position at the commencement of the game.

Rules of the Game.

1. Each player places one peg in turn, and when all are placed, moves in the same manner, but only as the lines run, and one hole at a time.

2. A Force made during the placing of the pegs does not interfere with that player's turn; that is to say, if White in *placing* the pegs occupies hole 1, and Black hole 3, Black would be *forced* by White taking hole 2 and would have to move, but would immediately afterwards place his peg as was his turn.

3. The placing of a peg gained from the reserve into the hole vacated by King peg does not count as a move, consequently any advantage so gained is *nil*.

4. The playing a peg when forced counts the same as its move, and reaps any advantage gained by occupying the hole it is forced into.

5. A forced peg, having the preference of two holes to move into, can be compelled by the forcer to occupy either.

6. A *made Block* or *made Force* is of no advantage; that is to say, if Black occupied holes 1 and 3, White could put a peg in hole 2 without being captured; or Black possessing holes 1 and 2, White could place a peg in 3 without being forced. The same applies to a peg when Forced into such a position.

7. Any advantage gained in a move, and not noticed before the next move, cannot be counted.

8. A person drawing a peg is compelled to move it, and on the event of its being placed in a hole, must there leave it.

9. A peg played to *Force* or *Block* cannot claim the advantage of a line if it make one by so playing, for instance, Black in 1, 6, 8 and 23, a white peg being in 15; Black by playing 6 to 7 can either take it as a line or Block 15, but not both. Neither can two pegs be *Forced* or *Blocked* in the one move. The player has the preference in each case A peg can, however, *Block* and *Force* in the one move.

Example.—White occupying holes 9 and 8, and Black holes 15 and 24, Black by getting a peg into 16 *forces* both 8 and 9; he therefore compels his adversary to move whichever is most to the forcer's advantage. Or white in 10, 19, 13, with Black in 9 and 12, captures peg 12, and forces peg 9, by moving from 19 to 11.

10. A player, whose turn it is to move, having his pegs so surrounded that he cannot—draws the game.

11. A player having the whole of his pegs (9) on the board can gain no more by Forcing the King.

12. A game being reduced to only three pegs on the board can be drawn, if not won in twenty moves.

The Housewife.

BREAKFASTS, LUNCHEONS, AND DINNERS.

SPRING.

Breakfast.

Fried Eggs.
Stewed Kidneys with Maccaroni.
Chicken and Ham Pie.

FRIED EGGS.—Melt a piece of butter in a small frying pan, and then break two eggs in it carefully so as not to burst the yolks; let them nicely set over the fire, when nearly set slip them out on a hot dish, pour the butter over them, sprinkle with salt and pepper, and serve.

STEWED KIDNEYS WITH MACCARONI.—Cook 2oz. of maccaroni (broken into small pieces) in boiling water. Take two or three mutton kidneys, skin them, remove the fat, and cut them into thin slices, season with salt, cayenne, finely minced herbs, and fry them on both sides in butter, then stew them in half pint of good gravy flavoured with fresh tomatoes, or *Conserve de Tomates*. Dish with a layer of the maccaroni over them, then the gravy poured over, add pepper and salt, some grated Parmesan cheese, and brown with a salamander.

CHICKEN AND HAM PIE.—Border a small pie dish with puff paste. Mince finely some cold fowl, ham, and a little shalot, season with salt, pepper, and pounded mace, moisten with white stock, fill the pie dish, cover with paste, bake in a moderate oven, and when done add, through a hole in the top, either a little hot cream or some good white stock.

Luncheon.

Sole au Gratin.
Lamb Cutlets——Soubise Sauce.
Cream Cheese——Salad.
Gooseberry Fool.
Wine:—Sauterne——St. Elie.

SOLE AU GRATIN.—Mince finely half dozen mushrooms, two shalots and some parsley, mix together, and strew a dish or tin (plentifully buttered) with half of this mixture, some baked bread crumbs sifted fine, and pepper and salt. Lay a couple of soles on this, then the remainder of the mushrooms, &c., more pepper and salt to taste, cover up the whole with baked bread crumbs; pour in at the sides a wineglassful of white wine, and enough stock or broth to come up to, but not over, the fish. Bake half an hour.

LAMB CUTLETS À LA SOUBISE.—Trim some neck cutlets very neatly, sprinkle them with pepper and salt, and broil on a brisk fire; serve with mashed potatoes in the centre, and soubise sauce in the dish.

Soubise Sauce.—Peel and blanch three onions, cool them in water, drain and put them in a stewpan with sufficient water or white stock to cover them, add cayenne, bay leaf, a little mace, and a small piece of ham or bacon, keep the lid closely shut, and simmer gently till tender, take them out, drain thoroughly, press through a sieve or tammy, and add quarter pint of *Béchamel* made thus: Put into a stewpan a little parsley, one clove, some sweet herbs, and half pint of white stock, when boiled long enough to extract the flavour of the herbs, &c., strain it, boil up quickly and reduce to half the quantity, mix a dessert-spoonful of arrowroot with a little milk or cream, pour on the reduced stock and simmer for ten minutes.

SALAD.—Take a lettuce, remove the outer leaves, wash, drain it thoroughly, and cut it into small pieces, take some fresh-cut garden cress (also washed and drained), if liked a few spring onions, put them in a salad bowl, with the following dressing:

Salad Dressing.—Mash the yolks of two hard-boiled eggs with a silver fork, add a teaspoonful of salt, two of mustard, a pinch of white pepper, and a little cayenne, add by degrees three tablespoonfuls of cream (or sweet oil), one of tarragon, and one of plain vinegar; stir till quite smooth.

GOOSEBERRY FOOL.—Pick one quart of quite young gooseberries and put them in a jar with a very little water and plenty of sugar. Put the jar in a saucepan of boiling water till the fruit be quite tender, beat it through a colander and then add gradually one pint of cream with sufficient sugar to sweeten, garnish the dish with macaroons or ratafias.

Dinner.

Sorrel Soup.
Boiled Salmon——Chervil Sauce——New Potatoes.
Croquettes of Beef—Poulet à la Marengo.
Roast Quarter of Lamb——Mint Sauce.
Roast Ptarmigan——Seakale.
Tartelettes Piémontaises.
Sponge Pudding——Sweet Rice.
Dinner Wines:—Sherry——Rudesheim——Chambertin.
Dessert Wines:—Amontillado——Haut Brion.

SORREL SOUP.—Wash, pick, and shred a pound of sorrel, put it into a saucepan with a head of lettuce shred finely, a handful of chervil, and 2oz. of butter; stir on the fire for about ten minutes, then add a quart of stock (or water), pepper and salt to taste, and a dust of powdered nutmeg; let the whole simmer half an hour, then stir in, off the fire, the yolks of two eggs beaten up with a gill of cream. Pour the soup over some diminutive slices of stale bread (neither toasted nor fried), and add a piece of butter as big as a walnut.

BOILED SALMON.—Put the fish—scaled and cleaned—into a fish kettle with sufficient cold water to cover it well, and with salt in the proportion of 1lb. to 6qts.; boil it quickly, skim carefully, and let it simmer till quite done. Remove it from the water, drain, brush the outer skin lightly with salad oil, and serve on a hot dish, with cut lemon and parsley.

CHERVIL SAUCE.—Wash and pick some chervil, put it into a saucepan of boiling water with a little salt, for about ten minutes, drain and mince it finely, put it into a sauce-boat and mix with it—by degrees—some good melted butter in the proportion of 1½ table spoons of minced chervil, to every ½pt. of melted butter.

NEW POTATOES.—Choose smallish potatoes and all of one size, put them into a stewpan with plenty of butter, and a good sprinkling of salt; keep the saucepan covered and shake, it occasionally until they are quite done, which will be in about one hour.

CROQUETTES OF BEEF.—Take ½lb. of roast or stewed beef, trim off all outside parts and fat, mince it very finely; melt in a saucepan a small piece of butter, stir into it a tablespoonful of flour, and keep on stirring till it gets brown; add a gill of good stock, some powdered sweet herbs, pepper and salt to taste, and the minced beef; keep on stirring till the mixture is hot, add a little chopped parsley; then work into the mixture, off the fire, a couple of yolks of egg. Lay it on a plate to cool, shape it into the shape of corks, roll them up in a beaten up egg and then in baked bread crumbs; fry them in hot lard, and serve with fried parsley.

POULET À LA MARENGO.—Cut up a fowl in joints as for fricasee, fry the pieces, doing the thighs first as they take longer than the rest, in olive oil, well seasoned with salt, pepper, a *bouquet garni*—parsley, thyme, and bay leaf—and a handful of mushrooms. Make a white *roux*, with 1oz. butter and 1oz. of flour, moisten it with white stock and a glass of white wine. Into this sauce incorporate gradually (stirring well all the time) the greatest part of the oil in which the fowl was fried. Arrange the fowl in a dish, pour the sauce over it and garnish with the mushrooms.

ROAST QUARTER OF LAMB.—Roast the joint before a clear, bright fire, at sufficient distance to prevent burning up the fat, baste frequently, sprinkle with a little salt, serve with the gravy well freed from fat.

Mint Sauce.—Chop as finely as possible some mint leaves previously washed, add to them sufficient white wine vinegar and water in equal parts to float them, and a small quantity of powered sugar. Let the sauce stand for an hour before serving.

ROAST PTARMIGAN.—Pluck, draw, singe, and truss the birds, wrap them in slices of fat bacon, roast before a clear fire, and serve on buttered toast.

SEAKALE.—Wash it well, and tie it into small bundles, put them in boiling water—well salted—and boil fast till quite tender. When well done, drain and serve on buttered toast with white sauce over.

White Sauce.—Put into a saucepan with 1pt. of white stock, a small onion, one clove, a blade of mace, and a faggot of herbs; boil for an hour, strain, thicken with a dessert spoonful of arrowroot, boil it up again, and add by degrees ½pt. of cream.

TARTELETTES PIÉMONTAISES.—Make a paste with 1oz. of butter, 2oz. of flour, the yolk of an egg, a little water, a pinch of salt, roll it out to the thickness of the eighth of an inch, and line some patty pans with it. Take 2oz. of finely grated Parmesan cheese, beat it up in a bowl with the yolks of two eggs; add pepper, salt, cayenne, and nutmeg, according to taste—very little of the two latter: then work in three tablespoonfuls of cream, fill each patty pan with the mixture, and bake them in a moderate oven till done.

SWEET RICE.—Wash 3oz. of rice and boil it in 1½pt. of new milk, with ¼lb. of loaf sugar, and a laurel leaf, till quite soft—one hour and a half. Take out the leaf, and let the rice stand off the fire for five minutes, then stir in by degrees four fresh eggs, well beaten, and half a gill of cream. Stir over the fire till at boiling heat, then let it stand, and stir it occasionally till cold, put it in a glass dish, and stand it in a cold place for two hours. Just before serving, sift over the surface one teaspoonful of pounded cinnamon.

SPONGE PUDDING.—Line a glass dish with some sponge cakes (cut in slices), savoy cakes and ratafias; put a layer of apricot compote, pour over a small quantity of custard, and on the top some whipped cream, flavoured with vanilla.

SUMMER.

Breakfast.

Omelette aux Pointes d'Asperges.
Whiting à l'Italienne.
Purée of Strawberries and Raspberries.

OMELETTE AUX POINTES D'ASPERGES.—Break four eggs into a basin with a little salt, pepper, and some coarsely minced heads of asparagus

Digitized by Google

previously cooked, put 2oz. of butter into an omellette pan, when hot, beat up the eggs and throw them into the pan. Stir till nearly set. Fold the edges over with the omelette spat, and when of a bright gold colour serve very hot.

WHITING À L'ITALIENNE.—Clean, skin, and remove the fins and tails of some whiting; put them in a dish with a little oil, the juice of a lemon, a few slices of onion, sprigs of parsley, pepper and salt, leave them for several hours, then drain, flour and fry them in boiling fat and serve with fried parsley.

PURÉE OF STRAWBERRIES AND RASPBERRIES.—Beat 1½lb. of picked strawberries and raspberries, press them through a sieve, sweeten to taste, stir in gradually half-pint of cream, and serve in a glass dish.

Luncheon.

Trout—Remoulade Sauce.
Stewed Sweetbread.
Aubergines à la Provençale.
Apricot Tart.
Wine:—Chablis—Beaujolais—Manzanilla.

TROUT WITH REMOULADE SAUCE.—Fry some medium-sized trout, lay them on paper to remove all fat. Chop some chervil, chives, capers, parsley, cress, a little shalot, pound them in a mortar, add a little French mustard, the yolks of two raw eggs, season with salt and pepper; add drop by drop good olive oil, in the proportion of two table-spoonsfuls to each egg, beat up the mixture, and when quite smooth add a little Chili vinegar; dish the trout (when quite cold), pour the sauce over, and garnish with sprigs of chervil.

STEWED SWEETBREAD.—Soak some sweetbreads in warm water till quite white, blanch in boiling water, and then put them in cold water again for a short time. Stew for half hour in half pint of well-flavoured white stock, with a small piece of butter. Beat up the yolks of two or three eggs with some cream, a little finely minced parsley and grated nutmeg, add this to the gravy, warm it, stirring all the time. Dish the sweetbreads with some well-boiled peas, pour the sauce over, and serve.

AUBERGINES À LA PROVENCALE.—This delicious vegetable, which is allied to the vegetable marrow, but far superior for the more elaborate forms of *entremets de légumes*, though common in Paris and the South of France, is not often met with at English tables, but may be obtained in Covent Garden market during July and August. Halve them lengthwise, remove most of the inside, and pound it up with some chopped mushrooms, fine bread crumbs, sweet herbs, and a little shalot or garlic, moisten with sweet oil; pepper and salt the *aubergines*, fill them with the above mixture, lay them in a baking tin with some sweet oil, and bake in a quick oven.

APRICOT TART.—Butter an open tart mould, line it with puff paste, stew some halved apricots in syrup till quite soft, fill the tart with this compote, and bake in a moderate oven.

Dinner.

Soup à la Reine.
Salmon (cold) à la Ravigote.
Crème de Volaille.
Roast Loin of Mutton.
Haricots verts à la Lyonnaise.
Parmesan Omelet.
Strawberry Ice Cream.
Tourte aux Cerises.
Dinner Wines:—Manzanilla——St. Julien or Mâcon——Moselle Cup.
Dessert Wines:—Montilla Sherry——Chateau Neuf des Papes.

SOUP À LA REINE.—Take two quarts of good white stock, put it into a saucepan with ½lb. of lean veal, a slice or two of ham, two whole onions, a carrot, a head of celery, mace, and a faggot of herbs. Boil gently for an hour and strain. Pound up the white part of a cold fowl, with 1oz. of sweet almonds, blanched, and one slice of crumb of bread—previously soaked in boiling milk. When quite smooth, add this to the soup, and press it through a hair sieve. Mix the beaten up yolks of four eggs with ½pt. of cream and a dessert spoonful of arrowroot; add it to the soup and stir it over the fire till quite hot, but do not let it boil. Add salt, pepper, and a little pounded sugar.

COLD SALMON À LA RAVIGOTE.—Take a piece of the middle, boil it as described at p. 67. When cold serve with ravigote sauce.

Ravigote sauce.—Pound in a mortar some sweet herbs, previously chopped—parsley, chervil, cress—a spoonful of capers, one or two anchovies; reduce to a smooth paste; add the yolks of two eggs, salt, pepper, three able spoonfuls of oil and one of lemon juice.

CRÈME DE VOLLAILLE.—Pound the white flesh of a fowl into pulp, pass it through a tammy, put it back into the mortar, add the yolks of three eggs and a gill of cream, flavour it with pepper, salt, and nutmeg, and a suspicion of shalot. Then, having well worked the mixture, pour it into a buttered shape, which should be only half filled, and steam for a couple of hours. Serve with béchamel sauce.

Béchamel sauce.—Put into a pint of milk two or three mushrooms, one onion, and a carrot cut into pieces, a bundle of sweet herbs, whole pepper, salt to taste, a few cloves, and a little mace; let the whole gently simmer for about an hour. Put 1 oz. of butter into a saucepan, and mix with it a table spoonful of flour, then strain the flavoured milk into a saucepan, and stir on the fire until it thickens. Finish it by stirring in a gill of cream.

ROAST LOIN OF MUTTON.—Trim and joint a loin of mutton, roast it before a clear fire, baste frequently, sprinkle with salt, and serve with the gravy well freed from fat, and plain boiled potatoes.

HARICOTS VERTS A LA LYONNAISE.—String some French beans, boil them in plenty of water, with salt to taste; when done, drain them dry. In the meantime, cut one or more onions into thin slices lengthwise. Put them in a frying pan with a good lump of butter, and keep stirring till they are a golden colour; then add the French beans, with pepper and salt to taste, and toss the whole for ten minutes, adding the least drop of stock, and a very little vinegar or lemon juice. Serve hot.

PARMESAN OMELET.—Beat up three eggs, with pepper and salt to taste, and a tablespoonful of grated Parmesan cheese. Put a piece of butter the size of an egg into an omelet pan; as soon as it is melted pour in the eggs, and, holding the handle of the pan with one hand, stir the omelet with the other by means of a flat spoon. The moment the omelet begins to set cease stirring, but keep shaking the pan for a moment or so; then with the spoon double up the omelet, keep on shaking the pan until the underside is of a good colour. Turn it on a hot dish, coloured side uppermost, and serve quickly.

STRAWBERRY ICED CREAM.—Put some picked strawberries into a basin, sweeten with powdered sugar, add strawberry jam equal in quantity to the fruit, the juice of two lemons, a small quantity of new milk, and one pint of cream, mix, colour with cochineal, and freeze.

TOURTE AUX CERISES.—Stone 1½lb. of stewing cherries, and cook them with some sugar, a little sherry, and a few drops of cochineal to give them a nice colour. Line a tourte mould with short paste uniting the joints carefully with white of egg. Fill the mould with rice and bake it; when done, remove the rice, put in the stewed cherries and serve hot or cold.

AUTUMN.

Breakfast.

Œufs brouillés aux Tomates.
Rognons à la Brochette.
Kedgeree.
Purée of Plums.

ŒUFS BROUILLÉS AUX TOMATES.—Beat up four eggs, with salt and pepper until well mixed. Put them into a stewpan with 2oz. of butter, and keep constantly stirring with a wooden spoon till nearly set, then add two table-spoonfuls of tomato sauce, and stir for two minutes longer off the fire.

ROGNONS À LA BROCHETTE.—Cut some mutton kidneys open down the centre, do not separate them; peel, and pass a skewer across them to keep them open, pepper, salt, and dip them into melted butter, broil them over a clear fire on both sides, doing the cut side first; remove the skewers; have ready a little butter mixed with some chopped parsley, nutmeg, salt, and pepper, and a little lemon juice, put a small piece of this *maître d'hôtel* butter in the hollow of each kidney, and serve very hot.

KEDGEREE.—Boil a teacupful of rice in water, strain and mix with it the remains of any cold fish and two hard-boiled eggs cut up small, add salt, cayenne, pounded ginger, mace, powdered cloves, 1oz. of butter, stir it all well over the fire, and serve very hot.

PURÉE OF PLUMS.—Stew a quantity of plums, with sugar to taste, and not too much water. When quite done pass through a hair sieve, stir well, and when cold it is ready for use.

Luncheon.

Pieds de Mouton à la Poulette.
Veal Cutlets à la Bordelaise.
Vegetable Marrows——Tomato Sauce.
Lady Abbess Cakes.
Wine:—Carlowitz Auslese——Pouilly.

PIEDS DE MOUTON Á LA POULETTE.—Clean, skin, and scald some sheeps' trotters, remove the large bone. Put into a stewpan 1oz. of lard, 3oz. of chopped suet, one onion and one carrot sliced, a faggot of herbs,

Digitized by Google

one root of parsley, two cloves, shalot, grated nutmeg, salt and pepper. Simmer them for a short time over the fire, but do not let them brown, then add 1qt. of hot water, and a little vinegar, stir till boiling; put in the trotters and stew them gently for about five hours till quite tender; drain them. Mix 1oz. of butter, 1oz. of flour, in a saucepan, moisten with white stock, add the trotters, some mushrooms, button onions, parsley, a little shalot (minced), grated nutmeg, salt and pepper; simmer for half an hour. Just before serving, add the yolks of two eggs and a little lemon juice.

VEAL CUTLETS À LA BORDELAISE.—Prepare some thin cutlets, trim them neatly and season with salt and pepper, take some fat bacon and some of the trimmings of the cutlets, chop them very finely, add bread crumbs, sweet herbs, a little shalot, all finely minced, beat them up with an egg, and cover the cutlets with this forcemeat; egg and bread crumb, and fry them of a nice gold colour. Dish them with gravy over and add the juice of half a lemon just before serving.

VEGETABLE MARROWS—TOMATO SAUCE.—Peel some vegetable marrows and boil them in salt and water, drain, quarter them, and serve in a very hot dish with the following sauce over:

Tomato Sauce.—Put 1½lb. of tomatoes in a stewpan, with one gill of gravy, some salt, pepper, laurel leaf, thyme, parsley, a little chopped onion or shalot; stew till tender, press them through a sieve, mix 1oz. of butter with 1oz. of flour, stir in the *purée*, when hot pour over the vegetable marrows.

LADY ABBESS CAKES.—Pound 3oz. of almonds, ½lb. butter, 2oz. of loaf sugar, with a little rosewater till it becomes a thick paste; spread it on a buttered tin, divide it into eight cakes, bake in a slow oven, when cold put a spoonful of preserve on each cake and cover with whipped cream.

Dinner.

Hare Soup.
Sole Frite à la Colbert.
Braized Fillet of Beef.
Roast Partridges.
Stuffed Artichokes à l'Italienne.
King Cup Puddings.
Coffee Cream.

Dinner Wines:—St. Elie——Haut Sauterne——St. Peray (Mousseux).

Dessert Wines:—Volnay or Chambertin——Amoroso Sherry.

HARE SOUP.—Take a hare, skin, draw and reserve the blood; cut it up and put it into a saucepan with an onion, two cloves, a faggot of herbs (parsley, thyme, and basil), pepper, salt and mace, 2qts. of stock and half bottle of red wine, simmer gently till the meat be quite tender, strain it from the soup, soak the crumb of some bread in the soup, and, removing the meat from the bones, chop it up with the soaked bread, and pound it quite smooth in a mortar, add the soup gradually to the purée, pass it through a tammy, hot it up, but do not let it boil. Just before serving add the blood, very gradually stirring it in off the fire, pour it into the soup tureen over small dice of fried bread.

SOLE FRITE À LA COLBERT.—Make an incision along the back-bone on that side of the sole which is called the back of it, from and up to within an inch of the head and tail; slip a knife under the flesh on each side, and loosen it from the bones; then egg and bread crumb (with baked bread crumbs) the sole, and fry it in plenty of lard, with the side bearing the incision uppermost. The edges of this will curl outwards in the process of frying, and the opening thus made is filled at the time of serving with plenty of *maitre d'hôtel* butter, the sole being sprinkled with fine salt. While the sole is being drained in front of the fire, the back bone may be removed carefully, but this is not necessary.

BRAIZED FILLET OF BEEF.—Take a piece of the undercut of the sirloin of beef, trim off the fat neatly, and the skin next to it; lard (not too finely) that side of it with fat bacon, tie it up, and lay it in a stew pan over a slice of fat bacon; add whole pepper and salt to taste, an onion stuck with cloves, a couple of sliced carrots, and a bundle of sweet herbs, moisten with stock, and let it braize gently for about an hour. When done, strain the gravy, free it from fat, pour it over the joint in the dish, and serve garnished with cauliflowers, tomatoes, Brussels sprouts, and potatoes, arranged in heaps round the fillet.

ROAST PARTRIDGES.—Pick, draw, singe, and truss, placing a slice of bacon over the breast of each bird. Roast at a moderate fire, removing the bacon a few minutes before the birds done. Serve with plain gravy and bread sauce in a boat

Bread Sauce.—Pour half a pint of boiling milk on a teacupful of fine bread crumbs, add a small onion stuck with three cloves, a small blade of mace, a few peppercorns, and salt to taste; let the sauce simmer five minutes, add a small piece of fresh butter, and at the time of serving, remove the onion and mace.

STUFFED ARTICHOKES À L'ITALIENNE.—Trim off the top of the leaves of the artichokes, boil them for twenty minutes in salted water with the juice of a lemon; drain them thoroughly; take some anchovies, bone and wash them clean, then mince them finely with a small quantity of garlic, add some powdered thyme and pepper and salt; open out the leaves of each artichoke without detaching them, insert a small quantity of this mixture between each leaf; tie up each artichoke with thread, place them close together in a tin, pour plenty of olive oil over them, lay a piece of oiled paper on the top, and set them in the oven for about half an hour. Remove the threads before serving.

KING CUP PUDDINGS.—Make half a pint of milk hot, and stir into it 2oz. of butter; let it cool, then add 2oz. of powdered sugar, 2oz. of flour, the yolks of three eggs and the whites of two (whisked separately), flavour with a little grated lemon peel and beat the mixture well. Butter some small cup-shape tins, fill them three parts full. Bake half an hour and serve on a *purée* of white plums or bullaces. (See Purée of Plums, page 68.)

COFFEE CREAM.—Dissolve 2oz. of isinglass in just enough water to cover it; put to half a pint of cream one teaspoonful and a half of very strong clear coffee with powdered sugar, let it just boil; leave it standing till nearly cold, then pour it into a mould, and when quite set turn it out.

WINTER.

Breakfast.

Fish Croquettes. Devilled Turkey.
Risotto à l'Italienne.

FISH CROQUETTES.—Take some remnants of boiled turbot, pick out the flesh carefully, and mince it not too finely. Melt a piece of butter in a saucepan, add a little flour and some hot milk; stir on the fire until the mixture thickens, add pepper and salt, a little grated nutmeg, and some chopped parsley, lastly the fish; and as soon as the mixture is quite hot turn it out on a dish to get cold. Fashion it in bread crumbs to the shape of corks, taking care to make them all of a uniform size, then roll them in egg and again in bread crumbs. Let them dry a short time, then fry in plenty of hot lard, and serve with fried parsley.

DEVILLED TURKEY.—Pound eight or ten chilies in a mortar with a little vinegar, add ½lb. of butter, one tablespoonful of mushroom ketchup, one of walnut, one of Harvey sauce, one pint of gravy thickened with flour. Mix well, and when quite hot pour the sauce over some legs of turkey which have been well scored, sprinkled with salt and pepper, and nicely broiled over a clear fire.

RISOTTO A L'ITALIENNE.—Chop up an onion and fry it in 2oz. of butter till of a gold colour, add ½lb. of rice, previously blanched and drained, and stir it, with the onion, for a few minutes over the fire, do not let it burn; add one pint of good gravy and a couple of sliced tomatoes, simmer gentle till the rice is tender, just before it is taken from the fire add some grated Parmesan cheese and 2oz. of butter. Serve in a dish garnished with broiled sausages.

Luncheon.

Sole à la Crème.
Game Pie.
Vegetable Curry.
Beignets Soufflés.
Compote de Coings.

Wine:—Beaune—Meursault—Amontillado.

SOLE À LA CRÈME.—Bone a good-sized sole. Make some forcemeat with the trimmings of the sole—put aside for the purpose—some oysters, mushrooms, fine bread crumbs, savoury herbs, mince them all very finely, and moisten with an egg, fill the sole with this stuffing, and stew till quite tender in white stock; serve with the following sauce poured over:

Sauce à la crème.—Take 2 oz. of butter, half pint of cream, 1oz. of flour, a little minced parsley, shalot, salt, pepper, and pounded mace, simmer over the fire for quarter of an hour.

GAME PIE (COLD).—Bone, cut up, and lard, a pheasant, a partridge, snipe, woodcock, or any other game. Make some forcemeat with 1oz. of bread crumbs, 1oz. of cold veal or fowl, 2oz. of bacon, a small onion blanched, some thyme, parsley, lemon peel, season with pepper, salt, and nutmeg, chop them all very fine, and pound in a mortar with 1oz. of butter and the yolk of an egg, butter a raised pie mould, line it with puff paste, put alternate layers of forcemeat and game, filling up the interstices with truffles previously cooked in white wine, and mushrooms cooked in lemon juice; cover with paste, ornament the crust, and bake for four hours, make a hole in the top, and pour in through a funnel some reduced gravy made with the bones and trimmings of the game.

Digitized by Google

VEGETABLE CURRY. — Take cabbage, onions, carrots, turnips, Brussels sprouts, or cauliflowers, some pared and cored apples, a slice from a cocoanut, cut them all up in small pieces and fry them in butter; simmer them slowly for four hours in one pint of stock, in which one table spoonful of curry powder has been mixed, and to which some milk from the cocoanut has been added. Serve, garnished with hard-boiled eggs cut in half, and some thin strips of onion nicely fried. Rice in a separate dish.

RICE, to boil (an Indian recipe).—Wash the rice thoroughly in three separate waters, add a little lemon juice or alum powder to whiten it, drain, and throw it into a large quantity of water and let it boil gently until tender, then put it into a colander, when drained put it into a saucepan with a cloth over it, and let it steam quite dry.

BEIGNETS SOUFFLÉS.—Put about one pint of water into a saucepan with a few grains of salt, a piece of butter the size of an egg, and as much sugar, with plenty of grated lemon peel. When the water boils throw gradually into it sufficient flour to form a thick paste; then take it off the fire, let it remain ten minutes, and work into it three or four eggs, reserving the whites of one or two, which you whisk into a froth and mix into the paste. Let it rest a couple of hours, then proceed to fry by dropping into hot lard pieces of it the size of a walnut. Serve piled on a dish, with powdered sugar over, and a lemon cut into quarters or make an incision in each beignet, and insert a small piece of jam or jelly.

COMPOTE OF QUINCES.—Partly cook four large quinces in boiling water, then plunge them into cold water, peel, quarter, and core them; then in a strong syrup—which has been well cleared and coloured with cochineal—stew them with the thin rind of a lemon cut in strips till quite tender, let them cool in the syrup, put them in a glass dish just before serving, pour the syrup over them and ornament with the strips of lemon peel.

Dinner.

Croûte au Pot.
Stewed Cod.
Escalopes of Sheep's Brains.
Beef olives——Roast Turkey.
Cream Cheese with Oat Cakes.
Baba.
Charlotte Russe.

Dinner Wines:—Sherry——Marcobrunner or Liebfraumilch——Champagne (Perrier Jouet).

Dessert Wines:—Madeira——Port——Chateau La Rose.

CROÛTE AU POT.—Cut off the bottom crust of a quartern loaf, leaving the same thickness of crumb as there is crust. Cut it out in rounds the size of a sixpence. Soak these rounds in some good clear stock, lay them in a well buttered tin, and put it into the oven to remain till they are quite dried up. Then lay them in a soup tureen with pieces of carrot, turnips, and leeks, that have been used to make the stock cut out in rounds, pour some clear stock boiling hot over, and in a few minutes serve.

STEWED COD.—Take some slices of cod and fry them, then take equal quantities of white stock and white wine, add butter and flour to thicken, some spices, a faggot of sweet herbs, and salt; lay the fish in the liquor and stew slowly. Remove the faggot, add the juice of half a small lemon, and serve with the sauce over.

ESCALOPES OF SHEEP'S BRAINS.—Wash them thoroughly, and boil them very fast so as to harden them, either in water highly seasoned and flavoured with onion, or in stock. When done (they will take about twenty minutes) take them up, and allow them to stand until cold, then cut them in thin slices, and dip them in batter made as follows: Mix two tablespoonfuls of flour with four of water, a tablespoonful of dissolved butter or oil, the yolk of an egg, and a pinch of salt and pepper. Let it stand for two hours. When ready for use beat the white of an egg to a strong froth and mix it with the batter. Fry in oil or other fat, taking care that it boils. Serve with fried parsley.

BEEF OLIVES.—Cut thin slices of steak, two inches by six; put on each at one end a piece of well-flavoured pork sausage meat, the size of a pigeon's egg, roll up each olive tightly and neatly, and tie it up with thread. Fry them in butter until they begin to take colour, then take them out, remove the thread from each, and lay them by. Fry some onions a golden colour in butter, add a very little flour, sweet herbs, a few mushroom trimmings, pepper and salt to taste, and moisten with some good gravy or stock. Let the sauce boil, then strain it, and carefully lay the olives in it to simmer till done and ready to be served. The sauce should cover them in the saucepan. Serve with mashed potatoes.

ROAST TURKEY.—Pluck, singe, draw, wipe thoroughly, and truss a fine turkey, stuff it with chestnut stuffing, pack it up in some thin slices of fat bacon, and over that a sheet of buttered paper, roast before a clear fire basting frequently with butter. A quarter of an hour before it is done, remove the paper and slices of bacon. Sprinkle with salt just before serving. Garnish with pork sausages, and serve with a tureen of rich gravy, and one of bread sauce.

Chestnut Stuffing.—Remove the outer skin of a number of chesnuts, boil them in salted water, with a handful of coriander seeds and some laurel leaves. When cooked (they must be rather underdone), drain and remove the inner skin, sprinkle with pepper, salt, and spices, and stuff the turkey, inserting while so doing, ½lb. of butter (or beef suet) cut into small pieces. An onion, chopped finely, may be added to the stuffing.

BABA.—Take 1lb. of finely sifted flour, 4oz. of stoned raisins, 4oz. of currants, 2oz. of mixed peel, eight eggs, 4oz. of pounded sugar, 4oz. of fresh butter, 1oz. of German yeast; dissolve the yeast in half a pint of tepid milk, strain and mix with it a large handful of flour, working it lightly with the fingers of one hand to form a light stiff dough. Put this, which is called the "sponge," into a deep basin, cover it with a cloth and leave it in a warm place to rise; this will take an hour and a half or two hours. Just before the sponge is ready place the remainder of the flour on a pastry slab in a heap, make a hollow in the centre, break the eggs into it, add a good pinch of salt, the butter just warmed, the sugar and the brandy; work all lightly together with the fingers of both hands, beating the mixture so as to beat the air into it; then work in the sponge in the same way, and lastly the raisins and currants. Place the paste in a large mould, well buttered, and put in a warm place to rise. The mould should be sufficiently high to allow the *baba* rising. When it has well risen, bake it in a moderate oven for about a couple of hours. Serve with

Sauce.—Put half a pot of apricot jam in a stewpan with half a pint of syrup and one gill of rum, boil and strain through a hair sieve.

CHARLOTTE RUSSE.—Line a plain mould with Savoy biscuits, carefully cut to fit exactly, brush over the inside (very lightly) with the white of an egg, set it on ice. Beat up ½pt. of rich cream with 1oz. of isinglass (previously dissolved in sufficient water just to cover it). Sweeten to taste, and flavour it with two liqueur glasses of noyeau and the juice of half a lemon. Pour this into the mould, and cover it with a slice of sponge cake cut exactly the size. Ice it, and turn it out very carefully.

USEFUL RECIPES FOR HOUSEWIVES.

TO CLEAN PAINT.—Take 1lb. of painter's sugar (sold at oil and colourmen's), and half gallon of cold water, mix them, wash the paint over with it, afterwards with fresh cold water.

TO WASH CARPETS FOR PREVENTING MOTH, &C.—Sweep the carpet quite free from dust and dirt, and then with a stiff carpet broom apply equal quantities of spirits of turpentine and water.

TO REMOVE STAINS OF INK, FRUIT, AND WINE.—Wash the stained article in hot milk, afterwards in fresh water.

TO REMOVE STAINS OF MILDEW FROM LINEN AND CALICO.—(1) Wet the spots, rub chalk on, and expose them to the sun and air, repeat till the article be clean. (2) Soak in butter milk for a fortnight, wash in fresh water. (3) Soak the linen in one pint chloride of lime to three parts of water.

TO REMOVE STAINS OF GREASE FROM CARPETS.—Make a paste with equal parts of fullers' earth and powdered magnesia with a little hot water, spread it on the stain and leave till quite dry, then brush it off.

TO REMOVE STAINS FROM MARBLE.—(1) Mix some unslacked lime (powdered) with strong soap ley, spread it on with a brush, leave it for six or seven weeks, then scour it off with soap and water, and wash with fresh water. (2) Make a paste with soft soap and whitening, lay it on for a day or two, wash it off with several waters.

FURNITURE POLISH.—Mix one pint linseed oil, 2oz. spirits of wine, 1oz. spirits of camphor, ½oz. spirits of hartshorn, 1oz. butter of antimony, 4oz. vinegar.

TO WASH TUSSORE.—Wash well in soft water (lukewarm) with yellow soap, rinse in cold water with a little salt, dry in the open air, iron, before the material be quite dry, on the wrong side.

TO WASH COLOURED LINEN.—Wash in the same way, but with the addition of a little colloid (sold with directions).

TO WASH COLOURED PRINTS.—Make a lather of curd soap, and wash the dress quickly in lukewarm water, with a wineglass of ox-gall mixed with it, wash in two waters prepared in the same way, rinse in cold water with a little vinegar in it, dry quickly in the wind, without exposure to the sun.

TO WASH BLACK BRAIDED DRESSES.—Wash without soda or washing powders, rinse in cold water, dry quickly, starch with cold starch.

TO WASH FLANNELS.—Wash in a lather of soap and water (not too hot), do not rub the material with soap, rinse and shake well, squeeze but do not wring, if coloured hang in the shade to dry.

TO GET UP COLLARS.—To a tablespoonful of starch add a teaspoonful of gum arabic, a lump of loaf sugar, and a pinch of salt. Mix with a little cold water and stir till quite smooth, then add sufficient boiling water to make it clear and of the proper consistency. Iron, while still very damp, with a very hot iron.

STAINING FLOORS.—Buy a bottle of dark oak stain, lay it on with a coarse sponge fastened to a piece of stick. If not dark enough when dry, lay on another coat. The next day rub it over with linseed oil and spirits of turpentine in equal proportions, and do this once a week, using a rough piece of flannel for the purpose.

FLOORS TO POLISH FOR DANCING.—Have the floors washed (the boards must be carefully planed), when dry, rub with a lump of dry beeswax and polish with a new scrubbing brush; very little wax should be used.

GROUND GLASS TO CLEAN.—Wash it in soapsuds and soda, then wash in clean rain water just warm, rub dry with a soft duster.

THE QUEEN.

The Royal Family.

Her Majesty, ALEXANDRINA VICTORIA, of the United Kingdom of Great Britain and Ireland Queen, Defender of the Faith, born May 24, 1819; succeeded to the throne, June 20, 1837, on the death of her uncle, King William IV.; crowned, June 28, 1838, and married, Feb. 10, 1840, to the late Field-Marshal His Royal Highness Francis ALBERT Augustus Charles Emanuel, PRINCE CONSORT, DUKE OF SAXONY, PRINCE OF COBOURG AND GOTHA, K.G., K.T., K.P., G.C.B., G.C.M.G., K.S.I., P.C., consort of Her Majesty, born Aug. 26, 1819; died Dec. 14, 1861. Her Majesty is the only child of his late Royal Highness Edward, Duke of Kent, 4th son of King George III.

1. Her Royal Highness Victoria Adelaide Mary Louisa, PRINCESS ROYAL, born Nov. 21, 1840; married, Jan. 25, 1858, to his Royal Highness the Prince Imperial of Germany, K.G. (only son of the Emperor of Germany), and has issue His Royal Highness Prince Frederick William Albert Victor, born Jan. 27, 1859; Her Royal Highness Princess Victoria Elizabeth Augusta Charlotte, born July 24, 1860; His Royal Highness Prince Albert William Henry, born Aug. 14, 1862; His Royal Highness Prince Francis Frederick Sigismond, born Sept. 15, 1864; died June 18, 1866; Her Royal Highness Princess Frederika, Wilhelmina Amélie Victoria, born April 12, 1866; Prince Joachim Frederick Ernest Waldemar, born 1868; Princess Sophia Dorothea Ulrike Alice, born June 14, 1870; and Princess Margaret Beatrice Feodora, born April 22, 1872.

2. FIELD MARSHAL His Royal Highness Albert Edward, PRINCE OF WALES, DUKE OF SAXONY, CORNWALL AND ROTHESAY, EARL OF DUBLIN, K.G., K.T., G.C.B., K.P., G.C.S.I., K.T.S., P.C., Colonel of the 10th Hussars, Colonel in Chief of the Rifle Brigade, born Nov. 9, 1841; married, March 10, 1863, to the Princess Alexandra (born Dec. 1, 1844), eldest daughter of the King of Denmark, and has issue His Royal Highness Prince Albert Victor Christian Edward, born Jan 8, 1864; His Royal Highness Prince George Frederick Ernest Albert, born June 3, 1865; Her Royal Highness Louisa Victoria Alexandra Dagmar, born Feb. 20, 1867; Her Royal Highness Victoria Alexandra Olga Mary, born July 6, 1868; Her Royal Highness Maude Charlotte Mary Victoria, born Nov. 26, 1869; and His Royal Highness Prince Alexander John Charles Albert, born April 6, 1871; died April 7, 1871.

3. Her Royal Highness ALICE MAUD MARY, born April 25, 1843; married, July 1, 1862, to His Royal Highness Prince Frederick William Louis of Hesse, K.G., and has issue Princess Victoria, born April 5, 1863; Princess Elizabeth Alexandrina Louise Alice, born Nov. 1, 1864; Princess Irene Marie Louise Anna, born July 11, 1866; Prince Ernest Louis, born Nov. 25, 1868; Prince Frederick William, born Oct. 7, 1870 (killed by accident, May, 1873); and Princess Alice, born June 6, 1872; another Princess, born May 22, 1874.

4. His Royal Highness Alfred Ernest Albert, DUKE OF EDINBURGH, EARL OF KENT, and EARL OF ULSTER, K.G., K.T., G.C.S.I., G.C.M.G., P.C., born Aug. 6, 1844; Captain Royal Navy, Feb. 23, 1866; married to Grand Duchess Marie Alexandrovna, only daughter of the Emperor of Russia, Jan. 23, 1874, and has issue Albert Alexander Alfred Ernest William, born Oct. , 1874.

5. Titles of the Eldest Sons of Peers.

The eldest Sons of Dukes, Marquises, and Earls usually assume (by courtesy) the second titles of their fathers. The younger Sons of Dukes and Marquises take the title of Lord as a prefix to their Christian and Surnames.

The younger Sons of Earls take the title of Honourable.

All Daughters of Dukes, Marquises, and Earls, take the title of Lady.

All Sons and Daughters of Viscounts and Barons take the title of Honourable.

The following are the titles which are or would be borne by the eldest Sons of Peers, with the titles of their fathers:—

Those marked thus * are the second titles of Irish Representative Peers,
Those marked thus † are the second titles of Scotch Representative Peers.

BISHOPS.

Style, *Right Reverend.*

The Bishops of London, Durham, and Winchester to take precedence in right of their respective sees; the other Bishops in the order of their consecration. The Bishop of Sodor and Man has no seat in parliament. The statute 10 & 11 Vict. c. 108, enacts that, upon a vacancy in an English or Welsh bishopric, the newly consecrated bishop (unless elected to one of the archiepiscopal sees, or to one of the sees of London, Durham, or Winchester), shall not be entitled to sit; but the summons is to be issued to such one of the other bishops as has not previously been summoned.

		Consec. Translated.

The year 1876 is the latter part of the 5636th and the beginning of the 5637th year since the creation of the world according to the Jews. The year 5637 commences on September 19, 1876.

The year 1876 answers to the 6589th of the Julian period; to the 2620th from the foundation of Rome; to the 2552nd year of the Olympiads; and to the year 7381-5 of the Byzantine Era.

The year 1293 of the Mohammedan Era commences on Jan. 28, 1876; and Ramadan (month of abstinence observed by the Turks), commences on Sept. 20, 1876.

Eclipses in 1876.

In the year 1876 there will be two Eclipses of the Sun and two of the Moon.

The first is a Partial Eclipse of the Moon, on March 10. The beginning of the eclipse will be at 5h. 21m. in the morning, Greenwich mean time; its middle will be at 6h. 21m., and the Moon will set at 12m. after this time, or at 6h. 33m. a.m. Part only of this eclipse will therefore be visible from England. The eclipse will end at 7h. 21m. At the time of the beginning of the eclipse the Moon will be in the zenith of a place whose longitude is 77 deg. 46 min. west of Greenwich, and in 5 deg. north latitude; at the middle she will be in the zenith of a place whose longitude is 92 deg. 20 min. west, and in latitude 4 deg. 40 min. north; and at the end she will be in the zenith of a place whose longitude is 106 deg. 50 min. west, and in 4 deg. 25 min. north latitude. At the time of the greatest phase nearly one-third part of the diameter will be obscured.

The second will be an Annular Eclipse of the Sun on March 25, invisible from Europe. The central eclipse begins generally at 6h. 3m. min. p.m., Greenwich mean time, in longitude 171 deg. 25 min. east, and latitude 9 deg. north; and the central eclipse ends generally at 9h. 31m. p.m., in longitude 46 deg. 5 min. west, and latitude 17 deg. north. This eclipse will be visible from North America and the North Pacific Ocean.

The third eclipse is a Partial Eclipse of the Moon on Sept. 3. It begins at 8h. 15m. p.m., and is visible, as the Moon on this day rises at 6h. 41m. p.m., or 1h. 34m. before the eclipse begins: the middle of the eclipse will be at 9h. 22m. p.m., when somewhat more than one-third of the diameter will be obscured. The eclipse ends at 10h. 29m. p.m. At the time of the middle of the eclipse the Moon will be in the zenith of a place whose longitude is 39½ deg. east, and latitude 7 deg. 55 min. south.

The fourth and last eclipse of this year will be a Total Eclipse of the Sun on Sept. 17-18. It will not be visible from Europe. It will begin on the Earth generally at 7h. 12m. p.m. on the 17th, mean time at Greenwich, in longitude 160 deg. 12 min. east, and latitude 10 deg. nearly north. The central eclipse begins at 8h. 16m. p.m., and ends at 11h. 2m., p.m. in longitude 85 deg. west and latitude 59 deg. 36 min. south. The eclipse ends on the Earth generally at 0h. 16m. a.m. on Sept. 18, in longitude 100 deg. west, and latitude 48 deg. 20 min. south. It will be visible from Australia and the South Pacific Ocean.

Rates of Postage and Conditions of Transmission.

INLAND LETTERS.

The rates of postage when prepaid are as follows, viz:—

For a letter not above	1oz.		1d.
,, above 1oz. but not above	2oz.		1½d.
,, ,,	2oz.	,, 4oz.	2d.
,, ,,	4oz.	,, 6oz.	2½d.
,, ,,	6oz.	,, 8oz.	3d.
,, ,,	8oz.	,, 10oz.	3½d.
,, ,,	10oz.	,, 12oz.	4d.

A letter above the weight of 12oz. is liable to a postage of 1l. for every ounce, beginning with the first ounce. Thus, a letter weighing between 14oz. and 15oz. must be prepaid 1s. 3d. A letter posted unpaid is chargeable on delivery with double postage; and a letter posted insufficiently prepaid is chargeable with double the deficiency. No letter may be above 18in. in length, 9in. in width, or 6in. in depth, unless it be sent to or from one of the Government offices.

INLAND NEWSPAPERS.

For each inland newspaper, whether posted singly or in a packet, the postage, when prepaid, is one halfpenny; but a packet containing two or more registered newspapers is not chargeable with a higher rate of postage than would be chargeable on a book packet of the same weight, viz., one halfpenny for every 2oz., or part of that weight. A newspaper posted unpaid, or a packet of newspapers posted either unpaid or insufficiently paid, is treated as an unpaid or insufficiently paid book packet of the same weight. The postage must be prepaid either by an adhesive stamp, or by the use of a stamped wrapper. No newspaper can now be sent through the post a second time for the original postage. For each transmission a fresh postage is required. Every newspaper must be posted either without a cover (in which case it must not be fastened, whether by means of gum, wafer, sealing wax, postage stamp, or otherwise) or in a cover entirely open at both ends, so as to admit of easy removal for examination. If this rule be infringed the newspaper is treated as a letter. Every newspaper must be so folded as to admit of the title being readily inspected. A newspaper or packet of newspapers which contains any inclosure except supplements is charged as a letter, unless the enclosure be such as might be sent at the book rate of postage, and the entire packet be sufficiently prepaid as a book packet, in which case it is allowed to pass. A newspaper which has any letter, or any communication of the nature of a letter, written in it or upon its cover, is charged as an unpaid or insufficiently paid letter. No packet of newspapers may be above 14lb. in weight, nor above 2ft. in length, 1ft. in width, or 1ft. in depth.

COLONIAL AND FOREIGN NEWSPAPERS.

Each newspaper is liable to a separate rate of postage, whether sent singly or in a packet, and, if above 4oz. in weight, it is liable to two rates of postage; and so on. The postage, which must be prepaid, cannot be paid in money. All publications registered for transmission abroad must be posted within eight days from the day of publication, including that day; and any newspaper posted more than eight days after the date of publication, as well as any unregistered publication, must be prepaid at the book rates of postage. The collected numbers issued during the month of a weekly or fortnightly publication are not allowed to pass as a monthly publication. Every newspaper must be posted either without a cover (in which case it must not be fastened, whether by means of gum, wafer, sealing wax, postage stamp or otherwise), or in a cover entirely open at both ends, so as to admit of easy withdrawal for examination. Every newspaper must be so folded as to admit of the title being readily inspected. No newspaper, whether posted singly or in a packet, may contain any enclosure except the supplement or supplements belonging to it. There must be no writing or other mark on a newspaper sent abroad but the name and address of the person to whom it is sent; nor anything on the cover but such name and address, the printed title of the publication, the printed name and address of the publisher or vendor who sends it, and words indicating the date on which the subscription to the newspaper will end. No packet of newspapers may be above 2ft. in length or 1ft. in width or depth. The limit of weight, which is not the same to all countries, is in each case shown in the Table of Colonial and Foreign Postage. It is forbidden to introduce into Russia, through the post, political newspapers, even in covers open at the ends or sides; and the only means by which persons residing in Russia can obtain newspapers from the United Kingdom is by subscribing for them at one of the Russian post offices. The admission into Russia even of newspapers not of a political character is permitted only when they are addressed to the house of some established bookseller, to the higher schools, to the Imperial Public Library, or to the Academy of Sciences in Russia. There is not, however, any restriction on political newspapers or any other publication addressed to members of the Royal Family of Russia, the Imperial Ministers, or members of the Diplomatic Corps. Printed prices current in covers open at the ends or sides are allowed to be addressed to any persons residing in Russia.

INLAND BOOK POST.

The postage is one halfpenny for every 2oz., or part of that weight. A packet posted wholly unpaid is charged with double the book postage; and if posted partially prepaid, with double the deficiency. A book packet may contain any number of separate books or other publication (including printed or lithographed letters), photographs (when not on glass or in cases containing glass or any like substance), drawings, prints, or maps, or any quantity of paper, or any other substance in ordinary use for writing or printing upon; and the books or other publications,

Digitized by Google

prints, maps, &c., may be either printed, written, engraved, lithographed, or plain, or any mixture of these. Further, all legitimate binding, mounting, or covering of a book, &c., or a portion thereof, is allowed, whether such binding, &c., be loose or attached; as also rollers in the case of prints or maps, markers (whether of paper or otherwise) in the case of books, pens or pencils in the case of pocket-books, &c., and, in short, whatever is necessary for the safe transmission of such articles, or usually appertains thereto; but the binding, rollers, &c., must not be sent as a separate packet.

Circulars—i.e., letters which are intended for transmission in identical terms to several persons, and the whole or the greater part of which is printed, engraved, or lithographed—may also be sent by book post. But a book packet may not contain any letter, or communication of the nature of a letter (whether separate or otherwise), unless it be a circular letter or be wholly printed; or any enclosure sealed or in any way closed against inspection; nor any other enclosure not allowed by Rule 3. If this rule be infringed, the entire packet is charged as a letter. A book-packet may be posted either without a cover (in which case it must not be fastened) or in a cover entirely open at both ends, so as to admit of the contents being easily withdrawn for examination; otherwise it is treated as a letter. For the greater security of the contents, however, it may be tied at the ends with string; postmasters being authorised to cut the string in such cases, although, if they do so, they must again tie up the packet. No book packet may be above 5lb. in weight, nor above one foot six inches in length, nine inches in width, or six inches in depth, unless it be sent to or from one of the Government offices. When, owing to a great and unusual influx of letters, books, &c., the transmission or delivery of the letters would be delayed if the whole mail were dealt with without distinction, book-packets may be kept back till the next despatch or delivery.

ABUSE OF THE HALFPENNY POST.

It seems to be but imperfectly understood that there is no legal way of sending a written letter through the post for a postage of a halfpenny, except by means of a post card. A notion appears to prevail that, because a post card, which is open to inspection, may have a letter written upon it, any card whatever, and even any piece of paper, if only it be placed in an open wrapper, may be sent through the post with a letter written upon it for a postage of a halfpenny. It seems necessary, therefore, to explain for the guidance of the public, 1st, That the letter rate of postage must be prepaid for any communication of the nature of a letter, not wholly printed, whether it be placed in a closed envelope or in an open cover, unless a post card be used for the purpose, or unless the letter be a circular letter according to the definition of a circular contained in Rule 3, Section 5. 2nd, That cards having merely a halfpenny adhesive stamp fixed to them must not bear any communication of the nature of a letter, unless it be wholly printed, or unless it be a circular letter. Large numbers of letters, not being circular letters, are from time to time found in halfpenny wrappers, contrary to the express provisions of the book post; and, as the officers of the department are instructed to surcharge all such letters with additional postage, it will save not only trouble to the Post Office but annoyance to the public, if care be taken always to pay letter postage for letters other than circular letters, unless they be written on post cards.

COLONIAL AND FOREIGN BOOK POST.

Every book-packet must be posted either without a cover (in which case it must not be fastened) or in a cover entirely open at both ends so as to admit of the contents being easily withdrawn for examination; otherwise it is treated as a letter. For the greater security of the contents, however, it may be tied at the ends with string; postmasters being authorised to cut the string in such cases, although, if they do so, they must again tie up the packet. The limit of size for a book-packet addressed to any place abroad is twenty-four inches in length and twelve inches in width or depth.

Exceptions.—No packet for Algeria or France, or for Syria, or Turkey, when sent by French Packet, must be above eighteen inches in length, width, or depth.

Whatever is allowed under Rule 3, Section V., to be sent in an inland book-packet may be sent in a book-packet to places abroad, except that water-colour drawings are not allowed to be sent in a book-packet to France or Algeria. No writing or manuscript mark, however, beyond the name and address of the person to whom it is sent, is admissible in or upon a packet forwarded *viâ* France to the Argentine Confederation, Bolivia, Brazil, Chili, Cuba, Ecuador, Guadaloupe, Martinique, Mexico, Paraguay, Peru, Senegal, Turkey, or Uruguay.

COLONIAL AND FOREIGN PATTERN AND SAMPLE POST.

There is a Pattern and Sample Post to certain colonies and foreign countries, but it is restricted to *bonâ fide trade patterns or samples of merchandise*. Goods sent for sale, or in execution of an order (however small the quantity may be), or any articles sent by one private individual to another which are not actually patterns or samples, are not admissible.

INLAND CARD POST.

Post Cards, whether official or private, having a halfpenny stamp impressed upon them (adhesive stamps not being accepted in payment of the postage) may be transmitted between places in the United Kingdom with letters written upon the back. The official "stout" Post Cards are sold at the rate of 8*d.* for 12 cards, or 4*d.* for six cards. The "thin" cards are sold at the rate of 7*d.* for twelve cards, or 3½*d.* for six cards. Neither the "stout" nor the "thin" cards are sold singly. The front (or stamped) side is intended for the address only, in addition to the printed words "Post Card" and "The address only to be written on this side." There must be nothing else written, printed, or otherwise impressed on it, nor must there be any writing or printing across the stamp. On the reverse side any communication, whether of the nature of a letter or otherwise, may be written or printed. Nothing whatever may be attached; nor may the card be folded, cut, or otherwise altered. If any one of these rules be infringed, the card will be charged 1*d.* on delivery. When, owing to a great and unusual influx of letters, books, &c., the transmission or delivery of the letters would be delayed if the whole mail were dealt with without distinction, Post Cards may be kept back until the next despatch or delivery. No card other than one of those issued by the Government, or a private card impressed with a halfpenny stamp at the Office of Inland Revenue, Somerset House, or at the Stamp Offices at Liverpool and Newcastle on Tyne, will pass under a halfpenny stamp, if it bear on it a written communication of the nature of a letter.

FOREIGN CARD POST.

Post Cards intended for transmission to foreign countries comprised within the General Postal Union are sold at the rate of 1½*d.* each.

REGISTRATION (INLAND AND FOREIGN).

The fee for registering a letter, newspaper, or book-packet passing between any two places in the United Kingdom is 4*d.* No letter or other postal packet addressed to initials or to a fictitious name can be registered; nor can any letter be accepted for registration, unless the enclosure be securely placed so as not to move about, and be covered by a proper and well-fastened envelope. Registered letters, &c., must be prepaid as regards both postage and registration fee; except official letters for Government Offices in London, Dublin, or Edinburgh, which may be registered on prepayment, in stamps, of the registration fee only. Every letter to be registered should be presented at the counter, and a receipt obtained for it, and should on no account be dropped into the letter box. If, contrary to this rule, a letter marked "Registered" be dropped into the letter box, it will, *if directed to any place in the United Kingdom or the British Colonies*, be liable to a registration fee of 8*d.*, instead of the ordinary fee of 4*d.* At all Post Offices the latest time for posting registered letters on the payment of the ordinary fee is entered in the notice exhibited in the office window; but, upon payment of a late fee of 4*d.*, in addition to the ordinary registration fee, at the Metropolitan Chief Offices, at the London District Offices (including the Lombard-street and Charing-cross offices), and at all provincial Head Offices, letters, whether inland, foreign, or colonial, may be registered after the hours specified, until the closing of the letter-box for each despatch (exclusive of the time during which late letters are received), or until the office is closed for the night. The registration of a packet makes its transmission much more secure, inasmuch as, under ordinary circumstances, a registered packet can be traced through its whole course; and thus the loss of a registered packet is a very rare occurrence. Nevertheless large sums of money or other articles of great value should not be sent through the post, even if the packet be registered; as the machinery of the department is not arranged with a view to such transmissions. By law, the Post Office is not responsible for the safe delivery of registered packets, though any officer who may neglect his duty on this point will be called to strict account. Sent in *unregistered* letters, valuable articles are exposed to risk, and offer a temptation which ought not to be created, and the department cannot in any way undertake the safe conveyance of such packets. All inland or colonial letters, therefore, which contain coin, and all inland letters which contain watches or jewellery, even though they be posted without registration, are treated as registered, and charged on delivery with a double registration fee of 8*d.*, in addition to the ordinary postage; and any such letters which cannot be registered in time are delayed until the next despatch. Even if the letter do not contain any article of intrinsic value, it should, if it be very important, be registered. No Letter Carrier, Rural Messenger, or other servant of the Post Office is allowed to carry a letter for any person to be registered.

POSTAGE STAMPS.

Every head postmaster is required to keep, for sale to the public, a sufficient stock of the different postage stamps in use, as also envelopes bearing an impressed halfpenny stamp, newspaper wrappers bearing an impressed halfpenny stamp, and post cards, both inland and foreign. The stamps are of the respective values of ½*d.*, 1*d.*, 1½*d.*, 2*d.*, 2½*d.*, 3*d.*, 4*d.*, 6*d.*, 9*d.*, 10*d.*, 1*s.*, 2*s.*, and 5*s.* The embossed envelopes, which are made of four sizes, viz., 4¼in. by 3⅝in. (square shape), 4¼in. by 2⅝in., 5¼in. by 3in., and 5¼in. by 3⅝in., are sold at the following prices:—

Size, 3⅝in. by 3⅝in. (Square shape.)				Other Sizes.			
1	- 1½*d.*	6	- 0*s.* 6½*d.*	1	- 1½*d.*	6	- 0*s.* 6½*d.*
2	- 2½*d.*	8	- 0*s.* 9*d.*	2	- 2½*d.*	8	- 0*s.* 8½*d.*
3	- 3½*d.*	12	- 1*s.* 1½*d.*	3	- 3½*d.*	12	- 1*s.* 1*d.*
4	- 4½*d.*	24	- 2*s.* 3*d.*	4	- 4½*d.*	24	- 2*s.* 2*d.*

The newspaper wrappers and the inland post cards are not sold singly. The wrappers are sold in packets of twelve for 6½*d.* The "stout" post cards are sold at the rate of 8*d.* for twelve cards, or 4*d.* for six cards; the "thin" cards at the rate of 7*d.* for twelve cards, or 3½*d.* for six cards. Foreign post cards are sold at the rate of 1½*d.* each. Sub-postmasters are required to keep halfpenny and penny stamps and post cards only, but they are bound, on application, to procure any stamps of other values, embossed envelopes, or newspaper wrappers. Every rural messenger is authorised to sell penny postage stamps at the usual price of 1*d.* each; and when any person applies to him for postage stamps the messenger must either supply them, or (if he have none in his possession) must, without extra charge, receive the postage in money, and on his arrival at the post office obtain postage stamps for the amount, and affix them carefully to the letters. Payment of postage cannot be made by means of postage stamps which have been torn, cut, or otherwise rendered imperfect; or of embossed, or impressed, stamps cut out from the envelopes, cards or wrappers, on which such stamps were embossed or impressed (even although the stamps have not been before used or sent by post), or of receipt or other Inland Revenue stamps. Applications for allowance on spoilt postage stamps, embossed envelopes, post cards or newspaper wrappers, which have not passed through the post, should be made to the Office of Inland Revenue, Somerset House, London. In the case of envelopes, cards, or wrappers, the application must be accompanied with these articles intact, as no allowance can be granted on the embossed, or impressed stamps, if cut therefrom. To discourage the transmission of coin by post, all postmasters in the United Kingdom at whose office money order business is transacted, and all letter receivers in the London District, are permitted, though not compelled, to purchase postage stamps from the public (provided the stamps be not soiled or otherwise damaged), at a charge of 2½ per cent.; the charge, however, never being less than one halfpenny. Under this arrangement the payments are as follows:—

For stamps not exceeding 1*s.* 8*d.* in value, the full price minus ½*d.*
" above 1*s.* 8*d.*, but not exceeding 3*s.* 4*d.*, the full price minus 1*d.*
" " 3*s.* 4*d.*, " " 5*s.*, " " 1½*d.*
" " 5*s.*, " " 6*s.* 8*d.*, " " 2*d.*
" " 6*s.* 8*d.*, " " 8*s.* 4*d.*, " " 2½*d.*, and so on.

In order to prevent the temptation to steal stamps attached to letters, which might be afforded by facilities for selling them, no separate stamps can be purchased. They must in all cases be presented in strips containing at least two stamps adhering to each other.

MONEY ORDERS.

The public are recommended, when applying for Money Orders, to use the printed "Application Forms," prepared expressly for—(1) Application for Inland Orders; (2) Application for Foreign and Colonial Orders; which are supplied gratuitously at all Money Order offices. These forms save time, and afford greater security, than verbal messages, against mistakes.

The commission on inland Money Orders is:—

For sums under 10*s.*	... ...	1*d.*	For sums of 5*l.* and under 6*l.* ... 7*d.*
" of 10*s.* and under 1*l.*	...	2*d.*	" " 6*l.* " " 7*l.* ... 8*d.*
" " 1*l.* " " 2*l.*	...	3*d.*	" " 7*l.* " " 8*l.* ... 9*d.*
" " 2*l.* " " 3*l.*	...	4*d.*	" " 8*l.* " " 9*l.* ... 10*d.*
" " 3*l.* " " 4*l.*	...	5*d.*	" " 9*l.* " " 10*l.* ... 11*d.*
" " 4*l.* " " 5*l.*	...	6*d.*	" "10*l.* ... ... 1*s.*

No order is allowed to contain a fractional part of a penny.

No Money Order can be issued, unless the applicant furnish, in full, the surname, and at least the initial of one Christian name, both of the remitter and the payee, together with the remitter's address. In the case of Foreign orders the the full address of the payee must be given; and if the order be payable to a native in British India, the tribe or caste, and the father's name, must also be furnished. Exceptions:—1st. When the remitter directs at the time of issue (which he is at liberty to do), that the order, by being crossed like a cheque, be made payable only through a bank, it is left to his option to give or withhold the name of the payee. 2nd. If the remitter or payee be a peer or a bishop, his ordinary title is sufficient. 3rd. The usual designation of a firm is sufficient, except in the case of a company trading under a title which does not consist of the names of the persons composing it, as the "Carron Company." The holder of a money order is always at liberty to direct, by crossing it, that the order be paid through a bank, even though its payment was not originally so restricted; and when the order is thus presented the question put on the presentation of an ordinary money order is dispensed

with. When application is made for a money order payable in London, or at any other town where there is more than one money order office, the remitter should say at which of such offices he wishes it to be paid: otherwise the order can be cashed only at the Head Office. An order once issued cannot be cancelled; and should repayment or transfer to a different office be required, the remitter or payee must apply to the paying postmaster. In order to enable the remitter to obtain an acknowledgment of the receipt of a money order before the money is paid, it is arranged that he may make his order payable ten days after date, provided that, in the presence of the postmaster, when he obtains the order, he affix thereto, in the space after the request C., a penny receipt stamp, and write his signature across the stamp. When an order is presented for payment (otherwise than through a bank) the postmaster has first to see that the signature of the payee be in agreement with the advice. He has then to call on the applicant to give the name of the remitter, and if the reply be correct, the order will be paid, unless the postmaster have good reason for believing that the applicant is neither the rightful claimant, nor deputed by him. When an order is paid through a bank it is sufficient that it be receipted (without regard to any discrepancy between the signature and the name in the advice), and that it be presented (crossed with the name of the receiving bank) by some person known to be in the employment of the bank. Money orders do not require a receipt stamp. Although at the end of twelve months from that in which it was issued, a money order, if still unpaid, becomes legally void, nevertheless, when a good reason can be given for the delay in presenting it, an application for payment, subject to a certain deduction, is entertained. No application can be entertained for compensation for alleged injury from the nonpayment of a money order at the expected time. After once paying a money order, by whomsoever presented, the office is not liable to any further claim. To guard against any person, even if he obtain possession of a money order, fraudulently getting it cashed, the remitter is recommended,—1st. When he is well known to the payee, to sign the letter enclosing the order with his initials only. 2nd. When this is not the case, either to make the order payable ten days after date, or to register the letter enclosing it, or to make the order payable through a bank by crossing it like an ordinary cheque. 3rd. When it is not considered expedient to adopt either of these courses, to send the remitter's name (without a knowledge of which payment cannot be obtained) in a separate letter from that containing the money order; although this latter precaution is much less effective than either of the others. Payment of an order cannot be demanded on the same day as that on which the order was issued. In case of the miscarriage or loss of an inland money order, a duplicate is granted on a written application (with the necessary particulars, and inclosing the amount of a second commission, in postage stamps) to the Controller of the Money Order Office in England, and to the accountants in Scotland or Ireland, as the case may be, where the original order was issued; and if it be desired to stop payment of an inland order, application must be made at the office where the order is payable, and a second commission must be paid. If alteration in the name of the payee or remitter of an inland money order should be required, application, accompanied by the payment of a second commission, must be made by the remitter to the postmaster of the office at which the order was issued. Should transfer of payment of an inland order from one office to another in the United Kingdom, or repayment of the amount of an order be required, an application, inclosing the order, must be made to the postmaster at whose office the order is payable, who will transmit in exchange a new order payable at the place desired, but for a less sum than the original order by the amount of the second commission charged for the re-issue. Proper printed forms for making applications in all these cases may be obtained at any money order office. Whenever, on complaint being made, it is found that the necessity for an application, entailing the payment of a fresh commission, is attributable to the post office, the charge will be remitted to the applicant and imposed on the officer in fault. A postmaster is required to give information how to apply for a duplicate order, &c., and must furnish the prescribed form of application. If payment of an order be refused, in consequence of the reply to the question respecting the remitter, or the signature on the order not corresponding with the entries on the advice, the applicant for payment should communicate with the remitter, and request him to apply personally to the issuing postmaster. No letter carrier, rural messenger, or other servant of the post office is bound to procure a money order for any person, or to obtain payment for one; but such services are not forbidden. Money orders are issued in the United Kingdom on the following colonies, British agencies, and foreign countries:—Alexandria, Berbice (New Amsterdam), Belgium, Belize (British Honduras), British Columbia, Cape of Good Hope, Canada, Ceylon (Colombo), Constantinople, Coquimbo, Demerara (Georgetown), Denmark, Egypt, Falkland Islands, France, The German Empire, Gibraltar, Gold Coast, Heligoland, Holland, Hong Kong, India, Italy, Malta, Mauritius, Natal, New Brunswick, Newfoundland, New South Wales, New Zealand, Nova Scotia, Prince Edward Island, Queensland, St. Helena, Seychelle Islands, Shanghai, Smyrna, South Australia, Straits Settlements, Suez, Switzerland, Tasmania, United States, Valparaiso, Victoria, West Coast of Africa, West Indies, Western Australia, Yokohama. The scale of commission for orders payable abroad is as follows:—

For sums not exceeding	£2.	£5.	£7.	£10.
	s. d.	s. d.	s. d.	s. d.
If payable in Belgium, Denmark, France, the German Empire, Heligoland, Holland, Italy, Switzerland, Gibraltar, Malta, or Constantinople	0 9	1 6	2 3	3 0
,, any other place abroad (including most of the Colonies) authorised to transact Money Order business with this country	1 0	2 0	3 0	4 0

The issue of a duplicate order, or the stoppage of payment of an order issued by a colony on the United Kingdom will be made on application to the controller of the metropolitan office of that portion of the United Kingdom in which such colonial order is payable, provided an additional British inland rate of commission be inclosed with the application. Postmasters in the United Kingdom have power to transfer to other offices in the United Kingdom payment of colonial and foreign orders (with the exception of French issues) originally drawn on their own offices. Orders issued in the United Kingdom and payable in the German Empire are subject to the conditions that govern the payment of orders in that empire. Orders issued in France on the United Kingdom cannot be paid after three months from the date of issue, without the authority of the French Post Office, and orders issued in the United Kingdom on France cannot be paid after three months from the month of issue without the authority of the Chief Office, London. Orders issued in the United Kingdom on Italy and *vice versâ* cannot be paid after three months from the month of issue without the authority of the chief office of the country of issue.

Our Portraits.

Sultan of Zanzibar.

(See page 4.)

His Majesty Seyid (or Sey-yid) Bargash Bin Seyid—in other words, "The Lord or Sovereign Bargash, the Son of Seyid"—was born about the year 1834 or 1835, and adheres to the religion of his forefathers, that of Mahometanism, though he is understood to be very liberal and enlightened in his views. His father was that firm ally of our country, Seyid Bin Sultan, who died in or about the year 1856. The late Sultan left behind him—by several wives, of course—no less than fifteen or, as some say, sixteen sons, one of whom seized upon the province of Muscat, and another that of Zanzibar, whilst two others of the brotherhood, one of whom is the present sovereign, put forward a rival claim to the latter dominion each on his own behalf.

Our own policy in Africa, and perhaps elsewhere, has been based more than we would all of us like to confess on the good old principle, "Divide et impera"; and the case of Zanzibar offers no exception to the rule. Having every possible claim to intervene that could be based on the right of the stronger, Great Britain very kindly offered to "mediate" between the swarthy brethren, instead of encouraging them to cut each other's throats. We confirmed the two swarthy princes in their respective "raj," to use the expression current in India; but ordered him of Zanzibar to pay a yearly tribute to him of Muscat—for what reason is not very clear, though probably well known and quite approved at the Foreign Office. In 1870, at the death of the potentate of Zanzibar, whose name was Meyyid, his brother stepped into his shoes, either by a family arrangement or else by

> The good old simple plan
> That they should take who have the power,
> And they should keep who can.

And so Seyyid Bargash came to the throne of Zanzibar. At first he was inclined to keep up the iniquitous slave trade, upon the proceeds of which his nobles and placemen mainly depended for their incomes; but English travellers and officers drew public attention to the traffic in humanity, and the British Government, as may be remembered, sent out Sir Bartle Frere to negotiate with his Majesty for its cessation. In spite of the opposition of his chiefs and nobles, the Sultan thought it best and most prudent to yield the point when the screw was gently applied to him, and in 1873 he signed a royal proclamation by which the slave trade was abolished throughout his dominions.

The Empire of Zanzibar comprises a narrow strip of land on the south-eastern coast of Africa, between the 2nd and 10th degrees of south latitude, extending from the river Jub, near the Equator, as far to the south as the vicinity of Cape Delgado, where it touches Mozambique. It is watered by many rivers, none of them, however, equal to the Zambesi in size or importance. According to the "Encyclopædia Britannica," the coast of the country is generally low, and has but few bays or harbours, and its northern portion is made dangerous by a line of coral reefs which extend along it. The principal rivers of the region are the Livuma, the Lufigi, the Ruvu, Pangari, and the Dana, of which the two last rise in the snowy mountains of Kilimanjaro and Kenia. The climate is similar to that of other tropical coasts of Africa, being hot and unhealthy in general; in some portions, however, the elevated ground, and with it a more temperate and healthy climate, approaches to within a short distance of the shores. The vegetation is luxuriant, and cocoa-nuts, palms, maize, rice, and olives form the chief articles of cultivation. The fauna comprises all the more characteristic African species. The chief inhabitants are the Sawahili; but the coasts are under the Arab dominion of the Imaum of Muscat, by whose efforts commerce with the nations of the interior has been greatly increased.

Along the coast lies the fertile and well-watered island of Zanzibar, about midway down the coast, which, although the traffic in humanity is at an end, will long remain one of the great markets for ivory. Mombas, on a small island close to the main shore, possesses the finest harbour along that line of coast, and has recently become famous as the seat of an important missionary station.

Those who have met the Sultan personally say that he is intelligent and pleasant, and polished in his manners, which are described as those of a perfect gentleman. During his stay in our capital, which event took place in the height of the London season of 1875, he visited most that is worth seeing.

"Bargash" may be regarded as his personal appellation, answering to what we should call his Christian name. Seyid, or Said, is the same word which we find in Spain spelt "Cid," and is equivalent to "Lord," or "King," or "Emperor;" and Bin Seyid means "the Son of Said," the Bin being probably the same as the Ben in Ben-hadad, Ben-jamin, and other names which occur in the Old Testament.

King Victor Emmanuel.

(See page 5.)

Victor Emmanuel, King of Italy, son of Charles Albert, King of Sardinia, and of Queen Theresa, daughter of Grand Duke Ferdinand of Tuscany, was born March 14, 1820, and received at his baptism the names Marie-Albert-Eugène-Ferdinand-Thomas-Victor-Emanuel. He was carefully educated in science and military tactics, and married April 12, 1842, the Archduchess Adelaide of Austria, who died Jan. 20, 1855. He took an active part, as Duke of Savoy, in the events of 1848, accompanying his father to the field, and behaving with great bravery at the battles of Goïto and Novara. On the evening after the latter (March 24, 1849), Charles Albert signed his abdication in the Bellini Palace. Little was then known of his son and successor, who assumed the title Victor Emanuel II., except that he was a dashing hunter, somewhat haughty, and a reputed opponent of Liberalism. He succeeded in obtaining from Austria terms less humiliating than those imposed on his father, but the treaty of peace was not signed till August, 1849. On mounting the throne of Sardinia he endeavoured to reorganise the finances, the army, and the system of public instruction, concluded with England several treaties of commerce, established railways, and promoted free trade. He indignantly refused the offer made by Austria for the cession of Parma, provided he would abolish the constitution. Genoa having revolted, and expelled his garrison, he sent an army against it, recovered his former rights, and his efforts for the prosperity of his kingdom were generally successful. He had, however, one great struggle throughout his reign with the court and clergy of Rome. Guided by Count Cavour, he confiscated much church property, and took away many clerical privileges. He concluded, in Jan., 1855, a convention with France and England, to take part in the war against Russia, and despatched to the Crimea an army of 17,000 men, under Gen. De La Marmora, which distinguished itself by a victory on the banks of the Tchernaya. Sardinia took part in the Conference of Paris, where her ambassador laid before the representatives an able paper on the state of Italy. In 1855 the king lost his mother, wife, and brother, and was brought to the verge of the grave by fever. After his recovery he visited France and England, where he was received with great enthusiasm, and was created a Knight of the Garter and Grand Cross of the Legion of Honour. In the early part of 1859, the King, whose relations with Austria had been for a long time the reverse of friendly, announced in the Chamber that a storm was impending, and Count Cavour detailed the grievances of Sardinia against Austria in a diplomatic circular. Lord Derby's Government used its best endeavours to avert a war which seemed imminent, but without effect. Austria summoned Sardinia to disarm, but in vain; and the Austrian army crossed the Ticino. The Emperor of the French despatched a powerful army to Italy, and, having assumed the command, joined the Sardinian forces, and defeated the Austrians at Montebello, May 20; at Palestro, May 30 and 31; at Magenta, June 4; and at Solferino, June 24, the Emperor and the King being present in person. The Austrians were expelled from Lombardy, the Princes from Naples, Tuscany, Parma, and Modena; and the Treaty of Villa Franca, concluded June 11, confirmed by the Treaty of Zurich, Nov. 10, terminated the war and established Victor Emmanuel as King of Italy. The Parliament, assembled at Turin, March 17, 1861, formally established the title, which was recognised by England March 30, and by France June 24. A treaty for the transfer of the seat of government from Turin to Florence, and the evacuation of Rome by the French in two years, was signed Sept. 15, 1864. The court was transferred to Florence in 1865, and the French army was withdrawn from Rome in 1867. In 1866 the King of Italy, making common cause with Prussia, by a treaty signed May 12, declared war against Austria. The Italian army was defeated by the Austrians at Custozza, June 24, and the Italian fleet sustained a reverse off Lissa, July 20; but in consequence of the success of the Prussians peace was signed at Vienna, Oct. 3, by which Venice and the territory of Venetia were ceded to Italy, and Victor Emmanuel made his public entry into Venice Nov. 7. His family consists of the Princess Clothilde Marie Thérèse Louise, born March 2, 1843, and married Jan. 30, 1859, to Prince Napoleon; Prince Humbert Rénier Charles Emmanuel Jean Marie Ferdinand Eugène, heir apparent, and Prince of Piedmont, born March 14, 1844; Prince Amadeus Ferdinand Marie, Duke of Aosta, born May 30, 1845; and Princess Maria Pia, born Oct. 16, 1847, and married Oct. 6, 1862, to Louis I., King of Portugal.

Alphonso, King of Spain.

(See page 8.)

Alphonso, Marquis de Covadonga, Prince of the Asturias, claimed the Spanish throne under the Pragmatic Sanction and under the protest of Pau. His mother, Isabella II., the daughter of Ferdinand VII., the last King of Spain whose title was undisputed, married in 1846 her cousin, Francis of Assissi, who was selected by Louis Phillippe for her hand amongst other contemporary suitors, such as the Count Trapani, Count de Montemolin, and the Prince of Coburg Gotha. To follow Queen Isabella's troubled career through all the intrigues of Espartero, Lopez, Olozaga, Gonzalez Bravo, Narvaez, Prim, Serrano, and others, would carry us too far. Suffice it to say that her reign lowered Spanish politics and finances to the depth of misery we see them plunged in now, and came to an end in 1868, the year of her downfall. Her protest from Pau, wherein she reserved the hereditary rights to the Spanish throne to her son Alphonso, was at the time so much waste paper, but has since been the disastrous source of civil wars. On this protest, and on the fact of his birth, which took place on the 28th of November, 1857, Alphonso rests his claims to the throne. If Don Carlos fights for the fiction of divine right, Alphonso is satisfied with the quasi-constitutional approval of the Pragmatic Sanction by the Cortes.

Three branches of the once all-powerful Bourbonic dynasty, in France,

Digitized by Google

Italy, and Spain, have lost their thrones within this short space of a quarter of a century. Whether brighter days are still in store for them remains to be seen.

King Alphonso's education was conducted under the eyes of his mother, and under the influence of priests and courtiers. But he is now only seventeen years old, and a long life with many chances lie before him. Since his accession to the throne, he has shown himself full of courage and activity.

Don Carlos and Duchess of Madrid.

(See page 8.)

SPAIN, once the ruling power on two continents, on whose dominions the sun never set, has of late been only prominent for internal strife, fratricidal civil wars, and consequent political as well as financial misery. It is grievous to behold what has become of the Spain of Charles V., the Spain of the Cid, Columbus, Cortez, and Pizarro; of Cervantes, Lope, and Calderon; and of the Spaniards who broke the first Napoleon's armies. Misrule of women, pretenders, and military adventurers, have done their work of destruction thoroughly, and Don Carlos lays now the last hand on it.

It is certainly not from any sympathy with his cause, or with the means he employs to attain his ends, that we place the pretender's portrait and that of his consort before our readers; but, as his doings have for some time attracted a considerable share of public attention, it may perhaps satisfy the curiosity of many to know something about the personal appearance and the antecedents of the adventurous couple.

How Don Carlos came to be a pretender to the Spanish throne is probably a historical puzzle to many of our readers, although the solution of the riddle is an easy one if we follow Talleyrand's advice, and look for the woman in the case.

Marie Christine, a Bourbon Princess of the Italian branch, and wife of Ferdinand VII., King of Spain, prevailed in 1830 on her husband to cancel the ancient Salic law for the succession to the Spanish throne, and substituted for it the Pragmatic Sanction. By the former usage the female issue was excluded from the throne, and Ferdinand VII., without direct male heir, would have been succeeded by his brother, the great-grandfather of the present pretender.

Queen Christine, after having secured the succession in the female line, gave, soon afterwards, birth to Isabella, and assumed the regency for her when Ferdinand VII. died in 1833.

From this time to the present day the strife between the rival lines has been incessant. The pretenders under the Salic law never rested. The first Don Carlos waged a bloody war against the Christinos for six years. His eldest son, known under the name of Comte de Montemolin, represented the cause between 1845 and 1861; and in 1868 Comte de Montemolin's son renounced his rights to the Don Carlos who now fights Serrano and the Spanish Republic.

Charles VII., as his followers like to call him, was born on the 30th of March, 1848, and married in 1867 Marguerite, Duchess of Madrid, the daughter of the Duke Ferdinand Charles III. of Parma and Louisa de Bourbon. Their early wedded life was spent at Frohsdorf, the hotbed of Bourbonic intrigue, and, thoroughly imbued with the notion of their right divine, both eagerly seized the opportunity for a second Carlist war after the resignation of King Amadeo. The deeds and misdeeds of their followers are a matter of present history, which we must leave to our readers to judge; but the agencies at work are the same as of old—priestly influence, and intense hatred of modern progress—in fact all the tenets of dire absolutism. A new pretender, if the present one should be defeated, was born on the 27th of June 1870. His name is Jacob, and he will be perhaps the head of a third Carlist war, against Alphonso, the present king, the son of the ex-Queen Isabella.

Charles I. Domnu of Rumania.

(See page 9.)

PRINCE CHARLES, a monarch of modern creation, is the son of Prince Anton of Hohenzollern, and was born on April 20, 1839. In 1866 the principalities on the Lower Danube, Wallachia and Moldavia—united since 1861 under the name Rumania—became dissatisfied with their native princes, and wanted a change. The European powers, always so much interested in this borderland of the Sublime Porte, were only too eager to supply the new ruler from their overstocked preserves. Prince Charles of Hohenzollern received orders from head-quarters to start for Bucharest, and so he did, only with a carpet bag, as the tale goes. Here he was duly elected by plebiscite, and proclaimed Domnu or Domnitor of Rumania on April 25, 1866. It was a lucky hit of the quondam Prussian lieutenant, and does credit to the proverbial readiness of his house to occupy other people's thrones.

Prince Charles's father owns large tracts of land in the county of Southern Germany, where the Hohenzollerns come from, and where their "Stammburg" stands. As his forefathers set out for the north to try their fortunes, and founded an empire in the course of time, so Prince Charles, who married a Princess of Wied in 1869, may do the same for his descendants in the East.

At present he reigns over a motley crew of French-polished Boyars, of bronze-coloured peasants whose costume and language have undergone not the least change for eighteen hundred years, of inconceivably dirty but eminently picturesque Tsigani, horse-loving yellow-skinned Lipovans, and gaberdined Jews. Four millions of inhabitants all told his dominions contain. Bucharest, the capital, numbers 142,000; and a gay capital it is, where all the elegance and extravagance of exported Paris society are to be found. So it was not a bad idea of Prince Charles, after all, to carry his carpet bag from Berlin to Bucharest, to exchange the capital of the ramrod for the City of Pleasure, as Bucharest is called in the East.

The Crown Prince and Princess of Italy.

(See pages 9.)

PRINCE HUMBERT of Italy was born on the 14th of March, 1844, one year after his sister Clotilde, who married Prince Napoleon. His father is King Victor Emanuel, and his mother was an Austrian archduchess. He is a Piedmontese by birth, and in his early youth he took a deep interest in the troubles that his father's brave little kingdom so valiantly passed through for the deliverance of the common country. He remained a Piedmontese until the battle of Custozza, June 29, 1866, and then he became Italian. The race from which he comes has never been famed for personal beauty, but rather for a higher quality—chivalry. The Crown Prince married on the 22nd of April, 1868, Princess Margaret of Savoy, a lady of great personal beauty, with a sweet, lovable, womanly character. Her father was the Duke of Genoa, brother of King Victor Emanuel, and her mother Princess Elizabeth of Savoy, married in 1856, the Marquis de Ruppale. Both the Crown Prince and Princess have succeeded in gaining the affections of the people of that fair land over which they are one day to rule.

Prince and Princess Philip of Saxony.

(See pages 12 and 13.)

ON the 4th of February, 1875, the marriage of the Princess Royal of Belgium with Prince Philip of Saxony was celebrated at Brussels, amid great festivities, at which members of the Orleans and Coburg families were present. The Princess Louise Marie Amélie was born on the 18th of February, 1858, and had from her tender youth succeeded in winning the affections of her immediate surroundings, as well as of the inhabitants of the Belgian capital, who had many opportunities of watching her sweet manners and high accomplishments. The bridegroom, Prince Ferdinand Philip, Duke of Saxony, and major in the Hungarian Militia, attained his 31st year on the 28th of March, 1875, and belongs to the younger branch of the house of Coburg-Gotha, which supplies empty thrones with kings and high-born spinster ladies with husbands. His father, Prince August, lives at Vienna as major-general of the Austrian army, and is married to Princess Clementine of Bourbon-Orleans. His paternal uncle occupies the throne of Portugal, and his elder brother serves as admiral in the Brazilian navy, and is married to a daughter of the Emperor of Brazil. The newly-married couple have relations at nearly every court in Europe, and are, through the late Prince Consort, intimately connected with our own royal family. But their union had no political bearing whatever, but was simply an offspring of mutual affection.

Canon Kingsley.

(See page 16.)

THE Rev. Canon Kingsley passed away from the world on Saturday, Jan. 23, 1875, after an illness which had for some time justified the gravest apprehensions. His name was so familiar in every English home, and his works and character were so well respected, that myriads had come to look upon him as their "mutual friend." He had indeed an unusual list of recommendations to general attention and favour. He was a gentleman and a Christian clergyman, a sound scholar, an active thinker, a prolific writer in various departments, and a zealous promoter of schemes for the welfare of men and women.

He was a son of the late Rev. Charles Kingsley, who was successively examining chaplain to Dr. Marsh when Bishop of Peterborough, rector of Barnack in Northamptonshire, and of Clovelly, North Devon, and eventually rector of Chelsea; he was born at Holne Vicarage, on the borders of Dartmoor, on the 12th of June, 1819. He claimed descent from an ancient Cheshire family, the Kingsleys of Kingsley or King's Lea, in the Forest of Delamere. Educated under his father's eye and roof till about fourteen years of age, he became a pupil of Mr Derwent Coleridge, and, having been for a time a student at King's College, London, entered in due course at Magdalen College, Cambridge. Here he gained a Scholarship and other distinctions, and took his Bachelor's degree in 1842, obtaining a First Class in Classics, and coming out as a "Senior Optime" in the Mathematical Tripos. At the close of 1842 he was ordained deacon by the then Bishop of Winchester, Dr. Sumner, his "title" being the curacy of Eversley. On receiving priest's orders in the following year, he accepted the rectory of that parish, and in the same year he married a daughter of Mr. Pascoe Grenfell, many years M.P. for Truro and for Great Marlow. He was subsequently, according to *Crockford's Clerical Directory*, chaplain in ordinary to Her Majesty, chaplain to the Prince of Wales, domestic chaplain to Viscount Sydney, and Professor of Modern History in the University of Cambridge, from which latter post he retired in 1869, when he became canon residentiary of Chester Cathedral. In 1873 he exchanged his canonry at Chester for one at Westminster, which he held till his death,

Digitized by Google

The vigour of his mind, the activeness of his habits, and the bold outspokenness with which he spoke and wrote soon brought him into prominence, and the strong opinions which he advanced on some subjects speedily made an impression after he entered upon public life. He was not a believer in the dictum that speech was given to man for the concealment of his thoughts, and therefore he told the world his mind. With Mr. Maurice, he became a leader and representative man. The story of "Alton Locke, Tailor and Poet," produced a veritable sensation by its advanced principles, its bold denunciations, and its fearless advocacy of unpopular opinions. His "Yeast" was another contribution to the same cause, and brought upon him no little hostile criticism.

Mr. Kingsley's views of Christian life are commemorated by the phrase "muscular Christianity," which was in fact, and as has been said, the application of the common-sense principle to religion in healthy, every-day, unostentatious action.

It is quite impossible for us to give even a cursory account of all the works of Canon Kingsley, but the following titles deserve to be recorded. Besides "Westward Ho," "Two Years Ago," and others already mentioned, he published "Miscellanies from *Fraser's Magazine*," in 1859; "The Water Babies," 1863; "The Roman and the Teuton," lectures delivered at Cambridge, in 1864; "Hereward, the Last of the English," in 1866; "The Hermits," in 1867; "How and Why?" in 1869; "At Last: a Christmas in the West Indies," 2 vols, 1871; and various volumes of sermons. Canon Kingsley also contributed articles to the *North British Review* and the *Encyclopædia Britannica*. Amongst other products of his pen also must be mentioned the "Message of the Church to Labouring Men," "Alexandria and its Schools," "Phaethon, or Loose Thoughts for Loose Thinkers," and "Glaucus." He was also the author of a dramatic poem, "The Saint's Tragedy." On the day following Canon Kingsley's death the great bell of Westminster Abbey was tolled, but the funeral took place at Eversley on Jan. 28, in the churchyard of the parish with which he had been connected from the commencement of his clerical life. Though the proceedings were, by the special desire of the deceased, conducted in a perfectly private manner, the occasion was made one of such an exhibition of sympathy and respect as is rarely witnessed. Sir William Cope, Bart., churchwarden of the parish, headed the *cortége*, Dean Stanley reading the open service, and the Bishop of Winchester following. At the grave Dean Stanley read the service, and was deeply affected. The Bishop of Winchester gave the Benediction. Inscribed on the coffin was "Charles Kingsley, born June 21, 1819; died Jan. 23, 1875." By special desire of the deceased, the grave was not bricked, his wish being that his body might be committed to mother earth without that formality. Over the grave, which is close to the rectory wall, a gigantic fir tree extends its protecting branches.

Bishop Thirlwall.

(See page 17.)

Dr. Connop Thirlwall, ex-Bishop of St. David's, died at his residence, Pulteney-street, Bath, on July 27, 1875. The bishop was of a different type from the ordinary run of English prelates. He was not a mere parochial clergyman, not a mere divine or theologian, not even a mere philosopher or historian; he was all these, but he was something more; he was a man of the greatest and most varied intellectual powers, and a proficient in almost every kind of learning, with which he combined the calm judicial faculty to a greater extent, perhaps, than any bishop who has sat on the Anglican Bench during the present or the last century.

Connop Thirlwall was a son of the late Rev. Thomas Thirlwall, M.A., who in 1809 was described as being minister of Tavistock Chapel, Broad-court, Long Acre, lecturer of St. Dunstan's, Stepney, and chaplain to the Lord Bishop of Dromore, and who subsequently held the living of Bowers-Gifford, in Essex. The future Bishop was born at Stepney on Feb. 11, 1797. At three years old, his father tells us, he "read English so well that he was put to learn Latin, and at four could read Greek with a fluency and ease which astonished all who heard him. From that time he continued to improve himself in the knowledge of Greek, Latin, French, and English, until he was old enough to be sent to Bancroft's school at Mile End. At seven his talent for original composition appeared; being developed apparently—by the accident of his mother having set his elder brother to write an essay, a task which Connop Thirlwall imposed upon himself spontaneously, and performed to the surprise of both his parents. Although it was only privately printed, and has been rigidly repressed by its author, there are still extant copies of a little book which was written by Connop Thirlwall when only eleven years old. It bears date 1809, and is entitled "Primitiæ: or Essays and Poems on various subjects, Religious, Moral, and Entertaining.

Almost immediately after giving this book to the public young Thirlwall was sent as "a day scholar" to the Charterhouse, from whence he proceeded to Trinity College, Cambridge, where he obtained a scholarship. He gained the Bell Scholarship and the Craven Scholarship in 1815, and took his Bachelor's degree in 1818.

It was about the year 1830 that Thirlwall and his old friend and schoolfellow, Julius Charles Hare, started and conducted the *Cambridge Philological Museum*, a magazine which contributed largely to the work of interesting the University in the erudite criticism and scholarship of Germany, as distinct from what may be termed the empiric school of Porson and his followers. In 1831 was given to the world by these same two friends the English translation of Niebuhr's "Early History of Rome," which produced such great and lasting effects upon English classical literature.

From the study of the early history of Rome Mr Thirlwall transferred his attention to that of Greece. In 1835 the publication of the first volume of Connop Thirlwall's "History of Greece" first made known to the world those powers and attainments of its author the report of which hitherto had scarcely extended beyond the somewhat narrow circles of Oxford and Cambridge Common rooms.

Mr Thirlwall acted for two years—we believe in 1828 and 1829—as one of the examiners for the Classical Tripos at Cambridge, and he subsequently held a simliar appointment in the newly founded University of London. In the year 1833 the publication of a pamphlet from his pen in favour of the admission of Dissenters to certain academical privileges at Cambridge led to the removal of Mr Thirlwall from or at all events to his resignation of, his Tutorship at Trinity College; but in the following year Lord Brougham (to whom he had become known through his connection with the London University), as Chancellor, presented him to the Crown living of Kirkby Underdale, in Yorkshire, where for six or seven years he busied himself with his parish duties and the preparation of his history for the printer's hands. In 1840, on the death of Dr. J. B. Jenkinson, Bishop of St. David's, Lord Melbourne offered to his acceptance the vacant see, to which shortly afterwards he was consecrated.

From that time down to nearly the end of his life, Bishop Thirlwall took an active part in the deliberations of the House of Lords on most subjects affecting the interest of religion and the Established Church. His first vote was given in 1841, in favour of the Jews' Declaration Bill—a measure of relief of which he was always a sincere and consistent advocate. In 1843 arose the question of the union of the sees of St. Asaph and Bangor, in order to expedite the foundation of a new see for the mercantile districts of South Lancashire and parts of the neighbouring counties. The result was the foundation of the see of Manchester, while those of St. Asaph and Bangor were preserved in their integrity.

In the later religious movements of the day the late Bishop was often called upon to act, and he never shrank from taking a decided and prominent part in them. He ever devoted much care and attention to the cause of education in all its departments, and in his western diocese he will long be remembered as the first bishop who for some centuries had ministered to Welsh congregations in their own language. In June, 1874, he resigned the see of St. David's after a tenure of thirty-four years, and took up his abode at Pulteney-street, Bath, where he resided until his death. He lived and died unmarried. He was buried on Aug. 3 in Westminster Abbey.

Lady Franklin.

(See page 20.)

On Sunday evening, July 18, 1875, in her house at Kensington, died one of the most remarkable women of our time, Lady Franklin, the widow of the well-known Arctic navigator. She had long passed the allotted term of human life, and went to the grave full of years as she was full of honours, paid to her not only on account of the celebrity of her husband, but on account of her own character, and of the zeal, energy, and perseverance which she exhibited in finding out what had been her husband's fate, and in making his discoveries known to the world.

Although she had been for some time an invalid, Lady Franklin never ceased to take an active interest in all that related to Arctic exploration, and it will be in the recollection of our readers that shortly before the sailing of the expedition which left our shores during the past year, she caused it to be notified that her reward of £1000 for further news of Franklin's discoveries still remained unclaimed. She stated at that time that, even in the event of her death, the money would remain to be given to those who brought home news such as she desired to have. The expedition of Capt. Allen Young, which has also gone northward, is specially intended to trace out the steps of Franklin and his companions, and as such Lady Franklin was deeply interested about it.

To all geographical details Lady Franklin lent the ear not only of an amateur, but of an expert, for she was herself a traveller of no mean order. As a young woman she visited the Continent in 1814, immediately after the peace of Amiens; and before her marriage, which took place on November 5, 1828, she had, in company with her father, visited not only France and Italy, but Germany, Bohemia, Denmark, Norway, Holland, Spain, and Russia, going as far as Moscow. After her marriage she passed some years with Sir John Franklin in the Mediterranean, spending the winters in Malta or Corfu, and at intervals journeying up the Nile to the second cataract, and visiting Sinai, Jerusalem, Asia Minor, and Greece. In 1836 Sir John was appointed Governor of Van Diemen's Land (now called Tasmania), and his wife accompanied him. During the time of her sojourn at the Antipodes, she crossed over to Australia and visited the infant colony of Port Phillip (now Victoria). It is stated that she was the first lady who made the overland journey between Melbourne and Sydney, which was then one involving not only fatigue, but danger. She also visited South Australia and New Zealand. In 1844 Sir John and Lady Franklin returned to England; and in 1845, in command of the ships sent to discover the North-West Passage, Sir John Franklin left England, never to return.

For the health of the only child of Sir John Franklin (by a former marriage) Lady Franklin visited, in successive years, Madeira and the West Indies, returning on the latter occasion by the United States.

Digitized by Google

Nearly three years passed, and in the spring of 1848 two Government expeditions were sent in search of Franklin—one by land, under the command of his old friend Sir John Richardson, and one by sea, under the guidance of Sir James Clarke Ross. From that time till the return of the Fox in 1859, and the certainty arrived at by Sir L. M'Clintock that Sir John Franklin was dead, Lady Franklin did not relax for one day her efforts to send, or to influence the Government to send, parties in search of those who were missing. The Fox sailed from Aberdeen in 1857, under the command of Captain (now Sir Leopold) M'Clintock; and it was during the voyage performed by this vessel that Lieut. Hobson discovered, on King William's Island, a cairn, in which was a tin case inclosing a paper deposited there by Capt. Fitzjames on April 25, 1848. This told that Sir John Franklin had died on June 11, 1847, and that the ships had been abandoned in April, 1848. Farther researches made at the same time by Capt. M'Clintock, showed that Franklin and his companions had really discovered the North-West Passage—traversed afterwards by M'Clure and M'Clintock.

Thus ended her long years of waiting; but not her faithful devotion to the memory of her husband. Whatever could serve to make his work known, whatever was likely to afford a chance of discovering more about his last voyage or about the end of any of his companions, was sure to meet with encouragement from Lady Franklin. Her name was known all over the world, and wherever she was known she had friends. She lived to accomplish the great object of her life, and she was useful and honoured to its end.

The Gold Medal of the Royal Geographical Society was conferred on her in token of recognition of the aid to science afforded by the expeditions of which she had been the promoter. She was the first woman who received this honour, which has only been conferred on two of her sex—on herself and on Mrs Somerville.

Lady Franklin travelled much during the later years of her life, visiting Northern Africa, Southern Russia, and Central Europe in 1858, and passing two years after the return of the Fox in visiting America, and in circumnavigating that continent. She also went to the Sandwich Islands, and returned home by way of Japan, China, the Straits Settlements, Calcutta, and Egypt. Between the years 1863 and 1872, she visited many parts of India, Western Europe, and Western Africa; and again went to America, seeing the whole of the west of that continent from Chili to Alaska, and traversing the United States. Her latest journeys were made in Spain, Southern France, and to Ober Ammergau.

For the last three years she lived in great retirement; but her house was a centre of interest to her large circle of friends. Her latest act was the completion of her husband's monument in Westminster Abbey.

Capt. George S. Nares, R.N.

(See page 21.)

Capt. George Strong Nares is a member of a family which has been distinguished for intellectual ability. He was born about the year 1829 or 1830, and entered the navy in 1845, having been educated at the Royal Naval School at New Cross, where he gained the naval cadetship which is given annually to the most promising pupil by the Lords of the Admiralty. He saw some service in H.M.S. Canopus, forming part of the Channel Squadron, and afterwards in the Havannah on the Australian station. He was next engaged under Capt. (now Admiral Sir) Edward Belcher in the Arctic expedition of 1852-3-4. On returning from his Arctic labours he was appointed first lieutenant of H.M.S. Britannia, the well-known training ship for naval cadets. In 1854 he was promoted to the rank of commander, and was attached to the training ship Boscawen. In 1866-7 we find him employed at the Antipodes, in command of the Salamander, in surveying the eastern and north-eastern coast of Australia and Torres Straits. In 1869 he was sent in H.M.S. Shearwater to survey and report upon the navigation of the Gulf of Suez.

From 1872 down to 1874 Capt. Nares was in command of H.M.S. Challenger, in making extensive soundings on the coast of China, the Eastern and South Pacific Seas, and in other parts of the world. The cruise of the Challenger is so fresh in our readers' recollections that we need not repeat any part of its story here. Capt. Nares returned home about Christmas last, in time to be nominated to the command of the expedition which left Portsmouth in the early summer of last year—with the good wishes of Her Majesty and the entire nation—consisting of H.M.S. Alert and Discovery; and he took the command with the intention, and let us hope with the result, of planting the flag of England, if not actually at the North Pole, yet at all events several degrees nearer to it than any point yet reached by the thirty-six previous Arctic explorers who stand on the roll of the Geographical Society before his name.

Capt. Nares is well known as the author of an elaborate and largely illustrated professional work, which has passed through five editions, entitled "Seamanship, including the fitting and rigging of ships, sailing, the management of boats," &c. If therefore a happy combination of theory and practice, of science and experiment, can be thought to point an officer out as well fitted to command, it may be presumed that this gallant captain is "the right man in the right place."

Thomas Woolner, R.A.

(See page 24.)

Mr. Woolner sent no works to last year's exhibition, but his fame as a sculptor is too firmly established to be affected in any way by such omission. Sculpture requires deep thought for conception, as well as time for execution. It is comparatively easy to cover any length of canvas with colours, paint the subject over and over again if alterations are desirable; but one injudicious stroke of the chisel may irretrievably spoil the statuary's work. A sculptor of Mr. Woolner's powers can therefore hardly be tempted by doubtful ambition to keep himself before the public by exhibiting works of minor importance in quick succession. His statues of Lord Bacon and Prince Albert for Oxford, Lord Macaulay for Trinity College, Cambridge; of William III. for the Houses of Parliament, of Lord Lawrence for Calcutta; besides numerous busts of celebrities of the time, as Tennyson, Carlyle, Richard Cobden, Mr. Gladstone, and others, fully bear out his claim to be ranked with the foremost of the Royal Academicians. Poet as well as sculptor, Mr. Woolner brings a refinement of plastic feeling to his works, which endowes his statuettes—Elaine, Ophelia, Guenevere, &c.—with a special grace. They may well be considered as the embodiment of his poems, many of which will perpetuate his name as well as his chisel.

Mrs. E. M. Ward.

(See page 25.)

Mrs. E. M. Ward has now been a quarter of a century before the public, her first picture of "Still Life" having been exhibited in 1850. Since then she established a lasting fame by her delineations of English domestic life, and even more by pictures belonging to the class of historical *genre*. Her works are not less appreciated abroad than they are at home, which can be said of comparatively few English artists. At the Vienna Exhibition Mrs Ward's picture, "The Tower, aye, the Tower," was much admired, and thought worthy of a first-class medal by a committee of very scrupulous Continental judges. To last year's Academy Show Mrs Ward contributed one picture, "The Poet's First Love," illustrating an incident in the early life of the Ettrick Shepherd, which the poet himself describes thus: "When only eight years old, I was sent out to a height with a rosy-cheeked maiden to herd a flock of new-weaned lambs. As she had no dog and I had an excellent one, I was ordered to keep close by her, and Betty had nothing to do but to sit and sew. We dined together at a well, and after dinner I laid my head down on her lap, covered her bare feet with my plaid, and pretended to sleep." The maiden sitting under a sturdy oak sewing, the boy lover reclining against her lap, and the trusty dog in front watching both, formed the subject of Mrs. Ward's picture. Boy and dog are admirably painted, in the artist's best style of pose and colouring. Whether the figure of the girl and the landscape background was left comparatively unfinished we will not decide. If it were done for contrast's sake, all we can say is that it was a hazardous experiment, which many critics will fail to properly appreciate.

Mlle. Varesi.

(See page 28.)

Signora Elena Varesi's family antecedents claim high professional distinction. The baritone-basso Signor Varesi has a great reputation in Italy and Spain, both as actor and singer; it was for him that Signor Verdi composed "Rigoletto," and Varesi's performance of which was second only to that of the inimitable Ronconi. The mother of Signora Varesi was known in Italy as Signora Boccabadati, who took the lead in the lyric drama in Italy for many years. Now, with such paternity, the little girl soon began to show her aptitude for imitation of scales and of tunes; and naturally the early indications of musical ability were not lost sight of. In addition to parental tuition and guidance, Signora Varesi had the advantage of the most distinguished professors in Milan. She was heard at concerts chiefly; but the enterprising agents in Milan soon saw that there was a star who was likely to shine in many capitals, and a lucrative engagement was offered to her to acquire experience in the foremost cities of South and of Central America. Signora Varesi left Italy with her mother, and sang at Mexico, Lima, Rio Janeiro, Valparaiso, Buenos Ayres, &c., with signal success. It is possible that her career might have been confined to the States wherein she travelled, so popular were her representations; but there was a travelling troupe of dramatic notoriety all over the world, which arrived in Chili, with the renowned Mme. Ristori as the tragedian; and this artist at once recognised the exceptional ability of her young countrywoman. Mme. Ristori took such an interest in Signora Varesi that she wrote to Mr Mapleson, under whose direction the great tragedian was last seen at Drury Lane Theatre, strongly recommending her *protégée*.

It may be asked how it is that such an artiste did not take London by storm, for even a Jenny Lind epidemic would have been justified with the artistic acquirements of the young and gifted artiste. We can explain how it is that Signora Varesi has been gradually gaining ground, and how it was that at her first appearance on the Drury Lane boards on the 17th of April, 1875, as Gilda, in "Rigoletto," she failed to make her public, and to excite the unqualified admiration of the critics. In the first place, the lady was ill—she was suffering from a climate new to her after the hot South American temperature. She could take but little sustenance, and, in a weak and debilitated state, she had to be tested on the exacting strains of Verdi—the most unmerciful of composers except Wagner for the singing voice. And Mlle. Varesi is not of the *criard* school: she sings, and does not scream. The verdict on the first night seemed to be the universal one, "She is a

Digitized by Google

accomplished artiste, but has no voice." That a great mistake was made about Signora Varesi on her first and second nights as Gilda subsequent assumptions by her have fully proved. On the 27th of April she appeared as Lucia; in the first act, in the *aria d'entrata* and in the duet with Edgardo, the organ was still found to be weak, but the excellence of the execution in certainty and in intonation could not be mistaken. She gained in strength in the second act, and in the finale the voice penetrated over chorus and band unmistakably. In the mad scene the triumph of the artiste was as great as had ever before been secured by a Persiani, a Jenny Lind, or a Patti. The method of the finished and refined vocalist was recognised. The words of Mme. Ristori were realised—she evidenced that she was a "genuine Italian singer." Mlle. Varesi will be indebted for her fame here to no physical pretensions to beauty—she is not handsome, she can scarcely be called pretty; but her eyes are "full of a gifted soul," her facial expression is equal to any emotional development, her action is graceful, her deportment easy—that of a lady. As an actress, while free from acrobatic exaggeration, in powerful situations she is thorough dramatic; her sensibility is acute, and it is in her imparted sympathetically to the audience; she can be in turn tender and truthful, pathetic and tuneful; her high notes are silvery and sweet, those of the medium register are clear and distinct. It is very probable that as Mlle. Varesi advances in age—she is only in her 21st year—her organ will gain in roundness. She may be emphatically designated as the successor to Sontag and to Persiani in volubility and sweetness. In velocity her attack of chromatic scales up and down—her trills, shakes, and intervals—is most remarkable, for it is attended with certainty; no sliding, no slurring, no shirking, but honestly and artistically delivered, as if from the most skilful violinist.

Mlle. Thalberg.

(See page 28.)

THE incidents of the career of Mlle. Zaré Thalberg afford no scope for a romantic biography, which might almost be confined to the facts that she is yet in her teens, or, as some novelist has expressed it, still in the bread-and-butter period of a maiden's life. "La beauté du diable, c'est la jeunesse" is an old axiom; but the young lady has more than youth—she is decidedly pretty. She comes from a musical race; her father was the famed pianist Thalberg, and her mother is the daughter of the celebrated contralto Signora Angri, now the wife of Don Pedro de Metta, a professor in New York, where Mlle. Thalberg was born on the 15th of April, 1858. She commenced her studies under her grandmother and Don Pedro, and was continuing them in Paris, when Mr Gye, on the introduction and recommendation of Herr Ullman, a well-known concert *entrepreneur*, engaged her to appear last season at the Covent Garden Royal Italian Opera. Her teacher for the stage is the experienced artist Signor Tagliafico. On April 10 the *début* of Mlle. Thalberg took place as Zerlina in "Don Giovanni;" and when a childish-looking peasant girl tripped on the stage with Masetto (her master, Tagliafico) the triumph was at once a certainty before the name had a magical effect, especially on the lady amateurs who play Thalberg's "Home, Sweet Home" fantasia. There was gaiety and grace enough of an amateurish kind displayed by the new comer, and there was charm enough in the timbre of the voice in the delivery of the simple melodies of Zerlina to compensate for defects of style and of experience. The name of Thalberg, indeed, sufficed to render the opera attractive for some nights. In her next part—another Zerlina, in Auber's "Fra Diavolo"—she was much less successful, for the character exacted larger histrionic ability and more vocal skill, and the novelty of the first appearance had worn off. Her next character was Cherubino, the page, in the "Nozze di Figaro." What position Mlle. Thalberg will eventually take on the lyric stage, when the voice has acquired more volume, when the executive skill to sing the scales has been more developed by time and practice, and when the method has been improved and refined, it is difficult to predict. She has natural gifts, and if her next engagement be in one of the small theatres in Italy, where the calls on her powers are limited, there is the prospect of a future before her; but she is in a state of tutelage at present. She has a classic physiognomy, with facial mobility, her form is symmetrical, and her movements graceful. The upper notes will no doubt be fuller as she gets older—fluency and flexibility may come with sol-faing; but it is something for her to be able to vaunt that the Covent Garden audiences have accepted her in the delineation of three characters rendered world-famed by Mme. Adelina Patti and Mme. Pauline Lucca.

Signor Salvini.

(See page 29.)

SIGNOR TOMASSO SALVINI is of Milanese parentage, and was born in the capital of Lombardy about 45 years ago. His father was well known as an actor, and his mother was an actress. He was educated in a school in one of the towns of Lombardy, and whilst a boy showed a rare power of acting in plays, both at school and also in the holidays. He became a favourite pupil of the great Modena, and when seventeen or eighteen years old, soon after the loss of his parents, he entered the *troupe* of which the great Ristori was the leader, and shared in many of her triumphs. In 1849 he entered the Army of Independence, and received more than one medal for his services in the cause of Italian liberty. On the proclamation of peace, however, he returned to his professional engagements, and joined a company under the direction of Signor Bondini. He played in the "Edipo" of Nicolini, in the "Saul" of Alfieri, and in both characters soon achieved a splendid success. He next visited Paris, where he played in succession the parts of Orestes, Saul, and Othello. At Florence he attracted the notice of the late Marquis of Normanby, our Ambassador at the Court of Tuscany, who encouraged him to extend his repertory of Shakesperian characters. In 1865, on the sixth centenary celebration of the birth of Dante, he was called upon suddenly to play the part of Lancelotto in Silvio Pellico's Tragedy of "Francesca de Rimini," which is founded on an episode in the "Divina Commedia." He created on his audience an impression which is still fresh and vivid, and he received a variety of rewards and honours from the people and government of Florence, and an order of knighthood from the hands of Victor Emanuel. In 1868 he made a professional tour to Madrid, where scarcely less honours awaited him at the hands of the then Queen—Isabella—and to Lisbon, where the King of Portugal entertained him as his guest in the royal palace. More recently he made a professional tour in America, where he was rapturously received, his Shakesperian performances being a marked success.

From America the transition to England was easy and natural; and the reception of Signor Salvini here in London showed that an English audience can rise above insular prejudice, and that our countryman can allow a foreigner, and even an Italian, to teach them how thoroughly to appreciate the works of their "poet of all time." The following words which fell from his lips in America may perhaps be quoted here, as explaining the real secret of the success which he has achieved: "The best method is obtained by close observation of Nature, and above all by earnestness. If you can impress people with the conviction that you feel what you say, they will pardon many shortcomings. And above all, study, study, study! All the genius in the world will not help you along with any art unless you become a hard student. It has taken me years to master a single part."

Mr. Henry Irving.

(See page 29.)

MR. HENRY IRVING'S theatrical career is one that is impossible for the general public not to watch with pleasure. It is now nearly five years ago since Mr. Irving's career at the Lyceum commenced, and during these years his progress in his art has indeed been great. First appeared "Fanchette;" then appeared the terrible "Bells," at which London shuddered so long; then "Charles I.," one of the worst plays that ever obtained a great success, and in which the author succeeded in depicting Cromwell in a manner calculated to cause envy to the most extravgant of burlesque writers; then appeared "Eugene Aram"—another actor's triumph, but an author's failure; and then Lord Lytton's "Richelieu" was performed. After "Richelieu" came Hamilton Aidé's pleasant play of "Philip;" and, lastly, in October 1874, "Hamlet" was put upon the boards of the Lyceum. When the announcement was first made, great wonderment was expressed as to how Mr Irving would play the Royal Dane. That it would be a good performance we all knew; but that it would be the great one it proved to be, few expected. All playgoers visited the Lyceum once if not twice, and even oftener, so that detailed criticism here would be superfluous. Everyone knows that Mr. Irving abandoned the conventional readings, that he forsook old-established points, and created new effects; that he introduced alterations, some of which perhaps are questionable; and finally, that the Lyceum Hamlet was the greatest success of modern days. In an age when Shakespeare is said to bring ruin to managers, and cynics declare that "late dinners have killed tragedy," the attraction of immense audiences for two hundred nights to witness a five-act tragedy of Shakespeare is surely the best proof of Mr. Irving's genius, and a welcome illustration of how an actor may, by downright hard work and unremitting study, obtain the highest honours that his profession can give him, and at last triumphantly win for his own "the blue riband of the stage."

Mr Irving is now in about the thirty-seventh year of his age, though he scarcely looks so old.

In the early part of the month of October in the past year, "Macbeth" was announced at the Lyceum theatre, and many of Mr. Irving's admirers received with dismal forebodings the intelligence that he was about to essay the principal character. It must be confessed that in his conception of Macbeth he was not happy, but made a distinct retrogade step in his art. He over-acted, and his attitudes throughout were unnatural; at times he hurried through his sentences with mad haste, and again, in an equally inexplicable manner, he drawled through them, leaving his audience unable to recognise the noble passages with which every one is so familiar. It has been said that to see Edmund Kean's Richard was like reading Shakespeare by flashes of lightning, but the same simile could not be applied to Mr. Irving's rendering of Macbeth. His facial by-play was, however, an excellent point in his performance, and though the natural expression of the tragedian's countenance is more suited to the display of the melancholy of Hamlet than to the stronger and more human passions of Macbeth. Mr. Irving retained the marvellously expressive power of his eyes and made effective use of it. Despite the actor's natural ability, hard work and zealous cultivation of his art, when "Macbeth" was first put on the Lyceum boards, the performance was roundly abused by the press. Yet scarcely had a month passed when it drew crowded houses; and before it is taken off very probably it will rank among the greatest of the successes of that favourite house. There is no doubt but that Mr. Irving is a great artist in his line—quite the greatest now on the English stage.

The Lady's Work Table.

INTRODUCTION.

INVENTION has not been very rife in fancy work during the year 1875. Embroidery in crewels, embroidery in silk on net, on many rich materials, braiding, bugling, and beading, have been more popular than other varieties. Lace work is still practised, but not nearly to the same extent as in previous years; so much is executed by machinery, the raised Spanish lace, with the cord and rings in relief, is now all prepared by machinery, even the flowers and leaves are sold ready made, so that there is nothing left but to braid and put in the stitches, and a rich, handsome écru furniture lace is the result. This novelty has been introduced by Messrs Kulp and Co., of Newgate-street, City, under the name "Point de Bruges." Macramé lace is still worked for furniture trimmings, and when it is to be applied to dresses silk is often used. The Huguenot lace, a design for which will be found (No. 46, among our work-table illustrations) is another revival. It is produced with mull muslin and net; the muslin is folded and stitched down, so as to form very effective designs in relief. There also have been one or two new patterns in Honiton lace braid, trefoils, connected by stems, and trefoils alone, enabling workers to form flowers and leaves with little trouble. Spanish or Sicilian embroidery was one of the novel introductions during 1875. A design will be found in No. 47. It is worked out with white and écru cambric, and open lace braid. The effect is pretty, but the embroidery has not met with the success anticipated, as it does not wash satisfactorily. The Swiss embroidery, on the other hand, has been an eminent success, and has been largely used for tabliers, jackets, and capes. It is an appliqué of black cashmere on coarse black net, the outlines being braided, and the veining of the leaves beaded. It is easily worked, and the cost of production is small. Straw embroidery, embellished with plaques of mother-of-pearl and cut jet beads, is also practised; and broderie Perse or cretonne work receives a large amount of attention. Brilliantine bordering is another novelty introduced during last year, and is suitable for trimming evening dresses. Designs will be found in Nos. 54 and 57. Black grenadine is used for the foundation, and the pattern is produced with either silver, gold, jet or coloured bugles, according to taste. The newest antimacassars are made of Brighton embroidery, which consists of honeycomb towelling worked with shaded wools and silk. There is also a great improvement in the linen drugget work. A wide fancy scarlet braid has been introduced in the design and long embroidery stitches in bright filoselles are used for making it firm. Crewels are now used for embroidering mats made of linen drugget. Thus it will be seen that, although there are no actual novelties, there are several variations and additional improvements to fancy work already introduced. So far as space allowed, the accompanying illustrations comprise designs of much of the new work introduced during the past twelve months.

Description of Coloured Plates.

EMBROIDERY AND APPLIQUÉ.

THE coloured sheet gives a very handsome table border, slipper, and two corners for appliqué and embroidery. The designs are sent us from Vienna. The border is embroidered on green and red cashmere appliqué on black. The first thing to be done is to frame a piece of thin soft linen the size required, smear this all over with shoemaker's paste, and on it lay your groundwork; let it dry. Have ready another piece of thin muslin, framed, on it trace the different parts of the designs, the brown cloth, for instance; on the opposite side to the tracing prepare with paste, and put on the brown material; prepare each colour in the same way. When all are dry cut out; a tracing must be made of the design, and pounced on to the cloth for the ground; then, when the parts are cut out, they must be pasted on to the ground in the same manner as the separate pieces. The greatest nicety and care will be required to get it exactly in position. The figure in the centre of each part is embroidered; this should be done on linen sheeting, frame the linen, pad each leaf well, and work in the coloured silk in long straight stitches, laying them carefully side by side. No filling up can be made in this sort of embroidery as in floss silk, and therefore great care must be used. When finished it is pasted in its place as well, carefully pinning it first to get it straight, and then edged round with a "passing" of silk, the same colour. The other appliqué parts are edged with braid the same colour, and a French knot worked at different intervals. The curves above the embroidery are worked in silk. The slipper is prepared in the same manner, but for so small a piece of embroidery the stitches are worked on the ground itself. The borders for cushions are worked with braids and silks on a red ground in one, with little figures of white cloth appliqué on each circle. The other cushion border is worked entirely in embroidery, in point au passé, long stitch, or, as some call it, satin stitch. If worked on cashmere or cloth it should have a thin lining of muslin framed together; this prevents the work stretching. The colours are clearly illustrated in the engraving.

CIGAR CASE, CARD PURSE, &c.

(By Mr Bedford, 186, Regent-street).

THE materials required are 4 skeins red, 2 black, 1 gold, 1 green, and purple; netting silk of the finest quality. The work is made up over thick cardboard, lined through with kid, and an inner case of silk for the cigars. The work is commenced from the bottom with the red silk. The finest crochet hook is also required. Make a chain of 4 unite, on this work 9 Ch.—2nd round. 1 DC., 2 in the next; the stitch in which the increase is made must be kept carefully throughout, and made regularly. —3rd round. * 1 DC. on each of the two next, 2 DC. in the following, repeat from *.—4th round. 1 DC. on each of the 3 next, 2 DC. in the following, repeat; work in this manner until you have 14 stitches between each increase, then work 5 more plain rounds in red. The whole pattern is worked in double crochet. When the 5 plain are finished you commence the stripe. The colours are all wound on different cards, and passed from stitch to stitch at the back of the work. In the following rounds, as the work is all in DC. crochet, the different colours only will be given. Work a row of gold, then one of black.—3rd row of stripe, 5 black, 4 gold, * 9 black, 4 gold, repeat from *.—4th round. 3 black, 2 gold, 2 red, 2 green, 1 gold, 6 black, repeat from *.—5th round. 2 black, * 1 gold, 3 red, 2 green, 2 purple, 1 gold, 4 black, repeat from *.—6th round. 1 black, * 1 gold, 1 black, 3 gold, 1 green, 3 purple, 1 gold, 3 black, repeat from *.—7th round. 1 black, 1 gold, * 4 black, 4 gold, 4 black, 1 gold, repeat from *.—8th round. 2 black, 2 gold, * 11 black, 2 gold, repeat from *.—9th round. Black.—10th round gold. 2 rounds of red.—13th round. You next work the pattern for the centre, * 6 red, 1 gold, 2 red, 1 gold, repeat from *.—14th round. 7 red, 2 black, * 8 red, 2 black, repeat from *.—15th round. Like the 14th.—16th round. 6 red, 1 gold, 2 red, 1 gold. Now repeat from the 2 rows of red 7 times, then 2 rows of red, and 1 gold row, 1 black row; then repeat the 8th round, working the rounds in the stripe backwards until the stripe is complete, and 8 rows of red for the top; these are shaped in making up.

TOBACCO POUCH.

THIS is worked in bright dark blue silk purse twist, gold bullion, and black silk; the inside should be lined with the thin gutta percha sheeting, as it keeps the tobacco moist, tassels of gold and blue finish the bag. Commence with the blue silk and work entirely in double crochet. Make a chain of 3 unite, in this work 5 DC., then 8 DC., then 11 DC., and gradually increase until you have 16 in this row, work 2 stitches in every alternate stitch, and in these stitches always increase one every round until you have eleven stitches every time between each of the increasings. In the next round you commence the pattern.—1st. Pattern round, work 4 blue, 2 gold all round. —2nd round. 1 gold, 2 blue, then 4 gold, 2 blue; the round must end with 3 gold.—3rd round. * 2 gold, 1 blue in the same stitch as the last, 2 gold, 2 black; repeat from *.—4th round. 1 black, 3 gold, then 4 black, 3 gold throughout,—5th row. * 2 gold, 1 blue, 2 gold, 2 black in the middle of the 4 black, and repeat from *.—6th row. 1 gold, 4 blue, * 4 gold, 4 blue; repeat from *.—7th round, * over the blue and 1st gold, work 7 blue, then 2 gold; repeat from *. 3 rows of blue. You next work the key pattern in gold and blue.—1st row of stripe, 7 gold, 1 blue.—2nd row. * 1 gold on the 1st gold, 5 blue, 1 gold on the last gold, 1 blue; repeat from *.—3rd row. 1 gold, 1 blue, 3 gold, 1 blue, 1 gold, 1 blue.—4th round. 1 gold, 1 blue throughout the round.—5th round. * 3 gold, 1 blue, 1 gold, 1 blue, 1 gold, 1 blue; repeat from *.—6th round. 4 blue 1 gold, 1 blue, 1 gold, 5 blue; repeat from *.—7th round. 5 gold, 1 blue * 7 gold, 1 blue; repeat from *.—8th round, 9th round, all blue, The ground work.—1st round. * 5 blue, 1 gold throughout.—2nd round. * 1 gold, 3 blue *, 1 gold, 1 black, 1 gold, 3 blue; repeat from *.—3rd round. 5 blue, 1 gold all round.—4th round, blue only.—5th round. 2 blue, 1 gold, then 5 blue, 1 gold all round.—6th round. 1 blue *, 1 gold, 1 black, 1 gold, 3 blue; repeat from *.—7th round. 2 blue, 1 gold, then 5 blue, 1 gold all round.—8th round. Blue only, now repeat from the 1st round twice more, then work from the 1st to the end of the 3rd round, 3 blue rounds, now repeat the gold and blue stripe from the 1st to the end of the 7th rounds, then 3 rounds blue, 1 round gold bullion. For the border you work on the last round of *blue*, not on the gold but at the back of it, 5 rounds of 1 treble, 1 Ch., miss 1 DC., 1 treble in the next; repeat from *.—6th round. With black, 1 treble over the next chain, * 5 Ch., 1 treble over the last 1 Ch. of last round, miss the next space, 1 treble in the following; repeat from *. —7th round. Over every 6 Ch. work with the gold bullion 5 DC. and DC. between the 2 trebles.

BLUE CARD PURSE.

THIS is worked with gold black and blue purse twists in DC crochet. Commence with gold by a chain of 3 unite, on this work in gold until you have 8 DC., then work the 1st pattern round, 1 gold, 1 black in every stitch.—2nd round. On every black and gold of last round, work 2 black 1 gold.—3rd round. * 3 black, 1 gold, repeat from *.—4th round. * 1 gold over the 1st black, 2 black, 1 gold over the gold, and also 1 blue, repeat from *.—5th round. * over the gold and black, 4 gold, 2 blue over the blue, repeat from *.—6th round. 1 blue, 2 gold, * 5 blue, 2 gold, repeat from *.—7th round. All blue.—8th round. 3 gold, 19 blue, increased by working 2 blue in one when necessary, but there only requires four sets of gold stitches in the whole.—9th round. Over the 2 gold work * 1 gold, 2 black, 1 gold, 1 blue, 6 black over blue, 2 blue, 6 black, 1 blue, 2 gold, 3 blue, and repeat from *.—10th round. * 2 black, 1 gold, 1 blue, 1 black over the first of the 5 black, 4 blue, 1 black on the 6th black, 2 blue, 1 black, 4 blue, 1 black, 1 blue, 1 gold, 1 black, 2 gold, repeat from *.—11th round. Like the last, working 2 stitches where necessary only to keep it flat.—

12th round. * 1 gold, 3 blue, 1 black on the 1 black of last round, 2 blue, 3 black, 2 blue, 1 black, 2 blue, 3 black, 1 gold, 2 black, 1 gold, 1 black, repeat from *.—13th round. 1 black; * 1 gold, 2 blue, 1 black, 7 blue, 1 black, 6 blue, 2 gold, 4 black, 1 blue, 3 black, repeat from *.—14th round. 1 gold, * 1 black, 1 gold, 2 blue, 1 black, 7 blue, 1 black, 1 blue 2 gold, 2 blue, 2 gold, 3 black, 2 gold, repeat from *.—15th round, 1 blue, * 2 gold, 2 blue, 9 black, 3 blue, 2 gold, 3 black, 2 gold, 2 blue, repeat from *.—16th round. 2 blue, * 1 gold, 16 blue, 3 gold over the 3 black of last round, 5 blue, repeat from *, 2 plain blue rounds when sides are crochet together, work together with half a DC. round of DC. in blue. *The Border.*—In gold work 1 treble, in the 1st DC. of last round, 3 Ch., 1 treble in the same DC., miss 3 DC., 1 treble in the next, and repeat from *.—2nd round, Over every 3 Ch., work 5 treble, 1 DC. between the two trebles of last round.—3rd round with gold. Work a DC. on each stitch of last round, and fasten off. The mounts and all materials may be had of Mr Bedford, 186, Regent-street.

Card Purse (in Red and Gold Silk).

You require fine red gold and black silk for this purse. With red make a chain of the unite, and on it work in DC., increasing to keep it flat 1 stitch of red and 1 of gold alternately until you have 28 stitches in all; then work 1st round, 2 red, 1 gold, 14 times, this is the commencement of the points of the star. In the 2nd round over the red stitches work 1 gold, 2 red, 1 gold over the gold, this will make an increase of stitches, and will in reality be 2 red, 2 gold all round.—3rd round. Over the 1st gold work * 1 black, then over the gold and red work 2 gold, 2 red; repeat from *.—4th round.,*2 black, 2 gold, 1 red; repeat from *.—5th round. 3 black, 2 gold all round.—6th round. 4 black, 1 gold, if necessary to increase make an extra black, but keep the pattern distinct.—7th round. * 1 red over the 1st black, then 4 black, 2 red; repeat from *.—8th round. Over the first red and black 2 red, then 3 black, 3 red; repeat from *.—9th round. 4 red over the first 2 red and 1st black, * 2 black, 5 red; repeat from *.—10th round. 6 red over the first 4 red and 1 black, then 1 black over the last black, * 1 red and 1 black; repeat from *.—11th round. Red, increase as necessary.—12th round. * 9 red, 1 gold, 5 red, 1 gold; repeat from *.—13th round, * 3 red, 2 black, 3 red over the last red, 1 gold, over the next gold a gold also, 4 red, 2 gold; repeat from *.—14th round. 3 red, 4 black, 2 gold over the last 2 red, 1 gold over the 1st gold, 2 red, 2 black, 1 red, 1 gold, 2 red, 4 black, repeat from *.—15th round. 1 red, 2 black, 1 gold, 2 black, 3 red, 5 black over the 2 black and 2 red of last round.—16th round. * 1 red, 4 black, 3 red, over the 5 black, 2 black, 1 gold, and 2 black, then 2 red, 1 gold, repeat from *.—17th round. 1 red, * 2 black, 2 red, 2 gold, 2 red, 4 black, 4 red, repeat from *—18th round. * Work red until the last of the 2 next gold on it and the following stitch, 2 gold, 1 red, 2 black, 2 red, 2 gold, 7 red, and repeat from *.—19th round * over the red and 1st gold work red, 1 gold, work red to the end of the next gold, 1 gold, repeat from *.—20th round. Red, repeat the whole for the other side, then crochet the 2 together with a row of DC. The border with gold, work 1 treble * 3 Ch, 1 treble, in the last DC. again; miss 3 DC. 1 treble, in the following, repeat from *.—2nd round. With black work 1 DC, over the 2 treble, 5 treble over the 3 Ch.—3rd round. With gold, 1 DC. on each stitch of last round.

DESCRIPTION OF ILLUSTRATIONS.

1. Scarf for Neck (Knitting).

You require blue and white Shetland wool for this scarf, and two wooden knitting kneedles, No. 9. The scarf is knitted in one long length, and should be about a yard and a quarter in length. Cast on with the blue wool stitches to knit this length, and knit 40 rows of blue, then 40 of white, 40 of blue, and 40 of white; join the first row and last rows together with the blue; make some little rosettes over a piece of cardboard three-quarters of an inch wide, tie them tight in the centre, and leave a long end to each one; fold the knitting so that half each blue stripe forms the outside edges of the scarf; then with a rug needle sew on the tufts at equal distances; finish with tassels of blue and white Shetland wool, and two buttons and cord of blue silk to fasten round the throat.

Tail of Scarf No. 1.

2. Baby's Jacket (Crochet Tricotee).

You require a bone crochet hook, No. 6, and white single Berlin wool. Make a chain of 110 stitches, and work eight rows in plain crochet tricotée. 9th row. Take up 26 loops, then take up the next three together, then work in plain tricotée until you have 29 to take up only, take up three loops together, and then 26 plain, work all off plain.—10th and 11th rows. Plain.—12th row. 25 plain, three loops together, then plain to the last 28, take up three together, and then 25 plain, work back.—13th row. Plain.—14th row. 24 plain, 3 together, work to the 27th stitch from the end, then 3 together, 24 plain, work back.—14th and 15th rows. Plain.—16th row. 23 plain, 3 together, work to the 26th stitch from the end of the row, then 3 together, the rest plain, work back.—17th row. Plain.—18th row. 22 plain, 3 together, plain to the 25th stitch from the end, 3 together, the rest plain.—19th and 20th rows. Plain. You now divide the work for the fronts and back. Work first the left side of the front. Work 22 stitches plain, work back, work 13 small rows in this manner, then work a DC. on each of the first 16 loops in the next row, then 8 loops plain, work 5 rows on these 8 loops, and fasten off. You next work the last 22 stitches of the work in the same manner for the second front, repeating from *. When this is finished take up the loops in the centre of the work, and for the back of the jacket work on them 13 rows; then work 5 rows on the first 8 loops only; fasten off. Take up the last 8 loops and work 5 rows on them, then join them to the shoulders. You next work 4 rounds of looped crochet all round the jacket in the following manner: Commence with the blue wool and work a DC. in the first loop, * then take up the next loop and work 5 Ch., then draw the wool through the last Ch. and the loop of the DC. stitch, 1 DC. in the next loop; repeat from *, taking care to keep the 5 Ch. to the front of the work. In the corners work 3 loops in the stitch.—2nd round. With white wool, * a loop of 5 Ch. on the DC. of last row, 1 DC. over the 5 Ch.; repeat.—3rd round is like the second.—The fourth round like the last round, but worked with blue wool.—5th round. With white wool, 1 treble on the 1st stitch, * 5 Ch., 1 treble in the same stitch, miss the next DC., 1 treble in the following stitch; repeat from *. Round the neck of the jacket you work only a row of DC. in blue, and then work the 5th round in white wool. The jacket is ornamented with three rows of insertion worked on the Maltese pin in blue wool; this is sewn on a row of the tricotée, and between the rows of insertion you work a row of fine feather stitch.—The Sleeve. Make a chain of 40, take all the loops up, work back 30 only, then take up 20 loops, work back 15, take up 10 loops, work all back on the needle, then take up all the loops and work all back; now work 16 plain rows. In the next row work the 3 centre loops together, 2 rows plain.—20th row. The 3 centre loops together.—21st and 22nd rows. Plain.—23rd. Plain, but the 3 centre loops together, then 2 rows plain; decrease in the following row as before, the 3 rows plain. Now work the border, making the right side of the border fall on the wrong side of the sleeve, so that it may turn back as a cuff; then ornament it with the insertion, and sew it into the armhole of the jacket.

3. Scarf or Cloud (Knitting).

The engraving represents the design adapted to a child's scarf, but it is equally adapted for clouds, &c. It is worked with four needles (these should be No. 7); and Shetland wool of three shades of grey, black and white are required for a child's scarf. Cast on 66 stitches, on to one needle with black wool, and knit these off, 22 on each of the three needles.—1st round. * Knit 6, then slip 1, knit 2 together, draw the slipped stitch over the knitted; knit 6. In the next stitch knit 1, then purl 1, then knit a stitch in the back part of the same loop, thus working three loops in the one stitch; repeat from * all round.—The 2nd round. Knit plain.—3rd round. Knit 5, * slip 1, knit 2 together, draw the slipped stitch over the knitted, knit 6; knit three stitches in one, as in the first round; knit 6, repeat from *; repeat these 2 rounds. For the length of the cloud work 6 rows of black wool, then 6 of each of the different shades, and 6 of white, until the whole is the length required; for a cloud use needles No. 4, and cast on 192 stitches. The pattern is as easily worked on two needles as on four, but the two outside edge stitches must be plainly knitted together, and not 3 in one, and every alternate row must be purled. When the clouds are finished add long tassels of the wool, using all the shades, and make them 8in. long.

4. Gaiter for Child of Eight to Nine Years of Age (Knitting).

You require four needles, No. 12, and single Berlin wool, blue and black for this gaiter. Cast on 72 stitches with blue wool, knit them off on to three needles, 25 on each of the two first, and the remainder on to the third. Knit 32 rounds of 2 purl and 2 plain with the blue wool, then with the black wool knit 2 rounds plain, 2 rounds purl, and 2 plain. Then commence the pattern in the next round.—39th round, with blue wool. * Knit plain.—40th round. * Knit 1, purl 2, repeat from *.—41st round. * 1 purl, 2 knit, repeat from *.—42nd round. * 1 purl, 2 knit, repeat from *.—43rd round. * 1 knit, 2 purl, repeat from *.—44th round. Knit plain.—45th round. Join the black wool and purl.—46th round. Purl with the black wool, repeat from the 39th round, until you have 7 rows of pattern. In the next plain row with the black wool decrease one stitch on each side the centre stitch for the back of the leg. Knit the first stitch, decrease, work the row and decrease the two last stitches on the 3rd needle, decrease in this manner every fifth round until you have worked 4 more patterns, then work with black 2 rounds of purl, 2 of plain, 2 of purl, then work 30 rounds of 2 plain and 2 purl stitches; then divide the work in half, take half of the stitches at the back, and knit 30 more rows, on two needles only, fasten off. Knit a small gusset on each side of these 30 rows, take up 15 stitches, knit back, then knit 11, knit back, knit 8, knit back, knit 5, knit back, knit to the end of the 15 stitches, and cast off; now take the front stitches and knit the rib 30 rows more, fasten off, sew to the gusset, and then knit 6 rows in black of purl and plain all round the bottom of the foot.

5. Child's Petticoat (Knitting).

This petticoat is intended for a child of five or six to eight years of age.

Digitized by Google

It is knitted with four needles until you have worked two-thirds of the whole petticoat; then you work on two needles only, by which means you make the placket hole. You require two pairs of needles No. 6, and red and white Saxony wool. Single Berlin can be used, but the Saxony is better for wear and washing. Cast on with red wool 196 stitches on to one needle, then knit off on to each of the other two needles 65 stitches, and with the third knit 66. Mark this needle or beginning with another piece of wool, and take care that all your rounds or rows begin at this place, or your patterns will be wrong. You next work two rounds of purl knitting, then two rounds of plain knitting. In the next round you commence the waved border, and work with white wool.—1st row of border. * Knit 5, purl 4; repeat from * on each of the three needles.—2nd round. Purl 1, knit 5, * purl 4, knit 5; repeat from * to *.—3rd round. Purl 2, * knit 5, purl 4 *; repeat from *.—4th round. Purl 3, * knit 5, purl 4 *; repeat from *.—5th round. Purl 4, * knit 5, purl 4 *; repeat from *.—6th round. Knit 1, * purl 4, knit 5 *; repeat from *.—7th round. Knit 2, * purl 4, knit 5 *; repeat from *.—8th round. Knit 1, * purl 4, knit 5 *; repeat from *.—9th round. Purl 4, * knit 5, purl 4 *; repeat from *.—10th round. Purl 3, * knit 5, purl 4 *; repeat from *.—11th round. Purl 2, * knit 5, purl 4 *; repeat from *.—12th round. Purl 1, * knit 5, purl 4 *; repeat from *.—13th round. * Knit 5, purl 5 *; repeat from *. This finishes the waved border. Now work with red wool 1 round of plain knitting, then two rounds purl knitting and 2 rounds plain knitting. Fasten off the red wool, and join the white. You next work the diamond pattern after the detail No. 5B. —1st round. * 7 knit, 1 purl, repeat.—2nd round. 6 knit, * 3 purl, 5 knit *; repeat from *.—3rd round, 5 knit, * 5 purl, 3 knit *; repeat from *. —4th round. 6 knit, * 3 purl, 5 knit *; repeat from *.—5th round. * 7 knit, 1 purl *; repeat from *.—6th round. 3 knit, 1 purl, * 7 knit, 1 purl; repeat from *.—7th round. 2 knit, * 3 purl, 5 knit; repeat from *.—8th round. 1 knit, * 5 purl, 3 knit, repeat from *.—9th round. 2 knit, * 3 purl, 5 knit *; repeat from *.—10th round. 3 knit, 1 purl, * 7 knit, 1 purl; repeat from *.—11th round. Repeat again from the first round, and repeat until you have 15 rows of patterns worked; then work the rest of the petticoat, which is 5 more sets of patterns, on two needles only, in single rows. The pattern is so simple that it will be easily kept; it will only be necessary to remember that in every alternate row the purl stitches must be knitted, and the plain stitches purled. In the 4th row of the last three of the five patterns you knit together every alternate two stitches, to reduce the petticoat for the band; the next row is not reduced, but every alternate row is until the pattern is finished; then cast off loosely and sew into an elastic band.

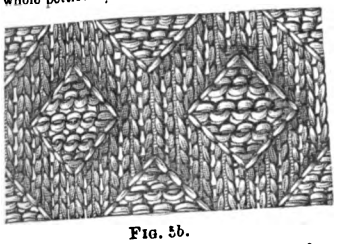

Fig. 5b.

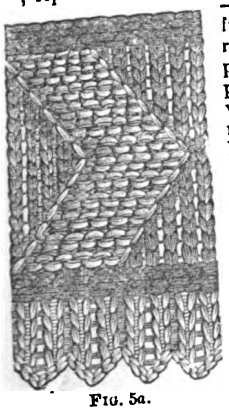

Fig. 5a.

6. Gaiter for Child (Knitting).

This gaiter is intended for a child of five or six years of age. It should be knitted in white Saxony wool on No. 12 needles: four needles are required. Cast on 64 stitches, and knit off on to three needles, in plain knitting; you then knit 36 rounds of ribbing, each round knit 2 plain and 2 purl, then 1 round plain knitting, 1 round purl knitting. You now commence the pattern, which is printed in a larger size in the detail.—1st round. * 1 purl, 5 knit; repeat from *. —2nd round. * 2 purl, 4 knit; repeat from *.—3rd round. * 3 purl, 3 knit *; repeat from *.—4th round. * 4 purl, 2 knit; repeat from *.—5th round. * 5 purl, 1 knit; repeat from *.—6th round. * 1 knit, 5 purl; repeat from *.—7th round. * 2 knit, 4 purl; repeat from *. —8th round. * 3 knit, 3 purl; repeat from *.—9th round.—* 4 knit, 2 purl; repeat from *.—10th round. * 5 knit, 1 purl *; repeat from *. —11th round. Begin from the 1st round again; repeat this pattern until you have 65 rounds, but in the 33rd round decrease 2 stitches, one at the beginning and one at the end of the round. Mind to keep the pattern; then 6 rounds with no decreasing; decrease three times in all in this manner; when this is finished work 2 rounds plain knitting, 2 of purl. You then work the frill: for this knit 20 rounds of 2 plain and 2 purl; in the 21st round you work two stitches in each stitch of the last row, that is, 1 plain and 1 purl, and then 10 rows more of 2 plain, 2 purl.

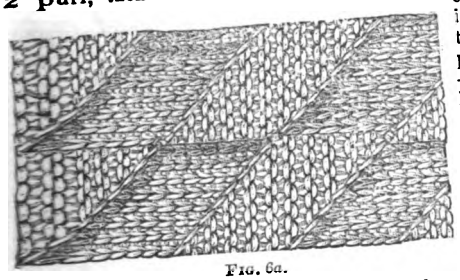

Fig. 6a.

7. Baby's Boot (Crochet Tricotee.)

This little boot is very warm, as it is lined through with knitting. You work first the crochet tricotée. Make a chain of 12 stiches with white wool; on this chain work 24 rows of plain crochet tricotée, using the same needle you did for the jacket (No. 2). In the 25th row take up the 12 loops, then take up the loops in the first row of the crochet, and so join the two pieces for the toe. Work back 10 plain, then 2 together twice, 10 plain.—26th row. Take up all the loops again, work back 9, 2 together twice, 9 plain.—27th row. Take up all the loops, work back, 8 plain, 2 together twice, 8 plain; decrease in the same manner in the 4 following rows, then work 2 plain rows, and cut off the thread. For the sole you make a chain of 7; take all the loops up, and work back. In the next row increase a stitch before the second and the last loops, then 3 plain rows. In the two next rows decrease 1 stitch at the beginning and end of each row, then a plain row. In the three following rows increase a stitch before the second and last stitches; then work 4 rows plain, then 3 rows, decreasing one stitch on each side this row. Now join this sole to the shoe with a row of DC. wool, using the blue, and working it on the right side of the crochet. You now take up all the stitches round the top of the shoe with white wool, and work the leg: work first a round of * 1 DC., 1 Ch, repeat from *; then work 2 rounds of looped crochet all in white wool. In the next round you introduce the commencement of a small star in blue wool; work one loop in blue wool, then 5 loops in white, and so on. In the following row on each side the blue loop of last row work a blue one, all the others white. In the following row a blue loop between the two blue loops of the last row, then two rows of loops in white; these loops can be either worked like those on the jacket or over a small mesh. The next row is the plain DC., taking up both edges of the stitch.—The Border. With the blue wool work 4 treble, with 1 Ch. between each in the first DC., * 3 Ch., miss 4 DC., 4 treble, with 1 Ch. between each in the next; repeat from *, fasten off at the end of the row.—2nd row. With white wool work 1 single on each treble and Ch. stitch in the last row; when you come to the second of the 3 Ch. work a DC. in the last white row. Fasten off at the end of the row; make a chain and little tassels of blue wool to draw the shoe, and run it through the first round of DC.; and chain stitches in the border. Now take some No. 8 knitting pins, and with fine eider wool cast on 23 stitches, knit plain, and in every row before and after the middle stitch make one by bringing the wool forward. Knit enough in this manner to fit from the row of Ch. and DC. in the border to the middle of the sole; then cast off, and sew into the little boot. You finish the toe by working a little scroll in chain stitch in the middle of it.

8. Crossover Tippet (Crochet).

6oz. of a pretty grey chené wool, 8-thread German, and 1oz. each of two shades of mauve, and H. Walker's ivory crochet needle, No. 6, will be required. Make a chain of 231 stitches. Tie a piece of wool into the centre stitch to mark it.—1st row. Work 21 stitches of double crochet into successive loops beginning on the 21st before the centre stitch; work 3 stitches into the next, work 21 stitches of double crochet into successive loops.—2nd row. Turn, make 1 chain, work in double crochet 1 stitch into each loop, taking the loops nearest to you always, till you come to the centre stitch, work 3 times into that, work 1 into each of the remaining stitches, and 1 into each of the next 9 chain.—3rd row. Turn, make 1 chain, work a stitch of double crochet into each till you come to the 16th stitch before the centre increasing, work 3 stitches into that and one into each stitch till you come to the centre stitch, work 3 times into that, work one stitch into each of the next 15, 3 into the next, and 1 into each of the remainder, work a stitch into each of the next 9 chain. With the first stitch of the 9 take the chain stitch that was made in the last turning and the first chain stitch together as one; draw the wool through both, then through the two on the needle; repeat this always when fresh chain stitches have to be taken up. At the end of the 9 turn 4th row make 1 chain, work 1 stitch of double crochet into each loop till you come to the centre one, work 3 stitches into that and one into each of the remainder, work a stitch into each of the next 9 chain, taking up the first with the chain of last turn as before. Continue in this manner, increasing in every row in the centre stitch for the back, and in every alternate row for the shoulder in the centre stitch of the 3 in the second row before the one being done, and taking up 9 chain stitches as before at each end every time till 9 have been taken on each side 7 times; then the next time work to the end of the chain in double crochet, and, always taking the loop nearest you at the end, make 2 chain, turn, work into the second. Work four rows from end to end, increasing in the places as described above, and increasing at the beginnings of these four rows only; then work four more rows from end to end, increasing in the same places as before, except at the beginnings of the rows; decrease a stitch by taking up the second loop. The fronts are now finished except the edging. For the remainder of the back work in the same way, increasing down the back only. Begin on the last increased stitch for the shoulder. * Work a stitch of double crochet, take up the next hoop, miss the next, take up the next, draw wool through both, draw the wool through 2 on the needle, work 1 stitch in every loop till you come to the centre one, work 3 into that, work a stitch of double crochet till within three of the end, take up the 3rd and last together, work as one stitch; repeat from * till only 15 stitches remain. For the Edging: 1st row. Work a row in double crochet all round with lightest mauve.—2nd round. With the same colour work 1 stitch of

20. Chatelaine Bag (Embroidery, Beading and Braiding).

Digitized by Google

double crochet, make 5 chain, miss 3 loops; repeat.—3rd round. Work with the same colour into the loop of 5 chain 1 stitch of double crochet, 2 long stitches, 1 extra long stitch, 2 long stitches, 1 stitch of double crochet; repeat.—4th round. Work a stitch of double crochet with the darker mauve into the extra long stitch in the last round, make 7 chain; repeat.—5th round. With darker shade work in the 7 chain stitches into last round 1 stitch of double crochet, 2 long stitches, 3 extra long stitches, 2 long stitches, and 1 of double crochet. This completes the crossover. A ribbon should be stitched about 3in. from the point at the bottom of the back, with spaces left at each end to pass the ribbon through the part that is stitched at the two ends in front; pass the ribbon on the left side round to the back, and through the space left on the left-hand side; pass the ribbon on the right-hand side across to the back, and slip it through the space left on the right-hand side of the back; tie the ends in front.

9. Baby's Glove and Gauntlet.

White Saxony wool, light blue cider yarn, 4 knitting needles, No. 16 Cast on 40 stitches, knit off on to three needles—15 on to each two needles, 10 on the third.—1st round. Plain knitting.—2nd round. Knit 1, purl 1 throughout the row.—3rd round. Purl 1, knit 1 throughout. These two rows form the pattern; every knitted stitch in one row must be purled in the next, and so on. Knit 20 rounds in this manner, then, on two needles only, work the thumb. Before commencing the next needle cast 5 more stitches on the needle, then work ten on the needle, keeping the pattern, and cast on five more; turn, and work these twenty stitches back, keeping the pattern; work 18 little rows on these 20 stitches, cut the wool, leaving a long end to it. With this wool take up the 17 stitches on the needle, and sew them all up together tightly, drawing them up, and sew down the two sides of these 18 rows. You now fold the thumb, and take up the two sides of five stitches extra that were cast on for the thumb in the place of the 10 stitches that were on the needle, and knit 30 rounds; then * work 8 stitches and knit 2 together, repeat from * all round; the next round work without any decreasing; repeat these two rounds twice more, then take up all the stitches on the wool and sew tightly together. The gauntlet is in crochet. Work from the inside of the glove with the white wool and a No. 12 steel hook, work 1 treble on the 1st knitted stitch in the foundation row; * 1 Ch., miss the next stitch, 1 treble on the following; repeat from *.—2nd round. 1 DC. on the 1st treble, * 1 Ch., * 1 DC. on the next treble. In working these DC. and treble stitches take up both sides of the horizontal loop; repeat from *.—3rd round. In this round you commence the looped crochet. You require a small round wooden mesh, the thickness of a No. 6 knitting needle. Work 1 DC. in each stitch of the last round, and as you work each stitch pass the wool round this mesh, which is held in the finger and thumb of the left hand on the outside of the work, work two rounds in white looped crochet. 5th round. * 5 white stitches, two blue stitches; repeat all round.—6th round. 1 blue stitch on the first white, then * 3 white, 4 blue; repeat from *.—7th round. * 5 white, 2 blue; repeat from *.—9th and 10th round. All white looped crochet.—11th round. With blue wool, work 4 treble in the first DC., * 3 Ch., miss 3 DC., 4 treble in the next; repeat from *. Fasten off at the end.—12th round. With white wool, work a DC. in the 2nd of the first three DC. stitches passed over in the 11th round, working over the blue chain stitches, 1 single on each of the next blue stitches of the last row until you come to the 2nd of the 3 chain, and work a DC. in the 2nd white DC. stitch below it. Fasten off at the end of the round. You must next work three little bars of chain stitch at the back of the hand in blue wool, and add a little cord of blue wool, with two tassels to tie on the glove. This is run through the first row of crochet in the gauntlet.

10. Scarf for Neck (Crochet).

This scarf is unusually thick and warm; it should be worked with a large crochet hook and double Berlin wool in the twisted long stitches. The ground is worked in white wool; the edge in coloured. Make a chain of 12 stitches; on this work back a row of DC.—2nd row. 3 Ch., the wool twelve times round the needle, take up the next loop, draw the hook through this loop and all the loops on the needle at once, then work a chain stitch to finish the stitch. Work in this manner to the end of the row, then turn.—3rd row. 1 DC. on each twisted stitch of the last row, work these two rows 120 times, then fasten off. Now work the following border all round the scarf with red wool.—1st round. On the side of each row of long stitches work * 3 DC., then 1 Ch.; repeat all round the scarf from *.—2nd round. 1 DC. over the first Ch. in the last round, * 1 Ch., miss the next DC., 4 treble on the following DC., 1 Ch., miss the next stitch, one DC. on the following; repeat from *; fasten off at the end of the round, and add tassels of the wool in the centre of the ends.

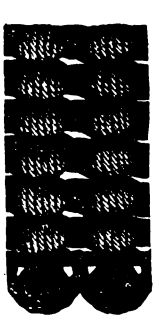

Fig. 10a.

11. Jacket for Child of Three or Four Years.

The jacket itself is to be made of cloth or cashmere, wadded and lined through with flannel. The border is crocheted in black, with shades of grey at intervals, and is sewn on to the jacket with a fine cord to finish the edge where joined to the jacket. Make the border 12 stitches wide, and work in rows of looped crochet. We should recommend the wool being passed twice round the three middle fingers of the left hand in each stitch every alternate row for 40 rows, then 20 rows, with three shades of grey. This gives a much softer look to the work than the Ch. stitch loop; it might be made still longer, and the wool cut and combed. When a sufficient length is worked join to the jacket, and work a row of crochet on the outside edge, as follows: Outside row. 1 DC., miss 1 stitch, 3 treble in the next stitch, miss 1 stitch, 1 DC. in the following.

12. Cloud (Knitting).

This is knitted in white and grey wool on two needles, in alternate stripes of each colour. It can be knitted in one long length or in a narrow width, working it the right length. Cast on with grey wool 240 stitches, and knit back. Then knit six rows alternately, 1 plain row and 1 purl; finish with a purled row. Then join the white wool and purl a row.—9th row. Purl 1, * the wool round the needle, purl 2 together; repeat from * to the end of the row.—10th row. Knit 1, * the thread forward, knit 2 together; repeat from * to the end of the row.—11th row. Purl.—12th row. Knit, join the grey wool, and work six rows alternately plain and purl, then repeat the white stripe. Continue this until the length is worked. Add tassels of the same wool, drawing the ends up when you sew them to the cloud.

13. Lady's Stockings, on Two Needles (Knitting).

You require two needles, No. 16, for merino wool; the same number of needles may be used for cotton. We cannot too strongly recommend Fawdel and Philips's cotton for stockings or socks; it can be had in all colours and mixtures, is very soft, and not much twisted, consequently works very smoothly and evenly; it washes well, and is very durable. Hutton's Alliance wool makes a better stocking than fingering; use No. 18 needles with it; if you are a tight knitter use No. 16 needles. Cast on 138 stitches, knit back.—2nd row. Knit 2, purl 1, always slipping the first stitch in each row; repeat from * to the end.—3rd row. Purl the stitches that were knitted in the last row, and knit the purled one; repeat this row until you have 8in. in length of the work. You now make the first decreasing; in this row knit or purl 2, to keep the rib, then slip 1, knit 1, draw the slipped stitch over the knitted, then continue the row and the rib until you are four stitches from the end of the row; then decrease by slipping a stitch and drawing it over the next knitted or purled stitch, then work the two last stitches on the rib. Now work 5 plain ribbed rows, then decrease as before, continue this until you have reduced 14 times (you have then 110 stitches on your needle); then rib without any decreasing 3 or 4 inches plain, according to the length the stocking is required. You now divide for the heel. The Heel.—Knit the first 37 stitches only in ribs, and knit 38 rows of ribbed knitting.—39th row. Slip the first stitch, knit 1, decrease, knit the rest plain; the ribbing can be kept if preferred.—40th row. Purl the row.—41st row. Slip 1, knit 1, decrease, knit the rest of the row.—42nd row. Purl to the 4 last stitches, decrease, and purl 2.—43rd row. Slip 1, knit 1, decrease once, knit the rest.—44th row. Purl.—45th row. Slip 1, knit 1, decrease twice, knit the rest.—46th row. Purl.—47th row. Slip 1, knit 1, decrease twice, knit plain.—48th row. Purl to the last 6 stitches, decrease twice, and finish the row; repeat these two rows twice more, and cast off. Now take the next 36 stitches in the middle of the stocking on to a third needle or thread; on the last 37 stitches repeat the directions for the heel. Begin with the stitch nearest the centre of the stocking, and knit to the end of the row; work the 38 rows, and then repeat the rest of the directions for the heel, only decrease at the end of the row instead of at the commencement. Fasten off at the end, and sew up the heel with the thread you leave to the knitting; the two rows of cast-off stitching are sewn together, and the whole of the back of the leg. You next commence the Foot: Take up the 36 stitches left in the centre of the work, and knit in ribbed knitting the length you require the foot, allowing two inches more in length for the rounding of the toe; 6 inches will make the foot about a suitable length. The first row of decreasing: slip 1, knit 1, knit 2 together, then knit plain to the last 4 stitches, decrease, knit 2. The next row purl, the following row knit, then repeat the decreasing row, only purl together instead of knitting together; repeat these three rows once more, then decrease every alternate row until you have only 20 stitches on the needle; fasten off. You next work the under part of the foot. The stitches for this are raised on the sides of the heel; instead of raising 36 stitches, 48 must be made; this is to allow for the instep. When the proper number are on the needle purl them back again.—The 2nd row knit.—3rd row. Purl.—4th row. 2 knit, take 2 together, knit 1, take 2 together, knit to the last 7 stitches on the needle, knit 2 together, knit 1, knit 2 together, knit 2.—5th row. Purl.—6th row. Knit.—7th row. Purl.—8th row. Knit.—9th row. Purl.—10th row. Repeat the 4th row.—11th row. Purl.—12th row. Knit.—13th row. Purl.—14th row. Knit 2, take 2 together, knit to the last 4 stitches on the needle, knit 2 together, knit 2.—15th row. Purl.—16th row. Knit.—17th row. Purl.—18th row. Like the 14th row. Now knit a row and purl a row until the foot is the same length as the top part; then decrease for the toe in exactly the same manner, taking care to count the rows so that the decreasings come in the corresponding row, as in the top of the foot. When all is knitted you sew up the sides of the foot and the toe, working in the ends carefully. These directions can be enlarged or decreased to a stocking of any size.

14. Petticoat for Girl of Twelve or Fourteen (Crochet).

You require half a pound of white Saxony wool and a long crochet needle, No. 6. Make a chain of 64 stitches for the middle of the back of the skirt, and work on it 15 plain rows of crochet tricotée. You now work the first gore. * Take up 24 stitches, work back; take up the 24 stitches of the last little row and 4 more, then work back. Work 8 more rows in this manner, taking up four more stitches each row until all are raised, then work 10 more plain rows; repeat from * twice more. Then work 10 more plain rows for the front breadth, making 20. After this you reverse the gores. * Take up all the stitches on the needle excepting the last 4, work back, then take up all but the last 8 loops, that is, the last 4 left first and 4 more, work back. Work in this manner until you have only 24 to raise; raise these 24 loops, and work them back, then raise all the loops, taking them up one set after the other, work back 9 more plain rows, repeat from the last * twice more, then work 15 more plain rows, making 20 for the last breadth. Join the two sides together, leaving sufficient for a plaquette hole round the top of the petticoat and the space left for the back; work two rows of double crochet. Fasten off. Round the bottom of the petticoat work a round of DC., then the following round: 1 DC. on the next stitch, * 2 Ch., miss 2 DC., 1 DC. on each of the three next DC.; repeat from *.—2nd round. * 1 DC. on the second of the 3 DC., 1 Ch., 5 treble over the 2 Ch., 1 Ch., repeat from *. You next work 3 rows of chain stitch on the first 2 rows of crochet in coloured wool, then miss 13 stitches, and work three more between these rows; work the design in chain stitch, as illustrated in the border at the edge of the petticoat.

15. Scarf (Crochet).

This is crocheted in thick double Berlin wool in stripes of two different colours. The shawl as engraved was made in the full length at once; but, as that forms an awkward piece of work in the hand, we have had it altered to the shorter method. The work will not therefore look exactly like the engraving, as the stripes will go across and not up the work. Make a chain of 20 stitches, * the wool on the needle, take up the next stitch, the wool on the needle, draw through these two stitches; repeat from * to the end of the row, where work a plain stitch; work back as in all crochet tricotée.—2nd row. The wool on the needle, take up the stitch between the 2 long stitches in the last row, and repeat as in the last row; work 3 rows of each colour the length required for the scarf, and then add a fringe.

16. Knitted Spun Silk Sock.

By Miss H. Ryder.

Materials required—4 needles No. 16, 1oz. of white spun silk. This sock measures 7½in. in length, 5½in. length of foot. The little sock given in the drawing has a hem at the top, but if preferred only ribbing need be done. For the ribbed top, cast on 75 stitches, and rib, that is, knit 2, purl 1, alternately, for a depth of 2½in. Sock with hem heading. Cast on 76 stitches, 21 on two needles, 34 on the third. Knit plain 10 rounds.—11th round. Throughout the round, make 1, and knit 2 together. You make 1 by throwing the silk over the needle.—Knit plain 11 rounds. Turn the hem down by the holes, and knit a plain round, taking up at same time with loop on your needle, the corresponding loop you cast on in beginning the sock, and draw the silk through both. This is perfectly easy to do. This completes your hem. Rib, that is knit 2, purl 1 alternately, until you measure from top of sock, inclusive of hem, 2½in. Before commencing the ribbon see you have right number of stitches on your needles, 34 on one, 21 on the other two. You must in your first row of ribbing knit 2 stitches together once, to bring your rib right on the needle with 34 stitches.

To Arrange for Pattern.—Rib up to 15th stitch on back needle, the one with 33 loops, and instead of purling the 15th stitch, knit it and the 16th together. Your next stitch is the centre stitch of the back needle; on it each round of the sock down the leg commences, and it is always purled. Many people find it useful to mark it by putting in a piece of coloured silk to prevent mistakes.—1st round. Purl centre stitch, knit 4, * knit 2 together, make 1, knit 1, make 1, knit 2 together, purl 1. Repeat from * until you are within 6 stitches of end of round, that is of the centre stitch, when make 1, knit 2 together, knit 4.—2nd round. Purl centre stitch, knit plain rest of round. *Every alternate round is same as this, therefore I shall not repeat the directions.* Repeat these 2 rounds 7 seven times more.—17th round. Purl centre stitch, knit 1, knit 2 together, knit 1, knit rest of round exactly like the first; commencing at *, but end with make 1, knit 2 together, knit 1, knit 2 together, knit 1.—19th round. Same as 1st, but after and before centre stitch you will only have 3 stitches to knit. Repeat 19th round twice more.—25th round. Purl centre stitch, knit 1, knit 2 together. Knit rest of round like 1st round, commencing at *. End with make 1, knit 2 together, knit 2 together, knit 1.—27th round. Same as 1st, only after and before centre stitch knit 2. Repeat 27th round twice more.—33rd round. Purl centre stitch knit 2 together. Knit rest of round like 1st round, commencing at *. End with make 1, knit 2 together, knit 2 together.—35th round. Same as 1st, only after and before centre stitch knit 1. Repeat 35th round until counting down from the beginning of pattern rounds, you have knitted 30 pattern rounds. In the next round, the 60th round or last plain round of leg, you prepare for heel thus:

To Prepare for Heel.—Purl centre stitch, knit to end of your back needle, and knit on it four more stitches, taking them off next needle. Knit plain that needle, and the next to within 3 of the end. Pass these 3 on the back needle without knitting. You will have 34 stitches on back needle; 17 on each of the others.

Heel.—The heel is made by working the back needle backwards and forwards, knitting and purling alternate rows until it is long enough, which it will be after knitting 28 rows.—29th row. Slip 1, knit 22, knit 2 together, * turn your needle, slip 1, purl 12, purl 2 together; again turn your needle, slip 1, knit 12, knit 2 together; repeat from * until you have only 14 stitches left on your needle. Knit the 14 stitches on your needle, and with the needle that has these on take up, and as you take up knit 16 stitches from side of heel, knit 2 stitches off front needle on the same. Front needle: * Knit 2 together, make 1, knit 1, make 1, knit 2 together, purl 1. Repeat from * 4 times more, taking loops off next needle on the front one. Two stitches are now left on the needle, 30 being on the front needle; these 2 must be knitted plain on a 3rd needle, with which take up, and as you take up knit 16 stitches from side of heel; knit on same needle 7 stitches off next needle. You will have 30 stitches on front needle, 25 stitches on each side needle.—1st round. Knit plain.—2nd round. 1st side needle: Knit plain to within 4 of end, when knit 2 together, knit 2. Front needle: * Knit 2 together, make 1, knit 1, make 1, knit 2 together, purl 1; repeat from * 4 times more. 2nd side needle: Knit 2, knit 2 together, knit plain.—3rd round. Knit plain.—4th round. Knit plain all but front needle. Front needle. Knit as in 2nd round. Repeat these 4 rounds 5 times more; you will have reduced your side needles to 19 stitches on each. Afterwards repeat the 3rd and 4th rounds until your sock foot measures from the heel 4½in.; knit 5 rounds all plain.

The Toe.—You will have 68 stitches on your needles. Put as many stitches on your front needle as you have on the other two together, taking two off each side needle. You will have 34 on front needle, 17 on the other two. Knit up to front needle.

To Reduce the Toe.—* Front needle. Knit 1, slip 1, knit 1, pull the slipped stitch over the knitted one, knit plain to within 3 of end, when knit 2 together, knit 1.—1st back needle: Knit 1, slip 1, knit 1, pull the slipped stitch over the knitted one, knit plain to end of needle.—2nd back needle: Knit plain to within 3 of end, when knit 2 together, knit 1, knit two rounds plain. Repeat from * twice more. Repeat from *, knitting only one round plain between the reducing rounds until you have 16 stitches on your front needle, 8 on each of the others. Knit one round plain, knitting on one needle the stitches off the two back needles. Cast off, knitting the stitches on front and back needles together.

17. Boot (Crochet).

The boot is commenced at the top of the leg, and is worked in Berlin wool, and a No. 8 crochet needle. Make a chain of 30 stitches, and on it work 4 rows of looped crochet, working in crochet tricotée. You now commence the increasings for the shape of the foot, work 8 loops of looped crochet, then work plain to the last 8 loops, work these in looped crochet, and work back. Now work 13 rows in this manner, but always increasing 1 stitch just after the first 8 loops and before the last 8 loops; then, in the next row, you work quite plain, work 8 DC. on the set of loops in commencing, and leave those at the end; then work 11 rows, increasing 1 stitch at each end of the row, and fasten off. Then take up the 8 loops at the beginning and end of the looped stitches, and make 1 Ch. between the two. On these 17 stitches work 11 rows of crochet tricotée quite plain. At the beginning and end of each row join to each side of the leg part. When this is finished you work all round the sole in DC. until it is the size required; decrease at each corner of the toe, and also in the middle of the heel until the right size, and join up with a row of crochet; then add strings to the boot round the leg.

18. Fanchon (Knitting).

This little headdress is very useful to throw over the head in an evening, and, being very light, the hair need not be disarranged by it. You work it in fine Tyrolese wool, white for the ground and pink for the border, and a pair of knitting needles No. 9. You commence with the point or end of the cap, and cast on 3 stitches; the whole is knitted in plain knitting. You make a stitch at the commencement of each row by bringing the wool forward before you commence, and knit the same stitch off in the following row. Continue in this manner until your work is about 11in. in width; then decrease one stitch at the end of each row until you have only 3 stitches on the needle, and cast off. The border is knitted with the pink wool, and is sewn all round the piece already knitted.—The Border. Cast on 15 stitches.—1st row. Knit plain.—2nd row. The wool forward to make one, knit 4; the wool twice round the needle, knit 2 together; the wool twice round the needle, knit 2 together; the wool twice round the needle, knit 2 together; knit 5.—3rd row. Knit 6, in the double stitch of last row, knit 1, purl 1, then knit 2, purl 1, knit 2, purl 1, knit 6.—4th row. The thread forward, knit the rest plain.—5th row. Knit plain.—6th row. Cast off 5 stitches, knit the rest plain.—7th row. Knit plain.—8th row. Commence again at the 2nd row. Then sew the border all round the headpiece and fold as illustrated in the engraving.

19. Chatelaine Bag (Spanish Point).

It may be said that the revival of the chatelaine bag as an appendage to the waistbelt is one of the luckiest hits in accessories to modern dress. Its origin is of a very early date, and in England the chatelaine bag seems to

have been introduced by the Anglo-Normans during the twelfth century. Berengaria, Richard I.'s queen, on her monument in the Abbey of Fontevraud, wears a chatelaine bag; and the illustrations of female costume in the Royal and Harleian manuscripts, as well as in the Liber Regalis, Westminster Abbey, show these appendages to the girdle in various shapes. Embroidery in silk, in silver, and gold thread was most frequently employed for ornamentation until point lace took its place in the seventeenth century. How well adapted is lacework for the purpose our illustration shows. For the designs of the mounting and monogram we are indebted to Mr. Thornhill, of 144, New Bond-street. To work out the pattern trace the design accurately upon patent cloth or leather, lined with very close canvas. A very thin soft cord is then fixed along the outline with a fine thread, the needle going over the cord, and not through it. After this the flat part of the pattern is worked in between the outlines, and then the outlines formed into a cordlike edge, with close buttonhole stitches. The leaves and flowers intended to be in relief are worked by laying a foundation of threads of a coarser kind along the edge, kept *in situ* by a few minute stitches. These foundation threads ought to be of different lengths, so as to produce a tapering rim after having been worked over in close buttonhole stitch, which has to be done next. The circles which form the centres of the flowers are made on a wooden pin of varying diameter. Selecting the diameter which corresponds with the size of the ring to be made, the thread is wound round the pin about twenty times, and then this foundation worked over very close with buttonhole stitches. The bars or "brides" which connect flowers and stalks of Spanish point ought to be put in with very fine buttonhole stitches over a foundation of three threads. Ultimately the outlines, where indicated on the design, have to be pearled, for which delicate task we can recommend the minute instructions given in Miss J. Herchel's book on the working of Greek lace. The finished work must be taken off from the pattern by passing a sharp knife between cloth and lining. It is then sown to the material of the chatelaine bag. Ladies who possess scraps of antique Spanish point can easily combine them into graceful designs by joining the same on a piece of patent cloth or leather. Such scraps afford likewise the most useful hints for imitating the old work.

20. Chatelaine Bag (Embroidery, Braiding, and Beading).

THE material of the bag is black velvet; it is lined with rose satin, and edged with fine black silk cord. The fringe and tassels are likewise black. The arabesques that decorate the bag and the flap are embroidered in satin; the outlines are chain stitch worked with embroidery silk, the beads between the rows of chain stitch may be put on either with silver or cut jet ones. The handle and clasp may be either bronze, gilt, or silver to match the beads.

21 and 23. Borders in Application and Fancy Stitches.

THESE two borders are appropriate for trimming work baskets, small brackets, tables, &c. The ground of No. 21 is red cloth, with a row of black velvet in the centre; the leaves are appliqués of white cloth, the fancy stitches being put in with embroidery silks of various colours, and with gold thread. The foundation of No. 23 is white cloth, with appliqués of black velvet, and chain stitches of gold thread. The soutache encircling the appliqués is a brilliant blue.

22. Medallion (Embroidery).

THE foundation of this medallion is white satin, on which is worked a design given the full size in the natural colours of the flowers. The embroidery is that known as "au passé." The edge of the coloured satin is embroidered in sprays of gold feathered stitch, when the medallion is used for the centre of a wall basket or bed pocket.

24. Border for Chair Cushion (Applique).

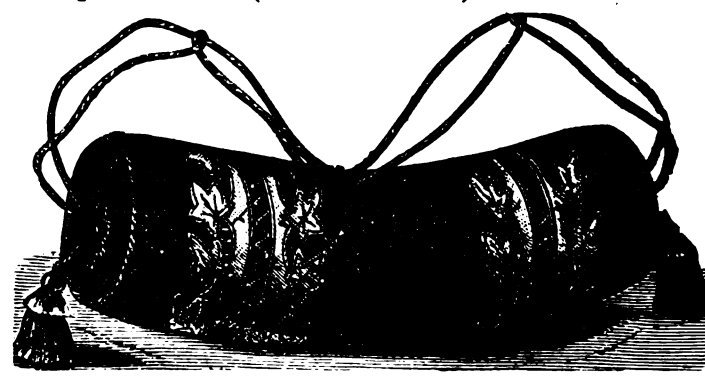
THIS border is intended for ornamenting the centre of chairs, or for using as stripes on sofas or ottomans. The selection of the colours must depend on the furniture of the room in which the border will be used. The model has white cloth for the foundation, and the leaves are put in with dark green cloth; the flowers are velvet of a darker shade of green, veined with gold. The Greek border is gold braid barred with black silk, and the rings are worked in satin stitch alternately with gold and black silk. The fancy stitches, such as the feathering in the outside border, are worked with shades of green silk.

25 and 27. Borders (Satin Stitch).

THESE borders are worked in satin stitch; they represent the same design in two different widths. They may be carried out in either white French embroidery cotton or white cambric linen or muslin, or they may be copied with coloured silks on either a silk or cloth foundation.

26 and 33. Borders (Roman Embroidery).

THE embroidery on these two borders is sometimes called Roman, and sometimes Strasbourg. These are designed for trimming spring dresses, and are worked on écru batiste, with filoselle to match. Both satin and buttonhole stitches are used in the work. They can also be arranged very effectively on the round pillows, covered with either satin or velvet, that are slung over armchairs. (See Illustration below.)



DETAIL OF NOS. 26 AND 33, PILLOW FOR ARMCHAIR.

28, 30, 32, and 34. Insertions (White Embroidery).

THESE insertions are intended for trimming chemises or any underlinen. They are worked on fine linen with soft white embroidery cotton, the flowers in satin stitch, and the stems in overcast. The flowers should be well padded, so that they may stand out in relief. No. 28 has open wheels and eyelets.

29. Medallion of Bamboo Hanging Rail.

THE rail, which is here illustrated, is to be fastened to a wall, where it serves either for hanging towels or as a temporary place for mantles, tunics, or any light garments. It is made of bamboo, which is coloured black, and picked out with gold. The embroidery (given full working size in No. 29) is worked on cloth with embroidery silks of appropriate colours. Our model is dark brown cloth, and the flowers are copied in shades of silk, commencing at the darkest shade of brown, and graduating to pale gold; but if the cloth is black, the roses should be pink, the cornflowers blue, &c. The embroidery is worked in satin, rope, and feather stitches, and in French knots.

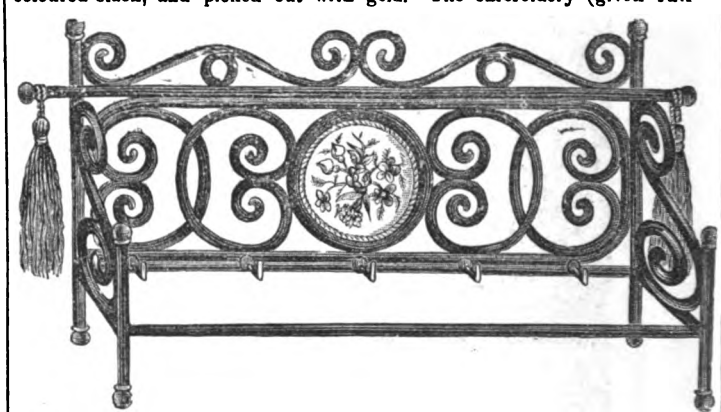


FIG. 29a.

31. Border for Chair, Cushion, &c.

THIS pattern is most effective when worked. The engraving represents it made of small pieces of cloth cut in the proper shape of the flowers; but it is more beautiful worked in silks the natural colours of the flowers, and will be found less tedious to produce. The ground work of the border is fine black cloth. The white border on each side is in grey cloth, edged with dark green silk, and embroidered with little flowers of red, and green leaves, in picot stitch. The garland in the centre is all appliqué in different coloured cloths, then sewn down with silks in corresponding colours. The roses are each made of three shades of red, yellow,

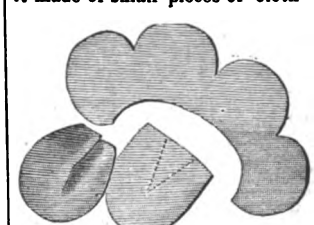

FIG. 31a.

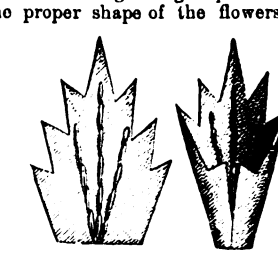

FIG. 31b.

Digitized by Google

or pink, so that if any length is worked the design is well varied. The corn flower can be worked in blue, reddish purple, and pinky grey cloth, as this flower is now cultivated in all these colours. Each petal should be worked down with black silk, and folded as illustrated in the engraving; the calyx of the plant is worked in two shades of brown silk; the leaves are cut out of green cloth of different shades, and sewn down with feather stitch in shades of green silk. The little sprays of myrtle are worked on the cloth in green silk in feather stitch, and white silk for the buds; the rose buds are also worked entirely in shades of silk.

Figs. 35 and 37. Throatlets with Steel and Porcelain Ornaments.

A PRETTY method of decorating the fashionable ribbon throatlets, which we should like to call steel and porcelain embroidery, has been introduced lately. The steel sprigs, scrolls, beads, and pendants are made in great variety at Birmingham, and can be sewn on in various combinations. Equally well look the tiny porcelain flowers. Beetle wings and mother-of-pearl ornaments might be likewise used for the same purpose.

36 and 41. Designs for Photograph Albums.

THESE designs for photograph frames should be etched in Indian ink or liquid sepia, and with small steel crowquill pens. The ink, prepared by Reeves and Sons, to be had at all stationers, is the best to work with, as it is a very good black. These designs look best on good Bristol board with a soft surface, not much glazed. They should be delicately done, and the shapes for photographs can be cut out or "punched out," and the photographs put in from the back, as in an ordinary album, if it is an objection taking it off its card. Any stationer will do this. It is a good plan, in order to get the exact shape of the frame, to put a thin piece of paper over, trace it, and then outline it on cardboard and cut it out. There is then the shape always to work from, and in arranging a page it makes it easier to put these card shapes down, to see how they look best, and then, when satisfactorily posed, just to put a finger on them, and trace round the outline with a pencil. When several of the smaller designs are to be arranged on a page, it is sometimes difficult to calculate how many can be put, and how much space spared for each; but by laying down the shape in cardboard you have the outline before you, and there only remains the trifling calculation of how much space the design round the frame will cover, which the eye can easily guess. The first thing on taking the sheet of cardboard is to measure and draw a pencil line right across, to arrive at the exact centre, then arrange the design or designs accordingly. If a margin is to be kept all round, draw a fine pencil line.

38 and 39. Girandole Frames for Glass or China.

THE engravings represent two designs for girandole, picture, or china frames. No. 38 can be made in the usual manner of wood and gilded, the inside rim of red velvet. We have seen frames of this kind made with plain velvet in the centre instead of glass, on which are arranged small shelves for holding china. No. 39 is made of velvet and leather or gutta percha flowers, entwined with a scroll of velvet or ribbon. You have first of all a frame made, which is covered with velvet; the foundation of the scroll is made of cardboard, edged with wire, and covered with the velvet; the flowers are nailed and glued on to the frame.

40. Throatlet (Blue Velvet and Pearls).

THE velvet encircling the throat is lined with white satin, and worked with tiny pearls. The ornament depending from the front consists of pearls of various sizes. Roman pearls are used for this ornament.

42. Throatlet (Black Velvet, Gilt, and Enamel).

THE black velvet encircling the throat is lined with white satin, and studded with gold and enamel stars. A single end of velvet in front, and terminates with a gold and enamel ornament.

43. Chatelaine with Three Chains.

THE fan is placed in the centre, the smelling bottle and the watch on either side. The chatelaine and the appendages are silver.

44. Chatelaine for Fan.

THIS chatelaine is intended for a fan. It is made of old silver, and has a small mirror above the fan; double chains at the sides.

45. Japanese Paperwork.

"JAPONICA," the authoress of the little pamphlet, "The Art of Japanese Paperwork, with illustrations," (11, St Bene't-place, Gracechurch-street,) has submitted to us some new knots and twists done in different colours, which certainly have a most pleasing effect, and are shown in our illustration. We confess a certain predilection for this knotted work in paper, even in preference to Macramé, as it seems specially adapted to many ornamental as well as useful articles for the drawing-room and the boudoir.

46. Huguenot Lace.

THIS work was introduced at the Cape of Good Hope by a German baroness, a personal friend of the Empress Maria Theresa, and for very many years the method of producing it was kept a secret. At the present time it is nearly extinct. It washes very well, as the sample we have seen has been thirty-three years in use, and the great recommendation is that it is very effective, and half a yard of the work might easily be made in one day. It is made of strips of fine mull muslin 6-10ths of an inch wide, folded into plaits 2-10ths of an inch; a stitch is taken alternately at the end of each plait, the thread drawn tight according to the different sizes required (whether for roses or buds), then with the same thread each leaf is taken up by a stitch outside and drawn together as close as possible, and fastened off very securely. Any lady finding a difficulty in working it would get full information, with a pattern of the work and the whole process in six stages of progress, by applying to "A. D." care of Mr Horwood, 40, Tavistock-crescent, London, W.; the proceeds of the work will be devoted to a Cape charity. The work may be seen, where orders can be given, at Mrs Dodsworth's, 7 Stall, London Crystal Palace Bazaar, Oxford-circus, where all materials may be procured. The lace is most effective, the flowers standing well in relief from the net foundation.

47. Border (Spanish or Sicilian Embroidery).

THIS style of embroidery is a mixture of white and écru linen, one being brought into relief, and the work proving very effective either for trimming summer dresses or mantles. In this design the white linen is appliqué on the écru, to which it is fastened by the button-hole stitches, encircling the flowers and leaves of the wreath. Two rows of white braid are added in a straight line at the top, and one row forms a festoon below the garland. The edge is scolloped and buttonholed.

48. Turkish Silk Guipure, called "Oyah."

IN the European part of Turkey and in Asia Minor, in Syria and Persia, plaited point d'Espagne in gold and silver, was greatly in fashion during the first half of the 18th century; and, according to the *Edinburgh Advertiser*, 1764, the Grand Turk issued sumptuary laws against the wearing of gold lace on clothes and elsewhere. Whether this lace was supplied by Greek and Italian traders, or was of native manufacture, is difficult to say. The fine guipure in white and coloured silk, called "oyah," still made in the harems of modern Turkey, indicates a high proficiency in lacework, and might be a remnant of the old native craft. Some specimens of this "oyah" lace, rich in design and of puzzling workmanship, were exhibited at the International Exhibition, 1874, and an example is represented in Fig. 47. It seems to be made with the needle or tambour hook, but all our attempts to find out how it is done have been hitherto in vain.

49 and 50. Venetian and Spanish Rose Point.

THE reproduction of Venetian and Spanish rose point has hitherto been attempted by but a few lace workers, for the reason that the work requires more skill and patience than are generally bestowed on modern lace work. This is greatly to be regretted, because both laces may justly be called the triumph of the needle. The two specimens represented in our illustrations were shown at the Vienna Exhibition and greatly admired. If German ladies are successful in such work, we cannot see any reason why English lace workers should not strive to attain the same proficiency in artistic needlework.

51. Border (Honiton Lace Braid).

THIS is a novelty, as one of the braids with which it is worked is woven so that it forms the stems of the leaves. This gives a pleasing variety, as, instead of every leaf being the same, the design can be changed in different ways by interspersing trefoils, &c. The braid is a decided improvement on the Honiton lace braid as first introduced. We are indebted for the design to Mr. Barnard, 119, Edgware-road, who first called our attention to this novelty.

52. Border and Insertion (Honiton Lace Braid).

THE upper part of this design is worked out with the new Honiton lace braid, which consists of trefoils connected by stems, and it can be arranged by turning it into different devices. The lower part is copied with braid composed of a succession of leaves linked together with stems. These new braids, together with the designs, can be procured from Mr. Barnard, 119, Edgware-road, W.

53, 54, 56, and 59. Borders for Louis XIII. (Guipure d'Art).

THESE designs are copied from a model of the time of Louis XIII., and are arranged by the Maison du Spinx, Paris. They are intended for a quilt, made up of squares (large and small), insertions and borderings, together with similar pieces in fine écru linen. The netting may be executed over the size of mesh deemed best by the worker; the squares of the model are as large again as those represented in the engravings. The darning is worked with the thread marked H. B., and the buttonholes and interlaced lines are put in with satin thread, which imparts that glazed effect to guipure d'art peculiar to the old style. The branches and veinings of the leaves are darned with

On needle you have 27 stitches, knit 3, seam 1, knit 3, seam 1, knit 3, seam 1, knit 2 together, seam 1. Knit 3, seam 1 to end of round.

In next round * knit 3, seam 1, knit 3, seam 1, knit 3, seam 1, knit 1, seam 1. Knit 3, seam 1, to end of round. Repeat from * four times.

On needle you have 26 stitches, knit 3 seam 1, knit 3, seam 1, knit 3, seam 1, seam 2 together. Knit 3 seam 1, to end of round.

In next round * knit 3, seam 1, knit 3, seam 1, knit 3, seam 2. Knit 3, seam 1, to end of round. Repeat from * four times.

On needle you have 25 stitches, knit 3, seam 1, knit 3, seam 1, knit 3, seam 2 together. Knit 3, seam 1, to end of round.

In next round * knit 3, seam 1 to end of round. Repeat from * four times.

On needle you have 24 stitches. knit 3, seam 1, knit 3, seam 1, knit 4, knit 2 together, knit 2, seam 1. Knit 3, seam 1 to end of round.

In next round * knit 3, seam 1, knit 3, seam 1, knit 6, seam 1. Knit 3, seam 1, to end of round; repeat from * four times.

On needle you have 23 stitches, knit 3, seam 1, knit 3, seam 1, knit 2, knit 2 together, knit 2, seam 1. Knit 3, seam 1, to end of round.

In next round * knit 3, seam 1, knit 3, seam 1, knit 5, seam 1. Knit 3, seam 1, to end of round. Repeat from * four times.

On needle you have 22 stitches, knit 3, seam 1, knit 3, seam 1, knit 2. knit 2 together, knit 1, seam 1. Knit 3, seam 1, to end of round.

In next round * knit 3, seam 1, knit 3, seam 1, knit 4, seam 1. Knit 3, seam 1 to end of round. Repeat from * four times,

On needle you have 21 stitches, knit 3, seam 1, knit 3, seam 1, knit 1, knit 2 together, knit 1, seam 1. Knit 3, seam 1 to end of round.

In next round * knit 3, seam 1, to end of round. Repeat from * four times.

On needle you have 20 stitches, knit 3, seam 1, knit 3, seam 1, knit 1, knit 2 together, seam 1. Knit 3, seam 1, to end of round.

In next round * knit 3, seam 1, knit 3, seam 1, knit 2, seam 1. Knit 3, seam 1 to end of round. Repeat from * four times.

On needle you have 19 stitches, knit 3, seam 1, knit 3, seam 1, knit 2 together, seam 1. Knit 3, seam 1, to end of round.

In next round * knit 3, seam 1, knit 3, seam 1, knit 1, seam 1. Knit 3, seam 1, to end of round. Repeat from * four times.

On needle you have 18 stitches, knit 3, seam 1, knit 3, seam 1, seam 2 together. Knit 3, seam 1, to end of round.

In next round * knit 3, seam 1, knit 3, seam 2. Knit 3, seam 1, to end of round. Repeat from * four times.

On needle you have 17 stitches, knit 3, seam 1, knit 3, seam 2 together. Knit 3, seam 1 to end of round; this completes the reducing the leg, and you have 72 stitches in all on your needles, 16 on heel needle, and 28 on each side needle. You now rib every round until you have knitted about two inches and a half since your last narrowing.

When you come to the last round of ribbing at the last needle, pass ten stitches on to the heel or back needle, also take ten stitches from the other side needle to the back needle; this prepares for heel, and you will have 36 stitches on heel needle, and 18 on each side needle. (The two front needles are not used again until the heel is completed.)

The heel is made by ribbing alternate *rows* until it is long enough, which it will be after 30 rows. Commence on front row by slip 1, seam 1. Knit 3, seam 1, to end of *row*. *Back row:* slip 1, seam 1. Knit 1, seam 3, to end of row. After the 30th row, which will bring you back to commencement of heel needle, then round your heel by knitting 23 stitches, knit 2 together, * turn your needle, seam 11, seam 2 together; turn your needle, knit 11, knit 2 together, repeat from * until there are only twelve stitches on the needle; this finishes heel. With the needle on which you have the 12 stitches take up, and, as you take up, knit 17 stitches from side of your heel. Knit 2 stitches off front needle on the same.

Rib all the stitches from the 2 front needles, excepting the two last, on another needle (the front needle is ribbed throughout until you commence narrowing for toe). These two stitches must be knitted on a third needle with which take up, and as you take up knit 17 stitches from side of the heel, also 6 stitches from other side needle to this. You now have 25 stitches on each side needle, and 32 on front needle.

In next needle, which is 1st side needle, knit plain. Rib front needle. Knit 2nd side needle plain.

1st side needle.—* Knit plain until within four stitches of the end, knit 2 together, knit 2.

Front needle.—Rib.

2nd side needle.—Knit 2, slip 1, knit 1, pull the slipped stitch over the knitted one, knit plain to end of needle, knit two rounds of the stocking plain (always ribbing front needle); repeat from * until the foot is sufficiently reduced, which will be when you have 68 stitches in all on your needles.

Knit the foot about 8½ inches long, including heel, but this entirely depends on the size required.

To reduce for Toe.—The front needle is now plain knitting, not ribbed. Put as many stitches on your front needle as you have on the other two together. You have now 32 stitches on front and 18 on each side needle, so you must take one stitch off each side needle and put it on the front, when you will have 34 on front needle, and 17 on each side needle.

Commence the toe at front needle by knit 1, slip 1, knit 1, pull the slipped stitch over the knitted one, knit plain to within 3 of end, when knit 2 together, knit 1.

1st back needle.—Knit 1, slip 1, knit 1, pull the slipped stitch over the knitted one; knit plain to end of needle.

2nd back needle.—Knit plain to within 3 of the end, knit 2 together, knit 1. This reducing is repeated every third round, the intervening rounds being knitted plain until you have about 26 stitches in all left on your needles; knit the front and back stitches together, and as you knit them cast off.

SIX OLD ENGLISH POTTERIES

(WITH MARKS).

MANY of the readers of the Almanac may have some odd set or some odd pieces of old English porcelain stowed away in their china closet, or in an out-of-the-way cupboard, the origin of which they would like to know. For these as well as for beginners in collecting the following short history of six of the principal porcelain manufactories in England is written, and their marks described.

The first thing they have to do, if they wish to identify a piece of porcelain is to ascertain whether it is made of hard paste porcelain, or of soft paste porcelain.

Hard paste porcelain can only with difficulty be scratched with a file or a steel point; has a semi-vitreous fracture, and will stand without injury sudden alternations of high and low temperature. It feels cold to the touch, and is bluish milk white. The rims or projecting rings upon which specimens of hard paste porcelain rest are generally left without glaze, which affords a ready method to distinguish them from specimens of soft paste porcelain. Hard paste porcelain was made at PLYMOUTH, BRISTOL, and LOWESTOFT.

Soft paste porcelain is more easily attacked by a file or a steel point, less dense, of a fine porous fracture, feels warm and soapy to the touch, and has a cream white enamel-like appearance. The supporting rings are generally covered with glaze. The paste after firing is nearly as translucent and sonorous as hard porcelain. Soft paste porcelain was made at BOW, CHELSEA, DERBY, WORCESTER, the so-called ROCKINGHAM works, SWANSEA, NANTGARW, PINXTON, and with the addition of Felspar at CAUGHLEY, COLEBROOK DALE, and in STAFFORDSHIRE.

After the degree of hardness has been ascertained, the mark, which will be generally found on the bottom, is to be compared with our illustrations, but care must be taken not to be deceived by forged marks. Such marks afterwards put on the glaze may be recognised by being easily scraped off with a knife, whilst genuine marks adhere much more firmly. Marks under the glaze cannot be imitated, unless in a piece wholly forged. Unmarked specimens require the knowledge of an experienced collector to be identified. He will take into account quality of paste, glaze, and style of decoration to form his judgment.

HARD PASTE PORCELAIN.

PLYMOUTH PORCELAIN.

(1768 to 1773.)

THE Plymouth porcelain works were founded by William Cookworthy who discovered the constituents of hard paste porcelain, kaolin and porcelain granite in Cornwall about 1758, and took out a patent for manufacturing the same in 1768.

Genuine specimens of Cookworthy's porcelain have become exceedingly scarce, and large prices are paid for well-authenticated ones. The great difficulty for the collector is to distinguish the real Plymouth ware from the host of similar productions in oriental china. Cookworthy's mark, the alchemic symbol for tin, is found but on a few pieces. It resembles the cipher 4 (Fig. 1) variously drawn. In rare cases this mark is impressed in

FIG. 1.

the clay, more frequently traced in blue *under* the glaze, or painted in red or gold *on* the glaze. The marks *on* the glaze ought to be examined very carefully, as they have been frequently forged of late, and put on spurious pieces. If a mark is wanting, the experienced collector may trust to his knowledge of the peculiarities of the Plymouth paste, glaze, and ornamentation; the tyro had much better leave alone such doubtful pieces.

The only practical hints we can give for identifying Plymouth porcelain are the following: Various degrees of hardness and transparency, according to the different proportions in which kaolin and "po-tuntze" were mixed, are observable in Plymouth porcelain. The harder pieces frequently show fire flaws. The glaze on uncoloured specimens is of a rich glossy but somecloudy white, and, thickly laid on, obscures the sharp outlines of the biscuit models. Characteristic for pieces decorated blue is the darkish hue of the colour

BRISTOL PORCELAIN.

(1768 to 1781.)

THE Bristol Porcelain Works are connected with the name of Richard Champion, whose labours extended over a period of thirteen years, from 1768 to 1781, when he sold his patent to a company of Staffordshire potters, who continued manufacturing porcelain first at Tunstall, and afterwards at New Hall, Shalton.

There are various means of identifying Bristol porcelain. First, the marks, which may be divided in three categories—the simple cross (Figs. 2, 3); the capital letter B (Figs. 4, 5)—both pencilled in blue or slate

are like arrow points (Figs. 19 and 20), sometimes like annulets (Fig. 21).

FIG. 19.

FIG. 20.

FIG. 21.

The cable ring on the top is hardly ever omitted. On pieces of the best quality the anchor mark is in gold, on specimens of the second quality painted in red, brown, or purple on the glaze. In rare cases two anchors with cable rings are employed. This anchor mark must not always be looked for at the bottom of the piece, but is frequently found on the pedestal, or on some other part of the decoration. By its minute size, it often escapes observation, or, if in gold, gets rubbed off.

Further means for identifying Chelsea porcelain is afforded by the glaze, which is of a softer milky white, and less thickly laid on than Bow china.

On cups and saucers, plates and dishes, the glaze is sometimes accumulated around the basil rim in tears, but in most specimens the inequalities of the glaze are removed by the rim having been ground smooth. Three spots free from glaze, caused by the three points on which the piece rested during the firing, are frequently found on dishes and other flat pieces manufactured at Chelsea.

WORCESTER PORCELAIN.

In the year 1751 a company was formed, chiefly through the exertions of a Dr. J. Wall, a physician, and Dr. Davis, an apothecary, to carry on the works at Warmstry House, an old mansion belonging to the Windsor family and the Earls of Plymouth. Fifteen proprietors, amongst them John Wall, M.D., Richard Holdship, William Davis, and the Rev. Thomas Vernon, held shares in the concern until 1772, when the lease of Warmstry House expired, and the premises passed into the hands of a new company, with John Wall the elder, M.D., William Davis, the elder and the younger, Rev. Thomas Vernon, Robert Hancock, engraver, and Richard Cook, of London, as partners. Robert Hancock left the works in 1774. In 1783 Joseph and John Flight purchased the property for 3000*l.*, and ten years later took Martin Barr into partnership. The style of the firm was then changed into "Flight and Barr." In 1807 Mr. Barr, jun., was admitted as partner, and in 1813 George Barr, and the name of the firm again altered into "Barr, Flight and Barr." When the Worcester works were sold to the elder Flight in 1783, Robert and Humphrey Chamberlain, two of the *employés*, commenced business on their own account in High-street, and later at Diglis, and proved formidable rivals to the old works, until in 1842 the two establishments were amalgamated under the style of "Chamberlain and Co." In 1852 Messrs. Kerr and Binns became proprietors; and since 1863 the business has been in the hands of the Joint-stock Worcester Porcelain Company, under the management of Messrs. Phillips and Binns.

One of the marks used at the Worcester works under Dr. Wall's management was a W. (Figs. 22 and 23). A crescent outlined in blue or gold (Fig. 24) is frequently found down to 1793, but not after. A similar crescent, but filled in with blue (Fig. 25), occurs on printed china after 1755. In rare cases the crescent is completed by a face (Fig. 26). The fretted square, in blue or in red (Figs. 27, 28, and 29), is likewise

FIG. 22.

FIG. 23.

FIG. 24.

FIG. 25.

FIG. 26.

FIG. 27.

FIG. 28.

FIG. 29.

considered as an early mark, sometimes a crescent is added to it. This Chinese mark, however, is not confined to Chinese subjects, but generally appears on Worcester China of good finish. The same with regard to workmanship cannot be said of the various other marks of Oriental character used at Worcester. Specimens with the marks (Figs. 22 to 29) are eagerly sought for by collectors. Transfer ware is frequently, but not always, signed in the subject with the initials of Richard Holdship and his rebus, an anchor (hold ship) (Figs. 30 and 31). The signature, "R. Hancock, fecit," occurs on subjects of garden scenes and figures (Fig. 32).

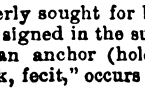

FIG. 30.

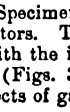

FIG. 31.

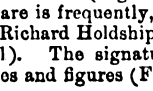

FIG. 32.

Collectors, however, ought to be very careful in examining Worcester transfer ware offered for sale, as, quite recently, many specimens have been most grossly forged. It is astonishing how even experienced dealers could have been deceived by these inferior productions, which are easily distinguished by the indistinctness of the outlines, and a peculiar bluish colour of the transfer ink.

The marks on Worcester porcelain, which cannot be with certainty ascribed to a distinct period, are either of a Chinese character like Figs. 33 to 37, or borrowed from continental factories, as Dresden (Figs. 39 and 40; or Sèvres (Fig. 41); or Chantilly (Fig. 42).

FIG. 33.

FIG. 36.

FIG. 37.

FIG. 38.

FIG. 39.

FIG. 40.

FIG. 41.

FIG. 42.

During the period when Messrs. Flight were sole proprietors (1783-1793), Worcester porcelain was marked either with the name "FLIGHT" alone or in combination with a crescent. A crown was added after the King's visit in 1788. Between 1793 and 1807 the mark was a capital B (Fig. 43) scratched in the paste, or "FLIGHT AND BARR," under a crown. From 1801 to 1813 the ware was marked with the initials of the firm (Fig. 44), and after 1813, with the same letters, but differently arranged (Fig. 45).

FIG. 43.

FIG. 44.

FIG. 45.

Messrs. Kerr and Binns, the successors of Chamberlain and Co., have used since 1852 four W's in a circle, surrounding the figures 51, the date of the Great Exhibition (Fig. 46), as mark for their porcelain, and the mark (Fig. 47) for fancy goods since 1857.

FIG. 46.

FIG. 47.

Chamberlain's porcelain is generally marked with his name, and is therefore easily identified. The earliest mark between 1788 and 1804 seems to have been the name "CHAMBERLAIN'S" pencilled on the glaze in a running hand. Another mark of this period frequently met with is "CHAMBERLAIN'S WORCESTER" stamped or painted in red, or "WORCESTER" alone. In 1814 the ware was marked "CHAMBERLAIN'S WORCESTER, 63, PICCADILLY, LONDON;" between 1814 and 1820, "CHAMBERLAIN'S REGENT (OR ROYAL) CHINA, WORCESTER, AND 155, NEW BOND-STREET, LONDON;" or, "CHAMBERLAIN'S WORCESTER, AND 155, NEW BOND-STREET, LONDON, ROYAL PORCELAIN MANUFACTURERS;" from 1840 to 1845, "CHAMBERLAIN AND CO., WORCESTER, AND 155, NEW BOND-STREET, LONDON, AND NO. 1, COVENTRY-STREET, LONDON;" in 1847, "CHAMBERLAIN AND CO., WORCESTER;" from 1847 to 1850, "CHAMBERLAIN'S" in Roman letters, impressed or printed.

Since 1863, the Worcester porcelain works are carried on by a joint-stock company, under the able management of Mr. R. W. Binns, F.S.A. He has revived the fame of the Worcester factory to the old standard with regard to general workmanship, admirable modelling, and tasteful decoration. Pierced work, a feature of old Worcester, has been brought to a remarkable degree of perfection, and a new body, in imitation of ivory, has been introduced, in which specimens of high artistic merit, after Japanese models, have been produced.

As the space allotted to us in this year's Almanac has now been exhausted, we must postpone the description of the marks used by English porcelain factories of minor note until next year.

under the glaze. Combinations of the cross, or of the B, with the swords, are likewise found. The letter T embossed or impressed, with the addition

FIG. 6.

FIG. 7.

FIG. 8.

of cross painted in blue, and the Dresden swords in a trianglo (Figs. 7, 8), are exceptional marks, the first occurring on statuettes representing the "Four Quarters of the Globe." Most of the Bristol marks are accompanied by numbers, varying from 1 to 24, and indicating the decorator of the specimen. The Plymouth mark in connection with the Bristol cross (Fig. 9), and the Plymouth mark alone, if found on specimens of Champion's paste, may perhaps be appropriated to the period of Cookworthy and Co., between 1770 and 1773. Combinations of the cross and the capital letter B, with the swords are found on some specimens (Figs. 10, 11). So far a marked specimen of Bristol porcelain seems easily

FIG. 9.

FIG. 10.

FIG. 11.

distinguishable; but the high prices offered for genuine examples of Champion's manufacture have set forgers to work, and the coveted cross-mark has been put on a great many pieces of Oriental china bearing some resemblance to Bristol porcelain. Fortunately, Champion's ware is so essentially different in paste and glaze from any other porcelain, that even a less experienced collector may escape being cheated.

The Bristol glaze shows a warm creamy-white colour, different from the hard and glossy surface of Oriental and Dresden porcelain. By being fired and glazed in one process, the glaze adheres more firmly, and not in a separate layer to the underlying body, exhibiting a peculiar texture, as if being pricked with a pin all over. The surface, when held in a reflected light, shows a series of spiral ridges and indentations, caused by the unequal shrinking of the clay moistened in different degrees by the workman while turning the piece on the potter's wheel. In many cases rough sandy patches, caused by minute particles ejected from the seggers during the firing, are to be observed on the glaze. Keeping these three characteristic defects of Bristol porcelain well in mind, and adding to them the confirmatory evidence of the enamelled green and the rich hammered appearance of the gilding, a collector may decide without much risk on the purchase of an unmarked specimen of Bristol porcelain.

LOWESTOFT PORCELAIN.

(1756 to 1804.)

THE Lowestoft Porcelain Works were started by Hewlin Luson, of Gunton Hall, and continued by Messrs. Walker, Browne, Eldred, and Richman.

During the first twenty years a soft paste china of good quality was made there, painted in colours, with Chinese patterns, views of Lowestoft, marine views, or floral decorations. A favourite border was the trefoil, in red and gold, and the marone or lake scale pattern is often met with. Earthenware and probably Delft were likewise produced. Many specimens of early Lowestoft ware, bearing dates from 1752 to 1771, with initials and inscriptions, of which Mr. Chaffers, in his "Marks and Monograms," gives a list, are still extant.

Hard paste porcelain was introduced in Lowestoft about the year 1775, and the belief that merely Oriental china had been decorated there must be considered as entirely erroneous, after Mr. Chaffers' conclusive proof to the contrary. The close resemblance of Lowestoft china to Oriental porcelain makes its identification difficult. No mark was ever used, and rarely even a painter's mark is visible; but still there are sufficient peculiarities in shape, style of decoration, and especially colouring, to help the collector. The floral patterns, amongst which the rose predominates, unmistakeable, and the borders are equally characteristic. The Lowestoft pink rose looks as having been plucked from the stalk and dropped upon the surface, leaves and other flowers appear similarly disjointed.

SOFT PASTE PORCELAIN.

BOW PORCELAIN.

(1744 to 1776.)

THE Bow works were founded by Edward Heylin, a native of Bow, and Thomas Frye, of West Ham, a painter. They became the property of Messrs. Weatherby and Crowther in 1750, and were sold in 1776 to Mr. Duesbury, who removed all the moulds and implements to Derby. Concerning the marks which were used at the Bow works, there is still war raging amongst collectors.

Four different classes of marks have been appropriated for Bow. The *bow* (Fig. 12, *a*, *b*, *c*), the *arrow* (Fig. 13, *a*, *b*, *c*, *d*, *e*), the *anchor* (Fig. 14, *a*, *b*), and the *dagger* (Fig. 15, *a*, *b*, *c*). They appear variously drawn, either single or in groups, scratched in the clay or pencilled on the glaze, in red, blue, brown, and black. Sometimes a cross and crescent are added (Fig. 16, *a*, *b*).

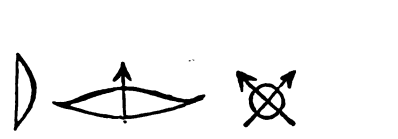

FIG. 12.

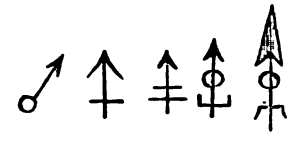

FIG. 13.

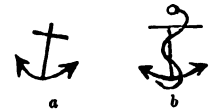

FIG. 14.

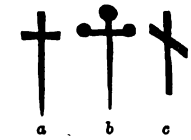

FIG. 15.

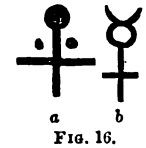

FIG. 16.

The *bow* or *arrow* marks are generally found on small pieces, as salt-cellars, butterboats, &c.; an *anchor*, combined with a *dagger*, and sometimes with a *crescent*, on figures. The marks illustrated in Fig. 16 are of rare occurrence.

The anchor mark is by some connoisseurs claimed exclusively for Chelsea porcelain; but, however that may be, it is sufficient for the collector of old English china to know that any piece on which one or a group of the above marks occurs is valuable.

As comparatively few specimens of Bow manufacture are marked, we have further to consider the means for identification offered by the peculiarities of the paste and glaze.

The Bow paste is of a milky white, and of different degrees of hardness. Some pieces are with difficulty scratched by a steel point, in all the fracture is close and compact, which makes them comparatively heavy for their size.

The glaze shows great brilliancy, but in most cases is thickly applied, so as to partly fill up the spaces between the raised parts of the decoration, and to impair the sharpness of outline they have in the biscuit state.

CHELSEA PORCELAIN.

(1745.)

RELIABLE information about the Chelsea porcelain works commences between 1745 and 1747. The first proprietors seem to have been the Duke of Cumberland and Sir Everard Fawkener, with Nicholas Sprimont, a Frenchman, as manager. About 1755 Sprimont became sole proprietor, and in 1769 the works passed into the hands of William Duesbury, of Derby, who carried on the business at Chelsea and Derby simultaneously until 1784, when the kilns at Chelsea were pulled down, and the whole remaining plant, with the principal workmen and artists, were transferred to Derby.

About the earliest marks on Chelsea porcelain the information is uncertain. The triangle incised in the paste (Fig. 17) belongs to them, as a milk jug, in the possession of W. Russell, Esq., proves, which bears this mark and the inscription "Chelsea, 1745." As another earlier mark, must be considered the embossed oval with raised anchor upon it (Fig. 18).

FIG. 17.

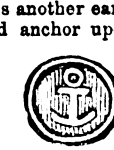

FIG. 18.

Later the plain anchor was adopted. Its form varies, especially with regard to the angle and to the points of the transverse bars; sometimes the latter

Digitized by Google

are like arrow points (Figs. 19 and 20), sometimes like annulets (Fig. 21).

FIG. 19.

FIG. 20.

FIG. 21.

The cable ring on the top is hardly ever omitted. On pieces of the best quality the anchor mark is in gold, on specimens of the second quality painted in red, brown, or purple on the glaze. In rare cases two anchors with cable rings are employed. This anchor mark must not always be looked for at the bottom of the piece, but is frequently found on the pedestal, or on some other part of the decoration. By its minute size, it often escapes observation, or, if in gold, gets rubbed off.

Further means for identifying Chelsea porcelain is afforded by the glaze, which is of a softer milky white, and less thickly laid on than Bow china.

On cups and saucers, plates and dishes, the glaze is sometimes accumulated around the basil rim in tears, but in most specimens the inequalities of the glaze are removed by the rim having been ground smooth. Three spots free from glaze, caused by the three points on which the piece rested during the firing, are frequently found on dishes and other flat pieces manufactured at Chelsea.

WORCESTER PORCELAIN.

In the year 1751 a company was formed, chiefly through the exertions of a Dr. J. Wall, a physician, and Dr. Davis, an apothecary, to carry on the works at Warmstry House, an old mansion belonging to the Windsor family and the Earls of Plymouth. Fifteen proprietors, amongst them John Wall, M.D., Richard Holdship, William Davis, and the Rev. Thomas Vernon, held shares in the concern until 1772, when the lease of Warmstry House expired, and the premises passed into the hands of a new company, with John Wall the elder, M.D., William Davis, the elder and the younger, Rev. Thomas Vernon, Robert Hancock, engraver, and Richard Cook, of London, as partners. Robert Hancock left the works in 1774. In 1783 Joseph and John Flight purchased the property for 3000*l.*, and ten years later took Martin Barr into partnership. The style of the firm was then changed into "Flight and Barr." In 1807 Mr. Barr, jun., was admitted as partner, and in 1813 George Barr, and the name of the firm again altered into "Barr, Flight and Barr." When the Worcester works were sold to the elder Flight in 1783, Robert and Humphrey Chamberlain, two of the *employés*, commenced business on their own account in High-street, and later at Diglis, and proved formidable rivals to the old works, until in 1842 the two establishments were amalgamated under the style of "Chamberlain and Co." In 1852 Messrs. Kerr and Binns became proprietors; and since 1863 the business has been in the hands of the Joint-stock Worcester Porcelain Company, under the management of Messrs. Phillips and Binns.

One of the marks used at the Worcester works under Dr. Wall's management was a W. (Figs. 22 and 23). A crescent outlined in blue or gold (Fig. 24) is frequently found down to 1793, but not after. A similar crescent, but filled in with blue (Fig. 25), occurs on printed china after 1755. In rare cases the crescent is completed by a face (Fig. 26). The fretted square, in blue or in red (Figs. 27, 28, and 29), is likewise

Dress and Fashion.

MOVEMENTS OF FASHION, 1875-76.

THE fickle goddess has been busy during the past year, and the preparations for the year of years, 1876, show no lack of activity. Dresses that are tied so closely to the limbs, that walking is a matter of difficulty, and sitting down straight an impossibility; skirts so long that raising them when walking is a necessity—such are the striking features of present fashions. Bodices no longer stop short at the waist, but they descend low on the hips, imprisoning them closely; the backs are as elaborately trimmed as the fronts, sleeves are very narrow, and tunics are rarely draped with their two sides alike. Extreme narrowness of skirt has obliged the removal of pockets; instead of placing them inside, they are now all worn outside, are usually made of the same material as the dress, and the upper edge is gathered with an elastic string, which stretches as the hand is introduced into them. In all new materials a great tendency is shown to discard plain colours; plaids and checks were adopted during the London season of '75, and the advent of '76 sees everyone robed and draped in brocades and figured materials of every descriptions.

For morning wear the soft woollen costumes are made up of such fabrics as honeycomb cloth, matelassé, basket poplin, damask check, knicker-bocker serge, armure, natté, figured bége, &c., in browns, drabs, navy blue, and prune. These materials are never used alone, as a costume to be fashionable must not be made of one pattern, tone, and material: a mixture of two shades and two materials is well-nigh essential. The richest fabric for winter morning costumes is called broderie laine; it has a fine cashmere ground with a rich glossy silk brocade of the same colour, and of floriated design all over it. This is made up with plain faille that matches the cashmere.

The richest among the new silks are all brocades. There is "Venetian soutache," in which the outline of the design appears to be traced out with fine cord or braid; there is "Japanese satin," with satin groundwork, brocaded all over with small Oriental patterns; these, with brocatelle and stamped or brocaded velvet, form but a small proportion of the rich fabrics prepared for winter wear. There is a change in the colours: the new ones are dark and positive; and the names of the principal are nègre, almost black; cassis, the shade of black currants, tinted with blue; bronze, olive green; Bordeaux or dark red; prune or plum colour; indigo blue; fumée, smoke brown; and bège, dark grey. For evening wear straw, ivory or cream, and nacarat (a pale orange red) are most in vogue. The make of silk dresses is very elaborate. Skirts have lost their uniform appearance; they are trimmed so variously, and with such profusion, that a detailed description is impossible. They are all made of two materials, faille and brocade, or silk and velvet, or fine wool fabrics, with elaborate satin brocades combined; faille to match. Skirts are very long, and are tied back so closely that a petticoat, which has its front breadth starched, would be quite in the way. There is generally a treble box-plait at the back, variously ornamented; and the tunics and tabliers are extremely long in front. The sides of the skirt are always elaborately draped or ornamented in some way. Narrow plaits are still much worn, the new feature in them being that they are joined in the centre horizontally when used for trimming composite dresses, the upper half being figured, the lower plain. Cuirass and Joan of Arc bodices are worn, likewise violin backs, and sleeves different from the bodice; and many backs have no sidepieces, but are cut with four seams from the shoulder. The principal trimmings are rich fringes, cord passementerie, braids of all description, including gold, silver, and steel, netted fringes with Spanish balls and double-faced ribbons.

Mantles have altered considerably during the past year: they have become larger and more voluminous in every way. Cloth is a very fashionable material for them, plain as well as matelassé and diagonal. Long circular silk mantles, lined with squirrel and bordered with dark fur, are much in favour. The paletot and dolman shapes are the favourite, likewise a close-fitting mantelet; but the new feature about the sleeves is that they commence at the elbow and not from the shoulder. Skunk, lustred beaver, lustred raccoon, and silver fox are among the favourite furs. Braiding is to be seen on many of the handsomest cloth mantles, several close-set rows of narrow Russian braid sewn on to give the effect of one very broad braid.

The new features about bonnets are rather in their accessories than in their forms. There are two distinct shapes worn; one having a coronet turned up brim, with moderate crown, and placed at the back of the head, while on the other the brim has the effect of being crushed down over the forehead *à la paysanne*. The former is the more becoming.

Strings are again generally worn, and the soft twilled ribbons of which they are made are about three and a half to four inches wide. Mottled ribbons, called "granite," and basket-woven Panama ribbons are used in conjunction with velvet; but gros grain ribbons are rarely seen. There is but little formality in the arrangement of the trimmings. Knots, bows, and tufts of flowers are massed just above the forehead inside, while on the outside the objective point is sometimes to the left of the front, sometimes all on the left side, leaving the right side bare; while on other bonnets all the trimming is clustered low down at the back.

Ecru cashmere lace is the most conspicuous novelty in bonnet trimmings; it is made in Normandy of fine wool, and in design it resembles black Chantilly and Mechlin. The colour is creamy white, and it is used as ruches, quillings, and lappets, forming a pleasing contrast to both dark velvet and felt. The new bonnet ornaments are red gold and silver, warranted not to tarnish; they consist of long massive brooches of the gold, with small floriated silver designs upon them; likewise buckles in open filigree silver and gold, richly chased in mediæval designs. There are gold and silver galloons, braid and soutache, from an inch wide to the merest cord; but these should be used sparingly and with judgment, otherwise they are bad style.

Felt and velvet are the most fashionable bonnets. The newest felts are partly smooth and partly of the fur-beaver felt. The edges are left "raw"—that is, cut smoothly, and not bound—and sometimes the crown is of a lighter shade than the brim. Pale cream and grey felts are most in favour for dressy costumes. The merle or blackbird, and especially the merle bronzé, is the favourite feather trimming for bonnets; it is the Brazilian blackbird, which is not entirely black, but has blue and bronze shades on its wings and back; the bird is mounted on wires and springs, that permit the head and wings to be moved about in the most natural manner.

Silver ornaments have been quite a furore during the past year; silver throatlets, silver belts, silver brooches, earrings, chatelaines, mounts to bags, Marguerite belts supporting fans; in fact, silver has been and is the favourite metal for day ornaments. Among our illustrations will be found some new patterns designed by the eminent Bond-street firm, who first popularised the Norwegian clasps and belts.

So far as space allows we have given illustrations of the various styles now prevailing in hats, bonnets, hairdressing, costumes, and toilettes. The patterns cut in paper of the dresses and mantles can be procured on application by letter to the *Queen* Office, 346, Strand, W.C. The prices are named at the end of the descriptions, and a price list will be found among the trade advertisements.

FASHIONABLE HEADDRESSES.

STYLES OF HAIRDRESSING.—HATS AND BONNETS.

No. 1. AFTERNOON HEADDRESS.—This style of hairdressing may be adopted either by a young married or unmarried woman. The hair is turned back from the temples and waved at the top of the head, where it forms bandeaux. Over the forehead the hair is crêpé, and falls in light curls. At the back there is Marie Antoinette catogan, fastened with a tortoiseshell comb, and tied with a faille bow.

No. 2. MORNING HEADDRESS.—This style of hairdressing is suitable for a young lady. The front hair, which is waved, forms a bandeau at each side, the ends of which are rolled to form a stiff curl. The hair is combed upwards from the temples, and at the top of the head there are bows and marteaux. Long ringlets escape from the chignon.

No. 3. BLACK LACE MANTILLE.—Either Spanish lace or sprigged net, trimmed at the edge with black lace, may be used for this mantille. The ends are tied in front. There is a double box-plait at the back, so as to give room to the chignon, and still to allow the lace to hang full at the sides. A rose fastens the lace to the hair over the forehead, and a second flower is placed on the mantille below the right ear.

No. 4. BLACK VELVET BONNET.—The brim is turned upwards and then backwards, and is covered with a double crossband of black velvet, piped with pink faille. Under the brim there is a torsade of velvet. A long natural feather partially encircles the crown, and a large moss rose, with leaves and buds, terminates the trimming.

No. 5. BLACK FELT BONNET.—The crown is black felt, and the brim is bound with black velvet; a bouillonné of pale blue faille is added beneath it, and upon the bouillonné there is a wreath of brown leaves of various shades. Loops of two shades of blue faille and a spray of roses complete the trimming.

No. 6. IVORY VELVET BONNET.—The foundation is covered with ivory velvet, and a crossband of ivory Surah surrounds the crown; also a wreath of hedge roses, with jet hearts.

No. 7. THE CORONET BONNET.—The bonnet is black straw, and round its low crown there is a torsade of black velvet. A cluster of black ostrich tips curls upwards, and there are two green wings at the side. Beneath the brim there is a wreath of field flowers.

No. 8. STRIPED VELVET BONNET.—Velvet of two shades, striped with satin. The soft crown, in the capote form, is of striped velvet; the brim is lined with black velvet, and beneath it there is a crossband folded, likewise of velvet. The outside trimmings consist of loops of velvet, a tuft of geraniums, and a natural feather, which curls over the capote crown.

No. 9. BLACK STRAW HAT.—The brim is lowered over the forehead, so that it shades it; at the back it is turned up, and ornamented with a black netted scarf, edged with fringe; black velvet loops and ends are intermixed with the scarf, and the same form the trimmings on the crown. Bronze wings at the side.

No. 10. THE LEBRUN HAT.—This hat is worn at the back of the head, and the brim, which is slightly turned up, is bound with black velvet. A torsade of brocaded ribbon encircles the crown, and is formed into a bow, from whence spring two bronze-coloured wings. A long black feather falls at the back.

Dress and Fashion.

MOVEMENTS OF FASHION, 1875-76.

THE fickle goddess has been busy during the past year, and the preparations for the year of years, 1876, show no lack of activity. Dresses that are tied so closely to the limbs, that walking is a matter of difficulty, and sitting down straight an impossibility; skirts so long that raising them when walking is a necessity—such are the striking features of present fashions. Bodices no longer stop short at the waist, but they descend low on the hips, imprisoning them closely; the backs are as elaborately trimmed as the fronts, sleeves are very narrow, and tunics are rarely draped with their two sides alike. Extreme narrowness of skirt has obliged the removal of pockets; instead of placing them inside, they are now all worn outside, are usually made of the same material as the dress, and the upper edge is gathered with an elastic string, which stretches as the hand is introduced into them. In all new materials a great tendency is shown to discard plain colours; plaids and checks were adopted during the London season of '75, and the advent of '76 sees everyone robed and draped in brocades and figured materials of every descriptions.

For morning wear the soft woollen costumes are made up of such fabrics as honeycomb cloth, matelassé, basket poplin, damask check, knicker-bocker serge, armure, natté, figured bége, &c., in browns, drabs, navy blue, and prune. These materials are never used alone, as a costume to be fashionable must not be made of one pattern, tone, and material: a mixture of two shades and two materials is well-nigh essential. The richest fabric for winter morning costumes is called broderie laine; it has a fine cashmere ground with a rich glossy silk brocade of the same colour, and of floriated design all over it. This is made up with plain faille that matches the cashmere.

The richest among the new silks are all brocades. There is "Venetian soutache," in which the outline of the design appears to be traced out with fine cord or braid; there is "Japanese satin," with satin groundwork, brocaded all over with small Oriental patterns; these, with brocatelle and stamped or brocaded velvet, form but a small proportion of the rich fabrics prepared for winter wear. There is a change in the colours: the new ones are dark and positive; and the names of the principal are nègre, almost black; cassis, the shade of black currants, tinted with blue; bronze, olive green; Bordeaux or dark red; prune or plum colour; indigo blue; fumée, smoke brown; and bège, dark grey. For evening wear straw, ivory or cream, and nacarat (a pale orange red) are most in vogue. The make of silk dresses is very elaborate. Skirts have lost their uniform appearance; they are trimmed so variously, and with such profusion, that a detailed description is impossible. They are all made of two materials, faille and brocade, or silk and velvet, or fine wool fabrics, with elaborate satin brocades combined; faille to match. Skirts are very long, and are tied back so closely that a petticoat, which has its front breadth starched, would be quite in the way. There is generally a treble box-plait at the back, variously ornamented; and the tunics and tabliers are extremely long in front. The sides of the skirt are always elaborately draped or ornamented in some way. Narrow plaits are still much worn, the new feature in them being that they are joined in the centre horizontally when used for trimming composite dresses, the upper half being, figured, the lower plain. Cuirass and Joan of Arc bodices are worn, likewise violin backs, and sleeves different from the bodice; and many backs have no sidepieces, but are cut with four seams from the shoulder. The principal trimmings are rich fringes, cord passementerie, braids of all description, including gold, silver, and steel, netted fringes with Spanish balls and double-faced ribbons.

Mantles have altered considerably during the past year: they have become larger and more voluminous in every way. Cloth is a very fashionable material for them, plain as well as matelassé and diagonal. Long circular silk mantles, lined with squirrel and bordered with dark fur, are much in favour. The paletot and dolman shapes are the favourite, likewise a close-fitting mantelet; but the new feature about the sleeves is that they commence at the elbow and not from the shoulder. Skunk, lustred beaver, lustred raccoon, and silver fox are among the favourite furs. Braiding is to be seen on many of the handsomest cloth mantles, several close-set rows of narrow Russian braid sewn on to give the effect of one very broad braid.

The new features about bonnets are rather in their accessories than in their forms. There are two distinct shapes worn; one having a coronet turned up brim, with moderate crown, and placed at the back of the head, while on the other the brim has the effect of being crushed down over the forehead *à la paysanne*. The former is the more becoming.

Strings are again generally worn, and the soft twilled ribbons of which they are made are about three and a half to four inches wide. Mottled ribbons, called "granite," and basket-woven Panama ribbons are used in conjunction with velvet; but gros grain ribbons are rarely seen. There is but little formality in the arrangement of the trimmings. Knots, bows, and tufts of flowers are massed just above the forehead inside, while on the outside the objective point is sometimes to the left of the front, sometimes all on the left side, leaving the right side bare; while on other bonnets all the trimming is clustered low down at the back.

Ecru cashmere lace is the most conspicuous novelty in bonnet trimmings; it is made in Normandy of fine wool, and in design it resembles black Chantilly and Mechlin. The colour is creamy white, and it is used as ruches, quillings, and lappets, forming a pleasing contrast to both dark velvet and felt. The new bonnet ornaments are red gold and silver, warranted not to tarnish; they consist of long massive brooches of the gold, with small floriated silver designs upon them; likewise buckles in open filigree silver and gold, richly chased in mediæval designs. There are gold and silver galloons, braid and soutache, from an inch wide to the merest cord; but these should be used sparingly and with judgment, otherwise they are bad style.

Felt and velvet are the most fashionable bonnets. The newest felts are partly smooth and partly of the fur-beaver felt. The edges are left "raw"—that is, cut smoothly, and not bound—and sometimes the crown is of a lighter shade than the brim. Pale cream and grey felts are most in favour for dressy costumes. The merle or blackbird, and especially the merle bronzé, is the favourite feather trimming for bonnets; it is the Brazilian blackbird, which is not entirely black, but has blue and bronze shades on its wings and back; the bird is mounted on wires and springs, that permit the head and wings to be moved about in the most natural manner.

Silver ornaments have been quite a furore during the past year; silver throatlets, silver belts, silver brooches, earrings, chatelaines, mounts to bags, Marguerite belts supporting fans; in fact, silver has been and is the favourite metal for day ornaments. Among our illustrations will be found some new patterns designed by the eminent Bond-street firm, who first popularised the Norwegian clasps and belts.

So far as space allows we have given illustrations of the various styles now prevailing in hats, bonnets, hairdressing, costumes, and toilettes. The patterns cut in paper of the dresses and mantles can be procured on application by letter to the *Queen* Office, 346, Strand, W.C. The prices are named at the end of the descriptions, and a price list will be found among the trade advertisements.

FASHIONABLE HEADDRESSES.

STYLES OF HAIRDRESSING.—HATS AND BONNETS.

No. 1. AFTERNOON HEADDRESS.—This style of hairdressing may be adopted either by a young married or unmarried woman. The hair is turned back from the temples and waved at the top of the head, where it forms bandeaux. Over the forehead the hair is crêpé, and falls in light curls. At the back there is Marie Antoinette catogan, fastened with a tortoiseshell comb, and tied with a faille bow.

No. 2. MORNING HEADDRESS.—This style of hairdressing is suitable for a young lady. The front hair, which is waved, forms a bandeau at each side, the ends of which are rolled to form a stiff curl. The hair is combed upwards from the temples, and at the top of the head there are bows and marteaux. Long ringlets escape from the chignon.

No. 3. BLACK LACE MANTILLE.—Either Spanish lace or sprigged net, trimmed at the edge with black lace, may be used for this mantille. The ends are tied in front. There is a double box-plait at the back, so as to give room to the chignon, and still to allow the lace to hang full at the sides. A rose fastens the lace to the hair over the forehead, and a second flower is placed on the mantille below the right ear.

No. 4. BLACK VELVET BONNET.—The brim is turned upwards and then backwards, and is covered with a double crossband of black velvet, piped with pink faille. Under the brim there is a torsade of velvet. A long natural feather partially encircles the crown, and a large moss rose, with leaves and buds, terminates the trimming.

No. 5. BLACK FELT BONNET.—The crown is black felt, and the brim is bound with black velvet; a bouillonné of pale blue faille is added beneath it, and upon the bouillonné there is a wreath of brown leaves of various shades. Loops of two shades of blue faille and a spray of roses complete the trimming.

No. 6. IVORY VELVET BONNET.—The foundation is covered with ivory velvet, and a crossband of ivory Surah surrounds the crown; also a wreath of hedge roses, with jet hearts.

No. 7. THE CORONET BONNET.—The bonnet is black straw, and round its low crown there is a torsade of black velvet. A cluster of black ostrich tips curls upwards, and there are two green wings at the side. Beneath the brim there is a wreath of field flowers.

No. 8. STRIPED VELVET BONNET.—Velvet of two shades, striped with satin. The soft crown, in the capote form, is of striped velvet; the brim is lined with black velvet, and beneath it there is a crossband folded, likewise of velvet. The outside trimmings consist of loops of velvet, a tuft of geraniums, and a natural feather, which curls over the capote crown.

No. 9. BLACK STRAW HAT.—The brim is lowered over the forehead, so that it shades it; at the back it is turned up, and ornamented with a black netted scarf, edged with fringe; black velvet loops and ends are intermixed with the scarf, and the same form the trimmings on the crown. Bronze wings at the side.

No. 10. THE LEBRUN HAT.—This hat is worn at the back of the head, and the brim, which is slightly turned up, is bound with black velvet. A torsade of brocaded ribbon encircles the crown, and is formed into a bow, from whence spring two bronze-coloured wings. A long black feather falls at the back.

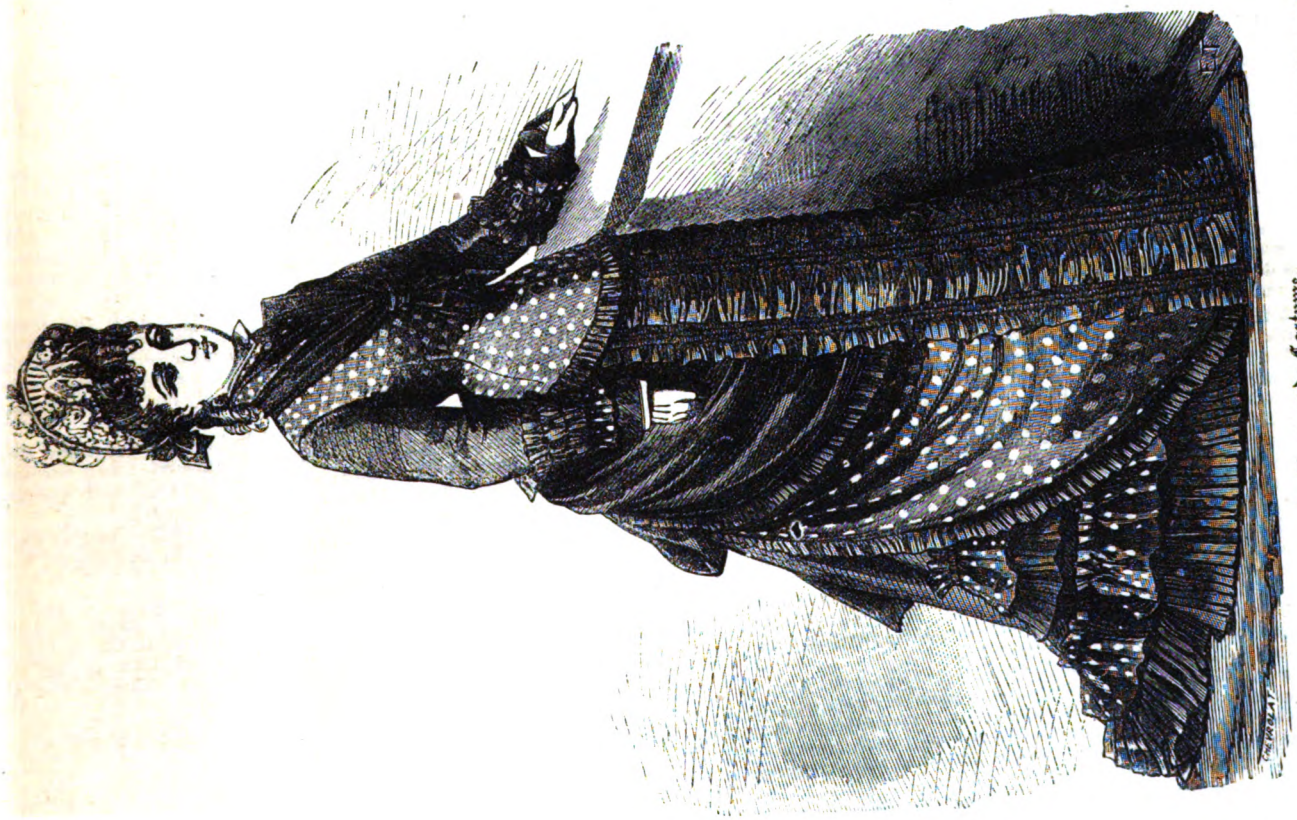
4. The Suite Dress.

Light blue silk, dark blue velvet, and cream brocade or Surah.—The skirt and sleeves are blue silk; the former is narrow, and mounted with a Bulgare plait at the back. It is bordered in front with a plaiting and bouillonné. The cuirass bodice is of blue velvet; and the Princesse tunic and plastron are cream brocade. A border of silver embroidery encircles the edges of the plastron, and is continued below the hips to the looping up of the tunic, which is edged with three rows of silver braid. There is silver braid also on the revers of the cuffs. Pattern of costume, 6s. 7d.



3. Promenade Costume.

Plain and Spotted Faille.—The back of the skirt is trimmed with alternate plaitings and flounces, the former being of plain faille, and the latter spotted. The front has a puffing up the centre, and several rows of gathering at each side. A triple tunic of the two failles is arranged at each side of the pouf, and is draped at the back under a full sash. The cuirass bodice of spotted faille has sleeves and fichu of plain faille. Pattern of skirt and tunic, 4s. 7d.; of bodice, 2s. 7d.

1. Promenade Costume.

BLACK VELVET AND CHECKED BEGE.—Plain velvet skirt; the tunic is pointed in front, and fastened at the side with velvet buttons. It is bordered with two plaitings of faille, and the back is ornamented with bows. Bodice fastened at the side with square basque, cut out on the hip, and rounded at the back. High collar, piped with velvet; checked sleeves, with velvet cuffs; pocket at the side. Pattern of bodice and tunic, 3s. 7d.; of skirt, 2s. 7d.

2. Carriage Toilette.

FAILLE AND BEGE.—The faille skirt is trimmed with five flounces, three of bége and two plissés of faille mounted with a heading. The bége tunic is trimmed with a fringe of the two colours, and is draped at the back with plaits. The pelerine paletôt is trimmed with fringe, the front is pointed, and the sleeve forms one with the back; a fringe and a faille cross band simulate a pointed hood. Pattern of skirt and tunic, 4s. 7d.; of paletôt, 2s. 7d.

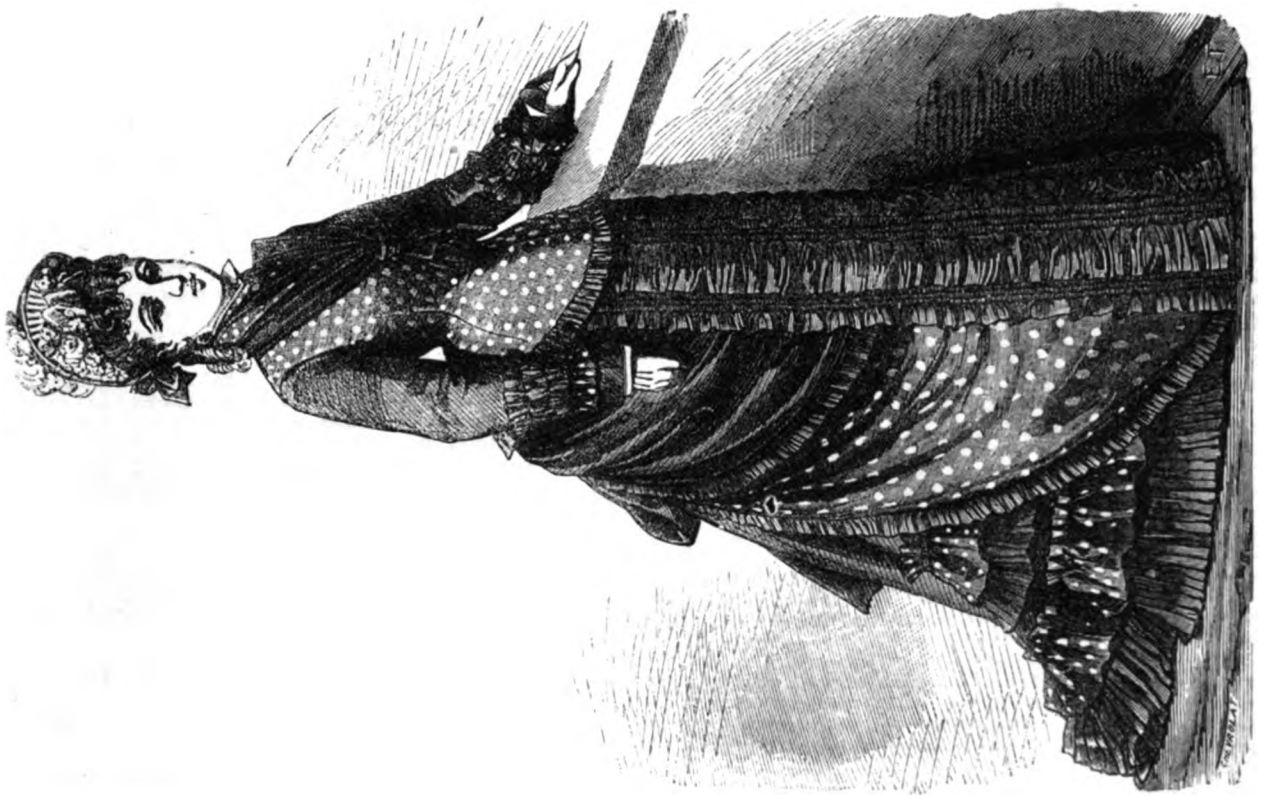
4. The Ambe Dress.

LIGHT BLUE SILK, DARK BLUE VELVET, AND CREAM BROCADE OR SUSAN.—The skirt and sleeves are blue silk; the former is narrow, and mounted with a Bulgare plait at the back. It is bordered in front with a plaiting and bouillonné. The cuirass bodice is of blue velvet; and the Princesse tunic and plastron are cream brocade. A border of silver embroidery encircles the edges of the plastron, and is continued below the hips to the looping up of the tunic, which is edged with three rows of silver braid. There is silver braid also on the revers of the cuffs. Pattern of costume, 6s. 7d.



3. Promenade Costume.

PLAIN AND SPOTTED FAILLE.—The back of the skirt is trimmed with alternate plaitings and flounces, the former being of plain faille, and the latter spotted. The front has a pulling up the centre, and several rows of gathering at each side. A triple tunic of the two failles is arranged at each side of the pouf, and is draped at the back under a full sash. The cuirass bodice of spotted faille has sleeves and fichu of plain faille. Pattern of skirt and tunic, 4s. 7d.; of bodice, 2s. 7d.

with plain gravy, fried crumbs, and bread sauce. Time, about half an hour.

PLAIN GRAVY.—See "Summer Dinner."

BREAD SAUCE.—Pour half a pint of boiling milk on a teacupful of fine bread crumbs, add a small onion stuck with three or four cloves, a small blade of mace, a few peppercorns, and salt to taste. Let the sauce simmer five minutes, add a small pat of fresh butter, and at the time of serving remove the onion and mace.

STUFFED TOMATOES.—Dip some tomatoes in hot water, peel them, cut them in half, and remove the pips. Rub a baking sheet with shallot, butter it well, and lay the tomatoes in it, filling each half with the following composition: Two parts bread crumbs, one part ham finely minced, and according to taste parsley and sweet herbs also finely minced, and pepper and salt. Put a small piece of butter on each half tomato, and bake them a quarter of an hour. Have ready some round pieces of buttered toast; on each of these put a half tomato, and serve.

STEWED PEARS.—Cut a number of pears in halves, peel them, and trim them so as to get them all of a size; put them into an enamelled saucepan with just enough water to cover them, and a good allowance of loaf sugar, the thin rind of a lemon, a few cloves, and sufficient prepared cochineal to give them a good colour. Let them stew gently till quite done. Arrange them neatly on a dish, strain the syrup, let it reduce on the fire, then pour it over the pears.

RICE SOUFFLÉ.—Pick and wash a teacupful of rice. Put it into a saucepan with a pint of milk sweetened to taste, and a pod of vanilla; let the milk boil till the rice is thoroughly done. When cold, remove the stick of vanilla and work in the yolks of six eggs one by one; then stir in the whites of eight eggs whipped to a stiff froth. Pour the mixture into a plain cake mould; put it into the oven at once; bake for about half an hour, and serve in the mould with a napkin pinned round it.

STORE ROOM RECIPES.

APRICOT, PEACH, OR PLUM JAM.—Take equal quantities of fruit and sugar, pound the sugar, pare and cut up with a silver knife some ripe apricots, peaches, or magnums, remove the stones, lay the fruit in a dish, strew over them half the sugar, and leave them till the following day; then boil and skim the remainder of the sugar, add the fruit, boil it up quickly, well skimming and stirring for twenty minutes; add the blanched kernels halved, boil for ten minutes more, and the jam will be ready to pot.

BLACKBERRY JAM.—To every pound of picked fruit allow 1lb. of loaf sugar, and ¼lb. of apples peeled and cored, and cut quite small; boil the fruit for ten minutes, add the sugar, boil, stir, and remove all scum; it will take from half to three-quarters of an hour.

GRAPE JAM (GREEN).—Pick them carefully, and reject any that are injured; wash them, and to every pound of grapes allow ¾lb. of sugar. Put the grapes into a preserving pan, then a layer of sugar, then a layer of grapes. Boil on a moderate fire, stirring it all the time to prevent its burning, and as the grape stones rise take them out with a spoon, so that by the time the fruit is sufficiently boiled—about one hour—the stones will all have been taken out.

GRAPE JAM.—Boil the grapes (ripe) to a soft pulp about one hour and half, and strain them through a sieve; weigh them, and to every pound of fruit allow ¾lb. of sugar. Boil together for twenty minutes, stirring and skimming well.

APPLE JAM.—Peel and core the apples, cut them in thin slices, and put them into a preserving pan, with ¾lb. of white sugar to every pound of fruit; add (tied up in a piece of muslin) a few cloves, a small piece of ginger, and the thin rind of a lemon; stir with a wooden spoon on a quick fire for half an hour.

MULBERRY JAM.—Take ripe mulberries, and allow 1lb. of sugar and one pint of mulberry juice to every pound of picked fruit; boil and skim the sugar with the juice for five minutes after the sugar is thoroughly dissolved; then add the fruit, and boil quickly for half an hour, stirring well; take off the fire, and, if quite stiff when cold, it is done sufficiently; if not boil for another quarter of an hour.

CARROT JAM.—Take young carrots, wash and scrape clean, cut them in rounds, cover them with water, and boil till they can be passed through a sieve. To every pound of pulp allow 1lb. of sugar, the grated rind and juice of a lemon, 1oz. of bitter almonds, blanched and chopped fine, and two tablespoonfuls of brandy. Boil the sugar and pulp together for a quarter of an hour; skim and stir. When cold add the other ingredients; mix well and pot.

BLACKBERRY JELLY.—Make it as directed for red currant jelly, but use only 10oz. of sugar to each pound of juice. The addition of a little lemon juice is an improvement.

BARBERRY JELLY.—Take ripe barberries, carefully rejecting any spotted or decayed ones, wash, drain them and strip off the stalks. Boil with a very little water till quite tender, press out and strain the juice, weigh it, and allow ¾lb. of pounded sugar to every pound of juice; boil up the juice, add the sugar, and boil for ten minutes, skimming and stirring as above.

MEDLAR JELLY.—Put ripe medlars into a jar with a very little water, bruising them slightly as you put them in; tie down the jar and put it into a slow oven for ten or twelve hours. Strain off the juice without pressure, weigh it, and allow equal weights of sugar and juice. Boil the juice, add the sugar, and boil again, skimming and stirring well till it jellies.

QUINCE JELLY.—Peel, cut up, and core some fine ripe quinces. Put them in sufficient cold water to cover them, and stew gently till soft, but not red. Strain the juice without pressure, weigh it, and to every pound of juice allow 1lb. of crushed sugar; boil the juice for twenty minutes, add the sugar and boil again till it jellies—about a quarter of an hour—stir and skim well all the time. Strain it again through a napkin, or twice folded muslin, pour into pots or moulds, and when cold cover it. The remainder of the fruit can be made into marmalade with ¾lb. of sugar and ¼lb. of juicy apples to every pound of quinces, or it can be made into compotes for tarts.

APPLE.—(1) Peel, core, and quarter some sound apples, and throw them into cold water as they are done; boil them till tender, then strain the juice from them through a fine sieve, and afterwards through a jelly bag—if necessary pass it through twice, as the juice should be quite clear—weigh it, and allow ¾lb. of sugar to every pound of juice, boil up the juice, add the sugar, stir till melted, and boil for another ten minutes, add the strained juice of a lemon to every 1½lb. of juice just before it is finished. (2) Wash the apples, quarter them (do not peel or core them) put them into a preserving pan with a very little cold water, and boil till tender; strain the juice and weigh it, allow 1lb. of sugar to 1¼lb. of juice, boil the juice, add the sugar, boil again, stirring and skimming well for ten to fifteen minutes, or until it jellies; just before it is finished add a few drops of cochineal.

DAMSON CHEESE.—Take ripe damsons and simmer them gently till quite soft, squeeze through a coarse sieve, reserve a few of the stones, weigh the pulp, and allow 1lb. of loaf sugar to every pound, boil with a few of the kernels for about one hour and a half, or until quite firm, stirring and skimming well. Put the preserve into shallow pots or moulds, and cover them, when cold, with thin tissue paper.

PEARS (TO PRESERVE).—Parboil some pears with the peel on, take them out of the water, peel and quarter them, then let them lie twenty-four hours in large dishes, with powdered lump sugar thickly sprinkled over them; to 6lb. of pears put the same quantity of loaf sugar, 1oz. of ginger sliced thin, the peel of three lemons cut into thin strips, and one pennyworth of cochineal. Stew gently for five hours, and keep in close covered jars.

ELDERBERRY WINE.—To every gallon of ripe elderberries put four gallons of water, ½oz. of ginger, and 2oz. of allspice; boil it twenty minutes, skimming well all the time, strain it through a hair sieve, and boil it again for half an hour with 3lb. of moist sugar to every gallon. Put 3lb. of raisins, cut in halves, into a tub, and pour the boiling liquor on them. When nearly cold add a little ale yeast, and let it work three days; strain it, add a quart of brandy to every thirty-six gallons; let it stand three months before bottling.

FRENCH MUSTARD.—Mix a quart of brown mustard seed with a handful each of parsley, chervil, tarragon, and burnet, a teaspoonful of celery seed, and cloves, mace, garlic, and salt according to taste. Put the whole into a basin, with enough wine vinegar to cover the mixture. Let it steep twenty-four hours, then pound it in a marble mortar. When thoroughly pounded pass it through a fine sieve; add enough vinegar to make the mustard of the desired consistency, and put into jars for use.

PICKLED MUSHROOMS.—Choose small button mushrooms, rub off the skin with salt on a piece of flannel, cut off the stalks, throw them into milk and water, drain, dry them in a cloth, and put them into jars; boil white vinegar enough to cover them, with some salt, bruised ginger, mace, a little nutmeg and cayenne; when boiling hot, pour over the mushrooms. When cold, cork the bottles and tie them down with a bladder.

PICKLED GRAPES.—Boil two quarts of vinegar with 2oz. of whole ginger, 1oz. peppercorns, 2oz. cloves, and a little mace. Cut some grapes carefully from the stalks before they are ripe, and be careful not to bruise the skin, put them into a jar, cover them with the vinegar (cold), and let them stand three days well covered. Boil up the vinegar, and when cold pour it over the grapes again. Bottle for use, and cork well.

WINTER.

PRACTICAL DINNER.

Palestine Soup.
Whitings au Gratin.
Veal Croquettes——Filet de Bœuf à la Française.
Lasagnes aux Tomates.
Apricot Compote.
Cheese——Oat Cake——Celery.

PALESTINE SOUP.—Boil 2lb. of Jerusalem artichokes in salted water, and when quite done pass them through a hair sieve. Take a quart of milk, boil in it a handful of whole pepper, a piece of mace, half a dozen

Digitized by Google

cloves, and an onion or two shallots. When the milk is well flavoured strain it; then melt a piece of butter the size of an egg, stir into it a tablespoonful of flour, then gradually the flavoured milk and the artichoke pulp. Boil it up, mix well, and lastly stir in a gill of cream, adding more milk if the soup be too thick; serve with small dice of bread fried in butter.

WHITINGS AU GRATIN.—Take a few mushrooms, a couple of shallots, and some parsley, all finely minced; mix them together. Butter a tin very plentifully, strew in it some of the above mixture and some fine baked bread crumbs, with a little pepper and salt. On this place the whitings (split open), on them place the remainder of the mushrooms, &c., more pepper and salt, and cover up the whole with a thin layer of baked bread crumbs. Pour in, at the side, a glass of white wine, and a sufficient quantity of stock to come up to the fish and soak the bread crumbs without washing them off. Put the tin in the oven to bake for twenty minutes.

VEAL CROQUETTES.—Take some cold veal, remove carefully all fat and outside parts, and mince it finely; melt a piece of butter in a saucepan, add a little flour, stir; then add a small quantity of stock and the minced meat with some parsley, finely chopped; season with pepper, salt, and a little powdered spices; stir well, and as soon as the mixture is quite hot remove it from the fire. Beat up and strain into a basin the yolks of one or two eggs, with the juice of half or of a whole lemon, according to the quantity of mince; put two or three tablespoonfuls of mince into the basin; mix them well with the egg and lemon; then add the whole to the rest of the mince; mix well, and turn it out on a dish. When cold, fashion it in bread crumbs to the shape of corks, taking care to make them all of a uniform size; then roll them in egg, and again in bread crumbs. Let them dry a short time; then fry in plenty of hot lard, and serve with fried parsley.

FILET DE BŒUF À LA FRANÇAISE.—Take a piece of the undercut of sirloin of beef, trim off the fat neatly, and the thin skin next to it; lard (not too finely) that side of it with fat bacon, and lay it for a whole day in a pie dish, with plenty of olive oil, pepper, salt, parsley, slices of onion, and bay leaves. Put it on the spit, cover the larded side with a piece of buttered paper, roast it at a brisk fire, and do not let it be overdone. Baste it frequently with its own gravy, and a short time before serving remove the piece of paper to let the larding take colour. Garnish with:

POTATOES SOUFFLÉES.—Take some large potatoes, peel them, and cut them in slices rather less than a quarter of an inch thick, dry them thoroughly with a cloth, and put them in the frying basket. Have ready two pans filled with boiling lard, plunge the basket in one of them, and keep shaking it; in two or three minutes lift up the basket, and plunge it into the other pan; when the slices of potato swell out drain them of all fat, and serve. The secret of success consists in removing the basket from the first pan of fat at the right time. The potatoes should not be allowed to colour in it.

LASAGNES AUX TOMATES À LA NAPOLITAINE.—Mince about ½lb. of rather fat bacon, together with a clove of garlic, a couple of onions, some parsley, thyme, marjoram, and basil to taste. When the mixture is minced into a paste put it into a saucepan with about 1lb. of fresh beef, cut up into small pieces. Keep on turning this on the fire until the meat is well browned, then moisten with a little water or stock, and add the contents of a shilling bottle of *conserve de tomates*. Let the sauce simmer for an hour, put in pepper and salt to taste, and if it be too thick add more stock, then strain it carefully, remove superfluous fat, and put it by till wanted. Take a pound of the flat, broad maccaroni called Lasagne (or any other may be used), break it up into convenient lengths, and throw it into a very large saucepan full of boiling water, with a small handful of salt. Keep stirring the Lasagne, with care not to break them, and the moment they are done pour into the saucepan a jugful of cold water, and strain them immediately and effectually. The Lasagne should not be overdone; about half an hour's boiling will cook them as they ought to be. Place on a deep dish a few pieces of fresh butter, then arrange the Lasagnes in layers, pouring plenty of the sauce, with a good sprinkling of grated Parmesan cheese, over each; put a few more pieces of fresh butter on the top of all, more sauce, and plenty of grated Parmesan cheese. Let the dish remain in the meat screen in front of the fire for about ten minutes, then send it up to table.

APRICOT COMPOTE.—Take a tin of preserved apricots, turn out the juice into a saucepan, add 1oz. of sugar and a glass of white wine, boil it up. Put in the apricots for a few minutes. Take them out, and dispose them on a glass dish, then well reduce the syrup, pour it over the apricots, and serve in a glass dish.

STORE ROOM RECIPES.

MINCE MEAT.—Mince very finely some beef suet, and of this take 1¼lb.; pick some currants; stone and chop finely some Malaga raisins, and take 1½lb. of each. Peel and core a quantity of apples, and weigh out 1¼lb. of these; mince them also finely, and mix these four ingredients in a basin, adding to them 1lb. of moist sugar, ½lb. of mixed orange, citron, and lemon candied peel, also finely minced. Squeeze the juice of a lemon in the mixture, and lastly put in half the thin rind of it, chopped as finely as possible. Work the mixture with a spoon for a little time. Put half a tablespoonful of salt into half a tumblerful of brandy, with powdered mixed spice and ginger, according to taste. Add this to the mince, work it a little more to get it well mixed, and put it by in a covered jar. It should remain seven or eight days before being used, and it will keep for several weeks.

CANDIED ORANGE OR LEMON PEEL.—Cut your oranges or lemons longways, take out all the pulp, and put the rinds into rather strong salt and water for six days, then boil them in a large quantity of spring water until they are tender; take them out and lay them on a hair sieve to drain, then make a thin syrup of fine loaf sugar (1lb. to one quart of water), put in your peels, and boil them over a slow fire till you see the syrup candy about the pan and peels, then take them out and grate fine sugar over them. Lay them on a hair sieve to drain, and set them in a stove or before the fire to dry.

LEMON PICKLE.—Cut six lemons each into eight pieces, put them into a strong jar, cover them with 1lb. salt, six cloves of garlic, 2oz. horseradish, sliced; add cloves, mace, nutmeg, and cayenne, ¼oz. each, and 2oz. flour of mustard. Pour over them two quarts of the best vinegar, and place the jar in a pan of boiling water till perfectly hot. Then put it in a dry place, stir it daily for six weeks, keeping the jar closely tied down. Bottle for use.

APPLE GINGER.—Wipe clean, quarter, and core some sound apples, and to each pound of these allow ¾lb. of the best brown sugar, and to every 4lb. of apples 1oz. of unground ginger; beat the ginger till it becomes soft and stringy. Put a layer of the apples into a dry earthenware pan, then a sprinkling of ginger, and then a thick layer of sugar, then apples, ginger, and sugar again, till all are used. Let these remain in the pan for forty-eight hours, then put all in a preserving pan with about a teacupful of water; boil for half an hour sharply, and pour into large jars, tying their mouths closely over when the preserve becomes cold.

PUNCH.—Take half a tumbler full of lemon juice, two tumblerfuls of loaf sugar, three of rum, one of brandy, add the rind of a lemon, five tumblers of boiling water, mix all well together, strain off the lemon peel. Bottle for use, and when required for use add boiling water to taste.

MILK PUNCH.—Take the rinds of eighteen lemons, pared very thin, put them into a quart of brandy, let them stand twenty-four hours; take out the peels except two or three. Add the juice of the lemons with two quarts of rum, 2½lb. of loaf sugar, seven pints of boiling water; stir altogether in a crock; pour into it three pints of boiling milk, with a nutmeg grated in it; let it stand covered all night. The next day strain through a jelly bag till it is clear, and bottle it for use.

CHUTNEY.—1lb. of raisins, 1lb. of apples, 2oz. of cayenne, 1lb. of moist sugar, ½lb. of salt, 1oz. of chillies, 2oz. of garlic, three pints of vinegar. Stone the raisins, pound the stones, and pound it altogether; put it into a stone jar, and let it simmer for a week on the stove. If it is too clear at the week's end, strain off the liquor for fish sauce; bottle the thick, and cork it tight.

DRIED FRUIT CHUTNEY:—Take 1lb. each of Elva plums, raisins, dates, and Normandy pippins, ½lb. preserved ginger, ¼lb. long red chillies, 2oz. garlic, 1lb. sugar (loaf pounded), ¼lb. mustard, ¼lb. salt, half a pint of lemon juice, and four pints of vinegar. Slice and stone the dates, cutting them into rings; split and quarter the pippins, taking out pips and core; sprinkle with the salt, and boil about twenty minutes in one quart of vinegar. Make a syrup of the sugar and lemon juice, and rest of vinegar. Mix in smoothly the mustard. Shred fine the garlic and chillies. Stone the raisins, cut small, also the ginger and Elva plums. Mix all the ingredients together, place on a slow fire, stir well, and remove on coming to the boil. When cold, bottle, cork tight, and keep in a warm place for about six weeks. It will then be fit for use.

CHILI VINEGAR.—Get an ounce of dried bird's-eye chillies from the grocer's, clean them, put them into a stoppered bottle, just cover them with pure rectified spirits of wine or with brandy, sufficient to wet them thoroughly, close cork the bottle, place it by the fire for a few hours, then pour on a pint of vinegar; keep in a warm place for one month, then filter. Half a pint more vinegar may then be put to the chillies; this last may be strained in a fortnight.

GINGER CORDIAL.—Put and keep in a jar for ten days the rind of ten lemons very finely cut, 2oz. of the best Jamaica ginger, just bruised, and half a gallon of white brandy. Shake the jar daily. Pour a quart of boiling water on to 2½lb. white sugar. Pour off the brandy on to this syrup, and when cold strain through a flannel bag.

GINGER WINE.—Pare twelve good-sized lemons very thin, bruise and beat ¾lb. of the best ginger, boil them in a quart of water; put 26lb. of loaf sugar to boil with 9 gallons of water, skim it well, put the ginger, peel, and water in before taking off the fire; chop 6lb. of Malaga raisins, and throw them into the cask with the juice of the lemons squeezed and 2oz. of isinglass; let the sugar that was boiled, &c., cool in a tub, and when nearly cold throw in a cupful of good yeast and stir frequently. When cold, put all into a clean cask, and stir frequently for a few days; then put in a pint and a half of brandy and fasten up close. Let it remain for two or three months; then bottle.

GAMES AT PATIENCE.

BY "CAVENDISH."

We must all remember as children—at least those of us who ever played at cards—what is now called the old fashioned patience, which is played by dealing the cards in four packets, until an ace is arrived at, when it is put in a separate place below one of the four packets, and so on for the other aces. Any two can be placed on any ace, and so on in sequence up to the kings; cards, not continuing the sequences already commenced being put on one of the four packets above. The game consists in endeavouring to make four complete sequences. If this is achieved, the player wins; if not, he loses. And a very good game the old fashioned patience is, demanding judgment and memory; but it has one serious defect, viz., that the chances against success, even in the hands of a skilful player, are considerable. This defect led innovators to propose an improvement, viz., to allow *shifting*, *i.e.*, to allow cards which make up sequences in the reverse order to be shifted from the top of one packet to another. Thus, suppose an eight to be on the top of one packet, and a six on the top of another, and a seven to be turned from the undealt cards. The seven would be placed, of course, on the right; and the shifters would then allow the six to be put on the seven, and so on for other top cards. This new fangled method was, of course, scorned by the old school; but it makes an excellent game, and it brings the chances of success in favour of the skilled player, which is as it should be with games where the player matches himself against fate, as the interest and amusement are thereby much heightened.

Since the old times referred to, many patiences, some very ingenious, others very silly, have been invented. A description of two or three of the best of these may be found useful by those who during the long evenings may find themselves without playfellows, and desirous of a little recreation.

To avoid repetition, it will be as well to commence with an explanation of terms:

Sequence order of the cards. — In the following patiences the sequence order of the cards is always ace, 2, 3, 4, 5, 6, 7, 8, 9, 10, knave, queen, king. This sequence is called an *ascending sequence;* the reverse, beginning with the king, and so on backwards to the ace, is called a *descending sequence.* In one of the patiences given the small cards from the 2 to the 6 are left out. The ascending sequence will in this case be ace, 7, &c., to king, and the descending sequence the reverse.

In some patiences the sequences need not be of the same suit, in others they must be.

Available cards are cards that are not covered or *blocked*, and that may be *taken* to form sequences in accordance with the special rules of the patience.

Removable Cards are cards that may be moved from one row or packet to another, to form sequences in accordance with the special rules of the patience.

A very pretty, but easy patience, called *La Belle Lucie*, is played, as follows:—

One pack of fifty-two cards is to be well shuffled, and dealt face upwards in seventeen packets of three cards each, the last card being dealt singly. The cards in each packet should overlap each other, but should be spread sufficiently to enable the player to recognise the underneath cards.

The object of the patience is to form in one deal four ascending sequences (which must follow suit), by taking any top cards that are available. When there are no available cards, removable cards may be made use of, any top card being removable which forms a descending sequence with any other top card, suit being followed when a card is moved; the card uncovered by the taking or removal becomes available or removable, as the case may be, if cards of the same suit next in sequence to it then present themselves on the top. Also, when all the cards of any packet, or the card dealt singly, have been taken or removed, and a blank space is thus left, any king on the top of a packet is removable to the blank space. Some players do not approve of moving kings to spaces.

Available cards should be taken whenever they present themselves. The skill of the player is only exercised in placing the removable cards, as, if this is injudiciously done, other cards which the player requires to take, may become blocked by the removals.

The following example of a moderately easy hand will show more clearly than mere description how *La Belle Lucie* is managed. As with the type we cannot represent over-lapping cards, the reader will please to understand that each packet of three is separated by a line from the next packet, and that the card to the left is at the bottom of the packet, the card to the right on the top of the packet, and may be either available or removable.

Qn ♣, 4 ♠, 10 ♠	Ace ♢, 9 ♢, 3 ♣	6 ♡, 2 ♢, 7 ♢
Kg ♣, 8 ♢, Ace ♣	Kv ♣, 6 ♠, Kv ♡	2 ♠, 2 ♣, 8 ♣
6 ♣, Qn ♡, 4 ♢	Kv ♠, Ace ♠, Kg ♡	3 ♡, 9 ♣, Qn ♢
10 ♢, 8 ♠, 8 ♡	Kg ♠, 9 ♠, 8 ♠	Kg ♢, 7 ♠, 4 ♡
2 ♡, 7 ♡, 10 ♣	5 ♢, 5 ♣, 7 ♣	Ace ♡, 9 ♡, 5 ♡
5 ♠, 4 ♣, 10 ♡	Qn ♠, Kv ♢, 3 ♢	6 ♢

To win the patience, take ace of clubs, move seven of diamonds on eight of diamonds (it will not be necessary to repeat each time on what the card is moved, because it must be moved on the next highest card of the same suit forming a descending sequence); move six of diamonds (making a blank space on which a king can be moved); move king of hearts to space. Take ace of spades; move two of diamonds; five of hearts; four of hearts; seven of spades; queen of diamonds; eight of clubs; seven of clubs. Take two and three of clubs; and two of spades. Move ten of hearts; nine of hearts; eight of hearts; and ten of spades. Take four and five of clubs; three, four, and five of spades. Move nine of diamonds; and take ace, two, three, and all the diamond suit up to the king. Move queen of hearts and take all the clubs up to the ten. Move seven of hearts, and take all the hearts, and the patience must be won.

A similar but less easy patience, called *The House in the Wood*, may be played with two packs shuffled well together and dealt as before, except that the number of packets will be thirty-five instead of eighteen, and that one packet will contain two cards. In this patience kings cannot be moved to spaces. Of course eight ascending sequences have to be made. If ordinary sized cards are used, instead of patience cards, which are smaller, the packets occupy a large space. It is convenient for two players to consult over this patience from the opposite sides of a card table, each taking four sequences, so as to bring all the packets within easy reach. Available cards should not be taken without consideration. Only one deal is allowed as before.

Another variety is *The House on the Hill*, which is played with two packs, four ascending and four descending sequences being formed, and the cards being removable in both ascending and descending sequences; but it is not nearly so good a patience as the former.

The two patiences which follow are among the best known:

Russian Patience is played with two packs of fifty-two cards each, shuffled well together. There are trifling variations in the mode of playing. The following is recommended:

Deal the cards face upwards by one at a time in horizontal rows containing twelve cards each, the thirteenth card being placed below the first, the fourteenth below the second, and so on, forming perpendicular rows. To economise space it is as well that the lower card in each perpendicular row should somewhat overlap the one above, but not so much as to conceal the values of the upper cards.

The game consists in forming four ascending sequences composed of spades, hearts, clubs, and diamonds, and four corresponding descending sequences, in accordance with the following rules:

During the deal if any available king or ace presents itself in the first row of twelve cards, it may be taken at once. If a king or ace is taken, and a queen or two of the available suits presents itself in the first row, it may similarly be taken and put on the king or ace, as the case may be, and so on for other available cards. The spaces left by the removal of cards during the deal must be filled up from the undealt cards as soon as the available cards are taken. In the succeeding rows only the outside cards can be taken. Thus, if the thirteenth card (first in the second row) is available it may be taken, and the space filled from the undealt cards; but if not available, all the cards in the top row are blocked, and the succeeding cards cannot be taken even if they would be otherwise available, until the twenty-fourth card (last in second row) is reached, when that card if available can be similarly taken. If it so happens that the thirteenth card is available, and is taken (it is not compulsory to take available cards), and the taking of this card renders any card in the top row available, it may be taken. Also if the twenty-fourth card is available, and taking it renders the twelfth or thirteenth cards available, they can be taken, and so on, their places being supplied from the undealt cards, and these again, if available, can be taken. These rules may be summed up thus: *any outside card*, if available, and not covered by another card, can be taken. Outside cards are the top horizontal row, and the perpendicular rows to the extreme right and left; but the top row, though uncovered, becomes blocked the moment a thirteenth card, which is not available or not taken, has been dealt; and only the right and left cards of the top row can become available, should chance happen to uncover them after the twenty-fourth card is dealt.

When the whole pack has been dealt out, cards in the bottom row (*i.e.*, cards which are uncovered), may be either available or removable. Removable cards can be moved either in ascending or descending sequences which follow suit; and the sequences are continuous throughout the double suit; *i.e.*, an ace, which follows suit, can be moved on a king, or *vice versâ*.

When all the cards in one perpendicular row are moved or taken, a blank space is left, on which any removable king or ace can be moved, and cards so moved to spaces may have other cards moved on them in ascending or descending sequences which follow suit.

When no more cards can be taken or moved, the untaken cards are placed together thus: the first perpendicular row is closed up so that the cards keep their order, the first card remaining at the top of the pack, when the collected cards are turned face downwards, the second card next, and so on to the last card of the row. The second perpendicular row is then similarly taken up, and added to the first, so that the top card of the second row follows in the pack next after the bottom card of the first row, when the collected cards are turned face downwards, and so on for the succeeding rows.

When all the rows are collected the pack is held face downwards, and

GAMES AT PATIENCE.

BY "CAVENDISH."

We must all remember as children—at least those of us who ever played at cards—what is now called the old fashioned patience, which is played by dealing the cards in four packets, until an ace is arrived at, when it is put in a separate place below one of the four packets, and so on for the other aces. Any two can be placed on any ace, and so on in sequence up to the kings; cards, not continuing the sequences already commenced being put on one of the four packets above. The game consists in endeavouring to make four complete sequences. If this is achieved, the player wins; if not, he loses. And a very good game the old fashioned patience is, demanding judgment and memory; but it has one serious defect, viz., that the chances against success, even in the hands of a skilful player, are considerable. This defect led innovators to propose an improvement, viz., to allow *shifting*, *i.e.*, to allow cards which make up sequences in the reverse order to be shifted from the top of one packet to another. Thus, suppose an eight to be on the top of one packet, and a six on the top of another, and a seven to be turned from the undealt cards. The seven would be placed, of course, on the right; and the shifters would then allow the six to be put on the seven, and so on for other top cards. This new fangled method was, of course, scorned by the old school; but it makes an excellent game, and it brings the chances of success in favour of the skilled player, which is as it should be with games where the player matches himself against fate, as the interest and amusement are thereby much heightened.

Since the old times referred to, many patiences, some very ingenious, others very silly, have been invented. A description of two or three of the best of these may be found useful by those who during the long evenings may find themselves without playfellows, and desirous of a little recreation.

To avoid repetition, it will be as well to commence with an explanation of terms:

Sequence order of the cards. — In the following patiences the sequence order of the cards is always ace, 2, 3, 4, 5, 6, 7, 8, 9, 10, knave, queen, king. This sequence is called an *ascending sequence;* the reverse, beginning with the king, and so on backwards to the ace, is called a *descending sequence.* In one of the patiences given the small cards from the 2 to the 6 are left out. The ascending sequence will in this case be ace, 7, &c., to king, and the descending sequence the reverse.

In some patiences the sequences need not be of the same suit, in others they must be.

Available cards are cards that are not covered or *blocked*, and that may be *taken* to form sequences in accordance with the special rules of the patience.

Removable Cards are cards that may be moved from one row or packet to another, to form sequences in accordance with the special rules of the patience.

A very pretty, but easy patience, called *La Belle Lucie*, is played, as follows:—

One pack of fifty-two cards is to be well shuffled, and dealt face upwards in seventeen packets of three cards each, the last card being dealt singly. The cards in each packet should overlap each other, but should be spread sufficiently to enable the player to recognise the underneath cards.

The object of the patience is to form in one deal four ascending sequences (which must follow suit), by taking any top cards that are available. When there are no available cards, removable cards may be made use of, any top card being removable which forms a descending sequence with any other top card, suit being followed when a card is moved; the card uncovered by the taking or removal becomes available or removable, as the case may be, if cards of the same suit next in sequence to it then present themselves on the top. Also, when all the cards of any packet, or the card dealt singly, have been taken or removed, and a blank space is thus left, any king on the top of a packet is removable to the blank space. Some players do not approve of moving kings to spaces.

Available cards should be taken whenever they present themselves. The skill of the player is only exercised in placing the removable cards, as, if this is injudiciously done, other cards which the player requires to take, may become blocked by the removals.

The following example of a moderately easy hand will show more clearly than mere description how *La Belle Lucie* is managed. As with the type we cannot represent over-lapping cards, the reader will please to understand that each packet of three is separated by a line from the next packet, and that the card to the left is at the bottom of the packet, the card to the right on the top of the packet, and may be either available or removable.

Qn ♣, 4 ♠, 10 ♠	Ace ♢, 9 ♢, 3 ♣	6 ♡, 2 ♢, 7 ♢
Kg ♣, 8 ♢, Ace ♣	Kv ♣, 6 ♠, Kv ♡	2 ♠, 2 ♣, 8 ♣
6 ♣, Qn ♡, 4 ♢	Kv ♠, Ace ♠, Kg ♡	3 ♡, 9 ♣, Qn ♢
10 ♢, 3 ♠, 8 ♡	Kg ♠, 9 ♠, 8 ♠	Kg ♢, 7 ♠, 4 ♡
2 ♡, 7 ♡, 10 ♣	5 ♢, 5 ♣, 7 ♣	Ace ♡, 9 ♡, 5 ♡
5 ♠, 4 ♣, 10 ♡	Qn ♠, Kv ♢, 3 ♢	6 ♢

To win the patience, take ace of clubs, move seven of diamonds on eight of diamonds (it will not be necessary to repeat each time on what the card is moved, because it must be moved on the next highest card of the same suit, forming a descending sequence); move six of diamonds (making a blank space on which a king can be moved); move king of hearts to space. Take ace of spades; move two of diamonds; five of hearts; four of hearts; seven of spades; queen of diamonds; eight of clubs; seven of clubs. Take two and three of clubs; and two of spades. Move ten of hearts; nine of hearts; eight of hearts; and ten of spades. Take four and five of clubs; three, four, and five of spades. Move nine of diamonds; and take ace, two, three, and all the diamond suit up to the king. Move queen of hearts, and take all the clubs up to the ten. Move seven of hearts, and take all the hearts, and the patience must be won.

A similar but less easy patience, called *The House in the Wood*, may be played with two packs shuffled well together and dealt as before, except that the number of packets will be thirty-five instead of eighteen, and that one packet will contain two cards. In this patience kings cannot be moved to spaces. Of course eight ascending sequences have to be made. If ordinary sized cards are used, instead of patience cards, which are smaller, the packets occupy a large space. It is convenient for two players to consult over this patience from the opposite sides of a card table, each taking four sequences, so as to bring all the packets within easy reach. Available cards should not be taken without consideration. Only one deal is allowed as before.

Another variety is *The House on the Hill*, which is played with two packs, four ascending and four descending sequences being formed, and the cards being removable in both ascending and descending sequences; but it is not nearly so good a patience as the former.

The two patiences which follow are among the best known:

Russian Patience is played with two packs of fifty-two cards each, shuffled well together. There are trifling variations in the mode of playing. The following is recommended:

Deal the cards face upwards by one at a time in horizontal rows containing twelve cards each, the thirteenth card being placed below the first, the fourteenth below the second, and so on, forming perpendicular rows. To economise space it is as well that the lower card in each perpendicular row should somewhat overlap the one above, but not so much as to conceal the values of the upper cards.

The game consists in forming four ascending sequences composed of spades, hearts, clubs, and diamonds, and four corresponding descending sequences, in accordance with the following rules:

During the deal if any available king or ace presents itself in the first row of twelve cards, it may be taken at once. If a king or ace is taken, and a queen or two of the available suits presents itself in the first row, it may similarly be taken and put on the king or ace, as the case may be, and so on for other available cards. The spaces left by the removal of cards during the deal must be filled up from the undealt cards as soon as the available cards are taken. In the succeeding rows only the outside cards can be taken. Thus, if the thirteenth card (first in the second row) is available it may be taken, and the space filled from the undealt cards; but if not available, all the cards in the top row are blocked, and the succeeding cards cannot be taken even if they would be otherwise available, until the twenty-fourth card (last in second row) is reached, when that card if available can be similarly taken. If it so happens that the thirteenth card is available, and is taken (it is not compulsory to take available cards), and the taking of this card renders any card in the top row available, it may be taken. Also if the twenty-fourth card is available, and taking it renders the twelfth or thirteenth cards available, they can be taken, and so on, their places being supplied from the undealt cards, and these again, if available, can be taken. These rules may be summed up thus: *any outside card*, if available, and not covered by another card, can be taken. Outside cards are the top horizontal row, and the perpendicular rows to the extreme right and left; but the top row, though uncovered, becomes blocked the moment a thirteenth card, which is not available or not taken, has been dealt; and only the right and left cards of the top row can become available, should chance happen to uncover them after the twenty-fourth card is dealt.

When the whole pack has been dealt out, cards in the bottom row (*i.e.*, cards which are uncovered), may be either available or removable. Removable cards can be moved either in ascending or descending sequences which follow suit; and the sequences are continuous throughout the double suit; *i.e.*, an ace, which follows suit, can be moved on a king, or *vice versâ*.

When all the cards in one perpendicular row are moved or taken, a blank space is left, on which any removable king or ace can be moved, and cards so moved to spaces may have other cards moved on them in ascending or descending sequences which follow suit.

When no more cards can be taken or moved, the untaken cards are placed together thus: the first perpendicular row is closed up so that the cards keep their order, the first card remaining at the top of the pack, when the collected cards are turned face downwards, the second card next, and so on to the last card of the row. The second perpendicular row is then similarly taken up, and added to the first, so that the top card of the second row follows in the pack next after the bottom card of the first row, when the collected cards are turned face downwards, and so on for the succeeding rows.

When all the rows are collected the pack is held face downwards, and

Digitized by Google

the cards are redealt face upwards in horizontal rows of twelve, as at first. Precisely the same rules apply to the cards taken during the deal as before, and also to the available or removable cards when the deal is completed.

Three deals are allowed. If the eight sequences are completed in three deals or less, the player wins.

An example of this patience would occupy considerable space. If the directions are *precisely* followed, it may be played from the description alone.

Persian Patience is played with two piquet packs (*i.e.*, packs from which the twos, threes, fours, fives, and sixes are excluded) shuffled well together.

The whole pack is dealt out in eight rows of eight cards each, the cards of the perpendicular rows overlapping slightly to economise space.

The game consists in forming eight ascending sequences in accordance with the following rules:

After the cards are all dealt out, any uncovered card is available that will form an ascending sequence commencing with the aces; the sequences must follow suit. It is not compulsory to take available cards.

Any uncovered card is removable in descending sequence, with this limitation, that only red cards can be moved on black ones, or black on red ones.

If all the cards in one perpendicular row are taken or moved so that a blank space is left, any uncovered card is removable to that space.

When no more cards can be taken or moved, those remaining untaken are thoroughly shuffled and redealt in horizontal rows of eight as at first.

The process of taking or moving is now repeated. Three deals are allowed. If eight complete ascending sequences are formed in three deals or less, the player wins.

If in any deal no card can be taken, that deal counts for nothing.

The following example will show clearly the *modus operandi*, and will also exhibit the kind of problems which are presented by this difficult but most charming patience:

There have been two deals and only five cards have been taken, viz.: two aces of diamonds, ace of hearts, ace of clubs, and ace of spades. The remaining cards are dealt as follows:

1st row.	2nd row.	3rd row.	4th row.	5th row.	6th row.	7th row.	8th row.
7 ♠	10 ♣	8 ♣	Kg. ♣	9 ♣	Kv. ♠	Q. ♢	Q. ♠
Kv. ♢	10 ♡	10 ♣	8 ♡	Kg. ♡	9 ♡	9 ♢	Q. ♢
7 ♣	10 ♠	7 ♢	7 ♣	Kg. ♠	Kv. ♡	Kg. ♢	7 ♡
8 ♠	Q. ♣	8 ♠	Q. ♡	Ace ♡	9 ♣	Kv. ♢	10 ♢
9 ♢	Kg. ♠	Q. ♡	8 ♢	9 ♠	10 ♢	8 ♢	10 ♠
9 ♣	Q. ♣	Kg. ♣	10 ♡	Kg. ♢	Kv. ♣	Kv. ♡	Q. ♣
Ace ♠	Ace ♣	7 ♢	9 ♡	8 ♡	Kg. ♡	7 ♣	7 ♡
Kv. ♣	8 ♣	Kv. ♠					

The 7, 8, ace of clubs, and 7, 8, 9, 10, knave of hearts can be taken; but if they are, no other card can be taken, and the patience is lost.

To win the patience play as follows:

Take 7 of clubs and 7, 8 of hearts, but on no account take 8 of clubs or 9 of hearts. Then move queen of spades on king of hearts, knave of hearts on queen of spades; 10 of spades on knave of hearts; 10 of diamonds on knave of spades; 7 of hearts on 8 of clubs (which was left untaken at the bottom of the second row for this purpose). Continue to move and take as follows: Move knave of clubs on queen of diamonds; take ace of spades; move 9 of spades on 10 of diamonds; 9 of diamonds on 10 of spades; 7 of hearts on 8 of spades; 8 of clubs on 9 of diamonds; 7 of hearts on 8 of clubs; 8 of spades on 9 of hearts (which was left untaken at the bottom of the fourth row for this purpose); take 7 and 8 of spades; ace of clubs and 9, 10 of hearts. The 9 of spades is not taken now, as there are two red eights at the bottom of other rows, either of which may require to be moved on the 9 of spades. Move queen of clubs on king of diamonds; knave of diamonds on queen of clubs; take 7 of spades, and there is one vacant space, on which any bottom card can be placed. Move knave of clubs to space; queen of diamonds on king of spades; knave of clubs on queen of diamonds. There being a vacant space, it would have saved time to make the last three moves together. Similarly, now move 10 of diamonds and 9 of spades together on to knave of clubs (this is to get at 7 of diamonds, which is next above knave of spades). Move knave of spades to space; take 7 of diamonds and 8 of diamonds in fourth row, uncovering queen of hearts; move queen of hearts on king of clubs; knave of spades on queen of hearts, preserving the space; take 7 of clubs; move 8 of diamonds on 9 of spades, which was left untaken for this purpose; move knave of diamonds to space; queen of spades on king of diamonds; knave of diamonds on queen of spades, and there are two spaces at command, and the player ought to win easily.

Move 8 of clubs and 7 of hearts to space (these can be moved together, as there are two spaces); move 9 of diamonds to other space; 10 of spades on knave of diamonds in seventh row; 9 of diamonds on 10 of spades, and 8 of clubs and 7 of hearts back on to 9 of diamonds. Practised players would move all these four cards together in order to save time. After a little experience the nine separate single moves requisite to transfer all these four cards from one row to another would, as a matter of course, be done at one operation. Take knave of hearts; move knave of diamonds on queen of spades; king of diamonds and queen of clubs together to space; knave of diamonds on queen of clubs. These three cards might have been moved at one operation to save time. Take 9 of spades; ace, 7, 8 of hearts; 8 of clubs; 9 of diamonds; 10, knave, queen, king of spades; queen of hearts; king of hearts from fifth row; and 9 of clubs; move king of clubs from third row to space; queen of hearts on king of clubs; take 8 of spades; 7 of diamonds; 10 of clubs; 8 of clubs; 8 of diamonds; 9 of spades; 10 of diamonds; knave of clubs; knave of diamonds from cards previously put on space, uncovering queen of clubs. Take queen of diamonds; queen of clubs; king of diamonds; and king of clubs.

There are now four spaces. It does not matter, in fact it has scarcely mattered for some time, how the cards are moved or taken. The patience is won, however the remaining cards are manipulated. There are other ways of winning the patience after the first few moves. It is not intended to exhaust the various ways of doing it, but to show the general principles on which the patience is worked.

GENEALOGICAL PUZZLE.

The following lines are copied from an old family picture:—

The first by my father's side is my brother,
And so is the next in right of my mother;
The third is my own son, lawfully begat,
And all sons of the husband in my lap,
Without hurt of lineage in any degree,
Show me in reason how this may be.

BLACK RAVEN.

The solution will be given in the Christmas number of *The Queen*.

DOUBLE ACROSTIC.

LE ROI EST MORT! VIVE LE ROI!

1. Although its stops don't stop it, I entreat
That Southron man to stop it in the street.
2. Two in this light appear; and such their scope,
Each may be thin as thread, or stout as rope.
3. In any sweepstakes you are sure of me,
Whether a prize, whether a blank I be.
4. At twelve o'clock to-night it will be born,
To die and live again tomorrow morn.
5. My rate is ever changing; 'tis a pity,
That I am only royal in the city.
6. I'd rather trust quinine's specific power,
Than fling this charm in stream 'ere sunrise hour.
7. For thee, dear friend, my acrostic was designed,
Applaud its merits, to its faults be blind.

CRACK.

DOUBLE ACROSTIC.

Ring out the old, ring in the new,
Ring happy bells across the snow:
The year is going, let him go;
Ring out the false, ring in the true.

1. "Quaint old town of toil and traffic, quaint old town of art and song."
2. "The great brand
Made lightnings in the splendour of the moon;
And, flashing round and round, ...
Shot like a streamer of the northern morn."
3. "Now speaks thy heart;
Now play'st thou well thy genuine part!"
4. "Ho the merry mischief maker,
Whom the people called the storm-fool,
Rose among the guests assembled."
5. "The huge earth shaking beast."
6. "Daisies, those pearl'd ——— of the earth."
7. "Open here I flung a shutter, when with many a flirt and flutter.
. . . . . .
Perch'd upon a bust of Pallas, just above my chamber door,
Perch'd and sat, and nothing more."
8. "I come, I come, ye have called me long,
I come o'er the mountains with light and song."

THREE GOBBINS.

Quotations from Tennyson, Poe, Hemans, Macaulay, Scott, Longfellow, and Shelley.

The solutions will be given in the Christmas number of *The Queen*.

A HINT ON AQUARIUMS AND SMALL FOUNTAINS.

A CHEAP and effective aquarium is an inverted bell propagating glass in a suitable polished wood stand. If required partly darkened, glue a piece of green silk on the outside; well washed clinkers make very good hiding-places for the fish; a piece of clean cork floating on the top is handy for small frogs or newts. It is quite as well to have an ornamented edging of perforated zinc about 3in. high, as it prevents the fish from jumping out if the water is high. A fountain can be made in these glasses by having a hole cut or drilled in the bottom, and fixing two pipes, fixing them in position and filling in with pitch just warm enough

Digitized by Google

to run, or shoemaker's wax; when set cover 1in. deep with plaster of Paris; this must be well washed out before fish are put in. Small-leaved plants can be obtained from the running ditches; a few small eels are very interesting. To make a fountain proceed as follows: Have a stand turned to hold a glass bowl; bend a tube (¾in. compo at 1d. per foot will do) so that one end comes down inside the side of the glass, and turns up in the middle of the bowl, and, having brought the end above the level of the water, have a gas tap and nipple soldered upon it. The other portion of the pipe may be carried from the side of the bowl to a tub out of doors elevated, the higher the better. Turn on the taps, and, when the glass is full, the water will run over the sides into the wooden stand and down an outlet pipe fitted under the bowl in the middle of the wooden stand, and carried out into the garden. If the inlet pipe be carried over the part w ere the silk is glued on, the deception is not so apparent; the glass should be slightly tilted away from the silk, as wetting this would probably make it come off in course of time. Cost of such aquarium Glass, 16in. drained, 4*s.*; stand, 3*s.*; tube and gas tap, 3*s.* 6*d.*; total 10*s.* 6*d.*

BERRIES FOR CHRISTMAS DECORATIONS.

It may be worth while to suggest to those who advocate house trimming at Christmas, and especially such as are swift to labour in church decorations, that mountain ash berries may be stored for the purpose either in bunches by gathering them when free from moisture, and hanging them in a dry place, or by threading them singly and keeping the strings where no damp will reach them. They take the place of holly berries successfully, and every decorator knows how much the appearance of her designs is often marred from want or scarcity of the bright red fruit among dark green foliage. If the season be wet and the berries much swelled, they will probably turn colour in the process of drying, but they may then be dipped into a solution of sealing wax dissolved in methylated spirits, and no one can detect that it is a delusion and a snare. Mountain ash can be procured so easily that there need be no lack of sufficiency. Berries washed in dissolved black sealing wax are useful as a substitute for ivy, and look very well when mixed with pale leaves, such as white laurel and holly.

NATURE PRINTING.

The question is repeatedly asked, "What will amuse an invalid?" and many who have good health are often inquiring for some fresh employment; to this we would answer, have you ever tried nature printing? The process is simple, the cost very small, and the subjects endless. Ferns, tree foliage, weeds, lace, fretwork, &c., are all suitable subjects, while an album made up of cards printed in this manner is sure to be interesting and instructive.

In the first place a quantity of bichromate of potash is required, this must be dissolved in water in a black bottle. Then a strong solution of common salt, as much salt as the water will take up, and some cards, about the size of those used for carte-de-visites. A sheet of glass about 6in. by 4in., and a piece of board about 1in. larger; at least we find this the handiest size. The *modus operandi* is as follows: choose a day when the sun shines brightly, get your materials in order, and commence by applying a coat of the bichromate solution to the card; cover it evenly and quickly, a camel-hair pencil doing the work best, then lay on the leaf or other subject, and on this the glass; expose to the full sun for ten minutes, and then wash with the salt solution and clear water, two or three times alternately, and the impression will be indelibly fixed. Small foliaged plants, ferns, grasses, mosses, and lace, are subjects that are specially suited to this treatment, and cards so prepared look well. We do not advance this as at all new, but it is a good amusement to pass away time. The cost of the whole of the materials would not be more than half a crown, and hours would be spent in sunny weather at this kind of work.

CUT PAPER PATTERNS.

A fresh assortment of new models is received monthly at The Queen Office, 346, Strand, W.C., from Paris. The consignment this month consists of costumes, jackets, and polonaises. These can be forwarded to any address on receipt of postage stamps, the prices being given in the following list. Flat patterns at half-price. They must be applied for by letter only, and all letters containing orders and stamps are to be addressed to the Editor of The Queen. The prices include postage for Great Britain and Ireland, but not for foreign countries. Unpaid orders are not attended to. The patterns are in no way connected with any other address advertising in The Queen. There are no specimens on view at the Office, but some are to be seen at, and London orders taken by, Mr. Catt, of 197, Sloane-street, S.W., and 92, Queen's-road, Bayswater. Country orders, as usual, to be forwarded through the post, addressed to the Editor of The Queen, 346, Strand.

Ladies who write for paper patterns are requested to be partitular in sending their complete address.

NEW PAPER MODELS.

	s.	d.
1. Costume for two materials, checked and plain—skirt, tablier, and bodice	6	1
2. Carriage Costume, brocaded silk and faille; skirt and train, 5/1; bodice, 2/7; entire costume	7	2
3. Afternoon Outdoor Dress, broderie laine and faille skirt, 4/7; bodice, 2/7; entire dress	6	7
4. Skirt with triple scarfs and queue de paon train	2	7
5 Skirt with queue de paon train, and gathered back breadths	2	7
6. Square tablier, with straps and bows at the back	2	1
7. Skirt for ditto	2	7
8. Sleeveless Cuirass Bodice to match	2	1
9. Jean of Arc Bodice	2	7
10. Cuirass bodice, with sleeves	2	7
11. Double-breasted Bodice, with puffed sleeves	2	7
12. Basque Bodice, with violin back	2	7
13. High Bodice and Waistcoat	2	7
14. Half-high Bodice for demi-toilette	2	7
15. Evening Skirt, with fronce front and plaited back	4	7
16. Evening Skirt, with tunic	4	7
17. Low Bodice	2	7
18. Sleeveless Jacket	2	7
19. Sleeve, with puffs	1	1
20. Sleeve with crevés down the back of arm	1	1
21. Double-breasted Polonaise, open with revers	3	1
22. Ditto high, with upright collar	3	1
23. Plain Train Skirt, with plaited back breadths	3	1
24. Ulster Polonaise for outdoor morning costumes, loose in front and Princesse at the back	3	1
25. Norfolk Jacket	2	7
26. Laveuse Tunic	3	1
27. Hood for evening wear	1	0
28. Opera Cloak	2	7
29. Fichu for out-door wear	2	7
30. Ditto, for evening wear	1	7
31. Sleeves from any illustrations	1	1
32. House Jacket	2	6
33. A Mantelet for lace and cashmere	2	7
34. A Dolman Cape	2	7
35. Jacket (close fitting)	2	7
36. Jacket (half fitting) for fur	2	7
37. Short double-breasted Jacket, with revers and deep cuffs	2	1
38. Waterproof Cloak, Connemara cape	2	1
39. Ditto, with cape and monk's hood	2	1
40. Ditto, with hood and sleeves	2	1
41. Large Circular Cloak for fur lining	1	0
42. Waterproof, for girl of fifteen	1	7
43. Riding Habit and Trousers	5	6
44. The Nightingale Jacket	0	9
45. Dressing Jacket	1	2
46. Long Flannel Dressing Gown, (Princesse form)	2	2
47. Ditto (Watteau form)	2	7
48. Morning House Dress	2	7
49. Petticoat under short costume	1	2
50. Flannel Petticoat	1	2
51. White petticoat under long skirt	2	0
52. High Petticoat Bodice	1	2
53. Low Petticoat Bodice	1	2
54. Low Petticoat Bodice (full)	1	2
55. Lady's Chemise	1	1
56. Lady's Nightgown	1	6
57. Lady's Knickerbockers	1	1
58. Lady's Drawers	1	1
59. Dress Improver or Bustle	0	9
60. Lady's Cooking Apron and Sleeves	1	1
61. Costumes for girls from five upwards	3	6
62. Princesse Frock, for girls from three upwards	2	0
63. Laveuse Costume for girl of eight and upwards	2	7
64. Sailor Costume for girls from four to ten	2	7
65. Long Dressing Gown for a girl of sixteen	1	7
66. Apron for a girl of four	1	0
67. Apron for girl of eight	1	1
68. Waterproof Cloak for girls	1	7
69. Chemise for a girl of eight and upwards	0	9
70. Night ditto	1	1
71. Drawers for a girl	0	9
72. Knickerbockers for ditto	0	9
73. Child's first Drawers	0	8
74. Ditto Knickerbockers	0	8
75. Baby's first Pelisse	1	7
76. Ditto for child of two	1	7
77. Baby Girl's Slouse Frock (high)	1	7
78. Ditto (low)	1	7
79. High Plaited Blouses for boys from two upwards	1	7
80. Baby's First Shirt	0	6
81. Ditto Flannel (Bed)	1	0
82. Ditto Night Dress	1	1
83. Outdoor Jacket for a child of three	1	0
84. Nursery Pinafore	1	2
85. Hood for a baby	1	6
86. Hood Shawl for an infant	0	7
87 Low Frock for a baby boy	1	7
88. High ditto	1	7
89. Circular Pinafore for a boy from two to three (high or low)	1	1
90. Norfolk suit for a boy of six	2	2
91. Spanish Suit for boys from eight to ten	2	2
